I strongly urge my colleagues to join me in supporting this resolution. I ask unanimous consent that the joint resolution be printed in the CONGRESSIONAL RECORD following this statement.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S. J. RES. 129

Whereas the Congress established the Depository Institutions Deregulation Committee to provide for the orderly phase-out of the limitations on the maximum rates of interest and dividends which may be paid on deposits and accounts at depository institutions;

Whereas the Congress, in establishing the Depository Institutions Deregulation Committee, has required the Committee to carry out its responsibilities with "due regard for the safety and soundness of depository institutions"; and

Whereas persistently high interest rates have produced severe strains within certain elements of the financial system and disrupted the flow of funds for home mortgage finance: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Depository Institutions Deregulation Committee shall—

(1) review its rule creating a new IRA-Keogh account with a minimum maturity of 1½ years. The Depository Institutions Deregulation Committee shall consider setting a ceiling on such accounts tied to a money market interest rate.

(2) refrain from all further actions which increase the cost of funds to depository institutions until the Depository Institutions Deregulation Committee unanimously finds that stability is restored to financial markets, or until December 31, 1982, whichever is earlier; and

(3) work toward establishing a deregulation framework conducive to the long term viability of all depository institutions, particularly those serving the mortgage markets and credit needs of local communities.

● Mr. HUDDLESTON. Mr. President, I am pleased to be joining with other Senators today to introduce legislation directing the Depository Institutions Deregulation Committee (DIDC) to reconsider actions taken at their September 22 meeting and to refrain from all further actions which increase the cost of funds to depository institutions.

Under normal circumstances, I would be reluctant to ask my colleagues to interfere with the decisions of a regulatory agency. But the DIDC has demonstrated, time and again, such utter disregard for the mandate given to it by the 96th Congress, as well as for orderly rulemaking procedures, that we cannot continue to ignore its performance. More importantly, the DIDC has become a contributing factor to the precarious situation we find in our national economy, particularly the instability among our financial institutions and the punishing interest rates which deny credit to home buyers, farms, and small businessmen.

The DIDC was created by title II of Public Law 96–221, the Depository Institutions Deregulation and Monetary Control Act. Its voting members are the Secretary of Treasury (the current chairman), and the Chairmen of the Federal Reserve Board, Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board, and the National Credit Union Administration; the Comptroller of the Currency (an employee of the Treasury and a member of the FDIC) sits in a nonvoting status. The committee meets quarterly and is charged with "the orderly phase-out and the ultimate elimination of the limitation on the maximum rates of interest and dividends which may be paid on deposits and accounts as rapidly as economic conditions warrant" over a 6-year period ending in March 1986. Further, we instructed the DIDC to "work toward providing depositors with a market rate of return on their savings with due re-

gard for the safety and soundness of depository institutions." Later, we said "the Deregulation Committee shall not increase such limitations above market rates during the 6-year period."

On September 22, the committee took the following actions: First. By a 3-to-2 vote, it raised the regular (passbook) savings rates at commercial and savings banks, and savings and loan associations, by 50 basis points (one-half of 1 percent). The action would clearly raise costs to institutions and their borrowers—by an estimated $2 billion—but, in the virtually unanimous opinion of all concerned, do nothing to add to the volume of savings (since convenience passbook rates are far below market rates of interest). Chairman Volcker of the Federal Reserve warned that:

> The impact on (bank and S&L) earnings in this case seems so severe (that) the safety and soundness of these institutions would be jeopardized.

Chairman Pratt of the FHLBB (which supervises most thrift institutions) added:

> We see no factors which would offset that and given the situation of the industry today, I think it would be a dangerous experiment.

Several days ago, Secretary Regan "changed his mind" and concluded that:

> The likely benefits to depositors now appear to be outweighed by the probable adverse effects (in terms of increased costs) to the depository institutions.

Accordingly, he reversed his vote, and this 50-basis-point passbook increase has been "postponed indefinitely".

Second. Created, effective December 1, a new account for IRA/Keogh depositors with a minimum maturity of 18 months, fixed or floating interest rates, an invitation to waive early withdrawal penalties for existing savers "rolling into" these accounts, and—most significantly—no interest rate limit.

Because of the changes in eligibility and annual deduction limits for these retirement savings programs, adopted as part of our Economic Recovery Tax Act of 1981, the potential audience for IRA/Keogh will increase next year by 48 million taxpayers. Under current rules IRA/Keogh customers may choose from a wide variety of certificates to fund their retirement trusts, including all of the market-related accounts. The authorization of a new ceiling-free account is, therefore, probably unnecessary.

But more importantly, creation of a new no-ceiling account invites sky-high bidding among depositories—the kind of ruinous rate wars experienced in the roaring twenties, briefly in 1973, or most recently in the competition for so-called retail repurchase agreements—where rates of 40 percent and 50 percent were offered for a brief period to entice savers into longer term accounts. Many financial institutions, particularly those smaller banks and thrift institutions serving hometown credit needs, are in no position to engage in unbridled rate warfare at the present time. Yet they are faced with a dilemma: Meet the competition or lose the customer. IRA/Keogh accounts are systematic and stable deposits under normal circumstances. They are also ideal sources of funds for longer term credit, such as home mortgages. To be squeezed out of the market for these accounts by a marketing free-for-all at the end of this year will do permanent damage to the supply of savings for the less well-heeled depositories meeting everyday consumer credit needs.

Third. Adoption of a new and higher ceiling rate for the popular six-month money market certificate accounts—which today account for $486 billion in deposits—in weeks when there is a decline in the index rate. This is accomplished by averaging the four preceding Treasury auction results for 26-week bills in such weeks. The use of this "moving average" presumably will help banks and S. & L.'s compete better with unregulated money market funds offered by securities firms; however, the higher rate permitted will still not approach the Wall Street rates on those uninsured investments in most situations. Furthermore, it is estimated that this seemingly technical adjustment would have cost the S. & L. associations $300 million in earnings if it had been in effect during the first 8 months of 1981.

Even with the postponement of a cost-increasing passbook account increase, the cumulative impact of these changes could well negate the assistance we sought to provide the depository institutions, and their agricultural and residential mortgage credit customers, through enactment of the all savers certificate as part of the tax bill last summer. The damage of high interest rates and the plight of the thrift business, with its "borrow short-lend long" asset-liability imbalance, were thoroughly described in our 6-hour debate the evening of July 16. We sought, through all savers, to lower the cost of funds to institutions and thereby to their mortgage and farm loan customers. Now, through the actions of the majority of appointees serving at the DIDC, our efforts were undermined and perhaps destroyed in 2 hours September 22.

The flip-flop by the Treasury Secretary on the passbook accounts ceiling is representative, unfortunately, of the procedural practices and confusion which have characterized the DIDC since its creation.

At its very first meeting May 28, 1980, the committee adopted a rate schedule for MMC accounts of Byzantine complexity without notice or an opportunity for public comment—and then set an effective date 5 days hence for implementation. A U.S. district court subsequently ruled that those actions violated the Administrative Procedures Act and ordered the committee to provide an appropriate notice and comment period. More recent actions, such as the IRA/Keough instrument described above, followed invitations to comment on markedly different proposals.

The latest procedural fiasco involved the all savers certificates. On September 3 the DIDC issued regulations which stated that:

> Any brokers' or finders' fees paid in connection with an ASC must be included as part of the yield on the deposit.

Then, on October 1—in an informal decision made by staff on, apparently, a 2-to-2 vote, with one abstention—"bona fide brokers," such as Wall Street firms, were exempted from the restriction. As a result, the major securities firms—with their nationwide sales networks—are soliciting all savers depositors for a handful of depository institutions—despite the clear decision by Congress that the all savers instrument was to be sold through all qualified depository institutions and not through securities dealers.

As my distinguished colleague from Wisconsin (Mr. PROXMIRE) observed in a letter to the DIDC:

> The brokerage ruling certainly was important enough for a formal vote of the DIDC.

He also noted:

> I raised the question because of adverse consequences that may be occurring by virtue of brokers seeking All Savers Certificates to the intent of All Savers, which is to re-disadvantage of smaller community savings and loan associations (because of) the fee basis of such brokerage, which goes contrary to the intent of All Savers, which is to reduce costs to thrifts.

Such procedural horseplay makes a mockery of the regulatory process—not to mention the intent of Congress in developing this tax incentive for savings at depository institutions.

To compound the problems described above, the DIDC has plans for accelerating the deregulation process further—despite the growing evidence with each passing day of strains on our financial system and the persistence of high interest rates. At their September 22 meeting, they also agreed to issue for comment a variety of proposals for new savings instruments, including some entirely without rate ceilings and others on a variable rate basis. Significantly, the committee issued these for 30 day, rather than the customary 60 day, comment so that they might be placed on the agenda for the next scheduled meeting.

The first proposal would attempt to circumvent a judicial decision last summer that the DIDC cannot, under Public Law 96-221, ignore preservation of a housing differential on accounts in existence in December 1975. Commenting on conference report language, U.S. District Judge Gerhard Gesell observed: "Congress rarely speaks in such unmistakable terms." It would create a schedule for phasing-out rate ceilings beginning with a new no-limit 3½-year account next February. Again, the prospect looms for unbridled and debilitating rate competition among banks, savings banks and savings and loan associations.

Then, after a delay of almost a month, the committee issued for shortened comment three possible instruments to compete with the money market funds: First, a no-ceiling transaction account with $5,000 minimum—which would revert to a NOW account if the balance fell below that minimum—and withdrawals permitted in $500 units; second, an account indexed to 13-week Treasury bill rates—either fixed at time of issue, or floating daily or weekly—with $10,000 investment required, and no additions or

withdrawals permitted during the initial 91 days, though withdrawals could be made with 14-day notice thereafter; and third, a $25,000 minimum, ceiling-free account, with 1-day withdrawal notice. With tongue firmly planted in my cheek, I remind my colleagues that these actions emanate from a deregulation committee.

Certainly, the possibility for more "wild card" and "hot money" savings plans is disturbing. It could offset any benefits depository institutions and their borrowers might get from a lowering of today's interest rate levels. If there is no improvement in the interest rate climate between now and December, it could worsen an already dire situation.

The financial illness of savings and loan associations and mutual savings banks—the so called thrift institutions which specialize in home finance—is well known. The overwhelming majority of these companies, according to the Federal Home Loan Bank Board, are suffering negative earnings and $25 billion in deposit outflows have occurred in the first 8 months of the year.

With the thrifts operating unprofitably and losing deposits, and excessively high mortgage rates, the businesses which are dependent on mortgage credit—principally home builders and realtors—are in desperate shape. Housing starts were at a 918,000 annual rate level in September, home sales declined to a 2.07 million rate. These are at or near post-war lows. The National Association of Realtors reports that, on a per capita basis, the September real estate sales numbers are the worst ever recorded. The decline in housing activity shows up, as well, in data about unemployment in the construction trades—over 17 percent—lumber mill closings, and decreased sales by the thousands of businesses which provide supplies and furnishings for homes.

Complaints about the DIDC are not restricted to thrift institutions. Its senseless and costly decisions, like the passbook increase, impact upon commercial banks, too—particularly those independent banks serving communities across America. Its decision last December to set the bill paying—and reservable—NOW account rate at the same level as the banks' regular savings rate has exposed bankers to unnecessary reserves' liabilities. Ironically, one of the voting members of the DIDC is the National Credit Union Chairman. Credit unions, however, are not bound by the DIDC rules.

After voting for a one-half of 1 percent increase for banks and S. & L.'s, the NCUA chairman then approved a full 5-percent increase in the share account ceiling for credit unions; while the DIDC's ceiling-free IRA/Keogh instrument was set for implementation December 1—the credit unions were given a 1-month head start when their new account was approved for November 1. Banks and S. & L.'s will be allowed to roll over existing IRA/Keogh customers without penalty to the new account; credit unions, however, have now been authorized to execute such rollovers from any account, not just existing retirement-oriented accounts.

Mr. President, I could expand this description with further comments about other questionable decisions by the DIDC. But, it should be clear that many of their actions have been taken with scant regard for "the safety and soundness of depository institutions" and the "orderly phase-out" over 6 years' language of Public Law 96–221.

It is time we intervened to examine the performance of this group of regulatory officials. That is what this resolution will accomplish. I urge its early consideration by the distinguished Senator from Utah (Mr. GARN) and his colleagues on the Committee on Banking, Housing and Urban Affairs. And I invite support from other Senators concerned about the impact of DIDC decisions on the stability of our financial system and on our battle against high interest rates.●

ADDITIONAL COSPONSORS

S. 46

At the request of Mr. THURMOND, the Senator from Virginia (Mr. WARNER) was added as a cosponsor of S. 46, a bill to amend title 5 of the United States Code to permit present and former civilian employees of the Government to receive civil service annuity credit for retirement purposes for periods of military service to the United States as was covered by social security, regardless of eligibility for social security benefits.

S. 1215

At the request of Mr. KASTEN, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1701

At the request of Mrs. HAWKINS, the Senator from Nevada (Mr. CANNON), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S. 1701, a bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children and other specified individuals.

S. 1735

At the request of Mr. ANDREWS, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 1735 a bill to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims.

S. 1808

At the request of Mr. PACKWOOD, the Senator from Michigan (Mr. RIEGLE), and the Senator from Oregon (Mr. HATFIELD) were added as cosponsors of S. 1808, a bill to authorize an Under Secretary of Commerce for Economic Affairs.

SENATE CONCURRENT RESOLUTION 33

At the request of Mr. PRESSLER, the Senator from Arkansas (Mr. PRYOR), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Mexico (Mr. SCHMITT), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from Utah (Mr. GARN) were added as cosponsors of Senate Concurrent Resolution 33, a concurrent resolution disapproving the Federal Trade Commission Trade Regulation Rule relating to the sale of used motor vehicles.

SENATE CONCURRENT RESOLUTION 45

At the request of Mr. GRASSLEY, the Senator from Michigan (Mr. LEVIN), the Senator from Colorado (Mr. HART), the Senator from Maine (Mr. COHEN), the Senator from North Carolina (Mr. EAST), the Senator from Alabama (Mr. DENTON), and the Senator from New Hampshire (Mr. HUMPHREY) were added as cosponsors of Senate Concurrent Resolution 45, a concurrent resolution expressing the sense of the Congress with respect to the rights of the people of Afghanistan.

SENATE RESOLUTION 239

At the request of Mr. CRANSTON, the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of Senate Resolution 239, a resolution disapproving the proposal to defer budget authority for Veterans' Administration health-care facility construction while the Administration "considers alternative methods for providing readily available quality medical care for eligible veterans."

UP AMENDMENT NO. 668

At the request of Mr. MATHIAS, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) was added as a cosponsor of UP Amendment No. 668 proposed to House Joint Resolution 357, a joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

UP AMENDMENT NO. 671

At the request of Mr. WEICKER, the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maine (Mr. COHEN), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Missouri (Mr. EAGLETON), the Senator from Vermont (Mr. LEAHY), the Senator from Rhode Island (Mr. PELL), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Michigan (Mr. RIEGLE), the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. TSONGAS), the Senator from New York (Mr. MOYNIHAN), the Senator from New Jersey (Mr. BRADLEY), the Senator from Michigan (Mr. LEVIN), the Senator from Maine (Mr. MITCHELL), the Senator from New Jersey (Mr. WILLIAMS), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of UP Amendment No. 671 proposed to House Joint Resolution 357, a joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

AMENDMENTS SUBMITTED FOR PRINTING

RECOVERY OF CERTAIN COSTS OF THE CORPS OF ENGINEERS

AMENDMENT NO. 636

Ordered to be printed and referred to the Committee on Environment and Public Works.

Mr. STAFFORD (by request) proposed an amendment to the bill (S. 809)

to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep-draft channels and oceans and Great Lakes ports of the United States and to authorize such construction in specified circumstances.

DEEP DRAFT CHANNELS AND PORTS

● Mr. STAFFORD. Mr. President, the Subcommittee on Water Resources yesterday reported S. 1692 to the full Committee on Environment and Public Works. This is important legislation to foster port improvements and maintenance on a cost-sharing basis. We hope to consider the bill in full committee on December 2, 1981.

The administration supports legislation that goes further toward non-Federal cost sharing on such work. Earlier this year, I was pleased to introduce the administration's harbor bill as S. 809. Since that time, the administration has submitted a slightly redrafted version of that legislation, which I am pleased to submit today as an amendment to S. 809.

I am confident that this redrafted administration proposal will prove helpful to the committee in its deliberations on the overall issue.

Mr. President, I ask unanimous consent that a copy of the amendment, together with its transmittal letter, be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

"That as a condition for operation and maintenance by the U.S. Army Corps of Engineers (hereinafter referred to as the Corps) of deep draft channels or ocean or Great Lakes ports of the United States on or after October 1, 1982, and for the construction or rehabilitation of navigation projects by the Corps to improve deep draft channels and ports which receive initial construction funding on or after October 1, 1981, an appropriate non-Federal public body shall agree with the Secretary of the Army (hereinafter referred to as the Secretary) to reimburse the Federal government for expenditures by the Corps for such work and shall agree to hold and save the United States harmless from liability for damage arising out of such activities, except to the extent that such damage is caused by the fault or negligence of the United States or of its contractors. Reimbursements for operation and maintenance expenditures required by this section shall be made to the Secretary, on behalf of the United States, no later than September 30, 1983, and annually thereafter, and, as approved by the Secretary, may be scheduled and periodically adjusted to result in the repayment of actual operation and maintenance costs. Payments may be scheduled to reflect five year projections deemed reasonable by the Secretary, with subsequent corrections for actual expenditures.

"SEC. 2. For purposes of this Act, "deep draft channels or ocean or Great Lakes ports of the United States" shall mean waterway channels or ocean or Great Lakes ports of the United States with an authorized depth of more than fourteen feet, except for entrance channels providing access solely to harbors with an authorized depth of fourteen feet or less, channels administered by the Saint Lawrence Seaway Development Corporation, and the Bonneville Lock and Dam project on the Columbia River.

"SEC. 3. (a) The entire amount of the Federal construction or rehabilitation expenditures to be reimbursed pursuant to the requirements of this Act, including interest during construction, shall be reimbursed within the life of the project but in no event to exceed fifty years after the date the project becomes available for use, as determined by the Chief of Engineers. Payments required by this section shall be initiated no later than one year after the project becomes available for use. The interest rate used for purposes of computing interest during construction and interest on the unpaid balance shall be determined by the Secretary of Treasury, taking into consideration the average market yields on outstanding marketable obligations of the United States during the period expenditures are made. The interest rate on the unrecovered balance shall be updated every 5 years to reflect the average market yield at that time on outstanding marketable obligations.

(b) This Act shall not be construed to prohibit non-Federal public bodies from securing financing through means other than provided for in this Act.

"SEC. 4. Agreements with non-Federal public bodies to carry out obligations required by this Act may relate the timing and extent of such obligations to projects or to separable units, features, or segments of such projects as the Chief of Engineers determines to be reasonable and otherwise within the requirements of this Act and the authorizations for the improvements concerned. Such agreements may reflect that they do not obligate future State legislative appropriations for their performance or payment when obligating future appropriations or other funds would be inconsistent with State constitutional limitations.

"SEC. 5. (a) On or after October 1, 1982, and in accordance with the provisions of this section and any regulations promulgated by the Secretary pursuant to this section, an affected non-Federal public body may provide for the recovery of its reimbursement obligations pursuant to this Act (including its administrative expenditures incurred therefor) by the collection of fees for the use of the project by vessels in commercial waterway transportation notwithstanding any prior law to the contrary, such fees may include, but are not limited to, tolls imposed as a condition of use of any project, waterway or waterway segment.

"(b) For purposes of this section:

"(1) The term "commercial waterway transportation" means any use of a vessel in any deep draft channel or ocean or Great Lakes port of the United States as defined in this Act—

"(A) in the business of transporting persons or property for compensation or hire, or

"(B) in transporting persons or property in the business of the owner, lessee, or operator of the vessel.

"(2) Fees are not authorized to be collected for:

"(A) Vessels owned and operated by the United States or any other Nation or political subdivision thereof and not engaged in commercial service; or

"(B) Vessels used by a State or political subdivision thereof transporting persons or property in the business of the State or political subdivision.

"(c) The Secretary, in consultation with the Secretaries of State, Commerce, Transportation, Treasury, Energy, and Agriculture, the Attorney General of the United States, and the Director of the Office of Management and Budget, may promulgate, and may from time to time revise, regulations and guidelines to govern the programs of non-Federal fee collection that may be undertaken pursuant to the authority of this section.

"SEC. 6. This Act shall not be construed to prohibit or otherwise interfere with any Department of the Army or other Federal authority to operate, maintain, or improve any navigation project for purposes of Coast Guard navigation requirements, Department of Navy transportation requirements, or any other national defense transportation requirements. Moreover, this Act shall not be construed to require any non-Federal contribution for navigation costs assigned by the Secretary to vessels owned and operated by the United States or any other Nation and not engaged in commercial service. The Secretary, in consultation with other concerned agencies, shall establish guidelines and determine any cost assignments that are necessary to carry out this section.

"SEC. 7. Money paid to the Secretary, pursuant to this Act, shall be deposited in the general fund of the Treasury.

"SEC. 8. (a) Provided that an appropriate non-Federal public body agrees, without benefit of the deferred payment provisions of Section 3(a) of this Act, to reimburse the Federal Government for all of its construction costs of a project on an annual basis during construction and to begin such reimbursements not later than one year after construction is initiated, the Secretary, acting through the Chief of Engineers, is authorized to study, design, construct, and rehabilitate such a project to improve deep draft channels and ocean and Great Lakes ports of the United States as defined in section 2 of this Act and to operate and maintain such channels and ports, at such depths and dimensions and with such dredged material disposal and other related facilities, as the Secretary determines to be justified to insure the safe and efficient conduct of national defense and commercial waterway transportation. Such improvements may be provided and maintained as a Federal project pursuant to laws and policies then in existence and without a requirement for any further congressional authorizations.

"(b) Before ports or waterway improvements subject to any treaty with the Government of Canada are approved for implementation by the Secretary, the Secretary of State shall consult with the Government of Canada. Such consultation sahll include environmental impacts and financing, especially recovery of costs by non-Federal public bodies by the collection of fees or tolls.

"(c) There are authorized to be appropriated to the Secretary such sums as are necessary to carry out this section."

DEPARTMENT OF THE ARMY,
Washington, D.C.

HON. GEORGE BUSH,
President of the Senate.

DEAR MR. PRESIDENT: On March 25, 1981 Acting Assistant Secretary Rogers transmitted proposed legislation for recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances. We have since that date given further consideration to this matter and have revised our previous draft to modify implementation and clarify certain points raised by other interested parties.

This revised proposal is a part of the Department of the Army's Civil Works legislative program for the 97th Congress. The Office of Management and Budget advises that enactment of this proposal would be in accord with the program of the President. The Department of the Army recommends that the revised draft be enacted by the Congress.

PROPOSED LEGISLATION

The purpose of the proposed revised legislation is the same as our original proposal; that is, to provide for the full recovery of certain operation, maintenance, and construction costs of the U.S. Army Corps of

Engineers for deep draft ports and their connecting channels. For the most part our revisions are technical in nature and are intended to make the bill more workable and acceptable. One change that should be noted, however, is that recovery of construction and rehabilitation costs would be applied to projects which receive initial construction funding on or after October 1, 1981, rather than October 1, 1982 as originally proposed. This would eliminate pressure to provide funding in fiscal year 1982 for projects in order to avoid reimbursement obligations under the proposed cost recovery program. In addition we have made clear in the language of the bill that tolls, which have previously been prohibited, would be authorized.

The revised bill is designed to insure an effective and fair system of cost recovery for all deep draft navigation improvements. Its enactment would put an end to federal subsidy of such navigation projects. Accordingly, any previous agreements with non-Federal public bodies which are founded on a different sharing of costs and responsibilities than are envisioned in this bill will have to be revised.

COST AND BUDGET DATA

Enactment of the enclosed legislation would require reimbursement to the Federal Government for navigation expenditures by the U.S. Army Corps of Engineers for operation, maintenance, and construction or rehabilitation activities on the deep draft channels and ocean and Great Lakes ports of the United States which are not related to defense or to non-commercial governmental use. This would result in significant savings to the Federal Government.

ENVIRONMENTAL AND CIVIL RIGHTS IMPACT CONSIDERATIONS

Enactment of the enclosed legislation will have no significant environmental or civil rights impacts. Individual Federal activities that occasion the reimbursements required by this Act will only be undertaken after any necessary assessment and review of their impacts.

Sincerely,

WILLIAM R. GIANELLI,
Assistant Secretary of the Army.●

RECOVERY OF CERTAIN COSTS OF COMMERCIAL WATERWAY TRANSPORTATION

AMENDMENT NO. 637

(Ordered to be printed and referred to the Committee on Environment and Public Works.)

Mr. STAFFORD (by request) submitted an amendment intended to be proposed by him to the bill (S. 810) to provide for the recovery of capital costs and operations and maintenance costs assignable to commercial waterway transportation for certain U.S. Army Corps of Engineers inland waterway projects.

COMMERCIAL INLAND WATERWAY TRANSPORTATION

Mr. STAFFORD. Mr. President, on behalf of the administration, I am today submitting revisions to S. 810. I am hopeful that this bill will receive consideration from the Committee on Environment and Public Works early in the next session of the Congress, once we have received and evaluated the administration's study of the impact of user charges required under section 205 of Public Law 95–502.

I ask unanimous consent that a copy of the amendment, as well as the transmittal letter, be printed at this point in the RECORD.

There being no objection, the amendment and letter were ordered to be printed in the RECORD, as follows:

Strike all after the enacting clause and insert in lieu thereof the following: "That as used in this Act, the term—

"(a) "commercial waterway transportation" means any use of a vessel on the inland waterway system of the United States—

"(1) in the business of transporting persons or property for compensation or hire, or

"(2) in transporting property in the business of the owner, lessee, or operator of the vessel (other than fish or other aquatic animal life caught on the voyage);

"(b) "Corps" means Army Corps of Engineers;

"(c) "Inland waterway system" means all inland and intracoastal waterways of the United States described in Section 206 of the Inland Waterway Revenue Act of 1978 (P.L. 95–502), as amended by Section 106 of this Act;

"(d) "Secretary" means the Secretary of the Army; and

"SEC. 2. (a) The Secretary in consultation with the Secretary of Transportation, shall prescribe a system of user fees to be levied on commercial waterway transportation on the inland waterway system pursuant to this Act.

"(b) The schedule of user fees authorized under this section shall be readjusted at least every 5 years on the basis of (1) the anticipated expenditures of the Corps on behalf of the inland waterway system and various segments thereof; (2) corrections for actual expenditures and reimbursements; (3) the expected volume of commercial traffic; (4) seasonal and other repetitive peak demands for use of the inland waterways; (5) congestion at various points; and (6) any other factors that the Secretary finds reasonable and equitable.

"(c) The Secretary, in prescribing a system of user fees under this section, is authorized to utilize, but is not limited to, one or more of the following mechanisms as a way to recover costs of the Corps from the users of the system: (1) license fees; (2) charges based on ton-miles over a given segment; (3) lockage fees; (4) tolls; and (5) charges based on capacity of cargo vessels over various segments of the inland waterway system.

"(d) User fees starting October 1, 1981 shall be adequate to recover 100 percent of anticipated operation and maintenance expenditures of the Corps assigned to commercial waterway transportation, plus an amount necessary to provide for the recovery of capital expenditures with interest, for rehabilitation or replacement of existing structures completed after October 1, 1981, over a period of no more than 50 years, less anticipated collections by the tax on fuel used for commercial transportation on inland waterways pursuant to Section 4042 of the Internal Revenue Code of 1954, as amended.

"(e) User fees on new or modified waterways completed for through traffic after October 1, 1981, shall be phased to provide for the full recovery of operation and maintenance and construction costs of the Corps, with interest, over a period of no more than 50 years from the date of initial movement of through traffic.

"(f) User fees collected under this section shall be credited to the Inland Waterways Trust Fund established by Section 203 of the "Inland Waterways Revenue Act of 1978" (P.L. 95–502).

"SEC. 3. Failure to pay any user fees prescribed under this Act shall subject the violator to a fine of not more than $10,000 for each day the waterway is used in violation of this Act and shall be grounds for prohibiting the violator from operating on any portion of the inland waterway system or using any lock on the inland waterway that is operated and maintained by the United States during the period of time the violator has failed to pay the fees prescribed by this Act. Such fine shall be collected and credited to the Inland Waterways Trust Fund.

"SEC. 4. Expenditures by the Corps for operation and maintenance and for construction and rehabilitation of inland waterways projects subject to reimbursement under this Act shall be assigned to commercial waterway transportation as follows: (1) for projects authorized only for navigation, 90 percent of costs remaining after subtracting any specific costs for recreation are to be assigned to commercial waterway transportation; (2) for multiple-purpose projects for which costs have been assigned to navigation, costs assigned to commercial waterway transportation will be in accord with that assignment; (3) for all other multiple-purpose projects providing navigation benefits but for which there have been no cost assignments, costs assigned to commercial waterway transportation will consist of all specific navigation costs, plus 10 percent of joint costs except that costs assigned to commercial waterway transportation for the Mississippi River and Tributaries Project will be 25 percent of total project costs. Expenditures on construction and rehabilitation for the Mississippi River and Tributaries Project will be considered maintenance.

"SEC. 5. Section 4042 of the Internal Revenue Code of 1953 is amended by:

"(a) striking all of subsection (a) and adding in lieu thereof the following:

" "(a) In general—There is hereby imposed a tax on any liquid sold by any person to an owner, lessee, or other operator of a vessel, for use as a fuel in such vessel in commercial waterway transportation." (b) striking all of subsection (b) and adding in lieu thereof the following:

" "(b) Amount of Tax—The tax imposed by the following table:

If the use occurs—	
After September 30, 1980 and before October, 1981	4 cents a gallon
After September 30, 1981	15 cents a gallon

Beginning January 1, 1983, and annually thereafter the 15 cents a gallon tax will be adjusted to the nearest cent by the percentage change in the Implicit Price Deflator for the Gross National Product during the preceding fiscal year as reported by the Department of Commerce." and,

"(c) deleting subsection (e).

"SEC. 6. Section 204(a) of the Inland Waterways Revenue Act of 1978 is amended by deleting its existing provisions and substituting in lieu thereof the following:

" "(a) IN GENERAL.—Amounts in the Trust Fund shall be available as provided by appropriations Acts for making capital improvement and operation and maintenance expenditures on the inland and intracoastal waterways of the United States.

"SEC. 7. Section 206 of the Inland Waterways Revenue Act of 1978 is amended by striking all of Section 206 and inserting in lieu thereof the following:

" "SEC. 206. INLAND AND INTRACOASTAL WATERWAYS OF THE UNITED STATES

For purposes of Section 4042 of the Internal Revenue Code of 1954 (relating to tax on fuel used in commercial transportation on inland waterways) and for purposes of Section 204 of this Act, the following inland and intracoastal waterways of the United States are described in this section:

" "(a) the Mississippi River and its natural and man-made tributaries upstream from Baton Rouge, Louisiana;

" "(b) all waterways of the United States and their tributaries with an authorized

depth of 14 feet or less emptying into the Gulf of Mexico west of the Mississippi River;

" "(c) the Gulf Intracoastal Waterway from St. Marks River, Florida, to Brownsville, Texas;

" "(d) the Apalachicola River and its tributaries upstream from its junction with the Gulf Intracoastal Waterway;

" "(e) the Columbia River and its tributaries upstream from a point immediately below the Bonneville Lock and Dam project;

" "(f) the Pearl River and its tributaries upstream from the junction of the West Pearl River with the Rigolets; and,

" "(g) the Mobile River and its tributaries, including the Tennessee Tombigbee Waterway project, upstream from the Mobile Harbor project;

" "(h) the Atlantic Intracoastal Waterway between Norfolk, Virginia, and Miami, Florida, via both the Albemarle and Chesapeake Canal and Great Dismal Swamp Canal Routes;

" "(i) the portions of the Willamette River and its tributaries with authorized depths of 14 feet or less."

"SEC. 8. The interest rate used pursuant to this Act shall be determined by the Secretary of the Treasury, taking into consideration the average market yields on outstanding marketable obligations of the United States during the period expenditures are made. The interest rate on the unrecovered balance shall be updated at least every 5 years to reflect the average market yield at that time on outstanding marketable obligations.

"SEC. 9. There are authorized to be appropriated to the Secretary such sums as are necessary to carry out this Act."

DEPARTMENT OF THE ARMY,
Washington, D.C., July 15, 1981.

Hon. GEORGE BUSH,
President of the Senate.

DEAR MR. PRESIDENT: On March 25, 1981 Acting Assistant Secretary Rogers transmitted proposed legislation for recovery of costs assignable to commercial waterway transportation for certain Corps of Engineers inland waterway projects. We have since that date given further consideration to this matter and have revised our previous draft to modify implementation and clarify certain points raised by other interested parties.

This revised proposal is a part of the Department of the Army's Civil Works legislative program for the 97th Congress. The Office of Management and Budget advises that enactment of this proposal would be in accord with the program of the President. The Department of the Army recommends that the revised draft be enacted by the Congress.

PROPOSED LEGISLATION

The purpose of the proposed revised legislation is the same as our original proposal; that is, to provide for the full recovery of certain capital and operation and maintenance costs of the U.S. Army Corps of Engineers for most inland waterways with authorized depths of 14 feet or less. The primary modification we are proposing is to limit cost recovery to major navigation channels handling the bulk of the nation's commercial barge traffic. This will provide for recovery of about 90 percent of the Corps of Engineers' operation and maintenance expenditures assigned to commercial shallow draft navigation.

We have also proposed an increase in the fuel tax imposed in the Inland Waterways Revenue Act of 1978 to 15 cents a galion beginning October 1, 1981. The fuel tax would be subject to subsequent adjustments based on fluctuations of the Gross National Product and, to simplify collection, would be imposed at the pump rather than through returns filed by barge owner-operators. This increase will cover a significant portion of the Corps of Engineers' expenditures on some projects and collection of the tax at the pump will greatly simplify collection procedures.

In addition the bill contains other changes intended to improve the bill's acceptability and workability and to insure an effective and fair system of cost recovery for shallow draft commercial navigation improvements. Its enactment would put an end to federal subsidy of such navigation projects. Accordingly, any previous agreements with non-Federal public bodies which are founded on a different sharing of costs and responsibilities than are envisioned in this bill will have to be revised.

COST AND BUDGET DATA

Enactment of the enclosed legislation would require reimbursement to the Federal Government for navigation expenditures by the U.S. Army Corps of Engineers for waterway transportation on the inland and intracoastal waterways of the United States. This would result in significant savings to the Federal Government.

ENVIRONMENTAL AND CIVIL RIGHTS IMPACT CONSIDERATIONS

Enactment of the enclosed legislation will have no significant environmental or civil rights impacts. Individual Federal activities that occasion the reimbursements required by this Act will only be undertaken pursuant to existing or future congressional authorizations and after any necessary assessment and review of their impacts.

Sincerely,

WILLIAM R. GIANELLI,
Assistant Secretary of the Army.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Committee on Energy and Natural Resources on S. 1867, the Reclamation Reform Act of 1981. The hearings will be held on Thursday, December 10, and Friday, December 11, beginning at 9 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings you may wish to contact Mr. Gary Ellsworth of the committee staff at 224–7146.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. COHEN. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Select Committee on Indian Affairs on S. 1370, a bill to authorize the Secretary of the Army to acquire a subordination, by condemnation or otherwise, in such interests in the oil, gas, coal, or other minerals owned by the Osage Tribe of Indians needed for Skiatook Lake, Osage County, Okla.; and, S. 1779, a bill to authorize the exchange of certain land held in trust by the United States for the Navaho Tribe, and for other purposes.

The hearing is scheduled for November 23, 1981, beginning at 9:30 a.m. in room 5302, Dirksen Senate Office Building. For further information regarding the hearing, you may wish to contact Timothy Woodcock, staff director, or Peter Taylor, general counsel of the Select Committee on Indian Affairs at 202–224–2251. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Select Committee on Indian Affairs, U.S. Senate, Washington, D.C. 20510.

ADDITIONAL STATEMENTS

THE REAGAN PLAN FOR ARMS REDUCTION

● Mr. D'AMATO. Mr. President, President Reagan's speech yesterday outlining his plan for arms reduction should give hope to people throughout the world. The United States, and particularly this administration, genuinely seeks to reduce the threat of nuclear war.

An era of peace was initiated in 1945 when this Nation embarked upon a policy of economic recovery and deterrence to war. Ours is a defensive policy, not one that is offensive in design. We truly seek no territory, and no empire. We seek to live in peace.

All the same, it would be foolhardy, given the evidence the President presented this morning, to unilaterally disarm our strategic and tactical forces. But the proposal by the President that the United States not deploy Pershing II missiles and ground launch intermediate range weapons in Europe if the Soviet Union removes its SS–4, SS–5, and SS–20 missiles is a fair and judicious one.

The United States and the Soviet Union must work together to reduce the risk of war. The President's proposal that the United States abandon plans to deploy the Pershing II and ground launch intermediate range weapons in Europe in return for the Soviet Union's removal of their SS–4, SS–5, and SS–20 missiles, is a fair and judicious one.

The possibility that arms reduction talks can begin gives hope that substantial progress can be made in the next few years to limit the potential for nuclear war.

The present danger is real. We must have an adequate defense because, as our President has said, an imbalance exists between the United States and the Soviet both in conventional and nuclear weapons.

Our defense policy can be realized in two ways. The first is the best way—through the reduction of nuclear arms. I believe that the President will be successful because the Soviet Union appreciates the fact that this Nation may also choose the second way to assure the defense of the people of the United States and Western Europe. We could choose to develop a threat comparable to that with which the Soviet Union has deployed.

What is most important today is that the President is genuinely seeking a balance of forces at lower levels than we have today. President Reagan should be commended for his expression of hope for peace, and for his willingness to engage in arms talks. These efforts should be supported by all Americans.●

TACKLING THE JAPANESE JUGGERNAUT IN ITS BACKYARD

● Mr. BENTSEN. Mr. President, it is difficult to comprehend the paralysis which overcomes American executives when I ask why they do not invest in Japan. I hear no end of excuses ranging from cultural differences to regulatory barriers to the fear of being unfairly undersold. Yet, I am becoming more and more convinced that the Japanese have created a psychological barrier to protect their market which is far more smoke than steel.

As my son would say, they have "psyched us" into believing that only firms foolishly willing and able to gamble tens of millions of dollars and thousands of man-hours should invest in Japan itself. The reality is somewhat different and therein lies one of the keys to our generally dismal performance in recent years in the competition for world markets.

The incentive structure of higher corporate executives discourages risk taking and a longer term approach to corporate investment decisions. The next quarter is far more important to the hired guns peopling executive suites across our Nation than next year. That philosophy in combination with the perceived barriers to doing business in Japan has held United States direct investment in Japan to a trickle—and almost all of that by a handful of multinationals. That is a deadly combination for it may guarantee a perennial second class status to American firms producing goods in direct competition with Japanese firms. Our firms are always one step removed from the major marketplace first tackled by their Japanese competitors—the Japanese market itself.

Very real and major problems do confront U.S. firms seeking to invest in Japan. The barriers are unlike any they will have encountered in Europe. Yet, I am concerned that our firms seem beaten even before they begin. They give up hope of grabbing a share of the Japanese market without a struggle, and then lament the Japanese juggernaut as they are gradually forced to take a smaller and smaller market share worldwide.

U.S. business can and must face up to the challenge of Japanese productivity and quality. It must realize that competing in Japan with Japanese firms is the surest way to maintain its market position.

Sounds impossible? Well, it is not. There are American entrepreneurs who are bearding the lion in his den today. One of these modern pioneers is Dr. Sheldon Weinig, president of Materials Research Corporation.

Dr. Weinig gave a speech on November 18 to the Japan-American Society in Houston in which he reviewed his own company's success in moving into the Japanese market. And, I believe his comments are instructive to us all.

Mr. President, I ask that the speech be printed in the RECORD.

The speech follows:

HOW CAN AMERICAN MID-RANGE COMPANIES SUCCESSFULLY INVEST IN AMERICA?

(By Sheldon Weinig, D.Sc.)

When asked about the economy these days, I generally answer: "the funeral in Europe is next Tuesday. The United States is paralyzed by staggering interest rates and budgeting uncertainty. The good news/bad news is Japan where we have never done better."

The Japanese success story continues and when we observe the number of articles, books and television programs on the subject, we really feel that we are competing against an invincible economic giant.

To further exacerbate the matter, once some special trait of Japanese success is identified, we are then bombarded with the "how to" books and seminars.

These run the gamut from Elizabeth Barrett Browning's "How Many Ways Do I make a Quality Circle, Let Me Count the Ways", to the pragmatic manager of a computer peripheral house in Phoenix who, not knowing what particular Japanese trait would work, had his employees meet in the morning for the traditional circle, changed the country-western music played in the factory to Japanese music, and then had the company cafeteria serve sushi instead of hamburgers. The causal relationships are not clear.

My favorite is a seminar sponsored by Arthur Anderson, the prestigious accounting firm. I will quote from their brochure: "The Japanese have achieved a formidable and competitive advantage over other countries in manufacturing low-cost, high-quality products in the world marketplace. Despite the tremendous disadvantages of remote location and lack of raw material and energy resources, Japan has become one of the most successful manufacturing countries in the world. This competition has contributed to the trade balance of the United States falling into a deficit, our dollar weakening, our workers losing jobs, our international trade dominance diminishing, and the ascendency of the Republican Party."

I will try not to add another grain of sand to the beach. My subject today is business investment in Japan. This aspect of the U.S.-Japanese equation concerns the advisability and practicality of a U.S. mid-range company making a serious business investment in Japan without having a name or financial position like IBM, Dow or Texas Instruments.

Why bother making a business investment in Japan? Many U.S. companies have conceded the entire far eastern market to Japanese companies. In some cases, the concession was not-so-subtly encouraged by the Japanese. Companies have been discouraged from entering the Japanese market by various devices, of which protective tariffs have been the least onerous. In fact, the most effective barrier to investment in Japan is the inability to penetrate the "Old Boy Network".

Other companies export to Japan, but do not make further investments. Perhaps they believe that the United States has an inherent birthright to world technical leadership and, therefore, all they have to do is continue to export their products.

For those industries engaged in technology that is being pursued by the Japanese, to not invest and not become involved in technological and commercial intercourse is to flirt with the possibility of blind side surprise and subsequent disaster. The failure road is strewn with a large number of U.S. companies who believed they had an invincible technological lead and, therefore, didn't have to be concerned about foreign competition.

In electronics, the size of the Japanese market and the Miti coordinated thrusts into specific areas mitigate against technical dominance by a U.S. company that isn't also an integral part of the Japanese domestic scene. In other words, to retain technical leadership, you must be a part of each major segment of your marketplace. U.S. electronic companies must be technologically involved in the Japanese marketplace. Conversely, Japanese electronic companies have become technologically enmeshed in the U.S. marketplace.

It is easy to blame the Japanese for the lack of American investment in Japan, but I'm afraid that most of the blame must be accepted by American businessmen. Let's face it; given the choice between three and a half hours on the Concorde to Paris or London versus fourteen to sixteen hours nonstop New York to Tokyo, the choice is obvious. The combination of Japanese discouragement—subtle or overt, a foreign environment, and a preference for comfort has not brought out the best in the American industrialist.

Myths for all situations have been developed concerning business investments in Japan, and our first task will be the separation of the myths from the realities.

Even if a company wanted to begin only modest commerce in Japan, it would fall prey to the first myth—that a foreign company can do business in Japan only through a trading company. The trading company is generally part of the "old boy network" and, although sometimes effective for companies in commodity type businesses, is a poor substitute for selling high technology products.

Fact: The trading company works as an effective barrier between you and your customers. I have likened trading companies to making love through three blankets. In the parlance of politics, there is no "touching the skin". Since you have chosen to be represented rather than represent yourself, you never have the benefit of direct interaction with your customer and your marketplace.

MRC succumbed to all the above. Despite an aggressive European program which resulted in six subsidiaries and a major manufacturing center in Toulouse, France, our total Japanese investment was a trading company relationship. We deprived ourselves of an early and meaningful business position in Japan, the world's fastest growing electronics marketplace.

Finally, stark reality confronted us! MRC serves the electronics and telecommunications market. We manufacture the basic metals, ceramics and equipment used in the production of integrated circuits. The industry has shifted from almost total U.S. domination to 45 percent U.S. and 35 percent Japan. Our greatest potential market was Japan.

Therefore, we made a decision. Step one: MRC would establish a Japanese company and commence direct sales and service. Step two: We would make an immediate investment in a plant for manufacturing equipment products in Japan. Step three: A joint venture with our trading partner would overcome some disadvantage of size. They, however, assured us that our idea was neither feasible nor possible. We persisted and they finally agreed to become our 20 percent joint venture partner.

The first organizing step came close to aborting the entire adventure before it even got started.

We have all read statistics on the legal population in the United States as compared with Japan. The number is one in ten thousand in Japan and one in four hundred and fifty in the United States (although I expect it is every other person in New York). But these are only statistics. Let me tell you about the real world.

We retained an American-style Japanese law firm and asked our partners who would be their counsel. They told us to send the papers to their managing director for review. We were surprised. Normally, our lawyers would deal with their lawyers. However, we did not pursue the matter, believing that ultimately they would send the papers to their lawyers.

Our attorneys gave birth to the typical American document (1½ lbs), and then we really had problems. Our partners conveyed their complaints through us without benefit of lawyers and we literally had to negotiate in behalf of their interests with our counsel. Tens of thousands of dollars later and an exhausted executive team, and law notwithstanding, the formal signing of the documents had to wait for the correct lucky day before the deal could finally be sealed.

Following the ceremonial dinner honoring the occasion, the president of the Japanese company gave vent to his feelings regarding lawyers and American contractual arrangements; but surprisingly, he was most angry with me. "Why, after our long business relationship, did we need lawyers? And if we did, why was the document so long and complicated in its 'what if' clauses? Surely an agreement could have been written in two or three pages."

How could I explain to him public company corporate life and the responsibility to the board of directors and stockholders? How could I explain to our stockholders a major corporate investment in a foreign country based on friendship?

There were, and I am sure will be, many other problems relative to the use of lawyers. The Japanese use lawyers only for extraordinary situations. U.S. executives are trained in the use and abuse of law; the Japanese are not. Many U.S. business procedures have been written in the shadow of lawyers' offices. We live with the constant threat of litigation.

Consider the standard form of purchase order and acknowledgement used in the United States. It is a series of threats and warnings. In Japan, the vendor-vendee relationship is based on a feeling of "you need us and we need you and neither of us needs lawyers".

The legal dilemma is not a myth, but is a business-cultural difference of extraordinary complexity. I believe the extremes will be moderated with time and experience on both sides, but under no circumstances should it be considered as a trivial problem.

The most interesting areas of mythology deal with personnel and the problems of hiring. "You will not be able to hire Japanese nationals to work for an American company because you can't transfer retirement benefits; there are excess personal benefits (carfare, vacation house, etc.) that you won't understand; and, finally, you will destroy their careers as they can never return to a Japanese company after working for foreigners."

Most of this is decoration. The Japanese are superb in the camouflage of personal feelings, especially displeasure. The real underlying problem is suspicion and fear relative to the unpredictability of the American or foreign company. We invested long hours attempting to understand this problem. We believe it is resolvable, however, with a fair and carefully-thought-out approach.

There were ten engineers employed by the trading company and assigned to MRC Business. It was our desire to have them all become fulltime employees of the joint venture. We met with them, and although all of them understood English, we insisted on an interpreter. We suggested that we would go halfway toward them if they would come halfway to us.

We had no vacation facilities in Japan; we were not interested in off-business hours meals, etc.; but we could arrange vacations in the United States contiguous with their training; we have developed an excellent pension program and, of course, stock participation. We offered fifteen percent salary increases to compensate for their "lost" benefits.

Eight out of ten joined the company. The two oldest did not come with us, but under Japanese custom they were loaned to us until we could hire their replacements.

The next myth was absolute assurance that it would take one to two years to find replacements for the two engineers who did not join us. Fact: We hired their replacements in 90 days.

Another interesting myth is that lifetime employment has a universality of good associated with it that results in total dedication and superb workmanship. When the lifetime employment policy is discussed, two aspects are described as being very important.

The first is the "lack of job descriptions," which is extolled as an excellent example of flexibility. Then we are told about the lockstep advancement in both salary and promotion, and this is proposed as an excellent example of inflexibility. Even the Japanese are questioning the entire concept. An executive recently stated, "the Japanese seniority system offers security and creates a harmonious atmosphere, but it may also reduce incentives to do creative work."

Another problem is that the security is shortlived as the workers are forced to retire in their fifties. This has given rise to the highest savings rate in the world—not out of desire, but fear for their old age.

Once again, we see evidence of camouflage, intended or not. The picture is of a harmonious mass of workers and managers meeting, singing, exercising, eating, etc., all happy with a lockstep salary and promotion program. It isn't true; the senior management who directed the phenomenal Japanese technological and economic success of the last decade are not part of the harmonious mass. They are the leading edge of the bell-shaped distribution curve. The leaders, mavericks, adventurers—they are all out there and they are very much responsible for the extraordinary success story.

Maybe the biggest myth is that "Japan is against all foreign company investment regardless of the business". We decided to step directly up to this myth—or reality, we weren't sure. MRC retained a public relations firm and had them organize a press conference at the American Club in Tokyo. We described MRC and explained the reasons why we wanted to open a company in Japan for sales, service and manufacturing. We then explained that benefits would result for both Japan and MRC through the formation of the business. "Therefore, hang out welcome signs for us, not roadblocks." By the time I returned to New York, the first letter had arrived from the governor of a prefect in Japan stating, "welcome". There were many others.

We returned to Japan to visit plant sites and to discuss financial arrangements. We clearly stated our position relative to financing and found significant room for negotiation and real flexibility in local Japanese government.

Why was the reception from local government so positive? They want manufacturing plants for the same reasons we do in the United States. Their young people are educated locally and if they find no opportunities, they go off to the big cities.

What did we discover as a mid-range company is that investing in Japan is difficult but possible. What is the larger picture relative to the deteriorating relationship between the United States and Japan, its most important trading partner?

While we in the United States are embroiled in a budget and tax battle that has virtually paralyzed parts of our industrial complex, the Japanese continue to expand their markets and technologies.

Further, the demand upon her manpower and productivity base for defense-related expenditures has been relatively light because of the Japan-U.S. security agreements which place strict limits on defense. Finally, by a series of protective measures, real and imagined, Japan has kept foreign investment to a minimum.

The Japanese have a national industrial strategy and this has enormous influence relative to government policy and private sector investment. Although we cannot interfere with their way of life, we do have to insist on an open environment for investment. We must treat our investment differently in Japan because quarterly profits per share are not significant and the rate of return on capital for U.S. companies is two to three times greater than that for Japanese corporations.

However, investment must be at many levels, not just in business. For example, there are less than 500 American students studying in Japan, mostly on their own money, whereas there are 12,000 Japanese students in the United States, mostly supported by industry.

If the United States is to continue as a major economic and technological power during the 1980s, then it must not only invigorate its domestic economy, but it also must treat the world as a place of opportunity relative to the marketing of its products and the investment of its capital. We have lost this spirit of adventure.

The bottom line is not written. But we are not afraid to compete as long as we can separate the myths and camouflage from reality. The Japanese abilities, coupled with the difficulty of any foreign operation, are challenge enough.●

IMPORTS OF LIBYAN OIL

● Mr. HART. Mr. President, last month, the Senate debated and narrowly defeated my proposal to ban American imports of Libyan oil. Many Senators clearly believe the United States should not be involved in the production, shipment, and sale of Libyan oil. Some, however, question whether a unilateral American withdrawal from Libyan oil operations would be effective. They argue that American technicians operating sophisticated oil production equipment in Libya could be replaced with new technicians from France and Italy and that other oil-importing nations would snatch up any Libyan oil supplies the United States refused to accept.

These arguments are contradicted by Libya's reaction to the recent decision by the Exxon Corp. to withdraw from all of its oil operations in Libya. As Youssef M. Ibrahim, reporter for the Wall Street Journal, points out today, just the threat of a complete withdrawal of American oil companies from Libya—even a unilateral effort—has caused Colonel Qadhafi to reevaluate his oil pricing strategy. Qadhafi recently offered to lower the price of Libyan crude for some American oil companies. Without doubt, this has been prompted by the loss of markets for Libyan oil and the threat that even more markets would be lost unless American companies were enticed to stay in Libya.

I ask that Mr. Ibrahim's article be printed in the RECORD, and I urge my colleagues to read it carefully.

The article follows:

LIBYA MIGHT CUT CRUDE OIL PRICE BY MORE THAN $1

(By Youssef M. Ibrahim)

In a conciliatory move aimed at spurring buying by U.S. petroleum companies, Libya yesterday offered to reduce the price of its oil.

Oil industry sources said that, after months of resisting any concessions on price, the Libyans notified companies that are part of the Oasis Group that Libya will cut the average price of its crude by more than $1 a barrel, to about $36 a barrel. Members of the Oasis Group are Conoco Inc., a unit of Du Pont Co.; Marathon Oil Co.; and Amerada Hess Corp.

The move coincides with what appears to be a broader attempt by Libya to defuse its confrontation with the oil companies and Western governments.

In addition to the price reduction offer, the Libyans are also said to have completed their withdrawal from neighboring Chad, whose occupation by Libya was strongly opposed by the U.S. and France. And oil industry executives reported that Libyan officials have said they hope to negotiate a settlement with Exxon Corp., which last week announced it was withdrawing from its oil and natural gas concessions in Libya.

LIBYA FEARS WITHDRAWALS

Oil industry sources widely believe that Mobil Corp. plans to follow Exxon in departing Libya, although Mobil yesterday continued to insist that its involvement in the Libyan oil industry was "still under review." Libyan officials, in the view of the industry, have been clearly alarmed by the prospect of further defections by other oil companies that are instrumental in pumping and marketing Libya's oil.

The new Libyan oil prices are competitive with those of Nigeria, whose comparable quality oil previously had a $1 edge on Libya.

Oil industry sources said the Libyan price-cut offer still hasn't been accepted by all the American petroleum companies still operating in the North African country, most of whom have adopted a very tough stance over the past six months. The sources suggested the companies will press the Libyans for further price concessions.

"It's very encouraging," said one senior U.S. oil company official. "It shows some concern on their (the Libyans') part, but it isn't as profitable as we hope. We will continue to talk," the official added.

Oil industry sources believe the decision by Exxon to abandon its 25-year relationship with Libya and end its operations there has seriously shaken Libyan officials.

ASSURANCE OF SUPPLIERS

Over the past two days, the National Oil Co. of Libya, which oversees all oil industry activities in the country, has been sending telexes to equipment suppliers, notifying them that it will pick up contracts arranged with Exxon.

"In case Esso Standard Libya (Exxon's Libyan affiliate) . . . fails to fulfill its obligations, we want to assure you upon instructions of the National Oil Co. (of Libya) that we will advance you the funds," one such telex to an American supplier read, according to an official at the supplier concern.

The telexes were coupled with assurances by Libyan officials that they hope to negotiate a settlement with Exxon, industry sources said.

The Libyan price cut is attracting especially wide attention in the oil industry because of the political facts that seem to surround it.

Among other things, oil industry sources observed, there is a strong belief among some officials that Exxon's decision to pull out of Libya—and the possible duplication of this gesture by Mobil—has to some extent been instigated by Saudi Arabia, which has severed its diplomatic relations with Libya after several belligerent exchanges with the Libyan leader, Col. Muammar Qadhafi.

Both Exxon and Mobil have enormous stakes in Saudi Arabia through their partnership in the Arabian American Oil Co. Aramco pumps and markets much of Saudi Arabia's 8.5 million-barrel-a-day production.

Last week, when it confirmed its decision to withdraw from Libya, Exxon wouldn't explain its action. But industry sources believe the decision was motivated by the poor profitability of operations in Libya, pressure from the U.S. government on all American companies operating in Libya to trim operations there, and increasing harassment of Exxon employees in the Brega oil terminal by Libyan security forces, who have been after the housing facilities occupied by the Exxon expatriates working there.

Exxon's pullout could cost the company more than $400 million—for just its wholly owned liquefied gas plant there and other equipment—unless the company can negotiate compensation from the Libyans. The value of the concessions themselves could add many more millions to the potential loss.

Libya's conciliatory price attitude represents a dramatic turn of events for a country that over the past 10 years has generally dictated to oil companies operating there.

Benefitting from a comfortable oil surplus on world markets and a drop in demand from the ailing Western economies, the oil companies seem to have zeroed in on Libya, whose oil, until recently, was the most expensive in the Organization of Petroleum Exporting Countries.

"It is time for the industry to do anything it likes and that's what they are doing in Libya," remarked Herman Franssen, chief economist of the International Energy Agency, a 21-nation organization based in Paris.

CONTRACTS ABANDONED

Over the past six months, U.S., Italian, French and other Western buyers have walked away from more than a million barrels a day of Libyan oil. As a result, Libyan production fell from a high of 1.7 million barrels a day in January to less than 750,000 barrels a day. Oil industry sources say the Libyan economy is beginning to feel the pinch, and there are reports that Libyan officials are sounding out world financial markets for loans.

The Libyan situation has been complicated by a gathering storm of anger in the U.S. against alleged Libyan terrorist activities. France also has exerted military pressure on Libyan troops in Chad by aiding opponents of the Libyan occupation with arms and ammunition. From a Libyan point of view, the withdrawal of oil buyers came as a final blow in what appears to be an international abandonment of the country.●

FOOD SAFETY LAWS

● Mr. GARN. Mr. President, a few years ago, when I was proposing amendments to the Endangered Species Act, I was widely accused of trying to gut the act. Today we see the same thing being said about some of our colleagues who are struggling with the Clean Air Act. I think it is fair to anticipate that the same thing will be said when the Senate undertakes modifications in the Nation's food safety laws.

Those charges were not true then, and they are not true now. The fact is that we have developed, in so many cases, a rigid regulatory structure which simply fails to reflect the real world in which real people live, work, and have their being. The abstractions of legislation do not always meet the reality of daily life. That is especially true when the legislators have not had experience with the kinds of things being regulated, and may be even more true when the staffs of those legislators have never had a real job in their lives.

My colleague from Utah, Senator ORRIN HATCH has recently treated the question of the food safety laws in an article in the Washington Post. I very much appreciated his comments, particularly when he said that "the basic purpose of the Delaney clause represents sound public policy." I agree with him; I said the same thing about the Endangered Species Act, and about the Clean Air Act. The problem is that the rigidity of the Delaney clause runs up against a technology so keen and efficient that carcinogens can be found anywhere, in quantities so small that they cannot be believed. It is not uncommon now to measure carcinogens in parts per quadrillion. I do not want to get into a debate over the threshold effect but I would like to point out that concentrations that small are simply a fact of life on this planet, and it is foolhardy to ban from consumption anything with levels of that sort in it. And yet, that is what the Delaney clause does.

Mr. President, we will have an interesting time with the food safety laws in this Congress, but I believe we will be better prepared for it if we take a look at the outline of the problem given to us by Senator HATCH. I accordingly ask that his article, from the Post of November 10, be printed in the RECORD.

The article follows:

SACCHARIN, BACON AND THE LAW

(By ORRIN G. HATCH)

There is quiet on the food safety front. No imminent crises. No public alarms. No important food substances about to be removed from our dinner tables. On July 25, Congress eagerly agreed for the third time in four years to keep the Food and Drug Administration from banning saccharin during the next two years. In addition, the scientific evidence on nitrites has been re-examined and initial fears about its potential toxicity have been assuaged, allowing bacon to remain on our breakfast tables, at least for the moment.

Yet it is an uneasy quiet. The momentous task of re-examining the broader questions of food safety policy remains. Four years ago, amid the tumultuous public reaction against the proposed saccharin ban, Congress defused the situation by postponing revision of the food safety laws pending a study by the National Academy of Sciences. This study has since been concluded, and the NAS has recommended an overhaul of current food safety laws. In the view of NAS, "the law has become complicated, inflexible and inconsistent in implementation . . . [and] is inadequate to meet changing and increasing problems of food safety." Under the Carter administration, the FDA's Task Force on Food Safety advocated significant revision of the statute. The General Accounting Office recently completed a survey of former FDA commissioners that revealed a strong consensus for major reform.

But what reform? I recently introduced S1442, the Food Safety Amendments of 1981, as one way to revise and update these laws.

Unfortunately, past debate on food safety has been less than dispassionate. Too many consumer groups and food processors have been raining invective on each other.

At the center of this storm rides the Delaney Clause, a 1958 amendment requiring a ban on any substance shown to induce cancer in man or animals, regardless of any benefits associated with its use. No exception is made for substances found in such infinitesimal amounts as to present the most insignificant risk to humans.

Combatants in earlier battles of the food safety war have been fighting either for the Delaney Clause or against it. But what is needed, in fact, is some fine tuning.

The basic purpose of the Delaney Clause represents sound public policy—no substance should be added directly to food if it is a carcinogen. But how should substances like saccharin be regulated? Applying a rigid, inflexible rule to a substance that has been in use for decades and for which there are no available substitutes is shortsighted at best. For diabetics and others who cannot eat sugar, cutting off their only viable substitute sweetener is unfair.

Reasoned decision-making is even more crucial in matters affecting the supply and marketing of our basic foods. Natural nutrients found in familiar foods such as potatoes, onions and black pepper have been implicated as potential carcinogens. Essential nutrients such as selenium, Vitamin D and calcium, substances required in our human diet, act in high doses as carcinogens. The logical extension of implementing the current law would lead to FDA's banning these most basic foods.

Fortunately, the FDA has chosen the more prudent course of action and ignored the statute. Yet the law should not be merely an option or a suggestion that a federal agency can accept or reject with impunity. Laws are normative, which means they not only tell us what we can and cannot do, but set standards reflecting what a consensus of us in the community considers reasonable policy.

Right now, the Delaney Clause as a law that provides for summarily banning foods without any recourse or appeal is not reasonable.

Our revision of law should keep pace with scientific advancements. Scientists can now detect traces of potentially harmful substances at parts per trillion—a million-fold increase in analytical sensitivity compared with the methods available more than 20 years ago, when the Delaney Clause was conceived and the law last examined. Traces of such substances are being found throughout our food supply in very minute quantities. Attempting to eliminate all these food substances threatens the quantity of our national food inventory while promising only the most nominal impact in our common cause to improve the public health.

Keeping our food supply safe is of the highest priority. Yet some degree of risk is inherent. Zero risk has proved to be impossible to achieve. The FDA must focus its resources on eliminating those risks that have a potential for actually harming humans. Trivial or speculative risks should not be regulated.

Revision of the food safety law is only the first step in assuring the American people a safe and plentiful food supply. Increasing our knowledge by supporting research in the fields of nutrition and disease prevention is of equal importance. Only if sound and reliable information is available can consumers, industry and the FDA make informed and rational decisions.●

SUCCESSOR GENERATION PROBLEM

● Mr. LUGAR. Mr. President, we are all aware of the importance of maintaining and expanding the many close connections which unite us with the nations of West Europe. At this critical period, it is more important than ever to remind each other of the shared values which distinguish the West from totalitarian regimes which are fundamentally opposed to these values.

In this regard, the Governments of West Germany and the United States have agreed to explore ways in which young people can become better acquainted with the values and the historical experience which unifies the nations of the West. This has become known as the successor generation project.

On November 3 the Congress was privileged to welcome the German representative for this project, Dr. Hamm-Bruecher. In introducing Dr. Hamm-Bruecher, Senator HEINZ offered an excellent summary of the situation which has brought into existence the successor generation project. I commend his thoughtful comments to my colleagues, and ask that they be reprinted in full.

The speech follows:

REMARKS OF SENATOR JOHN HEINZ

Mrs. Hamm-Bruecher, distinguished panelists, friends:

On behalf of my cosponsors—the Atlantic Council of the United States, Senators Cohen, Nunn, Lugar, and Boschwitz, and Representatives Fenwick and Leach—I want to welcome all of you here this afternoon for our "Conference on the Long-Term Challenge to German-American Partnership and Security." This challenge, called the "Successor Generation Problem" by some, has deeply concerned me because of its magnitude and its potential to disrupt not only German-American friendship, but also the harmony of the entire Atlantic community.

Although I have felt vaguely uneasy about the tensions that developed between the U.S. and Europe over the Vietnam War in the 1960s and early 1970s, only in the last few years have I begun to comprehend fully the dynamics at work. I want to thank the Atlantic Council Working Group on the Successor Generation for their outstanding contribution to our understanding of these dynamics—the policy paper entitled, The Successor Generation: Its Challenges and Responsibilities.

As one who was less than a year old when the Second World War broke out in Europe, I am a member of the Successor Generation myself. Yet, at the same time, I am old enough to remember by vivid impressions of the Yalta Conference, the Marshall Plan, the Berlin Blockade, the Hungarian Revolution in 1956, the building of the Berlin Wall in 1961. I am proud of the fact that the United States and the Federal Republic of Germany stood as one in our steadfast opposition to Soviet efforts to extinguish basic human rights. German-American partnership was and still is the linchpin of the free world's economic and political, as well as military security.

But I believe that events in Europe today potentially threaten the partnership that has been the bedrock of peace since 1945, the partnership that has helped keep the free world free. The conference today is part of a major effort to discover what we can do about erosion of support for that partnership among the Successor Generation on both sides of the Atlantic.

I believe that current developments affecting the Atlantic Alliance present both a challenge and an opportunity. The challenge is to adapt the Alliance to meet the new conditions of a new generation. And the opportunity is to build a better and more permanent relationship upon our shared moral and political values.

The demonstrations of recent weeks in West Germany and other Western European countries have dramatized the concerns of the Successor Generation.

Some members of this vocal minority cry out against the deployment of nuclear weapons. Some cry out against materialism. Some cry out against an economic system that doesn't seem to be producing enough new jobs. The cries come from the political left, from the Protestant churches, from environmentalists, from the economically dissatisfied, and from the broad category of searching idealists. While many of those involved in this movement have opposed both U.S. and Soviet policies, it is also unfortunately true that many seem to focus on U.S. policy as the cause of their evils.

It's difficult for Americans to understand what it's like to live with the immediate threat of war—a third war in a single century on your own soil. It's no wonder that there is deep concern in Germany lest the Soviets view Germany as a lance pointing eastward.

But to Americans it seems as though things have somehow got turned around. The German Successor Generation seems to be suffering from a sort of historical amnesia, a loss of historical perspective. While American policy is the focus of dissatisfaction, the Soviet Union, which still oppresses West Germany's Polish, East German, and Czechoslovakian neighbors, and which just two years ago invaded Afghanistan, is made to look benign. Why is it that the German Successor Generation sees America as part of the problem, not as part of the solution?

After World War II, the sharing of ideas was built on Atlantic consensus just as surely as did political, economic, and military cooperation. As one observer has said, "the bricks in the edifice were guns and money and technology, but the mortar holding it together remained the common heritage and values of western civilization."

This common heritage and the network of human contacts that have grown out of it have produced a belief in democratic institutions and the free enterprise economic system—a belief that our shared values were so precious that we must be prepared to protect them if necessary, but also a belief that the surest way to avert war is to be strong enough to discourage it.

Surely what unites us—our shared devotion to democracy and individual freedoms—is greater than what divides us.

I believe—and I'm confident that I speak for our panelists—that we must do all we can to maintain those values and that strength.

Our task is to channel the Successor Generation's idealism and energy into strengthening the values and institutions that bind us together.

Our meeting today is to begin this task on our side of the Atlantic just as Dr. Hamm-Bruecher has begun it on the other side. I hope you will join with us in that effort.●

A PIONEERING OREGONIAN

● Mr. PACKWOOD. Mr. President, on October 2, 1981, Mr. Alfred A. Aya—a pioneering Oregonian—died at the age of 102. His life and activities are part of Oregon's history.

I ask that this brief account of his accomplishments be printed in the RECORD.

The account follows:

ACCOMPLISHMENTS OF MR. AYA

Death came quietly in San Francisco's early morning on 2 October to Mr. Alfred A. Aya, pioneering Oregonian. He was born 15 June 1879 in Albert Lea, Minnesota, to immigrant German parents whose family name was originally von Ay, deriving from the town of Ay in Alsace-Lorraine. When he was 10 years old, his family moved to Eugene, Oregon, where he continued his formal edu-

cation until graduation from the University of Oregon Law School in 1903.

He was a member of the legal fraternity, Phi Delta Phi and, as Valedictorian of his graduating class, delivered an address concerning weaknesses of circumstantial evidence.

He practiced law in Portland until 1909, then turned full attention to various industries with which he had become associated. In 1910, as President and General Manager of the La Pine Townsite Company, he founded the Central Oregon town of La Pine and promoted awareness of Oregon's need for more industries, greater population—and particularly the need for hardy people willing to settle in undeveloped areas and help realize potentials he felt similar to many in Switzerland. He was President of the La Pine State Bank, the La Pine Commercial Club, and publisher of the La Pine newspaper. In these activities, he was instrumental in organizing the Oregon State Chamber of Commerce—and became one of its early Directors.

Living in La Pine at this time, he met Grace M. Honeyman who was on a sightseeing tour with her father, Mr. Thomas D. Honeyman, President of Honeyman Hardware Company owned by that pioneering Scottish family in Portland.

Following this chance meeting, Mr. Aya pursued his courtship by travelling to and from Portland—though La Pine was then 125 miles from the nearest railroad. When the time came to obtain her father's permission to marry, Central Oregon was heavily snowbound, and Mr. Aya travelled considerable distance on skiis out of La Pine on his way to Portland. Enroute, a snapping ski pole broke one of his ribs, but he continued on to his destination. His fortitude was rewarded, and in June 1914 they were married.

He and his wife raised their first two children while living in La Pine. Their first child, Barbara, is now Mrs. Clarence Wilkins of Vacaville, California. Their second child is Mr. Roderick Honeyman Aya, recently retired Division Manager—Federal Taxes, American Telephone & Telegraph, living in Rowayton, Connecticut.

In 1918, Mr. Aya moved his family to Portland where Swift & Company, of Chicago, engaged him to develop their extensive industrial property in North Portland. For that purpose, he was sent to study cargo handling facilities of the Port of New York—toward developing Swift & Company's North Portland's Columbia River frontage as the Pacific Coast's only direct seaport for shipment of livestock products. Mr. Aya brought about construction of the necessary deep water channel up the Columbia past the mouth of the Willamette River, then the only route for ocean cargo out of the Portland complex.

Having many interests at the time, he was active in political circles, the Portland Ad Club, the Portland Press Club, the Realty Board, the Portland Chamber of Commerce, a Charter Member of Portland's Waverley Country Club, Vice President of the Oregon Manufacturer's Association, Vice President and General Sales Manager of Columbia Tire Corporation, promoter of the Pacific International Livestock Exposition, and President of the North Portland Manufacturer's Club.

During the early 1930's, Mr. Aya pursued various activities including development of an electric furnace for smelting precious metal ores. Specially designed electrodes enabled use of continuous electric arc for this process.

In the mid-1930's, he provided advertising and legal counsel to Honeyman Hardware Company, Portland, and conducted limited private law practice.

He began his final career in 1944, at age 65, becoming an Associate of J. Henry Helser Company, Investment Managers, headquartered in Portland. After World War II, when Mr. J. Henry Helser returned from service in the U.S. Third Army, Mr. Aya moved to San Francisco to develop the firm's activities in California.

He served as Senior Associate in J. Henry Helser Company until he retired at age 79 in 1958.

After 52 years of marriage, Mrs. Aya, at 73, passed away in January 1966. Mr. Aya continued to maintain the household in San Francisco together with his youngest son, Alfred A. Aya, Jr., of Pacific Telephone's Corporate Research Division. Mr. Aya leaves his three children, several grandchildren and great grandchildren.●

POLITICAL ECONOMY OF THE B-1 BOMBER

● Mr. RIEGLE. Mr. President, a study has been prepared called the Political Economy of the B-1 Bomber." This study demonstrates the disproportionate burden that Michigan and other States would bear if Congress does approve funding for the B-1. The author of the report is Dr. James R. Anderson, of the Employment Research Associates in Lansing, Mich. I ask that the results of the study be printed in the RECORD.

The material follows:

TABLE I.—ALLOCATION OF B-1 TAX BURDEN AND PROGRAM SPENDING BY STATE

[Dollar amounts in millions]

State	B-1 outlays	B-1 tax burden	Net gain or loss
Alabama		$517.4	−$517.4
Alaska		115.4	−115.4
Arizona	$342.3	394.0	−51.7
Arkansas		274.6	−274.6
California	12,286.3	4,620.8	+7,665.5
Colorado	76.5	505.5	−429.9

●

SENATOR SARBANES SALUTES 75TH ANNIVERSARY OF THE CATHEDRAL OF THE ANNUNCIATION

● Mr. SARBANES. Mr. President, this week, Archbishop Iakovos, primate of the Greek Orthodox Church of North and South America, will be in Baltimore to help celebrate the culmination of the 75th anniversary of the founding of the Greek Orthodox Cathedral of the Annunciation, first Greek Orthodox Church to be established in Maryland.

Seventy-five years ago through the visionary efforts of a small but determined group of Greek imigrants, orthodox Christianity first took root in Maryland. These heroic pioneers and their successors achieved this vision because they willingly made the sacrifices necessary to preserve their faith and built a viable religious community. Over the years the Cathedral of the Annunciation has been the center of religious life in Baltimore and throughout Maryland for thousands of faithful parishioners.

In the year 1906 when the State of Maryland formally granted a charter to the Greek Orthodox Church of Evangelismos, the parish consisted of 68 families. Today more than a thousand fami-

lies worship, are comforted and receive the sacraments from Father Constantine Monios, dean of the cathedral and assistant pastor, Father Mark B. Arey.

The establishment of Greek Orthodox Churches, in Baltimore and elsewhere throughout the country indicated to many Greeks that their future was to be found in the United States. These early pioneers, like my own father and mother, dedicated themselves to the founding and building of their churches even before they had homes and possessions. Those who came after have preserved those timeless values—strong family, hard work and love of church—which have not only perpetuated a venerable spiritual tradition but have also contributed significantly to the diversity and strength of this great country.

Over the years the Greek-American community has played an important role in the growth, stability and the revitalization of downtown Baltimore. I ask that a brief history prepared by parishioners of the Cathedral of the Annunciation, of which I am proud to be a member, be printed in the RECORD.

The history follows:

A BRIEF HISTORY OF THE GREEK ORTHODOX CATHEDRAL OF THE ANNUNCIATION

Greek families began to arrive in Baltimore in large numbers in the 1880's. The thirst for Orthodox worship came with them. One of these early Greek immigrants, Christos Sempeles, yearned to foster a worshiping community in his new land. Mr. Sempeles quickly established himself in the confectionery business with his brothers at Centre Market and was able to provide funds to establish the first Greek Orthodox place of worship at Bond and Gough Streets. He could not receive enough support from his fellow immigrants and the attempt failed.

From 1893 to 1905, as the need for an established center of worship became more pronounced, the sacraments of the Orthodox were celebrated only on the occasion of visits by Greek Orthodox priests. Two of the earliest priests known to visit Baltimore were Father Papaconstantinou and Father Theodore Prussianos. On Sunday, March 18, 1906, a Divine Liturgy was celebrated at the Union Hall on Fayette and Gay Streets. The records show that 150 Greek Orthodox attended that historic Liturgy. The name "Evangelismos" (Annunciation) was chosen and the first full time priest, Father Constantine Douropoulos, was assigned to the new parish in 1908. In October, 1909, a church was purchased at the corner of Homewood and Chase Streets.

Church membership increased immediately and church related activities thrived. In order to preserve the Greek language a Greek school was established in 1912, and the first youth organization, the Greek-American Athletic Association, was founded in 1915. A portion of Woodlawn Cemetery known as the "Greek Circle" was purchased in 1916.

Throughout the early years the internal affairs of Greece still greatly influenced the immigrant generation. The struggle of the Royalists and the Venizelists, following the end of World War I, in Greece had a dramatic effect on the Greeks in America. The establishment of Holy Trinity Greek Orthodox Church at Broadway and Monument Streets was a direct result of the political conflict in Greece. This parish existed for a period of seven years until in 1929, the two congregations came together again and the Annunciation community continued its life at Homewood and Chase.

As the congregation grew, the church structure at Homewood and Chase became inadequate to serve the spiritual, educational, and social life of the parish. Plans were formulated early in the 1930's to enlarge the church structure. These plans failed to materialize because another avenue appeared. A larger, more magnificent church at the corner of Maryland Avenue at Preston Street became available. Even though plans were underway to demolish the then vacant former Congregationalist Church and build a gasoline station on the site, an appeal by several families of the parish to Mayor Howard Jackson was successful and the church was purchased for $40,000. The original construction cost of the church in 1889 was $137,000.

The official purchase of the church was made in March, 1937 and the first Divine Liturgy was celebrated there on April 23, 1937. His Eminence, Archbishop Athenagoras, Primate of the Greek Orthodox Archdiocese of the North and South America, consecrated the church on May 8, 1938.

As the Woodlawn Cemetery property was no longer adequate, a 14-acre tract of land on Windsor Mill Road was purchased as a Greek Orthodox Cemetery in October, 1943.

In 1959 a major renovation of the undercroft area of the church building took place and the three-level educational wing was completed. In 1965 the sanctuary was refurbished and redecorated and the new iconastasion installed. Throughout the entire history of the Annunciation, renovations and restoration helped preserve the building and add greater space for parish life and activities.

Perhaps one of the most significant milestones in the life of the Annuncation parish occurred in March of 1975. His Eminence, Archbishop Iacovos proclaimed the Annuncation parish the Cathedral of the State of Maryland. In an impressive ceremony this title was bestowed by Metropolitan Silas during an archpastoral visit here.

As the Cathedral continued to grow it became evident that in order to meet its responsibilities as the center of Orthodoxy in Maryland and to better serve the needs of its parishoners additional physical facilities were required. In 1978 five townhouses on Preston Street was acquired with the hope that they would be converted into a cultural and social center. Responding to the need for a parking facility, the Brooks-Huff property on Maryland Avenue was acquired. The Chapel of Holy Wisdom in the educational wing of the Cathedral was completed in February of 1981. During this year major renovations are taking place in the Cathedral interior. The Chapel of the Holy Resurrection at the Greek Orthodox Cemetery will be constructed in 1981.

The life of a parish is not reflected in the development of physical facilities alone. The physical facilities merely reflect the needs and achievements of those who worship and live the life of this Cathedral. From the time of its founding the Cathedral has been the fountainhead of Orthodox life in this city and State. It has been a leader in spiritual, liturgical, musical, ecumenical, and humanitarian activities.

The Cathedral Philoptohos has responded to the needs of the faithful for forty-five years. The education of our parishioners has been accomplished through our religious instruction both for the children and adults of our community. The Theodore J. George Library, judged by many as the most comprehensive in the Archdiocese, will soon be in its new home and will house 10,000 volumes. In order to respond to the critical area of social services a committee dedicated to this work has founded the Blood Bank, has arranged Cooley's Anemia testing programs, assists the elderly and those who turn to the Cathedral for assistance in social service related programs.

With the blessing and support of our Cathedral both St. Nicholas and St. Demetrios parishes were established. These parishes, along with our Cathedral now serve thousands of Greek Orthodox families. The story continues. We mark the Seventy-Fifth Anniversary of the founding of the Cathedral parish as one of the leading and largest parishes in the Archdiocese.●

SENATOR HUDDLESTON TESTIFIES ON IMMIGRATION

● Mr. HUDDLESTON. Mr. President, I ask that my testimony today before the House Subcommittee on Immigration, Refugees and International Law be printed in the RECORD.

The testimony follows:

TESTIMONY OF SENATOR WALTER D. HUDDLESTON BEFORE THE HOUSE SUBCOMMITTEE ON IMMIGRATION, REFUGEES, AND INTERNATIONAL LAW, NOVEMBER 19, 1981

Thank you, Mr. Chairman, and members of the Subcommittee. I'd like to express my great appreciation to you for all of the work that you, Mr. Chairman, and your Subcommittee have done in the vital area of immigration. It was not long ago that very few people cared about immigration. Today, this Subcommittee not only cares about immigration, but is taking positive steps to do something about it.

As we all know, demands on a Member of Congress' time are unending; these demands make the level of expertise developed by this Subcommittee all the more impressive. So it is extremely gratifying to me to see so many people recognizing the danger that uncontrolled immigration poses to our country. I think that we have found a consensus in Congress on the framework for a solution to our immigration problems, and I am quite pleased to be working with this Subcommittee and its Senate counterpart in seeing that skeleton fleshed out.

My greatest concern, Mr. Chairman, is with the lack of control over immigration. I see immigration reform as a two-step process. The first step is stabilization, getting control over immigration. The second step is real immigration reform. I believe that we cannot move to comprehensive immigration reform without first controlling our borders.

Last year we admitted more people to the United States than in any other year in our history. More than 800,000 persons were admitted legally, and at least that number came illegally. Close to one million illegal immigrants were apprehended, and another 900,000 ineligible aliens were turned away at ports of entry. Estimates of the illegal immigrant population in the United States have risen from 3.5 to 6 million four years ago, to perhaps 8 or 10 million today. Yet the Immigration and Naturalization Service is demoralized, underfunded and lacking leadership.

How did we get to this state of affairs? For fifteen years, from 1965 to 1980, Congress passed no major immigration legislation. We thought the 1965 legislation would make our immigration laws humane and less discriminatory, without increasing immigration. Now we can see that the real effect of the 1965 law was to send immigration spiraling out of control.

For fifteen years, the members of the House Judiciary Committee were the only ones who wanted to do something about our immigration problems. Others chose to ignore the problems for fear of appearing insensitive or because the problems were thought to be too far in our future. While the House struggled to make us aware of the worsening situation, both legal and illegal immigration continued to mount.

Then in 1979, we awoke to find what has

turned into a ceaseless flow of "boat people," Southeast Asians who placed themselves in mortal danger in hopes of being resettled in the United States. We resettled hundreds of thousands, far more than the rest of the world combined. And we are continuing to accept thousands of refugees each month, not just from Southeast Asia, but from all around the world. We have spent more than $4 billion on refugee assistance in the last two years.

To help these refugees, Congress passed the first major change in our immigration laws since 1965, the Refugee Act of 1980. Most of us here today were part of that effort. But even this major loosening of our immigration laws was not enough to meet the unending demand. The number of refugees has risen to 16 million worldwide, and all of our efforts, and those of the United Nations High Commission for Refugees, seem unable to reduce the number.

In May, the Attorney General, under pressure to admit Southeast Asians who did not qualify as refugees, suspended enforcement of parts of the Refugee Act, just as Attorney General Civiletti the year before had ignored the Act in order to admit Cubans and Haitians. This decision was wrong. It angered Southeast Asian countries, caused us embarrassment in the Asian press, and was not in accord with the policies established by Congress.

Americans are the most generous people on this planet in admitting refugees and immigrants. But as Americans continue their historical generosity in the face of unending pleas for entry, they have become increasingly concerned by the lack of control in immigration. Senator Alan Simpson, Chairman of the Senate Subcommittee on Immigration, calls this process "compassion fatigue."

Resentment has turned to violence between Americans and new immigrants in Colorado and Texas. In Florida, researchers found that at least part of the cause for last year's Miami riots was resentment over large numbers of new Cuban entrants receiving massive government aid. Two-thirds of Americans wanted a complete suspension of immigration until unemployment fell below five percent, according to a November 1980 Gallup-Newsweek poll. Think of the resentment which will exist in 1982 when unemployment is expected to be over 9 million.

Some people blame the Cuban exodus of last year for the "great awakening" of the immigration reform movement. I think that the American people have been concerned over uncontrolled immigration for much longer.

A 1977 Roper poll found that 91 percent of those polled wanted "an all-out effort" to stop illegal immigration, and 75 percent wanted legal immigration reduced below 400,000 per year. In 1980, that poll was repeated; again 91 percent wanted all-out action on illegal immigration, and the number calling for decreased legal admissions rose to 80 percent. In such a climate, comprehensive immigration reform is difficult. We must regain control over immigration before we can hope to completely reform it.

Fortunately, as this hearing shows, we are finally moving in that direction. The Reagan Administration has presented its proposals, the two Subcommitees are hard at work, and many of the bills you will hear about today, including S. 776, the Immigration and National Security Act of 1981, are being seriously considered as models for immigration control laws.

Our task is not complete, however, since we have formed only an outline of the necessary steps, the details have not yet been worked out. We must reconcile the differences in our approaches in a manner which will retain the effectiveness and fairness of each, while minimizing the cost and burden of each.

But we can take heart in the emergence of a growing consensus in Congress on the following elements:

First, we must control all legal admissions to the United States. Several mechanisms have been proposed, including a strict statutory ceiling on admissions, a flexible statutory ceiling under Executive control, Congressional control over a flexible ceiling, and a temporary ceiling reset by Congress every year or two.

Second, we must control illegal entry to the United States, both directly and by those who would abuse the terms of their visas. This effort will have many parts, since illegal immigration is a complex phenomenon. Some of those parts will include a prohibition against the employment of illegal immigrants in American jobs, coupled with a method for determining who is eligible to work; increased immigration law enforcement both in the interior of the U.S. and along our borders; and swift, fair, and final adjudication of immigration status, consistent with the due process requirements established by Congress.

Third, we must have a humane solution for those illegal residents who have become deeply attached to this country. This effort, perhaps the most controversial of all three, will include some legalization of status for some illegal residents, and temporary worker status for others. I might point out a new concept that is gaining favor, of a synthesis between these two points.

By linking guestworkers and amnesty we could solve most of the problems each idea alone would cause, while avoiding the creation of many new problems. We could be generous in granting permanent residence to long-term residents, reserving temporary worker status for illegal residents who entered recently. Thus we could avoid rewarding most illegal residents for breaking the law, and also avoid bringing in large new groups of foreign workers.

I would like to address two parts of S. 776 which cover aspects of these larger areas I feel deserve special note. The first is the ceiling on legal admissions, and the second is the Fair Hiring system, the system to verify the eligibility of an applicant for employment.

The ceiling I proposed in the INS Act is simple and effective. It would set a ceiling in law, which could be flexible in emergencies, but would otherwise include all categories of admissions. I have suggested a ceiling of 350,000 per year. That level of 350,000 per year is sometimes described as too low, but I think that it is very generous. It is more than the admissions for permanent resettlement of the rest of the world combined. It is higher than the average admissions over the last 60 years, and represents an increase in the statutory level of visas of 80,000 per year. It will mean a U.S. population in the year 2000 of about 245,000,000 people, and in the year 2030 a population of 260,000,000, assuming fertility remains low and no illegal immigrants enter.

If the need arises to admit more people in a given year than the 350,000 ceiling, the President can adjust the internal limits in the system, to waive the per country limitation, for example, or the limit on the number in any preference. If this is not enough, he can borrow visas from the next year's ceiling.

This means that the President could conceivably admit 700,000 persons in one year, even under the ceiling, but we would balance that off the next year. I believe that this flexible ceiling offers a practical solution that is generous yet controlled.

The other area I would like to touch on today is the Fair Hiring system, also called the Employment Verification system. I call it the Fair Hiring system because that is what we are trying to produce: fairness in hiring, including fairness to American employers trying to determine who is eligible to work, and fairness to American minority workers, understandably anxious that they not bear an unnecessary burden.

The Fair Hiring system I proposed in the Immigration and National Security Act is one which I think will give the most effective coverage of the work force with the least burden and the least cost. It is a three-phase system, using both improved Social Security cards and a telephone verification system for the applicant's Social Security number. The system gradually becomes more effective and secure, while minimizing high start-up costs.

The electronic technology to make such a system reliable and inexpensive has only recently become available. But such a system offers benefits that no other system, even the more commonly discussed eligibility card system, has.

This system is the only one which will provide absolute security for the American employer from inadvertent or erroneous government prosecution, while placing no burden on the employer. The employer acts only as a conduit for information, and does not have to judge who is eligible for employment. The unique transaction code provided to the employer, just like in a credit card purchase, provides an absolute defense for the complying employer.

And the Fair Hiring system I proposed is the only system that gives absolute protection against minority American workers. All such systems to verify employment can be made non-discriminatory by requiring every job applicant to do the same thing, regardless of appearance or ancestry.

But the electronic system is the only one which creates a record of each transaction that can be used to determine whether in fact an employer is checking the eligibility of all applicants or only those who appear suspicious.

The only serious objections to the electronic system that I have heard involve cost and reliability. New technology is far less expensive than even just a few years ago, since new mini-computers can carry out the tasks we would require here. And, under my system, the cost is delayed and spread out, since the system is introduced gradually.

As for reliability, I would point out that the wide use of such technology by banks, credit card companies and other financial institutions indicates their faith in the systems. The large credit card companies process almost 30 million transactions a month, and even banks are now using electronic bill-paying machines for their customers' convenience. The United States is unique in having the national communications network which would allow us to expolit this new technology.

Mr. Chairman, I would like to close my remarks today with my own personal view of the immigration problem. For 15 years we have ignored our immigration problems. We have pretended that they are too far off to affect us personally.

But my real worry is for our less fortunate citizens. It is our low-income and minority citizens who have borne the brunt of competition with immigrants. They are the ones who need help. It is time that we helped the poor of our own inner cities, our rural poor, our malnourished and under-educated children, our own ghettos and barrios. Our unemployment and child mortality rates are as high as many third-world nations. It is time that we answered these cries for help.

It is not who the new immigrants are that concerns me; I happen to believe that a multi-ethnic, multi-cultural society is one of America's greatest strengths. But the numbers are just too large.

We cannot accept everyone in this world, nor even a fraction of those who want to come here. Telling ourselves that we have no problems if we just admit more is a

delusion that will not cause the demographic and economic problems of the world to vanish. We cannot create a budget on the hopes that we will win a sweepstakes; nor should we plan for immigrant admissions as though we will be miraculously saved from our own actions in time to save our children's future.

It is time that Congress acts to regain control of immigration. The 97th Congress must act on these immigration control proposals if we are to avoid a tremendous backlash, which could permanently endanger the most generous immigration policies on earth. I stand ready to act on these proposals, and I hope that this Subcommittee, which has done so much work this far, will do so as well.

Thank you, Mr. Chairman.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during whicn the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in several of the covering letters are available to Senators in the office of the Foreign Relations Committee, room 4229 Dirksen Building.

The notifications follow:

DEFENSE SECRETARY ASSISTANCE AGENCY,
Washington, D.C., November 17, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-01, concerning the Department of the Air Force's proposed Letter of Offer to Turkey for defense articles and services estimated to cost $71 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

You will also find attached a certification as required by Section 620C(d) of the Foreign Assistance Act of 1961, as amended, that this action is consistent with Section 620C(b) of that statute.

Sincerely,

ERICH F. VON MARBOD,
Director.

[TRANSMITTAL No. 82-01]

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Turkey.

(ii) Total Estimated Value:

	(*Millions*)
Major Defense Equipment*	0
Other	$71
Total	71

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Cooperative logistics supply support (FMSO II) for follow-on spares and supplies in support of C-130H, F-4E, F/RF-5A, F-100C/D/F, RF/F-104G, T-33, T-37C, and T-38 aircraft and other systems and subsystems of U.S. manufacture.

(iv) Military Department: Air Force (KBL).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: November 17, 1981.

POLICY JUSTIFICATION

TURKEY—COOPERATIVE LOGISTICS SUPPLY SUPPORT

The Government of Turkey has requested the purchase of cooperative logistics supply support (FMSO II) for follow-on spares and supplies in support of C-130H, F-4E, F/RF-5A, F-100C/D/F, RF/F-104G, T-33, T-37C, and T-38 aircraft and other systems and subsystems of U.S. manufacture at an estimated cost of $71 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey in fulfillment of its NATO obligations; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

Turkey needs these logistics support systems to maintain the readiness of the Turkish Air Force weapon sytsems of U.S. origin. The cooperative logistics support will be provided in accordance with, and subject to the limitations on use and transfer provided for under the Arms Export Control Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.

Procurement of these items and services will be from the many contractors providing similar items and services to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

U.S. DEPARTMENT OF STATE,
Washington, D.C., October 2, 1981.

Pursuant to section 620C(d) of the Foreign Assistance Act of 1961, as amended (the Act), and the authority vested in me by Department of State Delegation of Authority No. 145, I hereby certify that the provision to Turkey of cooperative logistics supply support for US-origin aircraft and other system of US manufacture is consistent with the principles contained in section 620C(b) of the Act.

This certification will be made part of the certification of the Congress under section 36(b) of the Arms Export Control Act regarding the proposed sale of the abovenamed articles and is based on the justification accompanying said certification, and of which such justification constitutes a full explanation.

JAMES L. BUCKLEY.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 19, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-03, concerning the Department of the Army's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $175 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
Director.

[TRANSMITTAL No. 82-03]

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Pakistan.

(ii) Total Estimated Value:

	(*Million*)
Major Defense Equipment*	$114
Other	61
Total	175

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Sixty-four M109A2 155 mm self-propelled howitzers, 40 M110A2 8-inch self-propelled howitzers, 75 M198 155 mm towed howitzers, ammunition, spare parts, training, and technical assistance.

(iv) Military Department: Army (VAU, VBI, VAT, VAP, and VAL).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Included in report for quarter ending September 30, 1981.

(viii) Date Report Delivered to Congress: November 19, 1981.

POLICY JUSTIFICATION

PAKISTAN—HOWITZERS

The Government of Pakistan has requested the purchase of 64 M109A2 155 mm self-propelled howitzers, 40 M110A2 8-inch self-propelled howitzers, 75 M198 155 mm towed howitzers, ammunition, spare parts, training, and technical assistance at an estimated cost of $175 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan.

The Government of Pakistan requires these howitzers to upgrade and standardize existing artillery as a part of Pakistan's overall force modernization plan.

The sale of this equipment and support will not substantially alter the overall military balance in the region.

The prime contractor for the M109A2 155 mm self-propelled howitzers and M110A2 8-inch self-propelled howitzers will be the Bowen-McLaughlin-York Company of York, Pennsylvania. The Rock Island Arsenal of Rock Island, Illinois, will produce the M198 155 mm towed howitzers.

Implementation of this sale will require the assignment of sixteen additional U.S. Government or contractor personnel for each program to provide Quality Assurance Teams during item deliveries and Mobile Training Teams for 60 days to train a cadre in the operation and maintenance of the howitzers.

There will be minimal impact on U.S. defense readiness as a result of this sale. Initially, 40 M109A2 howitzers will be diverted from U.S. Army production to satisfy Pakistani delivery schedules with payback from subsequent production financed by Pakistani funds.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 19, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the

Arms Export Control Act, we are forwarding herewith Transmittal No. 82-04 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $117 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERICH F. VON MARBOD,
Director.

[TRANSMITTAL NO. 82-04]

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Pakistan.

(ii) Total Estimated Value:

	(*Million*)
Major Defense Equipment*	$102
Other	15
Total	117

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: One hundred M49A5 tanks and 35 M88A1 recovery vehicles with related ammunition, spare parts, and ancillary equipment.

(iv) Military Department: Army (VAQ, VAM, and VAR).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed To Be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending September 30, 1981.

(viii) Date Report Delivered to Congress: November 19, 1981.

POLICY JUSTIFICATION

PAKISTAN—M48A5 TANKS AND M88A1 RECOVERY VEHICLES

The Government of Pakistan has requested the purchase of 100 M48A5 tanks and 35 M88A1 recovery vehicles with related ammunition, spare parts, and ancillary equipment at an estimated cost of $117 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan.

The Government of Pakistan requires these tanks, accompanying support equipment, and recovery vehicles to upgrade and standardize existing armor as a part of Pakistan's overall force modernization plan.

The sale of this equipment and support will not substantially alter the overall military balance in the region.

The prime contractor for the M88A1 recovery vehicle will be the Bowen-McLaughlin-York Company of York, Pennsylvania. The M48A5 tanks will come from reserve component stocks.

Implementation of this sale will require the assignment of U.S. Government personnel to Pakistan as follows: M48A5 tanks—a Quality Assurance Team of seven U.S. Government personnel in-country for 14 days after arrival of the first increment of tanks; M88A1 recovery vehicles—a Quality Assurance Team of five U.S. Government personnel in-country for 28 days after arrival of the first increment of recovery vehicles. No contractor representatives will be required.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 19, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-05 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $21 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERICH F. VON MARBOD,
Director.

TRANSMITTAL NO. 82-05

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Pakistan.

(ii) Total Estimated Value:

	(*Million*)
Major Defense Equipment*	$20
Other	1
Total	21

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Twenty-four M901 Improved-TOW vehicles, 1,005 I-TOW missiles, related spare parts, training, and technical assistance.

(iv) Military Department: Army (VBC and VAY).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending 30 September 1981.

(viii) Date Report Delivered to Congress: November 19, 1981.

POLICY JUSTIFICATION

PAKISTAN—M901 IMPROVED-TOW VEHICLES AND IMPROVED-TOW MISSILES

The Government of Pakistan has requested the purchase of 24 M901 Improved-TOW (I-TOW) vehicles (ITV's), 1,005 I-TOW missiles, related spare parts, training, and technical assistance at an estimated cost of $21 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan.

The Government of Pakistan requires this equipment to assist in the upgrade of its overall force modernization plan. The ITV's will provide a very modest number of highly mobile, armor protected anti-tank weapon systems.

The sale of this equipment and support will not substantially alter the overall military balance in the region.

The prime contractors will be the following: M901 ITV's—Emerson Company of St. Louis, Missouri; I-TOW missiles—Hughes Aircraft Company of Canoga Park, California.

Implementation of this sale will require the assignment of ten U.S. Government personnel in Pakistan for 90 days to provide training for a cadre in operations, employment, and maintenance, to include direct support and limited general support of the ITV's. Additionally, a Quality Assurance Team of seven U.S. Government personnel will be required in Pakistan for 14 days after arrival of the first increment of ITV's.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., Nov. 19, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-06 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $82 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERICH F. VON MARBOD,
Director.

[TRANSMITTAL NO. 82-06]

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Pakistan.

(ii) Total Estimated Value:

	(*Million*)
Major Defense Equipment*	$51
Other	31
Total	82

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Ten AH-1S attack helicopters including the TOW missile system and spare parts, training, and technical assistance.

(iv) Military Department: Army (VBA).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending 30 September 1981.

(viii) Date Report Delivered to Congress: November 19, 1981.

POLICY JUSTIFICATION

PAKISTAN—AH-1S HELICOPTERS

The Government of Pakistan has requested the purchase of ten AH-1S attack helicopters including the TOW missile system and spare parts, training, and technical assistance at an estimated cost of $82 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan.

The Government of Pakistan requires this equipment to upgrade its existing structure as part of Pakistan's force modernization plan. The AH-1S helicopters will provide a modest air mobile anti-tank capability.

The sale of this equipment and support will not substantially alter the overall military balance in the region.

The prime contractor will be the Bell Helicopter Company of Fort Worth, Texas.

Implementation of this sale will require the assignment of ten U.S. Government personnel to Pakistan for a period of 20 days to perform a site survey. Additionally, five U.S. Government technical representatives will be required in Pakistan for 24 months in support of the system.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $25 million, or in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that two such notifications have been received—one on November 17 and one on November 18, 1981—and I ask to have them printed in the RECORD.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room 4229, Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 17, 1981.

Dr. HANS BINNENDIJK,
Committee on Foreign Relations,
U.S. Senate,
Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a NATO country for major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,

ERICH F. VON MARBOD,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 18, 1981.

Dr. HANS BINNENDIJK,
Committee on Foreign Relations,
U.S. Senate,
Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country for major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,

ERICH F. VON MARBOD,
Director.●

DENTON RESPONDS TO PRESIDENT'S SPEECH

● Mr. DENTON. Mr. President, President Reagan's proposal is perfectly reasonable and will be a significant step toward world peace if it is implemented.

The proposal is timely. For years, the Soviet Union, with the greatest war machine on Earth, has painted the United States as an imperialist power while our leaders have remained silent. It is overdue for our President to speak up, to illuminate the Soviets' record and compare it with ours.

As the President pointed out, this Nation has time and time again been magnanimous, not selfish. After World War II, when the United States could have dominated the world with its nuclear superiority, it helped rebuild the other industrial powers, even those that had been our enemies.

President Reagan's disarmament proposal is in keeping with that record and with our peace-loving tradition. It is realistic in that his politics recognize that a just peace can be negotiated only from a position of restrained but usable strength.

Throughout our history, we respected, and acted for, the right of all peoples to live in peace. The Soviet Union maintains that it respects the same principle. The time has come for its leaders to prove it by concrete actions.●

COAL: REMARKS OF JOSEPH A. McELWAIN

● Mr. BAUCUS. Mr. President, few of us doubt that coal will continue to become more important as a component of our country's energy mix over the next 30 years. And, few of us doubt that increased dependence upon coal requires increased awareness of the problems the coal industry faces if it is to utilize coal in an economic, efficient, environmentally acceptable way.

Recently, Mr. Joseph A. McElwain, chairman and chief executive officer of the Montana Power Co., made some thought-provoking comments on coal's potential. In brief, he examined the promise many believe to be associated with coal development, and he pointed out that with coal's great potential coexist great potential problems—problems that need to be recognized, addressed, and solved.

Mr. McElwain is an able utility executive and a thoughtful spokesman on these issues. I believe everyone who is concerned about electricity production and coal development can benefit substantially from reviewing the facts, figures, and comments he has concisely presented in his remarks. While I have not hesitated to disagree with the utility industry and do not share all of the views presented in Mr. McElwain's speech, I do believe it is important to recognize industry expertise and listen when spokesmen as able as Mr. McElwain have something important to say.

Accordingly, I ask that Mr. McElwain's remarks be included in the RECORD.

The remarks follow:

REMARKS OF JOSEPH A. MCELWAIN

We are accustomed to hearing coal characterized as this country's ace in the hole. The characterization falls short. To see coal as anything less than a royal flush indicates the viewer is not playing with a full deck.

If we take an objective look at the energy cards we have to play, I think it is abundantly clear that petroleum and natural gas will never fill a full house again. When they're all dealt out during the next 20 or 30 years, we cannot expect the supplementary sources of energy like solar and geothermal to make up more than a straight. Nuclear power's hand may not turn out to be nearly as strong as we once thought it would be. The impediments seem less surmountable with each month that passes, beginning with the hysteria generated by Three Mile Island, the real problem of cleaning it up, the history of cost escalation, the quandary over waste disposal, the unknowns of decommissioning and, most recently, the discovery of rust and brittle steel in 17 of our nuclear electric plants. The political and technical problems of nuclear power may cause that technology to be dealt out of any large part of our energy future.

Without doubt, we'll need all the players and all the cards, but coal must come out with the top hand if we're to lick our energy problems.

It is possible to cite a host of learned studies and reports reaching that same conclusion. It is possible, but it is not necessary. The coal industry is a common sense industry and common sense says you go with what you have. And we have plenty of coal. That is, we have plenty of coal, but not enough to waste.

We all are fond of boasting that the United States is coal rich—that we have between 200 and 500 years of recoverable coal reserves to bail this country out of its winter of energy discontent. That may or may not be true.

Almost every estimate of proven coal reserves we read takes as its base an excellent U.S.G.S. report published in 1975. That report, estimated our demonstrated reserves at 434 billion tons. Some 283 billion tons were identified as recoverable. The latter figure assumed a 57 percent recovery rate of underground coal and 80 percent recovery from surface mining. At least one study has suggested the recovery rate might be more nearly 33 percent and that losses in handling and cleaning could drive our ultimate reserve base of product fuel to something on the order of 120 billion tons.

I do not profess to be qualified to judge the accuracy of the various estimates of coal reserves. I think it is safe to say that if one accepts the figure of 120 billion tons, exploration of inferred and speculative reserves easily could multiply that figure by three or four. It also is conceded that in situ burning of coal could double the reserve figure. All of these imponderables make me think, nonetheless, that we cannot afford to be blasé about the extent of our reserves or how we use them. It is possible that, indeed, we have a lot less coal than we think—particularly when we crank in the institutional, environmental and regulatory constraints on mining.

Which leads us to the conclusions that our royal flush is even more precious than we thought: that if the coal industry is to fulfill its mission, then we must work smarter than we ever have before. The challenge of our lifetimes may be to bridge the energy gap of the next 30 years, to take up the slack left by diminishing oil and gas supplies until other energy forms can assume their long-term places gradually.

The figures tell us that gargantuan task will make deep inroads into all of our resources—financial, technological and managerial, as well as the base resource of coal.

Looking at some six studies completed in the last couple of years, during the remainder of this century the coal industry will be busy—very busy. The best minds assembled by groups ranging from the Office of Technology Assessment to the National Coal Association—tell us that by 1990 we'll be producing between 1.2 and 1.4 billion tons of coal annually. If that comes to pass, we'll have almost doubled our 1980 production of 734 million tons. The figure is stagger-

ing—and it's more staggering when we look at the range of 1.5 to 2.3 billion tons projected for the year 2000.

The opportunities for our industry are incredible. We are truly entering the coal era. We are doing it at a time when the resource we produce is assuming critical importance to the health of our economy, the well-being of the American people and the security of their Nation. For coal, aided by all the other energy resources at our command, is the transition fuel for the last twenty years of this century and the initial years of the next. With it, we will make the transition from oil and gas and make it without our economy staggering, stuttering and halting. Without it, the state of our Nation would be imperiled as it would by global conflict.

Coal will be carving out a lot of work in our energy world. From electric generation to liquid fuels, coal will be the fuel of abundance. A quick outline of the prospective coal markets should suffice to describe the dimensions of our challenge and opportunities.

Any list of coal markets begins with a discussion of electricity, for that form of energy promises to assume major proportions as we switch from oil and gas. Most experts long since have concluded that electricity will constitute half of our total energy mix by the year 2000. The National Electric Reliability Council projects a 38 percent increase in electric demand by 1990. NERC says coal will provide almost 53 percent of the Nation's total electric generation then.

In terms of market, and assuming we double our nuclear capability by 1990—which appears unduly optimistic—mining to support electric generation will increase from more than 584 million tons this year to 881 million tons in 1990. That new increment of coal will fuel 198 units of new generation totaling in excess of 100,000 megawatts of capacity. Another 6000 megawatts of power converted from oil to coal will make up the remainder of the market.

The transfer from oil and gas to coal also may be reflected strongly in the need of industry for process heat. From a market of 60 tons in the mid-1970s, the Department of Energy has projected coal demand to reach 315 million tons by 1990.

By the mid to late 1980s—depending on the timing of natural gas price deregulation—we also may be looking at a significant use of coal as a chemical feed stock.

One more large market may be expected to develop in the 1980s and 1990s. On a global scale, coal comprises about 25 percent of energy consumption. With the rest of the world on the transition path from oil and gas, it is estimated that coal will have to supply one-half to two thirds of the additional energy the world requires during the next 20 years. Even under moderate energy growth assumptions, world coal production will increase two and a half to three times and world trade will exceed the 1979 level by 10 to 15 times. Giving those figures a national context, the first thing to say is that the United States easily could become the Saudi Arabia of coal's OPEC equivalent.

If large quantities of coal are permitted to move over the international trade lanes, the U.S. has the capability of moving into the market in the largest way. By the year 2000, the world market is projected to require something on the order of 672 million to 856 million tons annually. Various estimates have the U.S. supplying between 150 million and 500 million tons of that demand. Our largest markets most likely would be Western Europe, Japan and other East Asian nations.

So coal looms large in the future of the world and the future of our nation. Yet I would not suggest the future is devoid of problems posed by the demand for coal. Some interests would insist the problems are so grave there are no solutions. By and large, those interests are not the ones who have been solving the problems for a decade or more. By and large, they are not the ones who have taken the time to ponder the problems of energy insufficiency, or to devise practical alternatives to the use of coal.

Fortunately, the people in this room and others have been working on the problems and solving them for more than 10 years. Their success in the restoration of mined land, emission controls and all the other areas of critical concern is testied to by a single, comprehensive statement from the Congressional Office of Technology Assessment.

I quote:

"With the possible exception of carbon dioxide pollution, all the significant problems associated with substantially increased coal used appear to be solvable." End quote. The problems are solvable. Who was saying that 10 years ago?

It is not my intent to belittle the challenges of producing and using coal in environmentally acceptable ways. Nonetheless, I believe that the track records of both the coal and utility industries indicate good faith and full competence to address those challenges successfully.

In fact, sometimes we find ourselves rather far afield as we seek solutions not only to environmental problems but the dilemmas of transport and coal utilization. We know that rail, water transport and trucks have specific applications for moving coal—as do, in a sense, electric transmission lines. But none of those is possible or feasible in all cases.

More recently we have begun to turn to coal slurry pipelines, whose application also is limited—particularly by the availability of water. In the not too distant future, we'll see new wrinkles on the slurry pipeline. Oil and processed coal may be slurried into a high Btu product and piped to generating stations formerly dependent on high-priced oil. By the end of the 1980's, we could be shipping coal-derived methanol mixed at the mine with powdered coal. After transport in slurry form, the two fuels will be separated out for vehicle fuel and boiler fuel, respectively.

Beyond transport, much of the threshold technology we are working on today will make two significant contributions.

First, it will permit us to improve our environmental performance in new and exciting ways. For instance, the evidence today suggests our nation and the world has an acid rain problem. The connection between that problem and the burning of coal at best is tenuous. But should circumstantial evidence turn hard with more research, the new technologies should be in place to alleviate the problem and avoid throwing our energy production abilities into a tailspin.

Second, harkening back to the possibility that our coal reserves are not quite so vast as we think, the new technologies will improve the efficiency with which we use coal.

The consequences—in addition to improved environmental performance—include the ability to stretch out our coal supplies and to produce electricity more cheaply for our customers.

In that considerable arsenal of new and enhanced technologies, my particular favorite is magnetohydrodynamics, commonly called MHD. It is a favorite because it has the greatest potential efficiency of all the embryo technologies.

Of several promising technologies it is the only one that creates electricity in a direct conversion process. The result is a great leap in efficiency—from around 35 percent with the contemporary coal-fired plant to the neighborhood of 50 percent at a lower cost. In essence, with MHD we will be able to wring 50 percent more work out of a ton of coal. In so doing, we will match or improve upon the environmental mitigation capabilities of other prospective technologies as well as substantially alleviate transport problems.

In a relatively few years, MHD has advanced rapidly from the research stage to the engineering development phase. In that period, the need for new technical breakthroughs has been eliminated. That is a significant accomplishment for a technology that just a few years ago was no more than an unfunded gleam in the engineers' eyes.

The milestones recorded in the research stage include encouraging results demonstrating high energy extraction capabilities from the generator; the successful production of large-scale super-conducting magnets necessary to the process; combined-cycle system tests that indicate strongly that MHD will meet or better stringent environmental standards; successful operation of the coal combustor and, most recently—in the last few weeks—a clear demonstration that the MHD generator will function for extended periods of time under the high temperature conditions required by the technology.

The latter milestone has led AVCO Corporation working under contract to the Department of Energy—to announce that construction and operation of commercial MHD electric power generators is possible.

If MHD is accorded adequate support from government and industry, I have no doubt that it will advance to the commercial demonstration plant stage by the early 1990s.

MHD, of course, does not stand alone. It is anticipated that atmosphere fluidized-bed combustion plants will be available yet this decade for applications in small power plants and small-scale industrial uses.

Pressurized fluidized bed combustion should be ready for large plants in the 1990s, holding out the promise of improved efficiency and better environmental performance.

Also on tap in the 1990s will be combined gas and steam turbines that may lift the efficiency of coal burning in industrial cogeneration and utility plants to about 45 percent.

By the end of the century, 45 percent efficiency may be attained by fuel cells in relatively small applications. Fuel cells also offer exceptionally efficient, clean burning.

The 1980s and 1990s also promise to see coal assume an important part in replacing liquid and gaseous fuels through coal gasification and liquefaction.

The list of potential applications goes on and on. Collectively, it suggests that coal is just beginning to come into its own. It will, of course, take more than talking and hocus-pocus to go from predictions and projections to reality.

But I believe there is abroad in this country, as there has not been since the Arab oil embargo, a will to accomplish. I believe there is an impetus to re-examine regulatory excesses and to address and solve problems. I believe that decisionmakers realize that only through broad and intelligent use of coal can our nation expect to stay afloat.

There even is a realization that coal is not an alterative; it is a necessity. Economists have been reviewing the figures and concluding that economic growth and growth in the electric supply are in lock-step and that without coal to produce more energy whatever the form, the direction will be down rather than up.

I think our elected leaders know that a shrinking or stagnant economy is not an acceptable political course. I think they know the nation needs the employment growing supplies of energy will power—as well as the nearly 200,000 new jobs in coal mining that are forecast by 1985.

You and I face awesome responsibilities and challenges as we move toward fulfilling our nation's needs. In the 1980s, the 1990s and in the infant years of the new century, we will be tested and we will respond. We will prove that, indeed, coal is not only our ace in the hole but it is king, queen, jack and 10 as well.●

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

SECOND CONTINUING APPROPRIATIONS, 1982

The Senate continued with the consideration of the joint resolution.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the motion to reconsider be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as comanager of the bill, I would set aside the one committee technical amendment in order that Mr. PELL may offer his amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 678

(Purpose: To increase the appropriations for Pell Grants and Supplemental Education Opportunity Grants)

Mr. PELL. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Rhode Island (Mr. PELL), for himself, Mr. MOYNIHAN, Mr. RANDOLPH, Mr. EAGLETON, Mr. KENNEDY, Mr. RIEGLE, and Mr. STAFFORD, proposes an unprinted amendment numbered 678.

Mr. PELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, there is appropriated $160,000,000 for subparts 1 and 2 of part A of title IV of the Higher Education Act of 1965—

(1) of which $80,000,000 shall be available for Pell Grants under such subpart 1, and

(2) $80,000,000 shall be available for Supplemental Educational Opportunity Grants under such subpart 2, which are in addition to the amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981, for such grants.

Mr. PELL. Mr. President, this amendment is cosponsored by Senators MOYNIHAN, RANDOLPH, EAGLETON, KENNEDY, RIEGLE, and STAFFORD.

Mr. President, the amendment I offer today will provide $160 million in additional funding for student financial assistance; $80 million would be provided in additional funding for the basic educational opportunity grant program. This would fund the grant program at $2.454 billion. The other $80 million would restore funding for the supplemental educational opportunity grant program to the level contained in the Budget Reconciliation Act. It would maintain funding for the SEOG program at $370 million, a level that has been in effect for the past 3 years.

With respect to the basic grant program, the figure contained in the continuing resolution in referencing the Labor-HHS-Education appropriations bill as approved by the full Appropriations Committee would eliminate up to 600,000 currently eligible basic-grant students. The amendment I am offering would enable this program to serve up to an additional 300,000 students, for a total of about 2.6 million students nationwide in the 1982–83 school year.

The small increase I am seeking in the basic grant program would have a very dramatic and beneficial impact when considered at the State level. In my own home State of Rhode Island, for instance, it would provide an additional 1,700 grants, which would go largely to students from middle-income families who bear the major part of the tax burden in our Nation and who have been particularly hard-pressed to make ends meet because of the ravages of inflation.

Last year some 16,000 Rhode Island students received basic grants. Approval of this amendment will not mean an increase in the number of recipients, but it will, I am hopeful, help maintain the program at about the current level of participation. It is a no-growth amendment, and is intended to provide at least some protection to those already eligible to participate in this program, as well as those who can meet the new, more restrictive program requirements.

I would also point out that approval of my amendment with respect to the basic grant program would mean funding that program at $196 million less than the authorization figure of $2.65 billion contained in the Budget Reconciliation Act. In fact, this amount represents a cut of more than 7 percent from the reconciliation figure.

Mr. President, this grant program is widely considered the foundation for all student financial assistance. It is the primary program of student aid for millions of young Americans who seek to fulfill the dream of a college education that otherwise would be beyond their reach. It is literally the one program that insures that the doors of educational opportunity will remain open for students from low-and middle-income families.

In regard to the $80 million for the SEOG program, failure to provide this amount will mean that about 139,000 students will be dropped from this program. The effect at the State level would be equally dramatic. In my own home State of Rhode Island, almost 1,800 students would be dropped from the SEOG program unless we appropriate the additional $80 million.

Protection of these students is critically important. As conceived and administered, the SEOG program provides grants of up to $2,000 for students with exceptional financial need. It serves as a supplement to every other program of student aid, and is designed to fill the gap that could exist between the cost of a postsecondary education, on the one hand, and the regular grant and loan programs available to the student, on the other. In many instances, the SEOG program literally makes the difference in determining whether or not a student will be able to pursue a college education at the institution that best meets the student's educational needs.

The importance of the SEOG program is further underlined when you look at what has occurred to other student aid programs. The national direct student loan program has been reduced from $286 to $186 million, borrowing in the guaranteed student loan program has been reduced by one-third. Pell grants will be cut, and other Federal student assistance programs have been held at level funding for at least the past 3 years. All of this has taken place at the same time that the costs of a postsecondary education have outstripped the rate of inflation.

Mr. President, both elements of my amendment are of critical importance to the education of young people throughout our Nation. I would hope, therefore, that my colleagues would join me in supporting this amendment.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATFIELD. Mr. President, may I ask the Senator to yield for a question?

Mr. PELL. Certainly, Mr. President.

Mr. HATFIELD. Will the Senator indicate again the total amount that this represents?

Mr. PELL. The total amount is $160 million divided evenly, 50–50, between the SEOG—the supplemental educational opportunity grants—which will be maintained at the present level, which is what they have had for the last 3 years; the other $80 million would go into the basic grant program, which would protect 300,000 students who would otherwise be dropped from participation in this program.

Mr. HATFIELD. The total would be $160 million.

Mr. PELL. Yes, Mr. President.

Mr. HATFIELD. Mr. President, I know that the subcommittee chairman (Mr. SCHMITT) who is in charge of this particular issue, wants to be heard. Meanwhile, I am happy to yield to the Senator from Wisconsin if he wishes to speak.

Mr. PROXMIRE. Mr. President, there is no one who has done more for education than my good friend from Rhode Island. This is a matter in which he has particular expertise and interest. I certainly understand and appreciate what he is trying to do.

I must resist his proposal, however, Mr. President. The reason is that this Health and Human Services and Education part of the appropriations bill is already $3.2 billion over the President's request. We are doing all we can to put together a resolution that will not be vetoed by the President. It is critical that we do that.

For that reason, Mr. President, I unfortunately must oppose my good friend from Rhode Island, although I fully appreciate the merit of providing as much assistance for young people going to college as we can provide. For that reason, as I say, I unfortunately have to oppose this amendment.

Mr. EAGLETON. Mr. President, I am pleased to support the amendment of the distinguished Senator from Rhode Island

to increase the funding for Pell grants and supplemental educational opportunity grants.

The continuing resolution, in referencing the Labor-HHS-Education appropriations bill and approved by the full Appropriations Committee, will eliminate up to 600,000 currently eligible students from the Pell grant program. Under the present program parameters, students from families with annual incomes of more than $18,000 would be virtually eliminated from participation. Under the continuing resolution, SEOG's will be cut by 22 percent, eliminating some 140,000 students from this program.

Mr. President, I would remind my colleagues that student aid programs have undergone three rounds of cuts since the Reagan administration took office in January: First, rescissions from the fiscal year 1981 budget; second, reductions in program ceilings imposed by the Omnibus Reconciliation Act; and third, further reductions below the reconciliation levels in this continuing resolution.

In 1978, Congress passed the Middle-Income Student Assistance Act, broadening eligibility under the Pell grant program to include students from families with an annual income of up to $25,000.

Although Federal assistance, in the form of grants, loans, and work-study opportunities, has been increased in the last decade, it has not kept pace with rising college costs and the concomitant rising demand for aid. Limited Federal dollars in the Pell grant program were, prior to 1978, targeted exclusively to low-income students. Middle-income families, who do the work of our society, and bear the brunt of the tax burden in our country, found themselves increasingly unable to get any kind of assistance for their children's higher education. Colleges found themselves increasingly facing student bodies made up of the able poor, who could get the full cost of their education paid by various aid programs, and the wealthy, who could afford to pay their own way.

If we do not adopt this amendment to partially restore the Pell grant program, we are in effect reneging on those middle-income students.

Similarly, with the SEOG program. It plays an essential role in the total picture of student assistance in permitting the enrollment of deserving students attending higher priced public and private colleges and universities for whom eligibility under other programs is limited.

Let me illustrate the impact of the lower figure provided in this continuing resolution on a typical SEOG student at a higher priced institution in Missouri.

A student from a family whose annual income is around $25,000, would have a need for $8,000 in aid, under the federally determined needs analysis which would first require a family contribution of $2,500. This student could probably get about $400 under the Pell grant program, $400 under the State grant program, and another $2,500 in institutional support. Under the two loan programs, this student could expect to receive a direct loan of $900, and a guaranteed loan of $1,600. This same student could earn another $1,200 under the college work-study program.

But under this extensive package of student assistance, that student would still be short $1,000. That is where the SEOG comes into play. It is central to the packaging of financing help from all applicable sources to meet the needs of lower middle-to middle-income students.

Mr. President, if we do not adopt the Pell amendment today, many promising careers will undoubtedly be abandoned because of inability to seek further education whether at a college or university or in a trade or technical school. If this amendment is not adopted, not only do these deserving young people lose, the Nation loses.

Mr. DENTON. Mr. President, there is some ambiguity as to how the three criteria should be used to determine institutional eligibility in parts A and B of the institutional aid programs authorized by the Higher Education Act, as amended in 1980. I would like to ask my distinguished colleague from Rhode Island if it is his belief that these three criteria—substantial percentage of students receiving financial aid, high average student awards, and low education and general expenditures—were intended by Congress to be used in the aggregate to determine eligibility, rather than that each should be used separately to exclude an institution from eligibility—the effect of which would be to deny eligibility to an institution that failed to meet any one criteria.

Mr. PELL. That is my understanding of Congress intent. We expected that the language meant that the three criteria should be taken together to determine eligibility.

Mr. HATFIELD. Mr. President, I shall have to join the distinguished ranking minority member of the Committee on Appropriations (Mr. PROXMIRE) in indicating my serious reservation about this add-on. I know that the Senator from Rhode Island has been an extraordinary leader in this area of education, but I believe that, with the budgetary restraints and reductions we have had to make, this would represent a very difficult figure to deal with, both in the conference and later on, perhaps, with getting the signature of the President on the bill.

I think, with those comments, we are ready to go to a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island. The clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) is necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from West Virginia (Mr. ROBERT C. BYRD) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 38, nays 59, as follows:

[Rollcall Vote No. 412 Leg.]

YEAS—38

Baucus	Heflin	Pell
Biden	Heinz	Pressler
Bradley	Hollings	Pryor
Bumpers	Huddleston	Randolph
Burdick	Jackson	Riegle
Cannon	Kennedy	Sarbanes
Chafee	Levin	Sasser
Cranston	Mathias	Specter
D'Amato	Matsunaga	Stafford
Dodd	Melcher	Tsongas
Eagleton	Metzenbaum	Weicker
Ford	Mitchell	Williams
Hart	Moynihan	

NAYS—59

Abdnor	Exon	McClure
Andrews	Garn	Murkowski
Armstrong	Glenn	Nickles
Baker	Gorton	Nunn
Bentsen	Grassley	Packwood
Boren	Hatch	Percy
Boschwitz	Hatfield	Proxmire
Byrd, Harry F., Jr.	Hawkins	Quayle
	Hayakawa	Roth
Chiles	Helms	Rudman
Cochran	Humphrey	Schmitt
Cohen	Inouye	Simpson
Danforth	Jepsen	Stennis
DeConcini	Johnston	Stevens
Denton	Kassebaum	Symms
Dixon	Kasten	Thurmond
Dole	Laxalt	Tower
Domenici	Long	Wallop
Durenberger	Lugar	Warner
East	Mattingly	Zorinsky

NOT VOTING—3

Byrd, Robert C.	Goldwater
Leahy	

So the amendment (UP No. 678) was rejected.

Mr. HATFIELD. Mr. President, I ask unanimous consent that we temporarily lay aside the motion for reconsideration by Mr. BRADLEY in order to take up another amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as comanager of the bill I set aside the technical committee amendment in order to clear the decks for consideration of further amendments.

Mr. President, I ask that the Chair recognize the Senator from Massachusetts (Mr. KENNEDY).

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

UP AMENDMENT NO. 679

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 679.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, strike lines 16 through 21 and insert the following new section:

SEC. 107. Notwithstanding any other provisions of this joint resolution and the provisions of sections 720(b) and 722(a)(1) of the Public Health Service Act, $35,790,000 is appropriated and shall remain available until expended for grants for the construction or expansion of two teaching facilities under section 720(a)(1) of such Act.

Mr. KENNEDY. Mr. President, I rise to offer this amendment. It is basically

designed to improve our health teaching facilities.

I believe the chairman of the Appropriations Committee, Senator HATFIELD, is familiar with the amendment and its objective of improving substantially the health care delivery systems in different parts of our country.

I hope that the committee will be willing to accept it.

Mr. HATFIELD. Mr. President, the Senator is correct. We have discussed this amendment and it has been cleared with both the minority and the majority.

Therefore, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (UP No. 679) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, once again I repeat the all too familiar litany.

I ask unanimous consent to lay aside temporarily the motion to reconsider offered by Senator BRADLEY.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as a comanager of the bill I set aside the technical amendment that is now being held and ask the Chair to recognize for the purpose of a brief colloquy the Senator from South Carolina (Mr. HOLLINGS).

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

DEFENSE APPROPRIATIONS

Mr. HOLLINGS. Mr. President, I thank the distinguished chairman and the distinguished chairman of our committee.

Mr. President, quickly what we have had is quite a group of Senators within the Defense Appropriations Subcommittee and the Armed Services Committee who have a basic concern that in this particular bill we enact the strategic defense policy of this Nation for the next 30 years in a continuing resolution under a crunch of 19 amendments pending now without sufficient time to debate such issues as the B–1, the MX, and several others within the Defense appropriations bill.

The distinguished chairman himself had to withhold his MX amendment because of the crunch of time and did not even get a chance to offer it within the committee.

Pursuant to that concern we had prepared an amendment to have the continuing resolution continue the funding for, say, the B–1 and MX at the 1981 levels until the enactment of the Defense Appropriations Act of 1982.

Both the majority leader, Senator BAKER, and our chairman of the subcommittee——

Mr. GLENN. Mr. President, may we have order so we can hear the Senator?

The PRESIDING OFFICER. May we have order in the Senate?

Mr. HOLLINGS. Mr. President, our majority leader, Senator BAKER, and the chairman of our subcommittee, the Senator from Alaska (Mr. STEVENS), assured us that it is their intent to call for consideration the defense appropriations bill, that has already been reported I know, on November 30. That is the Monday after Thanksgiving.

I note that the continuing resolution contains on page 3 at lines 19 and 20, "A bill that has been reported but not enacted under this particular resolution will be deemed to have been passed by that body or by that House."

So in reality when we adopt a continuing resolution we are adopting ipso facto the Defense Appropriations Act for whatever period of time that the continuing resolution continues to.

Having said that and having had that assurance, and because there are many other Senators who wish to be heard, we wanted to hear from our leader on this score, the distinguished Senator from Georgia and others, who had that same concern.

I wish to thank Senator BAKER and Senator STEVENS for that assurance because it will take between now and that particular time to get the accurate figures, let us say, on some of the cost amounts of the B–1 and perhaps for the MX so we can discuss that intelligently.

We are not trying to filibuster. We are not trying to harm or inhibit in any way the enactment of the Defense Appropriations Act, but we want sufficient time to debate and consider it in the most deliberative body in the world. It just cannot be properly considered in this fashion.

I also wish to thank the Senator from Texas, the chairman of the Armed Services Committee, for his consideration on this matter.

I have that assurance I take it, that we will consider the DOD appropriations bill for 1982 on November 30?

Mr. STEVENS. Mr. President, the Senator has my assurance that we are scheduling it, and it is up to the majority leader to ask for a consent agreement. But we have sought now and have asked for clearance on both sides for the purpose of taking up the defense authorization bill on November 30. That has not been cleared on your side of the aisle, if you will check it, but sometime this evening it is my understanding, when it has been appropriately cleared, the majority leader will make the request for the unanimous consent to schedule that to Commence on November 30. That is the understanding. It is our desire and it is just not my privilege to make that particularly, but it has not yet been cleared on your side. I cannot make the request yet, but that is our understanding. You and I have an agreement. The leader has indicated, Senator TOWER of the authorizing committee has indicated, he has cleared it. But it is not totally cleared, and I cannot make the request.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. STEVENS. Yes.

Mr. TOWER. As far as I know it is pretty well cleared on this side of the aisle. All that is required now—this is not certain, but as far as I can understand, all that is required now—is clearance on the Democrat side of the aisle and we will be scheduled for November 30.

Mr. HOLLINGS. Very good.

Mr. LEVIN. Mr. President, will the Senator yield?

Mr. HOLLINGS. I would be glad to yield.

Mr. LEVIN. I would hope the appropriation bill can be brought out like other appropriation bills for debate. I support the assurances the Senator from South Carolina has received from the Senator from Texas and the Senator from Alaska and others. But just so long as the position I have taken is clear to everybody, there will be an amendment offered relative to the B–1 before this debate is over, because the assurance that we will get to an appropriation bill does not solve the problem in this continuing resolution in what it creates for all appropriation bills, and that is it runs to the end of the fiscal year, and this Senate could adopt an appropriation bill in the area of defense and not have the usual powers that it has with all appropriation bills because there could not be a conference called, because the President could veto that bill and know there is a continuing resolution in place that he can fall back on, all the problems outlined yesterday by Senator STENNIS, Senator PROXMIRE, and Senator ROBERT C. BYRD about the evils of a continuing resolution that runs to the end of the fiscal year, which are not solved by agreeing to bring up the DOD appropriation bill any more than they are solved by Senator BAKER's assurances and Senator HATFIELD's assurances, which I take at full faith, that they will bring out all the other appropriation bills.

This is not the time that I wish to debate, which I am going to do later, the evils of the continuing resolution which runs to the end of the fiscal year. I am going to save that to the end of this debate, close to the end of the process. But I will be using as a vehicle to illustrate those evils an amendment which transfers the money from the B–1 account to the readiness account, which transfers the money to the Indian Ocean readiness, which transfers the money to restore the cut in the authorized strength of the Army, which restores some of the refueling tankers which were cut in order to get our planes to the Indian Ocean.

So while I commend the Senator from South Carolina and the others who are participating in getting that DOD authorization bill to the floor, it does not in any way solve the underlying problems of the continuing resolution running for the entire fiscal year, and I am going to be introducing before the end of the debate a resolution to transfer B–1 funds to the operation and maintenance account and the readiness account because I think unless we do that on this continuing resolution we are half a Senate. We do not have the usual powers of the Senate because of the way this continuing resolution is before us.

One other point before I yield, Mr. President. If we do bring that continuing resolution deadline forward by 6 months to February or March, that solves my problem. I will not be offering the B–1 amendment because the B–1 amendment I am going to offer is used as an illustra-

tion of the evils of a continuing resolution which undermines the appropriation process that has historically belonged to the Congress, and for no other purpose.

I would rather debate it a week from next rather than now. That is the time to debate it. The trouble is we will be debating it with half our traditional power, half of it gone, as outlined yesterday by Senators STENNIS, PROXMIRE, and ROBERT C. BYRD, and about which so many other Members in this Chamber feel so deeply.

Mr. TOWER. Mr. President, will the Senator yield for a question?

Mr. LEVIN. I do not have the floor.

Mr. STEVENS. Mr. President, the difficulty with what the Senator from Michigan says is that the date of March would not make any difference either because as a practical matter if you are right, the amount could be committed before the end of the year anyway.

But the Senator is wrong because there is every incentive to go to a conference with the defense bill.

The House has now included the B–1 and the MX and the major weapons systems, and so has the Senate bill. The differences between the two Houses are the differences in the individual procurement accounts that affect particularly congressional districts, and the imbalance between the two appropriation bills is in procurement of smaller items not in the major procurement items.

This bill is going to come before the Senate before the end of the year because we know they have to be resolved. The Department of Defense is not going to resolve conflicts like that. We can stand and argue about the B–1 all night, if that is what you want. As a matter of fact, I am constrained to say that I really think your side of the aisle does not want this bill to get to conference in time that it can get to the President, to see whether the President wants to sign it, so we can prevent the problems of the antideficiency act and all the other things we have to research Saturday morning.

If we really want to get this bill finished tonight, we can get it finished without talking ad nauseam about the B–1 because we are going to debate the B–1 in connection with the authorization that has already come out from the authorizing committee on November 30. We are going to make you that commitment tonight.

The things you argue about are in the authorization bill. The things you want to change in terms of readiness levels, force levels, the steaming hours, and so forth, the ceilings are set in the authorization bill. We did not set the ceilings in the appropriation bill.

Mr. LEVIN. They are in the appropriation bill.

Mr. STEVENS. In the authorizing bill we fund the levels and in a couple of instances we go above it. We do not make the allocations you suggest. They are set by law. You voted on them, everybody has voted on them. The President signed it or it is going to be law, this one has not been signed yet, I beg your pardon, but it will be law soon.

Mr. LEVIN. Mr. President, if the Senator will yield——

Mr. STEVENS. Yes.

Mr. LEVIN (continuing). We could get to a conference probably by tomorrow morning if we wanted to give up the traditional powers of the Congress to appropriate, which we are doing in a continuing resolution which runs the whole year. We are removing some traditional powers from the Congress. You are right, if you wanted to accept that you probably could get to a conference tomorrow morning. I, for one Senator, am not willing to accept that without as much opposition as I know how to muster. The B–1 is but an illustration of the inherent defects of a continuing resolution which runs for the entire year.

Mr. STEVENS. Mr. President, the trouble is—I do not know why you do not go over to the other body and argue with the majority over there. They set the date. It was set on the other side. As a matter of fact, there was an enormous argument on this side as to whether we should take that date. I am one who argued we should take it because it made sense. Do you know that when we went home for the 1980 elections we went home without passing 13 out of 14 appropriations bills?

We tried all year to catch up with those through supplementals, rescissions, and referrals. We have not been able to get to the 1982 bills, and now we are facing the problems of trying to get a bill that will carry us over to September 30, 1982, so when we come back in January we can get to 1983 maybe, and someday we can catch up.

We have departments and agencies of Government that have not had an appropriation bill for years, and the problem is we are trying to iron that out and find a bridge. We agreed that the House was right on this one, that we should go to September 30. We will debate that later.

I hope we can get to some of these amendments you are talking about. If you want to start debating all night, and it is apparent to me that that is what some people want, I wish you would say it. I wish you would say you do not want the President to have the opportunity to veto the bill and give us a chance to work out a compromise before the deadline tomorrow night because that is what I think is underway here.

Mr. LEVIN. I would be happy to say that on behalf of one Senator.

Mr. STEVENS. That is what I thought.

Mr. LEVIN. I would be happy to say that.

Mr. STEVENS. We should not kid one another that we are sitting around here trying to work things out because really there is a delaying process underway, and that process is to prevent the President of the United States from having an influence in this debate, and the debate is precisely what you say should be the spending levels until September 30 of next year. But as far as defense is concerned you are wrong to think that what you are doing in terms of this amendment will be to change the appropriations bill or the authorization bill you will be debating on November 30. You are trying to change the conference report that is on the authorization bill, that is on its way to the President.

Mr. LEVIN. I am trying to change the appropriation allocations.

Mr. STEVENS. No, you know we funded basically like the authorizations, and you know it and everybody else.

Mr. LEVIN. The Senator asked me the question of whether it is my purpose—I cannot speak for anybody else, and I do not think I can speak for anybody else, but let me reiterate what the purpose is.

Many, if not most, Members of this Chamber believe that there is a radical change taking place in the appropriations process when we adopt for all the Government agencies and all their programs a continuing resolution which runs to the end of the fiscal year.

Now, I am making that allegation. I am going to object as long as I can to that. The B–1 amendment, which I am going to offer, is simply an illustration of how this Senate can act if we decide to act to transfer money, if we decide to, to the Indian Ocean presence which has been cut 25 percent.

Mr. TOWER. Will the Senator yield?

Mr. LEVIN. Not quite yet.

Mr. STEVENS. I think I have the floor.

Mr. LEVIN. If I could finish this sentence.

Mr. STEVENS. What is the question? I yielded to you for a question.

Mr. LEVIN. I am answering your question. My answer to your question is that the purpose of the extended debate which I am going to engage in as one Senator has everything to do with the powers in this Senate and the powers in the Congress.

Mr. STEVENS. I will not yield any further for that, because the Senator is wrong. And the September 30 date, as I understand it, came from the House.

Mr. LEVIN. And they were wrong.

Mr. STEVENS. It was set for the purpose of trying to catch up finally with this process of not doing our work before we go home.

Mr. LEVIN. But it takes the pressure off.

Mr. STEVENS. Before we go back home once again and tell the American public that the Congress is unable to cope with the problems of financing the Government of the United States and, therefore, we are going to let all the loose ends go until we get back. Now, that is wrong. I think we agreed with the House that it is wrong. It is time for us to say this bill—unless we complete these bills in between time—and I give you my assurance that it is my intention to finish the Defense appropriation bill before we go home at Christmas. I think we will be forced to do that because I tell you that the changes that we have made in the bill as they affect some of the appropriations accounts, although they are small changes, drastically affect the employment level potential in very many congressional districts. We do have to iron this out as to where the balance comes in spending the amount of money we have got in the Defense appropriations bill.

Mr. LEVIN. And all the assurances in the world that appropriations bills will be brought at their face value do not solve the underlying problem; and that is that after we adopt the appropriations bills, I am assuming they are going to be brought forward, we do not have the tra-

ditional powers of the U.S. Congress. The President can veto any appropriation bill and know that there is a continuing resolution which has the lowest cover.

Mr. STEVENS. Mr. President, I will not yield any further for that dialog. I assume it is going to take place and I imagine we will have an interesting discussion at 4 to 5 a.m., maybe, depending on how long we want to run this.

It is getting to be a point where it is pretty obvious to this Senator that he is not going to see his little daughter tonight, and I do not know why, frankly. I do not know why, because I think we ought to be able to find some way to stop kidding ourselves about these procedures. There are amendments that are ready to be offered. I am prepared to offer an amendment.

Mr. SARBANES. Will the minority whip yield for a question?

Mr. NUNN. Will the Senator yield?

Mr. SARBANES. Will the Senator from Alaska yield?

Mr. STEVENS. I have promised to yield to the Senator from Georgia, then I will yield to the Senator from Maryland.

Mr. NUNN. Mr. President, just a brief observation. We seem to have flip-flopped completely, because what we have here is we have two major strategic weapons systems, the MX and the B–1, that are in this continuing resolution. Now, the further dilemma is that in the authorization bill we had already passed the authorization bill that was in conference before the President came up with his strategic program. This means that we did not debate either one of these systems on the authorization bill. And here we are at 11 p.m., tomorrow night at 12 p.m. the Government closes down, and unless something is done along the line suggested by the Senator from South Carolina, which I agree with, then we are in the dilemma, not having debated two major systems that will affect our strategic security for the next 30 years on the authorization bill, we are being forced to either fund these in the continuing resolution or if we extend the debate, to close down the Government.

Now, we will look back and say that was a real dilemma unless something was done, it was my understanding 2 days ago or yesterday that the Senator from Alaska was very concerned that if the MX and the B–1 were taken out of this continuing resolution and awaited the appropriations bill, which he now assures us will come up a week from Monday, that that would endanger the MX and the B–1, because there might be people on the House side who would refuse to go to conference knowing that if they did not go to conference there would be no appropriation bill and knowing if there were no appropriation bill there would be no MX and B–1.

Now, we have the reverse situation. The Senator from Michigan is understandably concerned, because he feels that if we put the MX and B–1 in the continuing resolution, where they are now, that that will do away with the incentive, first of all, for the Senate and the House to pass an appropriation bill.

Mr. STEVENS. Will the Senator let me answer that question?

Mr. NUNN. And second, it will do away with the incentive of the President to sign an appropriation bill if the MX or the B–1 were taken out of it. So what we have got is a totally reverse role.

I wanted to make a suggestion. I wanted to suggest to the Senator from Alaska and the Senator from Michigan a way out of this situation is that we do a couple of things. First of all, that we take the suggestion of the Senator from South Carolina, agreed to by the Senators from Alaska and Texas, and that we agree that we will have the defense bill come up a week from Monday, the defense appropriation bill.

Second, that we take the suggestion of the Senator from Michigan and make the dates of the continuing resolution expire on March 30, which is what the President of the United States requested, and which treats this like a continuing resolution rather than distorting the whole appropriation process.

One other solution, which I do not think solves the problems of either side completely——

Mr. TOWER. Will the Senator yield for a question?

Mr. STEVENS. I believe I have the floor and I do want to get on with this amendment. I thought we could accelerate the process. I yielded to the Senator for a question. I would like to know what is the question?

Mr. NUNN. I am proposing the solution. If the Senator wants to stay all night, then I will sit down. You have the floor. If you do not want a constructive suggestion, you solve the problem.

Mr. STEVENS. Mr. President, I say to my friend that it is unacceptable. As chairman of the committee, I am unwilling to recommend that the Defense appropriation bill be the only bill that has a termination date between now and September 30, because it would be a Christmas tree.

Mr. NUNN. That is not what I am suggesting. If the Senator wants to solve the problem, then I leave it to him to solve it. I was making a constructive solution, proposition. If the Senator will not yield enough time to make it, then I will give him back the floor.

Mr. STEVENS. I am not in a position to take the solution that the Senator suggests.

Mr. NUNN. The Senator does not want to listen, obviously.

Mr. STEVENS. Because we are prepared to meet the objectives that were outlined by the Senator from South Carolina, which I assumed that my friend from Georgia agreed to; and that is that we are committed to bring up the bill—the Senator from Tennessee, the majority leader, is here. I would be happy to yield to him to get that commitment now, if you would like. But to go beyond that, I am not empowered to make such a commitment.

I yield to the Senator and I ask unanimous consent that I can yield to the Senator for the purpose of making the commitment. I am still obligated to yield to the Senator from Maryland, I might say to my good friend from Tennessee. But I would like that commitment, if we could.

Mr. BAKER. Mr. President, could we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BAKER. Mr. President, I have the highest regard for the distinguished Senator from Alaska, the majority whip; the distinguished Senator from Michigan; the distinguished Senator from Georgia; and all the other Senators who have been involved in this B–1–MX conversation.

But, Mr. President, it is 11 p.m. There are 15 amendments remaining. Really, I have no desire to stay all night. But, my friends and colleagues, we have no alternative except to finish this bill because tomorrow midnight is hurtling down on us and tomorrow midnight, indeed, the Government will stop, or large chunks of it will. And I hope all of my colleagues and much of the gallery will restrain their applause at that prospect.

But, Mr. President, we must timely finish this. This is not the time, I humbly suggest, to get involved either in a prolonged and heated debate on the MX or the B–1, or to try to devise in detail techniques by which we can resolve this problem.

Let me make this commitment to my friend from Georgia, for whom I have such great respect, the Senator from South Carolina, the Senator from Michigan, and, of course, the Senator from Alaska: I promise, to the extent that the Senate will permit me to do so, that we will take up the Defense appropriation bill. I am prepared and I am ready to ask unanimous consent to set that bill for consideration by the Senate on November 30. That is a date that was arrived at after considerable conversation.

That is the date that was arrived at after considerable conversation. I am prepared to do that, Mr. President, whenever I am advised that the process referred to has been completed. I will do it in any event, but I am prepared to do it.

The second thing is I am prepared, Mr. President, to sit down with any Member of the Senate and find out how we get on with the business of passing this continuing resolution.

I support passage of the continuing resolution. I support the amendment which is at the desk and which I will call up and offer dealing with a further cut in the level of funding. I am bound by the terms. But I am not blind to the possibility of discussing any concerns that anyone else has that we may ameliorate before that amendment is taken up and finally dealt with.

My hope and admonition, Mr. President, is that we will not spend a great deal more time on this tonight but, rather, get on with the 15 or so amendments we have to deal with. I am prepared now to sit down with the Senator from Georgia or the Senator from South Carolina and try to work this out. I think I detect an effort and spirit to try to compromise. If the Senator from Michigan and the Senator from Alaska will permit me and the Senator from Georgia, the Senator from South Carolina, and the Senator from Arkansas will agree, we will find a corner some place and see what we can do to try to work it out.

In the meantime, I urge that we get on with the business at hand.

Mr. STEVENS. I am prepared to yield to the Senator from Maryland and the Senator from Texas for a question before I proceed with the amendment.

Mr. SARBANES. The question I pose to the Senator from Alaska, in view of the comments he was making about trying to get the Government on course and not deal with a situation where we are simply carrying a department on and on and on, is why those appropriation bills that were ready for final action were not acted upon prior to the continuing resolution being before us this evening.

The HUD appropriation bill had a conference report adopted in the House on the 15th of September, and there are three or four other bills on which the conference has acted, all of which could have been acted upon by us in final form and it would have taken those departments out of the continuing resolution and established them on a permanent basis for the rest of the fiscal year.

Mr. STEVENS. The Senator has a good question. We have been going full schedule. I think the chairman of the Appropriations Committee has done an admirable job under the circumstances that I outlined. We are still trying to solve some of the problems from fiscal 1980 and fiscal 1981. We have five bills through conference. As I understand it, this is the sixth one. We have our bill coming to the floor, the defense bill coming to the floor, on November 30.

I might again point out that there were 13 bills in the condition the Senator mentioned when we went home for the election in 1980. They were not moved because of considerations that I do not know, why they were not moved, but they were considerations which guided the majority at the time. There are some considerations here that are guiding the majority. We are trying to find our way around the problems that we face in terms of this budget and trying to get through the 1981 bills which were never finished in the last Congress, trying to get to the 1982 bills. Now I say we are trying to clear the decks. At least let us get started on the 1983 bills. I yield to my friend from Texas for a question or whatever statement he has.

Mr. SARBANES. The Senator has not answered the question.

Mr. STEVENS. I have to my satisfaction. I really have to get on. I took this to try to start on another amendment and I got stuck in a conversation. My friend, the chairman of the committee, would like me to get on with the subject. We will get back to this debate later tonight.

Mr. SARBANES. But we passed on the appropriations bills and they should not be included in this continuing resolution.

Mr. STEVENS. They are included, each one of them, by reference, and will be solved in the normal process as we go through. It is the same thing as passing. I yield to my friend from Texas.

Mr. TOWER. I just want to try to get back to what we were on a few minutes ago.

The Senator from Michigan wants to offer an amendment which, to my understanding, would transfer the funds earmarked for the B–1 to various readiness efforts that he would identify, I suppose, in his amendment. The Senator from Arkansas would like to offer an amendment tonight which would delete the fund for the MX basing mode. Am I correct?

Mr. PRYOR. The Senator from Texas is basically correct. It may go a little further than that, once I offer the amendment.

Mr. TOWER. What I am about to suggest is could we perhaps agree on controlled time and agree on a time certain to vote on those issues tonight?

Mr. PRYOR. I could only answer in the negative, I will say to my friend from Texas. We are talking about a 30-year commitment on our whole strategic weapons system.

Mr. TOWER. May I point out to the Senator from Arkansas we have agreed on this side to take up the defense appropriation bill next Monday.

Mr. STEVENS. A week from Monday.

Mr. TOWER. The clearances are through on this side but not on the Democratic side. It is my understanding that this is what the Senator from South Carolina and the Senator from Georgia would like to do, to take this bill up Monday week.

Mr. PRYOR. I would like to point out the fallacy in us believing that on November 30 when we take up the defense appropriation bill that will cure our problem. Here is the scenario that worries me deeply: One, if we in a continuing resolution which expires on September 30, 1982, include funds for MX, B–1, and the next step, if we include funds there that then go until November 30—please let me finish.

Mr. STEVENS. Mr. President, do I have the floor? Mr. President, I do not yield any further if I have the floor. This conversation could go on all night.

The PRESIDING OFFICER (Mr. JEPSEN). The Senator from Alaska has the floor.

Mr. STEVENS. I will ask my good friend from Oregon if it is possible for him to clear the amendment I started to clear a minute ago. He has sort of a pecking order. I wanted to see if I could move in because the Member that was up next was not here.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, may we have order?

Mr. President, may we have order?

The PRESIDING OFFICER. The Chair will respectfully ask Senators who are trying to resolve whatever they are trying to resolve to please do it in the cloakroom.

The Senator from Oregon may continue.

Mr. HATFIELD. Mr. President, to answer the question posed by the distinguished Senator from Alaska, I regret that his position on the pecking order is not at this particular time, so he can rest for a few moments.

Mr. President, I ask unanimous consent that the motion to reconsider by the Senator from New Jersey be temporarily set aside so that the Senator from New Jersey may offer an amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none. It is so ordered.

Mr. HATFIELD. Now, Mr. President, as comanager of the bill, I would set aside the technical amendment of the committee in order for the Senator from New Jersey to be recognized for the purpose of offering an amendment.

The PRESIDING OFFICER. Is there any objection? The Chair hears none. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I shall gladly yield my place in this line of amendments and choose not to offer the amendment at this time.

Mr. HATFIELD. Mr. President, now that the Senator from New Jersey has yielded, I repeat the same unanimous-consent request that the motion to reconsider be temporarily set aside so the Senator from Arkansas may offer an amendment.

The PRESIDING OFFICER. Is there any objection?

The Chair hears or sees none. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as comanager of the bill, I ask unanimous consent to set aside the committee's technical amendment in order for the Senator from Arkansas to proceed to offer an amendment.

The PRESIDING OFFICER. Is there any objection? Without objection, it is so ordered.

UP AMENDMENT NO. 680

(Purpose: To appropriate the sum of $362 million for the Maternal and Child Health Care Block Grant Act)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS), for himself, Mr. CHAFEE, Mr. SARBANES, Mr. PRYOR, Mr. PELL, Mr. KENNEDY, Mr. LEVIN, and Mr. CRANSTON proposes an unprinted amendment numbered 680.

At the appropriate place in the joint resolution add the following new section:

"Notwithstanding any other provision of this joint resolution there is appropriated the sum of $362,000,000 for the Maternal and Child Health Care Block Grant Act."

Mr. BUMPERS. Mr. President, this amendment restores $30 million to the maternal and child health care program, which is a block grant. It is essentially a screening program for mothers for prenatal and perinatal care, for crippled children's clinics, congenital children's defects, an so on. The House adopted an amount of $331 million. The reconciliation bill contained $373 million.

I think that the Senator from New Mexico, who is the distinguished chairman of the Subcommittee on Health and Human Services, agreed to accept this. My original intent was to offer an amendment to restore the level of funding for this program to the reconciliation level in the hope that we can get the House to split with us between the $373 million and their figure of $331 million. But I know that the Senator from New Mexico is as committed to the continuation of this program as I am.

By accepting this, he has just deprived this body of hearing one of the most

eloquent speeches it will ever have the chance to hear. In the interest of time, I shall forego that and yield the floor.

Mr. SCHMITT. Mr. President, if I had known, if I had just known that I was depriving us of another one of the eloquent speeches of the distinguished Senator from Arkansas and the former Governor of that great State, having had dinner with him once not too many years ago, when I was regaled with one of those speeches, the first in a series of many that I hope will not end in the near future, at any rate—had I known that, I would never have accepted or indicated my acceptance of the Senator's amendment. However, having done so and not wanting to renege on that commitment, I say only that he is correct.

In my commitment to this program, Mr. President, I would have liked to see us go to the reconciliation level and, in fact, had strongly considered that as part of the package, a somewhat broader package, that we discussed prior to the full committee markup that would have included some caps on the growth of entitlements so, once again, we could begin to take advantage of the discretionary programs such as this that are of such great value to the American people.

However, Mr. President, that has not been possible as yet to negotiate. I never give up hope. I think this is a reasonable compromise between us in a very, very important program, and I shall be happy to go to conference with this number.

Mr. CHAFEE. Mr. President, I wonder if the Senator from Arkansas will yield to me 1 minute?

Mr. BUMPERS. I do not have the floor, Mr. President.

Mr. SCHMITT. I shall be happy to yield, Mr. President, since there is no time agreement.

MATERNAL AND CHILD HEALTH CARE BLOCK GRANT

Mr. CHAFEE. Mr. President, I join my distinguished colleague from Arkansas in introducing an amendment to restore funding for the maternal and child health care block grant.

Fiscal responsibility has been our guide this year; we have had to make painful cuts in valuable programs in an effort to tame Federal spending—all with the aim of returning vitality to the Nation's economy. A healthy economy is critically important; so is a healthy population. Adequately funding maternal and child health will contribute to both.

The maternal and child health care block grant suffered enormous cuts earlier this year. In 1981, the program was funded at $456 million. Yet, it was authorized at just $373 million in the reconciliation package. Now, the Senate Appropriations Committee and House of Representatives seek to cut the program even further.

Mr. President, this is not a program which experiments with the taxpayers' money or which gives lavish handouts to undeserving recipients. This is a program which directly benefits mothers and children—and which indirectly benefits all of us.

It indirectly benefits all of us because it is enormously cost effective. Simply put, its emphasis on preventive health saves dollars. It directly benefits mothers and children by providing desperately needed services to them.

Under the maternal and child health care program, approximately 1 million children receive checkups, immunizations, and other basic health services for hemophilia, genetic disorders, lead-based paint poisoning, and other disabling conditions. Under the program, an estimated 1 million mothers receive prenatal and perinatal services. These services go primarily to poor families who are not eligible for medicaid and who would likely be without any care were it not for this program. Maternal and child health care programs assist in identifying pregnant mothers who are at high risk and have a direct impact on the number of children born with handicaps and on the development of preventable diseases.

Studies have shown direct correlations between infant mortality rates and levels of care provided for mothers. And, MCH directly affects those levels of care. The infant mortality rate in this country is an outrage—and an embarrassment. One out of 72 babies born in America dies. One out of 72. In the District of Columbia, that figure is 1 out of 33 among nonwhites. We can directly influence those rates, save the lives of American babies, and lessen the misery of thousands of families by putting our support behind this program.

What are the consequences of not adequately funding maternal and child health, Mr. President?

In my own State of Rhode Island—which, I believe, operates one of the best programs in the Nation—the effects of proposed cutbacks would be devastating. And Rhode Island's case is representative of the Nation's. In Rhode Island alone, several thousand fewer women would receive pre- and peri-natal care. Thousands of children would not receive "well care" or home health care or be able to participate in a lead-poisoning program. Do we want to go back to the days when hundreds of thousands of children suffered brain damage because they ingested lead-based paint and were not adequately screened or treated? I do not believe that we do, especially when such horrid effects can be prevented.

If the costs in human terms are not convincing enough evidence that maternal and child health warrants our help, then the dollars and cents figure will make the point.

In 1977, GAO reported that the cost of genetic screening at birth, along with early treatment of seven common disorders, was less than one-eighth the cost of caring for an impaired child over a lifetime.

In Texas, a recent study showed that each $1 spent on preventive care for children resulted in an $8 savings in long-term costs. Basic vaccinations—which as many as 40 percent of young American children still do not receive—are enormously cost-effective. The Center for Disease Control has estimated that the $180 million we spent on the measles vaccination program between 1966 and 1974 saved $1.3 billion in medical and long-term care costs. This says nothing of the reduction in instances of deafness, retardation, and other crippling effects that has occurred.

Maternal and child health dollars are not only dollars well-spent; but they are dollars which we cannot afford not to spend. I urge my colleagues to support this amendment.

Mr. President, I must say it seems to me so wise that the distinguished Senator from New Mexico is accepting this, because this is one of the outstanding programs. Unfortunately, it has been cut and I am delighted we are going to restore it to the funds suggested. I would like to see it go higher, but we are delighted to see it go that far.

Mr. CRANSTON. Mr. President, I am a cosponsor of and strongly support the amendment of the Senator from Arkansas (Mr. BUMPERS) and the Senator from Rhode Island (Mr. CHAFEE) to provide funding for the maternal and child health care block grant at the level authorized in the reconciliation bill.

Mr. President, this program is critical to the health and well-being of millions of low-income mothers and children throughout this Nation. It is a source of essential immunization and basic health services for infants and young children, and vital prenatal and delivery services for pregnant women.

The importance of maternal and child health care—both for those directly affected and for our Nation—cannot be over-estimated. During the last Congress, I chaired hearings on efforts needed to improve pregnancy outcome and reduce infant mortality. The overwhelming testimony at that hearing indicated that the single most important step we could take to prevent poor pregnancy outcome and decrease infant mortality would be to insure that every pregnant women received proper prenatal, delivery and postnatal medical care. The level of funding for the maternal and child health program approved in the reconciliation bill already represented a reduction in the amount of money available in fiscal year 1981 for these programs—further reductions are simply unconscionable.

Mr. President, the health and well-being of the children of this Nation should be of the utmost importance for every Member of this body. The future of our children represents the future of this Nation. By depriving these children of adequate health services, we deprive them of the opportunity to grow up strong and take their places as productive members of our society, and simply increase the need for costly remedial health services at a later date.

I urge support of the amendment of the Senators from Arkansas and Rhode Island which would simply restore funding for this important program to the level approved in the reconciliation bill.

Mr. KENNEDY. I rise in support of the amendment of the Senator from Arkansas.

All of us are aware of the importance of maternal, infant, and child health care services to healthy children and, ultimately, healthy and productive adults.

These services promise significantly reduced infant mortality, birth defects, mental retardation and other preventable handicapping conditions. They promise improved health status for handicapped children.

The effectiveness of prenatal care in

reducing illness or death in early infancy is well documented.

In 1977, neonatal and early infant death rates were four times higher for patients with no prenatal care.

Without prenatal care a pregnant woman is three times as likely to have low birth weight child.

Seventy-five percent of the risks associated with low birth weight can be identified in a first prenatal visit.

Screening programs for newborns and children can identify preventable or treatable handicapping conditions.

A 1977 GAO report found that the cost of screening at birth plus early treatment for seven common disorders was less than one-eighth the projected lifetime cost of caring for an impaired child.

The maternal and child health program is the principal means by which poor or geographically isolated pregnant women and children gain access to needed health services. Further cutbacks in the funding for this critical health care program will only serve to increase health care costs unnecessarily for the treatment of medical conditions that are preventable or curable at birth.

In my own State of Massachusetts the 18-percent reduction in the authorized level will have a considerable impact on services: more than 1,000 handicapped children will no longer be served in special handicapped clinics; 13,000 less children will be screened for lead paint poisoning, a particular problem in older cities; and hospital care for handicapped children will be slashed by nearly $50,000.

Further cutbacks will only exclude more mothers and children from access to essential services.

I urge adoption of the amendment.

Mr. SARBANES. Mr. President, I am very pleased to join the Senator from Arkansas and the Senator from Rhode Island as a cosponsor of this amendment to bring the maternal and child health care block grant up to the funding level in the Reconciliation Act.

The authorized figure of $373 million in the Reconciliation Act still means a cut of 17 percent from last year's funding figures. However, under the continuing resolution, the lower House-passed figures of $331 million would apply, which means a sharp curtailment in services provided by this very worthwhile program.

Earlier this week, I visited the John F. Kennedy Institute in Baltimore, which annually serves 5,500 handicapped children suffering from mental retardation, physical handicaps, or other disabilities caused by genetic, prenatal, or post-birth damage to assess how the administration's cuts will affect their services. Since the institute opened in 1967, 40,000 children and their families have been helped toward independence.

If the cuts go though as recommended by the administration, the Kennedy Institute and other programs that diagnose handicapped children and provide preventive and primary care will have their funds severely cut. This is a penny-wise and pound-foolish policy. The maternal and child health care funds prevent institutionalization of many handicapped children by teaching them and their families skills to enable the children to become and remain independent. This not only allows the family to remain intact and the child to have his or her own dignity, it also makes financial sense. Between $18,000 and $28,000 in State and Federal funds a year is saved for each child who avoids institutionalization.

During the visit to the Kennedy Institute, the doctors, professionals, and State officials unanimously agreed that the maternal and child health care program is very cost effective. This program catches many serious handicaps by early diagnosis and allows for remedial steps to be taken before complete deterioration or death occurs. Without early diagnosis, adequate health care, and rehabilitation, it will cost more in the future to care for the resultant severe health problems and a lifetime of institutional care.

The Kennedy Institute not only cares for and rehabilitates the newborn and the very young, it also conducts classes that enable school-age children to enter or return to public schools. Ninety percent of the children who go through a 1- to 2-year stay at the Kennedy Institute go on to public school and continue on their way to being an independent and contributing member of our society. Their independence is many times a long-fought battle over seemingly insurmountable physical and mental impairments. These battles are made possible with the assistance from the maternal and child health care program.

A cut of 50 percent in the funds of institutions and programs such as the Kennedy Institute will severely limit the ability to provide adequate service to the millions of handicapped children in need. Private sources of funds are of course being explored. The Kennedy Institute has strong support from the private and business sector of the community—but it cannot meet the gap caused by the immediate and severe reduction in Federal funds.

This program must continue as a combined effort among the Federal and State governments, the private sector, the community, and the family. Without this partnership and adequate funding for the maternal and child health care program, we will not be able to meet the needs of our children. I therefore urge the adoption of this amendment.

Mr. BRADLEY. Mr. President, earlier this year, Congress created a new maternal and child health block grant by consolidating seven programs which provide health services to mothers and children. The maternal and child health program, first authorized by Congress in 1935 under title V of the Social Security Act, is the central core of the new block grant. This block grant also includes the supplemental security income disabled children's program, lead-based paint poisoning prevention, sudden infant death syndrome, the genetic diseases program, hemophilia, and adolescent pregnancy services.

Acting under budgetary pressure, Congress reduced the funding for the new block grant for fiscal year 1982 to $373 million, 17 percent below the 1981 level for the component programs. If the provisions of the continuing resolution now before the Senate remain unchanged, funding for the maternal and child health block grant would be cut even further, to the $331 million approved by the House.

Mr. President, I believe that it would be irresponsible of the Senate to allow funding to fall to this highly inadequate level. I am therefore pleased to cosponsor the amendment offered by Senator BUMPERS to restore moneys for these essential health services.

It has often been observed that our children are our future. Yet what do our rhetorical commitments to our children mean when 1 in every 72 infants—and 1 in every 47 nonwhite infants—dies each year? When an estimated 9 million children have no regular source of primary health care? When two out of every five children are not fully immunized against one or more of the major childhood diseases we know how to prevent? And when 1 in 17 pregnant women—1 in 10 black mothers—and one in four mothers under the age of 15—receive either no prenatal care at all or none until the last 3 months of pregnancy?

While the health status of American children has improved dramatically in recent decades, not all groups have shared equally in this progress. Sharp disparities persist in both health status and the use of health services according to family income, ethnic background, parental education and geographic location. These disparities highlight the continuing relevance of these maternal and child health programs. These programs support a network of clinics in most countries across the country to which low-income families can go for routine preventive health care for their children.

A million children get checkups, immunizations, dental care and other basic health services through the title V maternal and child health program. Nearly a million mothers receive prenatal and delivery services under title V. Another 3 million children receive services related to hemophilia, genetic disorders, other handicapping conditions and sudden infant death syndrome.

Mr. President, the dollars spent on prenatal care and preventive health services for children are dollars well-spent. The provision of adequate prenatal care to high-risk women has its payoff in the funds not spent later for the care and possible institutionalization of children born with handicapping conditions that could have been prevented. Providing low-income families with access to comprehensive primary and preventive services has its payoff in the reduction in future hospitalization costs, as a recent Federal study has demonstrated.

Because preventive services and the provision of primary care require current expenditures, such programs are vulnerable in times of budget-cutting pressures. Such is the situation we face today. In the name of fiscal necessity, we are being urged to follow a course which will almost surely result in greater costs later—for the hospitalization and medical care that might have been made unnecessary had an ounce of prevention been provided. This amendment is that ounce of prevention.

Mr. President, improving the health of today's children not only immediately enhances the quality of their lives, it also expands their potential for signif-

icant contributions to the Nation as adults.

I join in urging my colleagues to support this amendment to restore funds for these vital maternal and child health programs.

I compliment the Senators for offering the amendment. I think it is very critical.

Mr. BUMPERS. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 680) was agreed to.

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 681

(Purpose: To provide funds for health promotion and disease prevention activities, and for activities under the Developmental Disabilities Assistance and Bill of Rights Act of 1981)

Mr. HATFIELD. Mr. President, as comanager of the bill, I ask unanimous consent to set aside the committee technical amendment in order to entertain another amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I ask the Chair to recognize the Senator from Utah for the purpose of offering an amendment.

Mr. HATCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 681.

Mr. HATCH. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, beginning with line 19, strike out through line 2 on page 26, and insert in lieu thereof the following:

SEC. 123. Notwithstanding any other provision of this joint resolution, funding for sections 501 (a), (b), and (c) of the Refugee Education Assistance Act of 1980 shall be at the levels and under the terms and conditions of the Labor-Health and Human Services Education Act, 1982, as passed by the Senate.

SEC. 124. (a) Notwithstanding any other provision of this joint resolution, there are appropriated to the Department of Health and Human Services $61,180,000 for activities under the Developmental Disabilities Assistance and Bill of Rights Act of 1981, and $1,754,000 for health promotion and disease prevention activities of the Office of the Assistant Secretary for Health.

(b) The amounts appropriated in subsection (a) are in substitution for and not in addition to any amount appropriated under this continuing resolution for the activities referred to in such subsection.

Mr. HATCH. Mr. President, this amendment restores $8.43 million to the appropriations levels for the developmental disabilities program bringing it to the reconciliation mark of $61,180,000 and funds the Office of Disease Prevention and Health Promotion within the Department of Health and Human Services by providing $1,754,000 instead of the $1 million level under the continuing resolution.

The Developmental Disabilities Act was originally passed in order to coordinate and provide services where necessary for the more severely handicapped persons of our Nation. This law is a vehicle to help eliminate gaps in services with emphasis on providing services to rural and underserved regions.

The Office of Disease Prevention and Health Promotion in the Office of the Assistant Secretary for Health is responsible for disease prevention policy and planning efforts, and also coordinates prevention-related activities in all DHHS agencies.

Mr. President, I think this is a worthy amendment. I really hope all of my colleagues will consider helping these people, because I believe that without this $8.43 million, the developmental disabilities program will be severely hampered and severely injured. I am hopeful that the manager of the bill may accept this amendment.

Mr. SCHMITT. Mr. President, may I just very briefly suggest the absence of a quorum so we may see a copy of the amendment?

Mr. HATFIELD. Mr. President, I ask unanimous consent to temporarily set aside this amendment in order to proceed with another amendment so we not lose time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, the Senator from Pennsylvania (Mr. SPECTER) is in the Chamber. I ask unanimous consent that the motion to reconsider of the Senator from New Jersey be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as a comanager of the bill, I ask unanimous consent to set aside the committee technical amendment and ask the Chair to recognize the Senator from Pennsylvania (Mr. SPECTER) for the purpose of offering an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. I wonder if we might defer this amendment until the arrival of Senator ROBERT C. BYRD, who is interested in this amendment. I understood that he was to be back in the Chamber shortly.

Mr. HATFIELD. He is here. May I have the attention of the Senator from Pennsylvania? The Senator from West Virginia is present.

UP AMENDMENT NO. 682

(Purpose: To amend H.J. Res. 357 to maintain existing enforcement authority of the Mine Safety and Health Administration)

Mr. SPECTER. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. SPECTER), on behalf of himself, Mr. RANDOLPH and Mr. ROBERT C. BYRD, proposes an unprinted amendment numbered 682:

At the end of the joint resolution, add the following new section.

SEC. Notwithstanding any other provision of this joint resolution, the Mine Safety and Health Administration shall continue during the term of this joint resolution to have the same enforcement authorities which where vested in it on the last day of the Fiscal Year, 1981.

Mr. SPECTER. Mr. President, the purpose of this amendment is to leave with the Mine Safety and Health Administration (MSHA) the jurisdiction over surface stone, sand, gravel, clay, and colloidal phosphate mines.

We had thought that this issue had been resolved in the Appropriations Committee, but I am now advised that there is a question as to whether these mines remain under the jurisdiction of MSHA. Therefore, I offer this amendment, so that there may be no disagreement as to the status of these mines.

Under the current arrangement, it may be that these mines would no longer be under the jurisdiction of MSHA, and some may believe that they would then fall to the jurisdiction of OSHA; but that, in fact, is not so. The status of the House language, in fact, would remove these mines from MSHA, but they would not be covered by the appropriate OSHA legislation.

Indeed, in addition to excluding the sand and gravel mines, which employ about one-third of the 39,500 surface mining work force, there would be excluded another one-third of the work force of some 37,500 people employed in such surface stone mining operations as limestone, granite, and slate mines.

There is a major health hazard which is connected with these mines, which has caused the deaths of some 26 people from January 1, 1981, through November 6, 1981.

There has been some dispute on this issue in deliberations in the Appropriations Committee, and I have the up-to-date statistics provided by the Mine Safety and Health Administration of the U.S. Department of Labor, which details the deaths and the individuals. I ask unanimous consent that this material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JANUARY 1, 1981–NOVEMBER 6, 1981

Sand and gravel (one contractor)	7
(Surface) stone (two contractors)	16
(Surface) clay	3
Total metal	26
Total nonmetal	74

Between 1978 and June 1981, 139 surface sand, gravel, stone workers have been killed.

FACILITIES AT SAND AND GRAVEL, SURFACE STONE AND CLAY MINES, 1981

Date, number killed, and place (city, State):

January 7, 1981, 1, Blue Ridge, Va.
February 14, 1981, 1, Lecanto, Fla.
February 17, 1981, 1, Nazareth, Pa.
April 10, 1981, 1, Gantts Quarry, Ala.
April 27, 1981, 1, Jamestown, S.C.
May 10 1981, 1, San Manuel, Ariz
May 17, 1981, 1, Mobile, Ala.
May 27, 1981, 1, Billings, N.Y.
June 18, 1981, 1, Ragland, Ala.
June 16, 1981 (died July 1), 1, Trona, Calif.
July 7, 1981, 1, McIntyre, Ga.

July 7, 1981 (died July 17), 1, Wausau, Wis.
July 7, 1981, 1 Bethel, Mo.
July 21, 1981, 1, Aberdeen, Miss.
July 28, 1981, Lilesville, N.C.
July 31, 1981, 1, Great Bend, Kans.
August 24, 1981, Irwindale, Calif.
August 31, 1981, Hooksett, N.H.
September 3, 1981, Ray's Community, Ala.
September 17, 1981, Waco, Tex.
September 22, 1981, 1, Morehead, Ky.
October 7, 1981, 1, Eckerty, Ind.
October 11, 1981 (died October 12, October 25), 2, Ft. Worth, Tex.
October 22, 1981, 1, Upton, Wyo.
October 22, 1981, Richmond, Ind.

Mr. SPECTER. Mr. President, the National Limestone Institute is in favor of retaining jurisdiction in MSHA, and this is set forth succinctly in a letter dated November 18, 1981, from James H. Williams, president of the National Limestone Institute, Inc., which says in pertinent part:

This industry wants relief from over-regulation springing from the Mine Safety and Health Act, but it does not choose to accept on blind faith that the transfer to OSHA, an already monetarily and functionally over-extended regulatory agency, will provide the necessary relief we seek. Until the Secretary of Labor, who has administrative authority over both MSHA and OSHA and who would be responsible for implementation of the intra-departmental transfer, demonstrates the Administration's support for transfer and demonstrates that OSHA will provide the type of even-handed regulation we all seek, Congressional action on the transfer proposal is not prudent nor in the long-term best interest of the industries it seeks to assist.

I ask unanimous consent to have this letter printed in the RECORD in full:

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL LIMESTONE INSTITUTE, INC.,
Fairfax, Va., November 18, 1981.

TO MEMBERS OF THE U.S. SENATE: During consideration of the Continuing Resolution, you will be asked to consider a legislative amendment proposing intra-departmental reorganization, and you will be asked to make this reorganization without knowing the Administration's position on the matter or how the Administration intends to implement it. In addition, there is deep division as to its long-term merits within the industries which would be affected by this reorganization.

The proposed Bumpers Amendment seeks to transfer regulatory jurisdiction over health and safety matters for the surface crushed stone industry from the Mine Safety and Health Administration to the Occupational Safety and Health Administration, by defunding MSHA's regulatory activity over this industry. The Administration has not testified on this proposal, but the input they have had, through contacts with the Senate and House Appropriations Committees (and Senate and House Labor Committees) has raised significant, negative questions on the implementation of such an intra-departmental reorganization. In addition, the Senate Appropriations Committee, during considerating of the 1982 Labor HHS Appropriations Bill, defeated the Bumpers Amendment by a vote of 16 to 11.

This industry wants relief from over-regulation springing from the Mine Safety and Health Act, but it does not choose to accept on blind faith that the transfer to OSHA, an already monetarily and functionally over-extended regulatory agency, will provide the necessary relief we seek. Until the Secretary of Labor, who has administrative authority over both MSHA and OSHA and who would be responsible for implementation of the intra-departmental transfer, demonstrates the Administration's support for transfer and demonstrates that OSHA will provide the type of even-handed regulation we all seek, Congressional action on the transfer proposal is not prudent nor in the long-term best interest of the industries it seeks to assist.

It is absolutely shocking that the Congress would proceed to effect administrative reorganization of this magnitude *without first knowing* the position of the Department in which the reorganization would take place and, more importantly, how OSHA would specifically regulate our industry once given that responsibility.

We strongly urge you to oppose passage of the Bumpers Amendment to the Continuing Appropriations Bill.

Sincerely,

JAMES H. WILLIAMS,
President.

Mr. SPECTER. Mr. President, I have a letter from the Honorable James J. Donovan, Secretary of the U.S. Department of Labor, dated November 19, 1981, which sets forth the agreement of the Department of Labor that these mines should remain under the jurisdiction of MSHA. I ask unanimous consent to have this letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD in full, as follows:

U.S. DEPARTMENT OF LABOR,
SECRETARY OF LABOR,
Washington, D.C., November 19, 1981.

Senator ARLEN SPECTER,
U.S. Senate, Washington, D.C.

DEAR SENATOR SPECTER: In response to your inquiry concerning the variety of proposals introduced amending the Federal Mine Safety and Health Act of 1977, I would like to provide you with some general considerations which the Administration believes are important in improving mine safety and health.

It must be understood from the outset that the basic purpose of the Mine Act—the protection of the health and safety of the nation's miners—is the Administration's paramount concern. However we believe that the regulatory role of the Federal Government has too often proven to be an obstacle to effective safety and health efforts. Together we must work to create an atmosphere that will better promote safety and health in our Nation's mines.

Along this line, a significant component of the Federal enforcement scheme under the Mine Act has been the statutory requirement for the imposition of mandatory civil penalties for every violation under the Act. There has been considerable criticism of this inflexible approach to monetary fines. We believe that a reexamination of the current civil penalty system is in order to determine how it could be reconstituted in a way which would effectively recognize an operator's actual safety and health record and provide more effective incentives to reduce injuries and illnesses.

Additionally, in carrying out the Department's responsibilities, the agency must have the flexibility to direct its enforcement capability toward those operations which pose significant threats to health and safety and away from areas which have been shown to present few risks. We have found that a relatively small percentage of all mining operations generally account for a high percentage of all mining injuries. It would appear that a greater degree of flexibility in utilizing existing enforcement resources could yield tangible health and safety benefits and could provide additional incentives for mine operators to improve safety and health conditions.

As enforcement alone is clearly not the key to improved health and safety, a necessary adjunct to our enforcement program will be concerted attempts to encourage further cooperative endeavors among industry, labor and MSHA. There are at least three areas needing attention.

First, we must find ways to provide the government's valuable assistance to industry without the constant threat of enforcement action. Programs like the recently initiated Compliance Assistance Visits (CAV) must be continued and expanded. Consultative approaches to health and safety problems, such as the Mine Safety Analysis program in effect in the Commonwealth of Kentucky should be carefully examined for possible application on a nationwide basis.

Second, we must explore the possibility of further expanding the cooperative efforts between MSHA and the States in order to make optimum use of the resources which both have to offer in the mine safety and health arena.

Third, we must reexamine the training requirements mandated by the Mine Act. While we believe that health and safety training is essential to a comprehensive health and safety effort, and that Section 115 has been implemented successfully in many areas, it is apparent that more flexibility is required in other areas.

We recognize that there are other substantive issues presented in pending legislation which should be addressed. One is the effort to exempt surface stone, sand, gravel, colloidal phosphate and clay operations from MSHA's jurisdiction. Sand and gravel and surface stone operations are more hazardous than surface bituminous coal operations. In each year since 1974, sand and gravel and stone mines have accounted for approximately one-half the fatalities in the metal and nonmetal mining industry. For example, over the last three years the fatality rate in sand and gravel mines averaged almost three times the fatality rate in surface bituminous coal mines. In our view, these statistics demonstrate the hazardous nature of the sand and gravel and surface stone segments of the mining industry.

Eliminating MSHA's authority to inspect these operations would effectively exclude a substantial portion of this hazardous industry from any regular Federal health and safety inspections. OSHA is currently subject to certain provisions in its appropriations bill which exempt most work places employing 10 or fewer employees. The exclusion would apply to 86 percent of sand and gravel mines and 66 percent of surface stone mines. Thus most of this portion of the mining industry would be all but totally exempt from federal safety and health inspections. In transferring that responsibility to OSHA, it must also be recognized that OSHA's resources are being concurrently reduced.

We look forward to working with you and other interested members, as well as the affected persons in the mining industry, in our mutual efforts to improve safety and health conditions in the Nation's mines.

The Office of Management and Budget advises that it has no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

RAYMOND J. DONOVAN.

Mr. SPECTER. Mr. President, I shall read only two paragraphs which are the relevant portion. Mr. Donovan's letter states as follows:

We recognize that there are other substantive issues presented in pending legislation which should be addressed. One is the effort to exempt surface stone, sand, gravel, colloidal phosphate and clay operations from MSHA's jurisdiction. Sand and gravel and surface stone operations are more hazardous than surface bituminous coal operations. In each year since 1974, sand and gravel and stone mines have accounted for approximately one-half the fatalities in the metal and nonmetal mining industry. For example, over the last three years the fatality rate in sand and gravel mines averaged almost three times the fatality rate in surface bituminous coal mines. In our view, these statistics demonstrate the hazardous nature of the sand and gravel and surface stone segments of the mining industry.

Mr. Donovan then concludes with the statement:

The Office of Management and Budget advises that there is no objection to the submission of this report from the standpoint of the administration's program.

In essence, there is a pressing need, from the point of view of safety, to have this jurisdiction retained in MSHA, as demonstrated by the conclusive statistical data. The retention of jurisdiction is supported, as noted, by the administration.

I yield the floor.

Mr. BUMPERS. Mr. President, first of all, let me say that the way this bill reads right now is not only the way it should read, but also, it is precisely the way the Senate has passed it twice, and it is precisely the way the House has passed it twice.

For some reason or other, like Rasputin, it seems to be coming back to haunt us. But let me give the Senate the reasons why it is good law.

In 1977, when the U.S. Congress passed the Mine Safety and Health Act, we passed it with the intention of protecting coal miners in this country. It is not that there are not other occupations that are hazardous, but we were trying to protect deep-mined-coal miners primarily and secondarily surface-coal miners.

Mr. President, like all good new administrations and agencies, the Mine Safety and Health Administration, with a great deal of fervor and dedication, rushed out and drafted several volumes of regulations.

They started regulating the digging of cable trenches by the telephone companies. Somehow or other, they even started regulating the harvesting of pineapples in Hawaii. They started regulating a kitty litter operation in Tennessee. They even started regulating a plant in Tennessee that has 200 employees, because it was within a quarter mile of a quarry.

Mr. President, may we have order? I would rather talk to an empty Chamber than a Chamber that is busy talking about something else.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BUMPERS. It was a classic case of a bunch of bureaucrats overstepping all the bounds of reason, far beyond anything Congress ever intended for them.

And these people were rightfully incensed and they came up here and they asked some of us to give them a little relief, and so we did.

We offered this amendment here the first time I believe in 1979 to exempt people in the crushed-stone business, in the clay business, in the colloidal phosphate business and sand and gravel business.

Mr. President, what this does is simply remove the jurisdiction for occupational safety of these industries from the Mine Safety and Health Administration over to the Occupational Health Administration.

They are not going to be left to their own devices. They are going to be protected and this will automatically occur.

But one of the points I make first off is the Senator from Pennsylvania has said that the Limestone Institute does not want in on this; they do not want to be transferred to OSHA.

Let me tell the Senators something. Of all the limestone operators in this country, the Limestone Institute only represents about 25 percent of them and the other 75 percent do want to be included in this amendment.

But let us look at the safety record of these people.

Sand and gravel operators in this country have a better safety record, a smaller number of injuries and accidents than the residential building construction industry, the repair garage trade, Sears, Roebuck and all other general merchandise stores, motor vehicle body manufacturers, and a whole host of others.

The stone industry has a better safety record than plumbers, the heating and air-conditioning industry, the painting industry, the mason industry, and a whole host of others. Why would we want to regulate those people the same way we regulate people who go down in the bowels of the Earth, a mile down into the bowels of the Earth to mine coal? Talk about apples and oranges. This is a classic case of it.

Everyone here weeps tears everyday about small business. We have 7,600 sand and gravel operators in this country and 6,000 of them employ fewer than 10 people.

Are we going to regulate those people who have a little barge out in the Arkansas River, sucking sand off the floor of the river, the same way we would people who go a mile into the bowels of the Earth to mine coal? Does that make sense? If it does, vote for the amendment of the Senator from Pennsylvania. If it makes sense to regulate an industry that has a better safety record than Sears, Roebuck, the same way we would people who go down to the bowels of the Earth a mile to mine coal, vote for the Senator from Pennsylvania. If Senators think that is nonsense, vote against it.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. BUMPERS. I am happy to yield.

Mr. LONG. Are we to understand that this Mine Safety Act applies to one simply digging gravel out of the stream?

Mr. BUMPERS. Absolutely.

Mr. LONG. I just asked the question.

Mr. BUMPERS. Let me correct that to say the way the bill reads now it will not, but if we adopt the amendment of the Senator from Pennsylvania, it will put them right back under the Mine Safety and Health Administration.

Mr. LONG. In the State of Louisiana, the parish where I live is bounded by the Amelia River. Most of the year you can wade across and it never gets up to your knees, but a huge amount of gravel is mined from that river. They just dig it out. They just pump it out. And no one gets down and digs it by shovel and no one comes into contact with it.

Am I to understand that under this amendment the Mine Safety Act would apply to simply digging that gravel up and putting it on the truck?

Mr. BUMPERS. The Senator is dead right.

Mr. LONG. No one goes underground; they do not have to blast anything. The machine just digs the stuff up and puts it on the truck.

Mr. BUMPERS. The Senator is dead right.

So far in 1981 they had nine deaths in that business. I want to get that in the RECORD. I am not going to bore Senators with it, but I can tell Senators that two of them were electrocuted standing in water and holding a hot wire and two others fell overboard and drowned, and all the regulations on the Earth are not going to keep that kind of accident from happening. In spite of that they have a better safety record than hotels and motels.

Mr. LONG. It seems that a person would be in greater danger if he just went out in the woods looking for pine nuts because a limb might fall on his head.

Mr. BUMPERS. The Senator is dead right, and he can understand why those people got properly agitated when all of a sudden they are faced with this regulation when they have been taking sand and gravel out from little streams in Louisiana and Arkansas all their life.

Mr. SCHMITT. And New Mexico.

Mr. BUMPERS. And New Mexico.

Mr. SCHMITT. We do not have a stream, if the Senator will yield.

Mr. BUMPERS. There are small streams, a lot of them. So some of the bigger operators have the barges out in the middle of the river with a tunnel to the shore so they can tunnel the sand from the barge to the shore. That is just what happened and Congress never intended it and I have been trying to get it corrected for the last 3 years. Finally, I got it down and now the Senator from Pennsylvania is trying to undo it.

Mr. LONG. Will the Senator yield?

Mr. BUMPERS. I yield.

Mr. LONG. Is that not the kind of thing Ronald Reagan promised trying to save us from putting Government on our back where it was never intended?

Mr. BUMPERS. I do not know anyone in this body who would holler louder amen than the President of the United States.

Mr. President, I yield the floor.

Mr. SCHMITT. Mr. President, I believe the distinguished Senator from Oklahoma wishes to make a comment. I yield to him at this point.

Mr. NICKLES. Mr. President, I rise to support this amendment offered by my colleagues, Senator BUMPERS and Senator SCHMITT. I want to take this opportunity to explain my support, to remind my colleagues of the recent history of this MSHA transfer provision, and to address the concerns of opponents of this amendment.

The Labor Subcommittee has already conducted hearings on and has reported favorably a transfer bill, S. 351. During the course of those hearings I heard the horror stories of small family-run sand and gravel mines and stone quarries being forced out of business due to inappropriate and unnecessary regulation and inspection. The Federal Mine Safety and Health Act of 1977 was written for and by the coal mining industry and is interpreted and enforced by a coal-dominated bureaucracy called MSHA. The act and its regulations are counterproductive when applied to the noncoal mining industries that this amendment is designed to transfer from MSHA to OSHA.

What is wrong with the MSHA statute that makes it so offensive to these noncoal industries? Major problems with the statute include:

First, two annual mandatory inspections of surface mines regardless of the safety record of the company.

Second, mandatory training requirements regardless of whether your employee is seasonal, or if compliance would take away one-fourth of your work force.

Third, mandatory citations regardless of an operator's cooperation or attempts to abate a hazard, no notices can be issued.

The industries which we would be transferring here are small in scale and are located in every community throughout the country due to the fact that the value of the commodity produced does not justify transportation costs over great distances. For example, of the approximate 7,600 sand and gravel operations, over 6,000 employ less than 10 people and 3,000 of those employ only 1 to 4 people. How can these small operators afford to comply with a statute that was not designed for their companies?

As a case in point, let me briefly quote from the testimony of W. Dave Amis, president of Amis Materials Co., in Oklahoma City. Mr. Amis was testifying on behalf of the National Crushed Stone Association, before the Labor Subcommittee in March of this year.

> My company operates a small crushed stone quarry at Stringtown, Atoka County, Oklahoma. We employ 20 to 25 persons, 5 of whom actually work in the quarry itself.
>
> Our crushed stone products are supplied to both the public and the private sectors. We produce approximately 50,000 tons of material a month.
>
> Since we started operating the quarry in October, 1977, we have never had a serious accident or fatality. In 1978, and again in 1979, we received awards from the Mine Safety and Health Administration (MSHA) of the Department of Labor for no lost time accidents during each of those years.
>
> In the face of this, we have had seven MSHA inspections which have resulted in numerous citations and subsequent penalties.
>
> The experiences of my company and those of others all over the country point up the one principle reason for NCSA's position in this issue . . . the Act is not working. It is not achieving what Congress intended for it to achieve, at least as far as the crushed stone industry is concerned. One glance at the disabling injury frequency rates from 1974 through 1977, just prior to the enactment of the 1977 Act, shows a regular, stair-step decline in injuries from 20.60 injuries per million man hours worked in 1973 to 16.69 injuries per million man hours worked in 1977. This represents a reduction of 20 percent. In its first year, the 1977 Act more than erased the safety advances of the four years previous for the crushed stone industry and for other metal and nonmetal commodities with a 25 percent increase in the disabling injury frequency rate.
>
> Crushed stone quarries are not the same as coal mines. There are vast differences in the hazards faced by coal miners and those faced by quarry workers.
>
> The work environment and the techniques and equipment used are much more like those found in the construction industry which is under the Occupational Safety and Health Act.
>
> When the Act was being considered in the 95th Congress, industry arguments that provisions of the 1969 Coal Act should not be applied to quarries because quarries were totally unlike coal mines were turned aside or forgotten as news came out of the dreadful events of the Scotia, Kentucky underground coal mine explosions and deaths.

This amendment that we have before us today was passed by the House of Representatives on October 6 of this year by a recorded vote of 254 yeas to 165 nays—an 89-vote margin. The amendment was also passed by the Labor-HHS Appropriations Subcommittees. Then at full committee this transfer provision was stripped out.

Let be add further that last year this amendment passed the Senate floor twice. On July 29, 1980, as a rider to the ERISA Reform Act the amendment passed 52 to 37. Then again on December 10, 1980, as an amendment to the 1981 continuing resolution the transfer passed 44 to 35. Also in the last Congress the transfer passed the House as an amendment to the Labor-HHS appropriations bill. At conference on the 1981 continuing resolution, the conferees initially supported the MSHA transfer, but it was subsequently dropped along with several Senate amendments as a result of the fight over congressional pay increases in that conference.

All of the above overwhelmingly indicates congressional support for this MSHA transfer. It is now time for Congress to complete action on this transfer and provide relief to these noncoal industries.

Our Labor Subcommittee guards its jurisdiction. We do not readily and willingly offer support to legislative efforts by others in areas within our jurisdiction which bypass the subcommittee. However, this transfer is so vitally needed now that as chairman of the Labor Subcommittee, I wholeheartedly endorse this transfer amendment. My hope is that the Senate will permanently enact this transfer into law this Congress with passage of either S. 351 or H.R. 1603.

Last, let me briefly address the concerns of opponents of this legislation. Their arguments are twofold. First, they claim that by denying MSHA funding to enforce standards against these industries that the result would be an exclusion from all safety and health authority rather than a transfer to OSHA jurisdiction. This is clearly erroneous. I refer my colleagues to the December 10, 1980, RECORD, pages 33273 and 33274. There one will find cites to and discussions of three Federal circuit court decisions which rule that OSHA would have enforcement jurisdiction in the case of a denial of funds from MSHA.

Second, the argument is made that although safety statistics indicate that these noncoal industries are safer in terms of nonfatal disabling injury rates that they are nevertheless dangerous operations since their fatality rates are higher. Let us look more closely at these fatality statistics.

I refer my colleagues again to the December 10, 1980, RECORD, page 33338 Therein our colleague, Senator BUMPERS, examined what constituted a mining fatality in the sand and gravel industry. You will find that such things as a motorcycle accident when arriving for work and drownings resulting from failure to wear provided lifejackets are considered mining fatalities.

As of October 11, 1981, there have been six surface sand and gravel fatalities. Three of those resulted from drownings, two occurred as a result of accidents with a construction front-end loader and a conveyer belt, and the sixth fatality resulted from a miner, while driving an auto over a railroad crossing, being hit by a train. Thus any fatality occurring on the site of a quarry or surface mine is considered a mining fatality regardless of the cause. This distorts the fatality incident rates.

I am convinced, Mr. President, that when this issue is carefully examined one must reach the conclusion that these noncoal industries would be better served and safer under OSHA than under MSHA. I hope my colleagues will join me in supporting the Bumpers-Schmitt amendment. Thank you, Mr. President.

Mr. President, briefly, I think it is important to let most of our colleagues remember why there is a very strong urge that a lot of small companies want to get out from the jurisdiction of MSHA. Comparing MSHA to OSHA there is a lot of difference. MSHA mandates two annual inspections of surface mines regardless of their safety record. Those mandatory training requirements are regardless of whether your employee is seasonal, or if compliance would take away one-fourth of your work force.

They also have mandatory citations, regardless of amount of efforts that you try to have in compliance. Unlike OSHA where you might have a voluntary business and without a fine, you have mandatory penalties and citations which have a very distasteful position with the employers.

It is also alluded by some who said if we take them away from MSHA they will not be covered by OSHA.

Mr. President, that is not correct. I refer my colleagues to December 10, 1980, in the RECORD where we find that discussions of three Federal circuit court decisions which ruled that OSHA would have enforcement jurisdiction in the case of a denial of funds from MSHA.

Mr. President, I think our colleague from Arkansas, Senator BUMPERS, did an excellent job stating the fact that the safety record of the small mines is not that detrimental. I think we can do a good thing for the small business community by defeating the Specter amendment.

Mr. SCHMITT. Mr. President, I think the Senator from Arkansas, the Senator from Louisiana, and the Senator from Oklahoma would all be interested. As I peruse the letter recently received by the Senator from Pennsylvania from Secretary Donovan, I really do not see a position taken by the Department of Labor.

I do see a report and analysis of some of the problems just alluded to by the Senator from Oklahoma that exist within the Mine Safety and Health Act and regulations, and he does indicate his belief that there are problems in sand and gravel mines. Whether we agree with his figures or not is probably not the issue tonight, but I do think it is important that we understand there is no position taken by the Department by this question in this letter.

Most importantly I think it is clear that through the debate we have had on the floor of the U.S. Senate on two different occasions the Senate has remained convinced that these provisions should remain and that this industry should be exempt from the Mine Safety and Health Administration. I think that is the most important fact.

We have all been through it once before and I have no need to occupy the time of the Senate any further.

I know of no other speakers.

Mr. RANDOLPH. Mr. President, I ask the able Senator from New Mexico—my attention was diverted—is he favoring the amendment offered by the Senator from Pennsylvania (Mr. SPECTER)?

Mr. SCHMITT. No, as much as I hate to not agree with any colleague offering an amendment, I cannot favor the amendment offered by the Senator from Pennsylvania.

Mr. RANDOLPH. The Senator would not be terribly upset if the Senator from West Virginia would support the amendment of the Senator from Pennsylvania?

Mr. SCHMITT. The Senator from West Virginia knows that I would not be terribly upset by any action he might take.

Mr. RANDOLPH. Or if the minority leader, Senator ROBERT C. BYRD, would support the amendment, would the Senator be upset?

Mr. SCHMITT. No; I really cannot say I would be upset with the distinguished junior Senator from West Virginia either.

Mr. RANDOLPH. This is a vital safety matter that is, at this late hour, being discussed in the Senate. It is a complex problem, and it involves life and death.

I want to say that for a long time, not a brief period, this has been a matter of concern within the Labor and Human Resources Committee. Over and over again we have discussed this issue. We have worked on it. Very frankly, I would say, although I must be very careful about this assessment, that the membership of the committee would possibly be in favor of the pending amendment offered by our colleague from the Commonwealth of Pennsylvania.

Having said that I must go further and say that this is a matter of committee consideration now, both the Subcommittee on Labor and the Committee on Labor and Human Resources.

I know there was a "Dear Colleague" letter which was, I believe, distributed by the Senator from Pennsylvania; is that correct?

Mr. SPECTER. Yes, it was.

Mr. RANDOLPH. Senator SPECTER, I believe that was yesterday, is that correct?

Mr. SPECTER. Two days ago.

Mr. RANDOLPH. I am not certain whether you have referred to it tonight, because I was otherwise involved at the outset, but did you go into the matters that were discussed in your communication?

Mr. SPECTER. Yes, I did.

Mr. RANDOLPH. I thank you very much.

I am wondering if Members have read that letter from the Senator from the Commonwealth of Pennsylvania, who tonight has reiterated the strong arguments against this change in safety jurisdiction.

I have no desire at this hour to continue the discussion, except to say that I have the highest respect for the judgment and conscience of those Senators who have spoken.

Having said that, I think it will be unwise at this time not to support the amendment of my colleague from the other side of the aisle, who is very familiar with mining industry operations both from the standpoint of management and labor, and the conditions of health and safety. These are matters with which we have been very closely associated in the mining States of this country.

Mr. PROXMIRE. Mr. President, will the Senator from Pennsylvania yield? Was it not the position of the Appropriations Committee to support the amendment of the Senator from Pennsylvania? Did he not offer the amendment in the committee and did not the committee vote by a majority vote after discussion to support his position?

Mr. SPECTER. Yes.

Mr. PROXMIRE. Did he not bring out the fact that the sand and gravel industry is a hazardous industry; that the fatalities are substantial?

Mr. SPECTER. Right. As a matter of fact, the issue was contested at that time by the distinguished Senator from Arkansas (Mr. BUMPERS) who challenged the issue of fatalities. Various statistics were cited at that time.

In preparation for the presentation this evening, I have supplemented the statistics available before the full committee and have before me an enumeration of 26 deaths which were caused by these kinds of mining operations. I will not disagree with the distinguished Senator from Louisiana (Mr. LONG) that there may be circumstances of some kind of gravel mining that do not pose the hazard. However, that does not deny the

basic fact that there are enormous hazards, as evidenced by the details of the 26 deaths in 10 months during this year.

Mr. PROXMIRE. I thank my good friend and I support his amendment.

Mr. BUMPERS. Mr. President, if I may just make a statement, the Appropriations Committee which has, I believe, 28 or 29 members did vote—I did not realize it was coming up—did vote 7 to 5 in favor of the amendment of the Senator from Pennsylvania, which was less than half the membership voting. If we had taken a rollcall vote and voted proxies I think it might have been quite different.

But I do want to point out that in 1981, so far this year, we have had seven deaths——

Mr. SPECTER. Mr. President, will the Senator yield for a question?

Mr. BUMPERS. Yes.

Mr. SPECTER. Where did the Senator get these statistics? Senator ROBERT C. BYRD had a handful of proxies, and I think the number was much larger and more substantial in support of the amendment by the full committee. I wonder if the committee records are available to show the precise tally?

Mr. BUMPERS. I know there was not a rollcall because the Senator from New Mexico had 11 proxies, and he chastised me for not having a rollcall.

Mr. PROXMIRE. The vote was 16 to 11 in favor of the Senator from Pennsylvania's amendment. In other words, there were 16 members of the 29-member committee who voted. It was a majority.

Mr. SPECTER. It was a rollcall vote, and I think the Senator from Wisconsin is correct in his recollection of the 16 to 11 tally.

Mr. NICKLES. Mr. President, will the Senator yield?

Mr. SCHMITT. Maybe a more critical vote is the vote of 52 to 37, which is the vote in favor of the Senator's amendment the last time it was considered on the floor.

Mr. BUMPERS. It was even greater than that. That was in 1980. It was even bigger than that in 1979. Maybe I should stand corrected on the Appropriations Committee. I thought we had a hand vote because I remember Senator SCHMITT saying to me, he chastised me for not voting proxies, and I should have asked for a rollcall, that he had the proxies.

Mr. HATCH. Mr. President, will the Senator from Arkansas yield?

Mr. BUMPERS. I would be happy to.

Mr. HATCH. It is my understanding that the Senate has voted twice on this in favor of the Senator from Arkansas' position, once in the ERISA Multiemployer Pension bill July 30, 1980. The amendment, offered by the Senator from Wyoming (Mr. WALLOP), was adopted by a vote of 52 to 37 by the full Senate.

Then when Mr. BUMPERS himself, the Senator from Arkansas, offered an amendment to the continuing resolution on December 10, 1980, that vote was approved 44 to 35; am I correct?

Mr. BUMPERS. The Senator is correct.

SEVERAL SENATORS. Vote! Vote!

Mr. SPECTER. Mr. President, by way of very brief reply on certain of the factual matters which have been alleged, it is not so that there will be a transfer of jurisdiction to OSHA from MSHA. The amendment only denies the use of MSHA funds to enforce standards in these activities.

There is currently pending in the Labor and Human Resources Committee S. 351 which would transfer enforcement responsibility for the surface mines from MSHA to OSHA, and that has not been acted upon.

The statistics are plain that the fatality rates in these kinds of mines are substantially higher than for coal surface mines and metal surface mines, higher for the construction industry with which it is frequently compared, and that it is in fact extremely dangerous.

The assertions were made by the Senator from New Mexico that there is no position taken by the administration. I would submit that a fair reading—and I would rest my case on this contention—of the letter of November 19, 1981, from Mr. Donovan that I referred to only in part is an explicit statement in support of this amendment. Mr. Donovan says in the first full paragraph on page 3 of his letter that:

> Eliminating MSHA authority to inspect these operations would effectively exclude a substantial portion of this hazardous industry from any regular Federal health and safety inspection.

The full letter supports that conclusion and the conclusion of the statement of position in greater detail.

I think there is no question from the language which I just read and a fair reading of this entire document that this is a statement by the administration in favor of continuing jurisdiction by MSHA.

SEVERAL SENATORS. Vote!

Mr. SCHMITT. If the Senator would yield, his quote is correct, but it is a statement of fact not followed by any recommendation from the administration relative to his amendment.

I understand why the Senator is interpreting it that way. I think if the Secretary of Labor could express a position, he probably would be in favor of the amendment of the Senator. But I do not see that in this letter, because I do not think that the OMB, as is indicated down here, allowed him to take that position.

Mr. SPECTER. I accept the statement of the Senator from New Mexico, as he articulates it, that were the Secretary of Labor to state a position he would be in favor of the amendment which I propose. I think it is implicit, but I will take the implication the Senator articulates.

Mr. SCHMITT. My understanding is that there is no official position from the Department of Labor. I think it is an extraneous fact. I think the point is the Senator from Arkansas has expressed the position of the Senate and I suspect it will be sustained one more time.

The PRESIDING OFFICER. The question is on the amendment.

Mr. SPECTER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered

Mr. SCHMITT. I yield to my distinguished colleague from West Virginia.

Mr. RANDOLPH. Mr. President, the Senator from West Virginia must comment on what has been said by his colleague from Arkansas. In essence, he has won this battle twice before in the Senate, not with my vote. Regardless of the closeness of the vote, I do want to indicate again that this matter is before the Committee on Labor and Human Resources, the proper forum for making this type of decision at least initially.

Mr. SARBANES. Will the Senator yield on that point? As I understand it, the Appropriations Committee addressed this issue this year, just within the recent past, and, as a committee, by a vote of 16 to 11, adopted the position contained in the amendment of the Senator from the Commonwealth of Pennsylvania. Is that correct?

Mr. PROXMIRE. The Senator from Maryland is correct. That is right.

Mr. WALLOP. Mr. President, I oppose the amendment of the Senator from Pennsylvania. There have been serious problems resulting from the implementation of the Federal Mine Safety and Health Act of 1977. I have been particularly concerned about the effect of this act on sand, gravel, and stone surface mining operations.

In 1977, the Congress approved the Federal Mine Safety and Health Act. This new law repealed the Metal and Non-Metallic Mine Safety Act and amended the Federal Coal Mine Safety and Health Act. All industries involved with mineral extraction were brought under the same law, mandating equal compliance with regulations, paperwork, and the payment of mandatory penalties. I did not vote for the Mine Safety and Health Act. Several reasons prompted me to vote against the bill.

First, our disappointing experience with the administration of the Occupational Safety and Health Act had made me exceedingly wary of new safety and health programs. Once the bureaucrats get their hands on these programs, they seem to launch a life and soul of their own.

A second reason for my vote was the obvious domination of coal mining in the program. Simply imposing an expensive safety and health program designed for coal mining on unrelated operations did not make sense. Last, I was concerned about implementation. There were not enough trained inspectors to properly enforce the program required by the act. Such a situation could only lead to frustration and confusion on the part of the mining industry and worker.

On August 7, 1978, I received the first complaint about the new Mine Safety and Health Administration from a small sand and gravel operator in Casper, Wyo. More complaints soon followed. In response, I have sought to develop legislation which would provide a more sensible approach to safety and health problems of the sand, stone, and gravel industries. On March 12, 1979, Senators BUMPERS, KASSEBAUM, PRYOR, and I introduced a bill, S. 625, to transfer these industries from coverage under the Mine Safety and Health Act to the Occupational Safety and Health Act. Forty

other Members of the Senate joined us in cosponsoring this legislation.

Though hearings were never held on the subject of transfer by this committee, the subject was raised during oversight hearings on the Mine Safety and Health Act in the spring of 1979. Industry, labor, and MSHA administrators all had an opportunity to discuss the issue. Despite the support for the legislation in both the Senate and the House of Representatives—where 214 Members cosponsored the Marlenee companion bill—no further action was taken on the bill by either the House or Senate Labor Committees. My frustration with the legislative process was rapidly approaching the level of frustration felt by the industry toward the administrative process.

This legislative inertia was temporarily overcome on July 29, 1980. I offered my bill as an amendment to the multiemployer pension plan amendments, and it was adopted by a vote of 52 to 37. The conference committee, which was conducted by the Labor Committees, subsequently dropped my amendment. However, we were successful in eliminating temporarily one of the onerous burdens of the program. The Bumpers amendment to the Labor appropriations bill prohibits the enforcement of the training provision for stone, gravel, and sand surface miners.

We have a responsibility to reduce and eliminate costly, ineffective, and inappropriate regulations. That is exactly the purpose of my bill. The proposal was reintroduced as S. 351 on February 3, 1981, and is now pending in the Senate Labor Committee, with 31 cosponsors.

It would perhaps be useful to review issues, particularly for those Members who are new to the Senate. A rather extensive record was developed in the last Congress during oversight hearings by both Labor Committees. The 96th Congress was dubbed the "Oversight Congress," and one major oversight for some Members was a lack of response to problems presented during hearings such as the MSHA sessions. Most of those Members are no longer with us.

The debate has become another classic business and labor confrontation. We are bombarded with lots of statistics, and the usual predictions of dire tragedy, bankruptcy, and so forth by both sides. The actual issues are far less cosmic in nature.

The first is whether the sand, stone, and gravel industries are mining operations. These industries are involved in the surface extraction of minerals. They use equipment similar to that employed by the surface mining of coal, metals, and other nonmetallic resources.

In addition, these industries have always been considered mining enterprises as far as Federal legislation has been concerned. I will concede to labor on this point. A second concern is the level of hazard in these industries. It is argued that all mines are hazardous operations, and require a separate safety and health program. The following table, prepared by the Congressional Research Service, indicates that sand, stone, and gravel surface mining has a better nonfatal disabling injury rate than other mining industries. The fatality rate is somewhat higher than the average mining rate. So, in another concession to labor, stone, sand, and gravel are hazardous occupations, as are many other occupations in our society.

A third point of contention is that the Federal Mine Safety and Health Act merely added all other mining operations to the Coal Mine Safety and Health Act. The result was to apply coal mining safety procedures and techniques to mining operations which had no relation to deep underground coal mining. It is argued that vertical safety standards respond to particular industry problems. However, as the hearing record states, efforts have been made by MSHA to combine standards. Neither business nor labor have demonstrated the validity of their arguments on this point.

While labor and business spokesmen have argued over these rather broad issues, specific requirements of the Mine Safety and Health Act have created real problems for the operators of stone, gravel, and sand surface mines. For instance, the law clearly states that an independent contractor will be considered as an operator. Any violation of MSHA by the contractor or his crew will result in a citation and fine for the contractor. However, MSHA has established a policy of citing and fining the owner of the surface mine, not the contractor, for contractor violations. Business is certainly right in complaining about this absurd policy.

Another fault with the program is mandatory penalties. Unlike OSHA, the mine safety program stresses only negative incentives for complying with the standards.

Operators are cited and fined for any and all violations. The quest for a fine results in penalties for the most minor violations, eliminates positive efforts at good faith compliance, and creates business mistrust due to subjective interpretation of standards by inspectors. Operators would regard the fines as a nuisance if they were not so expensive. Critics will argue that fines can be appealed. But, an appeal often costs more than the fine. One mine operator testified that an appeal of a $100 to $200 fine costs about $1,600. Only 5 percent of all citations are appealed. When one considers what a litigious society we live in, this rate of appeal is surprisingly low.

Unlike OSHA, there is no flexibility in the program. Violations under OSHA do not necessarily invoke a penalty, rather a citation is issued which requires prompt abatement. Maximum penalties under OSHA are one-tenth the amount under MSHA, though hazards are as serious under OSHA as they are under MSHA. It is encouraging that Congressman GAYDOS, chairman of the House Labor Subcommittee has recognized this problem, and has stated that mandatory penalty section may require revision.

A third problem with MSHA is the training requirement. As the hearing record clearly demonstrates, training, as required by the act, is a costly burden with little benefit for surface sand, stone and gravel producers. The rigidity of the requirement prohibits more sensible alternatives.

During the Senate debate on my proposal last year, I cited a survey of Wyoming sand, stone, and gravel companies which sought to determine the total cost of training loss of production time and administration. The results were as follows:

First, estimated number of employees to be trained (24-hour requirement), 869.

Second, estimated number of experienced employees to be trained (8 hours), 733.

Third, estimated number of instructors to be certified, 58.

Fourth, estimated administrative costs to implement MSHA's new health and safety training regulations, $220,486.

Fifth, estimated cost of production time lost due to MSHA's training requirements, $479,816.

Sixth, total estimated cost to these businesses in fulfilling all requirements of the health and safety training requirements mandated by section 115 of the 1977 mine safety amendments, $1,181,317.

Seventh, percentage increase in finished product costs resulting solely from above costs, 10 percent.

One last objection is the lack of onsite consultation. MSHA has created an adversary relation between Government and business. Rather than cooperating with business and labor to create a safe and healthy workplace, MSHA is absorbed by the search for violations and penalties. Even the steelworkers have conceded that consultation should be permitted.

Our inability to provide reasonable, simple, and practical changes in MSHA, such as allowing consultation, has created a bad environment for this program. Unfortunately, it is a problem which permeates too many of our Federal programs. That is why we now have a mandate for change.

The change I have proposed is to transfer surface sand, stone, and gravel operations from jurisdiction under MSHA to the Occupational Safety and Health Administration. Something has to be seriously wrong in a program for anyone to advocate transfer to coverage under OSHA, but that is precisely what I advocate. This is not a ploy to sacrifice the safety and health of workers. OSHA exists mainly through the efforts of labor. It is a tough program, not without its faults. And, it is flexible, which is the one most glaring fault with MSHA.

I would like to include in the RECORD a comparison of the major provisions of the Mine Safety and Health Act and the Occupational Safety and Health Act prepared by the Library of Congress. The comparison is a graphic display of the rigidity/flexibility problem. I ask unanimous consent that this table be included in the RECORD.

Mr. President, an amendment to exempt these surface mines from MSHA and transfer them to OSHA has passed the Senate and the House twice. The continuing resolution, because of its current wording. exempts these surface mines from MSHA. I urge my colleagues to oppose the amendment of the Senator from Pennsylvania.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

MINE SAFETY AND HEALTH

● Mr. KENNEDY. Mr. President, I support the amendment offered by the Senator from Pennsylvania, which would reaffirm the action of the Appropriations Committee regarding coverage under the Mine Safety and Health Act.

If we fail to adopt this amendment thousands of workers will face a greater risk of death or injury in the surface mines of this country.

The House amendment, which purportedly transfers jurisdiction over surface stone, sand, and gravel mines from MSHA to OSHA, would in fact totally exempt these mines and their workers from coverage under either statute.

OSHA is prohibited from inspecting facilities and operations which are under the jurisdiction of other Federal agencies.

Since the rider does not amend either statute but merely prohibits the expenditure of funds by MHSA, it would in effect exempt surface mines from coverage under both statutes, or at the very least encourage mine owners to resist OSHA enforcement.

Even if OSHA retained jurisdiction, surface mines would be virtually exempt from safety inspections.

The current OSHA appropriations rider exempts business with fewer than 10 employees from safety inspections.

Eighty-four percent of sand and gravel mines and 64 percent of stone mines employ fewer than 10 workers.

Mr. President, MSHA is a tough law. Two safety inspections of surface mines must be performed each year.

Mine owners may find these inspections bothersome but the dramatic reduction in the fatality and disabling injury rates in these mines since the passage of MSHA demonstrates how important these requirements are.

Fatality rates have declined by 38 percent since 1978. Disabling injury rates are down by 15 percent.

Despite this progress, surface. stone. sand, and gravel mines remain the most dangerous of all surface mines.

One hundred thirty-four have died in these mines since 1978, compared to 42 deaths in metal mines and 53 in surface metal mines.

We should eliminate safety inspections in these dangerous mines particularly when the evidence shows that increased inspections are saving lives.

Mr. President, legislation similar to the House-passed amendment has been pending before the Labor Committee since the beginning of the year.

Any action to amend MSHA should follow the normal legislative process.

I urge the adoption of the amendment.●

Mr. WILLIAMS. Mr. President, I support this amendment to restore funding to the Occupational Safety and Health Administration. Without this restoration, OSHA will have to conduct its operations with over $27 million less than its original budget request for 1982. We have already seen a significant decrease in OSHA operations in the last several months, and to my knowledge there has been no corresponding decline in workplace injuries or fatalities during this period. While we still hear talk of nitpicking enforcement and outmoded regulations, the fact of the matter is that OSHA has a mission of critical importance for the men and women of this country, and whatever problems do exist at that agency will not be solved by reducing the resources available to it.

To comply with the revised budget figures, without any restoration, OSHA will have to achieve a reduction in its personnel levels of major proportions. Last fiscal year, 160 slots were dropped from a total of 2,786 OSHA positions and under the revised figures, 90 more people would be removed or not replaced.

Already we have evidence of significant declines in OSHA enforcement activity. Workplace inspections have declined 17 percent, from a monthly average of 5,680 between January and October 1980 to 4,703 between February and August 1981. Comparing the same time periods, monthly followup inspections dropped 68 percent, from 1,012 a month to 326. The number of serious violation citations has declined 27 percent. Proposed and existing regulations concerning employee exposure to chemical hazards and other health and safety threats such as excessive noise, cotton dust, and lead, have been stayed, rescinded, or modified. In short, vigorous enforcement has been seriously lacking. Reduced funding for this vital program can only compound these problems.

Perhaps a small but significant example will best illustrate the damage that will be done with this attitude of cutting costs at all costs. The OSHA new directions program, which has had the support of Thorne Auchter, the Assistant Secretary for OSHA, as well as the support of many in the labor and business communities, will be cut over 60 percent, losing $9 million of its funding, without this restoration.

New directions is a program that provides seed money to groups in the business, labor, academic and public interest sectors so that programs in safety and health training and education can be developed and then become self-sustaining. The program has been a great success. It is an example of the best possible use of Government funds, to create and encourage the growth OSHA-related projects that can become self-supporting. The expenditure of these few million dollars will come back manyfold in a short period of time.

There are many other examples I could give of important work that OSHA has been doing. In the interests of time, I will stop now, having made the overall point clear. I can assure you that the workers of this country do not appreciate having the budget balanced on their backs, with disregard for their safety and health, and I would urge my colleagues to vote in support of this restoration amendment.

Mr. ROBERT C. BYRD. Mr. President, I am joining Senator SPECTER in offering this amendment. I believe he seeks to correct a very serious deficiency in the continuing resolution with respect to the Mine Safety and Health Administration.

I would like to review for a moment how the continuing resolution affects the Mine Safety and Health Administration's mine safety enforcement program. This joint resolution includes language on page 3 which reads as follows:

(3) Whenever the amount which would be made available or the authority which would be granted under an Act listed in this subsection as passed the House as of November 20, 1981, is different from that which would be available or granted under such Act as passed by the Senate as of November 20, 1981, the pertinent project or activity shall be continued under the lesser amount or the more restrictive authority: *Provided*, That where an item is included in only one version of an Act as passed by both Houses as of November 20, 1981, the pertinent project or activity shall be continued under the appropriation, fund, or authority granted by the one House, but at a rate for operations of the current rate or the rate permitted by the action of the one House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for the fiscal year 1981: *Provided further*, That for the purposes of this joint resolution, when an Act listed in this subsection has been reported to a House but not passed by that House as of November 20, 1981, it shall be deemed as having been passed by that House:

This language, I believe, is ambiguous. Depending on the interpretation of the word "item" in line 8, one can construe this language to mean that the "more restrictive authority" is controlling or that authority applicable in fiscal year 1981 is controlling.

I understand that conflicting interpretations were delivered yesterday with respect to the effect of this language on Mine Safety and Health Administrations enforcement authorities.

Also, I am told that the Office of Management and Budget has not been able to resolve its interpretation of the effect on this language on MSHA. So I believe that Senator SPECTER is doing us a service by clarifying the congressional intent on this matter. Without Senator SPECTER's clarification I expect the issue would have to be settled later by the courts.

Mr. President, the appropriations process is clearly not the proper forum to make detailed changes in enforcement programs affecting the health and safety of miners. And, this continuing resolution is an especially imperfect vehicle to consider such a change. The resolution fails to offer any detailed legislative explanation which I believe should accompany congressional decisions.

Where is the legislative history behind the House language? I am not aware of any hearings which the Appropriations Committee has held on this subject. On the other hand, these very same matters are being discussed in the appropriate place right now—that is Senator HATCH's Committee on Labor and Human Resources. S. 351 and other bills related to this matter have been reported out of subcommittee, I am told.

To prohibit sand and gravel enforcement funding in MSHA would be a preemption of the authorizing committee. The authorizing committee is looking at this matter carefully. We should let them complete the record on this matter before any recommendation is made to the Senate with respect to MSHA enforcement responsibilities.

Therefore, I urge you to vote for the amendment offered by Senator SPECTER.

[The following proceedings occurred after midnight.]

SEVERAL SENATORS. Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania (Mr. SPECTER). The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER (Mr. PRESSLER). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 35, nays 63, as follows:

[Rollcall Vote No. 413 Leg.]

YEAS—35

Biden	Glenn	Pell
Bradley	Hart	Percy
Burdick	Heinz	Proxmire
Byrd, Robert C.	Huddleston	Randolph
Cannon	Kennedy	Riegle
Chafee	Levin	Rudman
Cranston	Lugar	Sarbanes
D'Amato	Mathias	Sasser
DeConcini	Matsunaga	Specter
Dodd	Metzenbaum	Stafford
Durenberger	Mitchell	Williams
Eagleton	Moynihan	

NAYS—63

Abdnor	Garn	Murkowski
Andrews	Gorton	Nickles
Armstrong	Grassley	Nunn
Baker	Hatch	Packwood
Baucus	Hatfield	Pressler
Bentsen	Hawkins	Pryor
Boren	Hayakawa	Quayle
Boschwitz	Heflin	Roth
Bumpers	Helms	Schmitt
Byrd, Harry F., Jr.	Hollings	Simpson
	Humphrey	Stennis
Chiles	Inouye	Stevens
Cochran	Jackson	Symms
Cohen	Jepsen	Thurmond
Danforth	Johnston	Tower
Denton	Kassebaum	Tsongas
Dixon	Kasten	Wallop
Dole	Laxalt	Warner
Domenici	Long	Weicker
East	Mattingly	Zorinsky
Exon	McClure	
Ford	Melcher	

NOT VOTING—2

Goldwater	Leahy

So Mr. SPECTER's amendment (UP No. 682) was rejected.

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 662

Mr. HATFIELD. Mr. President, we have temporarily laid aside the Hatch amendment and we shall take it up shortly. We are now ready to remove that obstacle that we have been handling all evening and all day, the motion of the Senator from New Jersey (Mr. BRADLEY) to reconsider.

First, I ask unanimous consent that the motion to reconsider be temporarily laid aside so the Senator from New Jersey may offer an amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask the Chair to recognize the Senator from New Jersey so he may offer an amendment.

Mr. DANFORTH. Mr. President, may we have order, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BRADLEY. Mr. President, the amendment that I was going to offer at this time I shall withdraw because the issue that my amendment concerned was the retraining amendment that was dealt with earlier in the amendment offered by Senator DANFORTH, Senator MOYNIHAN, and myself. It is my understanding that that has now been worked out and I am pleased to yield to Senator DANFORTH and Senator MOYNIHAN for an explanation of what was worked out. I think it was a very satisfactory arrangement.

STATE STUDENT INCENTIVE GRANTS

Mr. President, I am pleased that the State student incentive grant program will continue to be available to assist undergraduate and graduate students in fiscal year 1982. This program represents a national commitment to the development of human capital through Federal investment in education. Federal efforts to improve the national economy are fatally flawed if we neglect to fully use all of those who are available to contribute to our economic growth. In establishing priorities for responsible fiscal management, we cannot forget the importance of a well educated and trained workforce. Funding SSIG shows our wise concern for the development of our human resources.

Federal support of higher education is a sound financial investment. Society benefits from developing more productive citizens, more knowledgeable voters, and more taxpayers. This is ample reason to continue Federal funding for higher education.

SSIG doubles the value of Federal funds by requiring a dollar-for-dollar match by the States. Through this program, the Federal Government helps educate children, in partnership with the States. SSIG is an incentive to States to assist students to finance their college educations.

The National Association of State Scholarship and Grant Programs credits SSIG with encouraging rapid State scholarship program growth since 1974–75. Prior to the beginning of the SSIG program during the 1974–75 academic year, only 31 States had statewide aid programs providing approximately $364 million to students. In the 1981–82 academic year, 57 States and territories have statewide, need-based aid programs, and the States appropriate about $887 million for this purpose. As the funding for SSIG has increased so has the growth of the statewide aid program.

For example, the greatest funding increase in the State programs occurred in the 1976–77 academic year when the SSIG appropriation more than doubled. In that year, SSIG funds increased from $20 to $44 million, and the total funding has been stable at $76.7 million and the State increases have been much smaller.

Without SSIG, many State scholarship programs would be eliminated. Although SSIG funds comprise only about 8 percent of all State aid program expenditures nationally, in 1980–81 the SSIG allocations represented one-half the program expenditures in 15 States and over one-third of the total program expenditures in 21 States. More than one-half of all the States—26—rely on the SSIG funds to provide over 20 percent of their total program funds.

Without SSIG many students currently supported by State programs would have to share the decreased Pell grants and SEOG grant funds. This would reduce the average per student grant and leave many students totally unsupported. New Jersey adds its SSIG funds to State funds and administers the combined funds in a tuition aid grant (TAG) program. The TAG program serves about 52,000 students per year. In 1980–81 TAG grants total $34.4 million with $2,083,898 in SSIG funds. Nationally 1,320,000 students were served in 1980–81 with $1,031,500,000 in combined State and Federal funds. SSIG funds represented $76.8 million or 8.42 percent of the funds.

I am pleased that this valuable program will continue to be available as an effective means of financing higher education.

Mr. DANFORTH. Mr. President, may we have order, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DANFORTH. Mr. President, we have worked out an agreement to deal with the trade adjustment assistance problem. First, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DANFORTH. What is the status with respect to unprinted amendment 662?

The PRESIDING OFFICER. The amendment has been tabled and a motion to reconsider that vote has been pending off and on since that action.

Mr. DANFORTH. Mr. President, I ask unanimous consent that all action relating to amendment 662 be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 683

(Purpose: To provide $98,560,000 for training, job search, and relocation allowances under the Trade Act of 1974)

Mr. DANFORTH. Mr. President, on behalf of myself, Senators MOYNIHAN, ROTH, BRADLEY, HEINZ, MITCHELL, SPECTER, EAGLETON, and PACKWOOD, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself, Mr. MOYNIHAN, Mr. ROTH, Mr. BRADLEY, Mr. HEINZ, Mr. MITCHELL, Mr. SPECTER, Mr. EAGLETON, Mr. PACKWOOD, and Mr. RIEGLE proposes an unprinted amendment numbered 683:

At the end of section 101(a) add the following new paragraph:

(6) Notwithstanding any other provision of this joint resolution, in addition to any sums otherwise appropriated there is appropriated an additional sum of $50,000,000 which shall be made available for training, job search allowances, and relocation allowances, under sections 236, 237, and 238 of the Trade Act of 1974.

Mr. DANFORTH. Mr. President, this is precisely the same amendment that was debated and voted on this afternoon, with the exception that the dollar amount in the earlier amendment, which was $98.6 million, has been reduced to $50 million. It is roughly a cutting in half of the dollar amount in the trade adjustment assistance retraining amendment.

As the Senate will recall, Mr. President, the vote on the motion to table the motion to reconsider the amendment was 47 to 47, an even split. Therefore, we have been negotiating with the distinguished Senator from New Mexico and we have agreed simply to split the difference.

I want to say that I very much appreciate the assistance of Senator SCHMITT and Senators DOLE, MOYNIHAN, BRADLEY, and others who have participated in the effort.

Mr. SCHMITT. Mr. President, I congratulate the Senator from Missouri on helping to work out this compromise. It is satisfactory to me, and I believe to the committee. I strongly recommend it to the Senate.

Mr. MOYNIHAN. Mr. President, may I first ask unanimous consent that the Senator from Massachusetts (Mr. KENNEDY) be added as a cosponsor to this amendment?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I join my distinguished colleagues from Missouri in expressing our appreciation to the Senator from New Mexico and perhaps especially to the distinguished chairman of the Committee on Finance, whose concern has been to see that there be this acceptable resolution. I thank my colleagues from Missouri, of course, who has led the way.

The question is on agreeing to the amendment.

The amendment (UP No. 683) was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Does the Senator wish to withdraw the previous amendment?

Mr. SCHMITT. I believe the previous amendment was withdrawn.

Mr. DANFORTH. Mr. President, what I wish to do is to withdraw amendment 662; and in lieu of that, we have just voted on the substitute.

The PRESIDING OFFICER. The Senator is correct.

The Senator from New Mexico.

Mr. SCHMITT. Mr. President, a parliamentary inquiry, merely to clean this up: Would it be appropriate at this point to request unanimous consent to do what the Senator from Missouri has just requested?

The PRESIDING OFFICER. It has been done.

The question recurs on the amendment of the Senator from Utah.

UP AMENDMENT NO. 681 (AS MODIFIED)

(Purpose: To provide funds for health promotion and disease prevention activities, and for activities under the Developmental Disabilities Assistance and Bill of Rights Act of 1981)

Mr. HATCH. Mr. President, on behalf of myself, Mr. RANDOLPH, Mr. KENNEDY, Mr. WEICKER, and Mr. CHILES, I send a modified amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Utah (Mr. HATCH), for himself and others, proposes an unprinted amendment numbered 681, as modified.

Mr. HATCH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modified amendment is as follows:

At the end of the joint resolution, add the following:

SEC. 124. Notwithstanding any other provision of this joint resolution, there are appropriated to the Department of Health and Human Services $61,180,000 for activities under the Developmental Disabilities Assistance and Bill of Rights Act of 1981, and $1,754,000 for health promotion and disease prevention activities of the Office of the Assistant Secretary for Health.

Mr. HATCH. Mr. President this amendment restores $8.43 million to the appropriation level for the developmental disabilities program bringing it to the reconciliation mark of $61,180,000 and funds the Office of Disease Prevention and Health Promotion within the Department of Health and Human Services by providing $1,754,000 instead of the $1 million level under the continuing resolution. The total add back is $9.184 million.

The Developmental Disabilities Act was originally passed in order to coordinate and provide services where necessary for the more severely handicapped persons of our Nation. This law is a vehicle to help eliminate gaps in services with emphasis on providing services to rural and underserved regions.

The Office of Disease Prevention and Health Promotion in the Office of the Assistant Secretary for Health is responsible for disease prevention policy and planning efforts, and also coordinates prevention-related activities in all DHHS agencies.

Mr. President, I ask my colleagues to consider this amendment to restore funding to two programs within the Labor-HHS sections included in this continuing resolution proposal.

This amendment proposes a funding level of $61,180,000 for the developmental disability program—an addback of $8,430,000. This addback is essential in order to maintain services for the 3 million developmentally disabled of our Nation. Also included in this amendment is a restoration of funds for the Office of Disease Prevention and Health Promotion in the Department of Health and Human Services to $1,754,000—an addback of $754,000.

The developmental disabilities program is divided into four major components consisting of State grants, protection and advocacy, special projects, and university-affiliated facilities. Each has a major function or role in the provision of services to developmentally disabled persons.

STATE GRANTS

For the past 4 years, the basic State grant program has remained at the same level of appropriation of $53,180 million having to adjust for inflation and increased costs of mandated activities without additional funds. Forty-nine States, the District of Columbia, and Puerto Rico each received a formula grant of at least $250,000 based on population, per capita income, and financial need. These formula grants were matched by State of local funds on a 75 Federal–25 State or local ratio. Currently, Virginia and the trust territories do not participate in the State grant program but they have applied for inclusion this year. The additional cost of providing a share for these States without increasing funds back to the fiscal year 1981 prerescission figure will put a strain on the States' already tight financial load.

PROTECTION AND ADVOCACY

During the last 5 years the demand for protection and advocacy services has steadily increased to a point where 30,000 developmentally disabled have received assistance in 1981. This year, participation has risen dramatically as service providers cut back due to reduced funding in an already inadequate service system. This program's appropriation must be $8 million in order to continue its effectiveness.

SPECIAL PROJECTS

Grants of national significance and special projects aided the developmental

disabilities program in developing new services and combinations of services for individuals who are developmentally disabled. Through the years, these grants brought together the resources of the university-affiliated facilities, the creativity of private organizations, and the experience of State agencies in designing and developing new and varied service models for individuals who are handicapped. This same funding source provided the necessary technical assistance needed to deliver these new service models to the developmental disabilities program at the State and local level. For fiscal year 1982, my Labor and Human Resources Committee requested $2.5 million for special projects.

UNIVERSITY-AFFILIATED FACILITIES

Thirty-six university-affiliated facilities (UAF's) and five satellite centers are now funded throughout the country under the DD Act. These programs now serve 66,000 severely developmentally disabled who are referred because diagnostic and treatment services are not otherwise available. The satellites provide services to the rural and underserved regions of the Nation. In addition, 77,000 professionals were trained during fiscal year 1981 in UAF's. Cuts proposed would eliminate services to 6,400 handicapped children who would be unable to find services elsewhere, train 7,700 fewer personnel and increase Federal and State welfare support costs by $32 million a year.

THE OFFICE OF DISEASE PREVENTION AND HEALTH PROMOTION

Another activity we must be engaged in to enhance the health of our citizens is preventive medicine and health promotion. Our national expenditure for health care now approximates $250 billion, and is increasing at astonishing rates annually. Unfortunately, a great deal of this money is spent on treating diseases and chronic conditions which are preventable.

Although it is imperative that we reduce our Federal spending in all areas, and health programs cannot be exempt from these reductions, it seems particularly unwise to me to economize in the area of prevention. These are only a few of the reasons I am proposing to restore adequate funding for the Office of Disease Prevention and Health Promotion. Health prevention programs have the greatest likelihood of contributing to reduced health costs in the long run. Certainly the efforts to prevent disease, and promote health through public education deserves our support at this time.

The Office of Disease Prevention and Health Promotion has been effective in accomplishing the goals implied in the title of this office. They coordinate all activities in prevention in the Department of Health and Human Services, provide liaison with the private sector, coordinate all programs in nutrition, provide technical assistance for planning and implementation of prevention-promotion efforts, and disseminate health information. They are also currently working to implement plans to achieve the 1990 objective outlined in "Promoting Health/Preventing Disease: Objectives for the Nation," which was published just last year.

I am certain Secretary Richard Schweiker shares my viewpoint on this issue. We held full committee hearings on preventive medicine and health promotion in July of this year. Secretary Schweiker was our lead speaker, and stated at that time:

In the framework of the Department of Health and Human Services, I am personally committed to a prominent role for health promotion and disease prevention as an essential element of our health strategy—indeed as our highest health priority.

Assistant Secretary Edward Brandt also recently stated at an address before the annual meeting of the Institute of Medicine the "prevention is the keystone" of the administration's approach to solving our Nation's health problems. Continuation of Federal support for the Office of Disease Prevention and Health Promotion also enjoys the support of an impressive number of prestigious professional organizations and volunteer agencies, including:

American Heart Association, American Lung Association, American College of Preventive Medicine, Association of Teachers of Preventive Medicine, American Public Health Association, Coalition for Health Funding, American Cancer Society, March of Dimes, Coalition for Health and the Environment, National Urban League, National Association of Nurses, American College of Cardiology, and American Red Cross.

I urge my colleagues in the Senate to vote for this amendment. Although this is a time of fiscal austerity, can we in the long run really afford to sever these handicapped persons from their lifeline when progress has just become evident? Can we not sustain a very effective and important effort within Health and Human Services which focuses on prevention and long-term cost saving? I propose that we can and I strongly urge my colleagues to support this amendment.

I ask unanimous consent to have printed in the RECORD a table in connection with this matter.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DEVELOPMENTAL DISABILITIES PROGRAM

	Actual, fiscal year 1981	Program authorization, fiscal year 1982	Reagan's September request	Senate appropriation, fiscal year 1982	House appropriation, fiscal year 1982	C.R. without amendment	C.R. with Hatch amendment
State grants	42,145	43,180	29,660	37,500	43,432	37,500	43,180
Protection and advocacy	7,303	8,000	4,000	7,500	7,000	7,500	8,000
Subtotal	49,448	51,180	33,660	45,000	50,432	45,000	51,180
Special projects	2,746	2,500	2,464	0	2,500	2,500	2,500
University affiliated: Facilities and satellites	7,237	7,500	3,696	5,250	7,500	5,250	7,500
Total	59,431	61,180	39,820	50,250	60,432	52,750	61,180

● Mr. KENNEDY. Mr. President, I am pleased to cosponsor Senator HATCH's amendment to maintain current funding levels for the Development Disabilities Assistance and Bill of Rights Act.

Congress spoke with a clear voice this past August when it reauthorized the DD program as a separate, categorical program at current funding levels for the next 3 years.

The message was this: we support the important role of the Federal Government created by the DD Act to assist States in planning for, coordinating, monitoring, and providing research, training, and needed services to their more than 3 million developmentally disabled residents.

Without Senator HATCH's amendment 12 of the 36 university affiliated facilities supported through the DD program will be eliminated.

UAF's are the sole comprehensive training program in the field of mental retardation and developmental disabilities.

Each year UAF's train 140,000 students, professionals, paraprofessionls, and parents.

UAF's also provide direct services to more than 68,000 developmentally disabled people annually, many of whom might otherwise be institutionalized but for UAF's which are the only integrated service providers able to deal with the complexity of their needs. UAF's have thus enabled families to remain intact and have prevented the multiple costs of institutionalization, costs in dollars and human misery.

UAF's have also been our vanguard in the research battle against mental retardation and other developmental disabilities. UAF supported research has led to PKU screening and discovery of the fetal alcohol syndromes. If screening projects used at UAF's were used nationwide, the incidence of mental retardation would be reduced by 50 percent.

This amendment is also critical to insure continuance of the protection and advocacy agencies in 49 States.

During their short lives, these agencies have marked a major advance in the

movement to assure that the human and legal rights of all developmentally disabled people are secured.

No struggle to proclaim and insure fundamental human rights has been harder or more tragic than the struggle of the developmentally disabled.

The recent Supreme Court decision in the Pennhurst case spotlights again the complexity of this issue. We must recognize the difficulty in achieving a national transition from institutional care to community-based settings. But we must insure that the Bill of Rights has meaning for the lives of developmentally disabled people. This amendment is critical to equip protection and advocacy agencies with sufficient funds to provide that meaning.

Finally, this amendment is necessary to continue the vital work of State councils which are responsible for identifying needed services in their States, planning for how those needs will be met in a coordinated and comprehensive fashion, and monitoring the quality of services provided.

These roles of State councils become more and more critical as the administration pushes to decentralize, deregulate, and reduce needed services to handicapped people.

The increase which this amendment represents is certainly a small price to pay for insuring a future of hope and opportunity for millions of developmentally disabled people.

I also commend Senator HATCH for including additional funds for health promotion.

These funds are among the most cost-effective health dollars spent by the Federal Government.

I urge the adoption of this amendment.●

Mr. RANDOLPH. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Chair cannot hear the speaker. Will those people conversing in the rear of the Chamber please desist?

Mr. HATCH. Mr. President, I notice that the distinguished Senator from West Virginia would like to make some remarks, and I yield.

Mr. RANDOLPH. Mr. President, the able Senator from Utah (Mr. HATCH) who chairs the Committee on Labor and Human Resources, has been in the forefront not only in the last few months but also for many years, in attempting, always in a constructive manner, to aid those persons who are handicapped. These people do not need a handout, but a helping hand. In reference to those of the disabled groups for whom he now speaks, the same is true.

The Developmental Disabilities Act targets resources on those individuals with a severe handicap which originated during their developmental years.

The State grant program provides funds for planning and coordinating services for developmentally disabled individuals as well as providing funds for "gap-filling" services. Protection and advocacy activities for the developmentally disabled are also carried out under this act.

Those of us privileged to join him in this matter commend him for what he is doing, and I hope the Senate will show its approval.

Mr. HATCH. I thank my colleague.

Mr. President, I understand that the distinguished floor manager of the resolution will accept this amendment.

Mr. SCHMITT. Mr. President, first of all, I express my appreciation for the cooperation we have received from the Senator from Utah.

I cannot say that I am entirely happy about the add-on of the dollar amount; but, once again, I am happy to see that the Senate recognizes the problems of the Nation's handicapped, as it has continued to do tonight.

It is unfortunate that so many other areas of comparable need and value in the budget cannot be assisted in the same way due to the major budgetary constraints under which we are operating.

I believe the Senator from Utah has a reasonable compromise which he has offered by his modified amendment, and I am happy to accept it and recommend it to the Senate.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment (UP No. 681), as modified, was agreed to.

Mr. HATCH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the committee amendment.

Mr. SCHMITT. Mr. President, I ask unanimous consent that, once again, the committee amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, I believe that in the pecking order of things, the Senator from Utah is to be recognized at this point.

The PRESIDING OFFICER. The Senator from Utah.

UP AMENDMENT NO. 684

(Purpose: To increase the amount of appropriation available to Title IV–B of the Comprehensive Employment and Training Act)

Mr. HATCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH), for himself, Mr. QUAYLE, and Mrs. HAWKINS, proposes an uprinted amendment numbered 684.

Mr. HATCH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the joint resolution, insert the following:

SEC. . Notwithstanding any other provision of this joint resolution, there is appropriated $10,000,000 for part B of Title IV of the Comprehensive Employment and Training Act relating to the Job Corps which is in addition to the amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981, for the Job Corps.

Mr. HATCH. Mr. President, this amendment adds $10 million more to the Job Corps program.

As my colleagues know, it is a rare instance in which I rise to support additional Federal funding. I believe, however, that the circumstances under which I do so today justify the event.

Only a few weeks ago, the Bureau of Labor Statistics reported that youth unemployment was at an alltime high, particularly among black teenagers. The youth unemployment rate is up over 19 percent overall and at an outrageous level of 48 percent for blacks. What I ask, will be the future of our free enterprise system if in 20 years our Nation's adult population must take over the factories, services and retail stores without having had the chance to lay groundwork for their occupations when they were young?

Everyone of us in the Senate, I would venture, had the experience of working as teenagers. In my case, I was an apprentice metal lather. Now, we may not have chosen to follow in the same business we worked in as young people, but I personally valued the experience very much. There is nothing quite as energizing as being able to reach one goal and build on it. Things like self-esteem, maturity, responsibility, and getting along with others are the intrinsic benefits which come from a young person's employment and training experience as well as his or her formal education.

Today, because so many young people lack the basic skills and motivation necessary to find jobs in private sector labor market, and because our economic situation does not permit business to create enough youth jobs at the current wage level, youth are becoming discouraged and cynical of our free enterprise system. As a matter of fact, some economists estimate that the youth unemployment rate may be higher than stated due to the discouraged worker effect, which is simply that many teenagers become so discouraged in their search of jobs that they drop out of the labor force altogether and, therefore, are not counted as unemployed.

All of this has me very worried. We have not provided in any way for a solution to the youth unemployment problem and we seem to have dismissed the fact that this problem may create subsidiary societal problems: Crime, vandalism, drug and alcohol abuse, and a coming generation of adults who are underprepared to take over our Nation's institutions. We have not enacted a youth opportunity wage. This will not solve all the problems of your unemployment, but it is an action we might take to help. We have, in the appropriations process, cut both the Job Corps and the title IV–A youth programs in CETA. We are now beyond the point of cutting fat

and waste, but we are now cutting actual participant slots.

Members of Congress, interest groups and my constituents in Utah also know that I have staunchly supported President Reagan's economic recovery program. I believe firmly that cuts in spending must be made as well as cuts in taxes. I will continue to vote for spending reductions when it is in our country's best interests to do so.

However, I am today proposing to increase the level of funding for CETA's title IV–B, the Job Corps, to the level which was agreed to in the Omnibus Reconciliation Act. We all remember that act as one over which a lot of blood and sweat was poured. The funding recommendation for Job Corps in that document was $106 million less than the original administration proposal. The Labor and Human Resources Committee, with the subsequent concurrence of the House-Senate miniconference on reconciliation, believed that this reduction was appropriate as it did not reduce the actual number of slots for participants, would not necessitate the closure of any Job Corps centers, and would allow a modest expenditure for the highest priority capital improvements. The level of funding we are now debating, $600 million, will mean the closure of five Job Corps centers and the elimination of approximately 2,000 slots.

The Job Corps is a unique concept for providing skills, training, and job counseling to young people. Those of you who may have spent some time down on the mall this week have had this concept demonstrated for you firsthand. The Job Corps serves primarily disadvantaged youth: 85 percent are high school dropouts and 100 percent are below the poverty level. As many as 25 percent have been rejected for enlistment into the U.S. Armed Forces due to their inability to meet minimum entrance requirements. The individual Job Corps centers, managed and operated by public and private organizations, concentrate on developing competency in the basic educational skills and in providing the skills training required for employment in the private sector or acceptance into the military.

The training programs have been designed by centers, in close collaboration with business and labor unions. The basic Job Corps programs are recognized for their effectiveness in not only basic education and general training, but in changing the attitudes of formerly discouraged young people. The private sector's faith in the Job Corps is exhibited by its willingness to be involved in the operation of Job Corps centers or in launching innovative programs which complement Job Corps training and provide advanced learning and career development opportunities.

Further, Job Corps centers are residential and provide students with the kind of support that accrues from having nutritious meals, health services, student government, organized sports and recreation, and the chance to see life in a positive atmosphere. This unique concept is one through which teenagers can develop some self-discipline, respect for others, respect for authority, and can receive the friendship and support of their fellow students. Counselors are equipped to handle personal problems. The concept is to permit students to become wellrounded, productive individuals who can cope with the day-to-day problems we all face and who can derive some self-satisfaction from having done so.

The success of the concept is clear from the statistics: In 1979, 93 percent of Job Corps enrollees were placed either in private sector jobs, admitted to school, or entered the Armed Forces. The placement rate of the Job Corps has increased steadily since it was created in 1964. Mathematica Policy Research, Inc., in a study recently performed for the Employment and Training Administration of the Department of Labor found that—

Corpsmembers averaged over four weeks more employment per year than the control group.

Corpsmembers averaged approximately $500 more per year in earnings than the control group.

There was double the likelihood of entrance into the United States armed forces.

Corpsmembers were three times as likely to earn a high school diploma or equivalent.

Five percent of Corpsmembers went on to college, while none of the control group did.

Corpsmembers averaged three fewer weeks of public assistance than control group.

Corpsmembers averaged one week less per year of Unemployment Insurance than control group.

There were significant Job Corps related effects in terms of reducing extra-marital children in females.

Robert Taggart, in a study just issued by the W. E. Upjohn Institute for Employment Research, estimates the social benefit-cost ratio of the Job Corps is about 1:45. His study is comprehensive since it includes such factors as reduced criminal activity—approximately $2,112 per Corps member—reduced treatment costs for drug and alcohol abuse—about $30 per Corps member—reduced dependence on transfer payments—approximately $1,515 per Corps member—and most importantly, increased post-program output—about $3,896 per Corps member.

Mr. President, it seems incongruous to me that we express outrage at the high level of youth unemployment, the lack of workers in skilled trades, the growth in Federal transfer payments for which society receives no service in return, and the loss of American industrial capacity and at the same time make a severe reduction in one of the few measurably beneficial programs in CETA. While other elements of CETA are of concern as well, pending our reauthorization next year, I feel that the Job Corps has made particular progress in reaching the very hard-to-reach young people in our country. In this respect, it is distinctive and deserves to be funded at a level which will preserve all the current aspects of this concept and its level of service. I hope all Senators will join me in support of this amendment.

Mr. President, I reserve the remainder of my time.

Mr. President, this is essential in order to prevent the loss of some of the major leaders in the Job Corps movement. This is one of the programs that really does work for the hardcore unemployed.

I believe this is a reasonable compromise that the distinguished Senator from New Mexico and I have struck. I certainly appreciate his accommodating my needs and those of the Labor and Human Resources Committee, of which I am chairman, in this matter, and I thank him for accepting this amendment.

Mr. SCHMITT. Mr. President, once again, the Senator from Utah has shown an excellent spirit of compromise on this issue.

The Committee and the Subcommittee on Appropriations for Labor, Health and Human Resources and Education have long recognized exactly what the Senator from Utah has said, that the Job Corps is a program that works.

It has a success rate of over 90 percent for the placement of its graduates in permanent income-earning positions; and the committee has already, independent of this amendment, taken a very strong position in favor of this program.

However, under the circumstances, $10 million in addition certainly will mean a great deal to the program, and I am happy to accept the amendment on my behalf, and I recommend it to the Senate.

Mr. MOYNIHAN. Mr. President, I was a member of the task force on poverty established by President Johnson which drew up the Economic Opportunity Act of 1964, about which we have heard very few pleasant things from the other side of the aisle until just recently.

I should like to note that as winter makes its way upon us, as spring will thereupon undoubtedly follow, upon which summer will follow, then fall, then another election, we are pleased to learn how many of the failed programs of the Great Society turn out to have heretofore unnoticed merit, such that amendments are put forth on their behalf by persons who perhaps heretofore had not had the opportunity to discern the innate goodness and the recorded and fine achievements of these programs.

This is an advance, and all of us should welcome the recognition, as Congress makes its way toward yet another adjournment sine die and yet another judgment by the people that not everything done in the 1960's turns out to be unacceptable in the 1980's.

I congratulate all those who have come, however late, to this perception.

Mr. HATCH. Mr. President, I just add that I have been a strong supporter of the Job Corps because I believe it is a good program. It is one of the few that is. It is one of the few hopes we have with regard to the hardcore unemployed. There may be other ways and there may be other approaches. I might even prefer other approaches as we get into this in the future, especially those that would further augment private sector employment. The Job Corps does that; and for that reason, I think my amendment is a good one.

Mr. SCHMITT. Mr. President, I appreciate the eloquent remarks of the Senator from New York, I think he also would

recognize that we are being very selective in the programs, that through experience, have shown some promise and are continuing to try to encourage those programs.

Unfortunately, the majority of the programs under the scrutiny in this area have not shown such promise and the Senate as a whole, both sides of the aisle, have in their wisdom decide to proceed onto sunnier times with respect to job training programs and other assistance to those who through the years have not been well served by many of the programs.

Fortunately, the Job Corps has begun to work finally and is showing considerable promise, and this side of the aisle as well as many other Senators are showing that in their support for it.

I move the amendment.

● Mr. WILLIAMS. Mr. President, I support the increase in funding for employment and training programs.

This amendment would merely bring the Senate funding level more closely in line with that proposed by the House. The amount still falls within the reconciliation guidelines.

As we are all aware, the unemployment rate in this country now stands at 8 percent with the assurance that rate will continue to spiral.

At a time when this Nation's economy is already experiencing double-digit inflation and we are in the midst of a major recession, we desperately need every American to be trained and educated to join the labor force and to work at maximum capacity.

It makes no sense to eliminate employment opportunities for individuals who are making a contribution as part of the workforce. What objective can possibly be served by placing more individuals on unemployment and welfare roles at a time when we are seeking to develop a program of economic recovery?

The administration has pledged support to explore methods of expanding private sector initiatives. I support that concept and encourage such an expansion of job opportunities.

I would submit, however, that we have an immediate need to provide job training and opportunities now—not just exploration.

Since November 4, the budget cutters have consistently reminded us of the message sent by the American people to the leaders of this Nation of their desire for a change in direction. In my view, another message is involved in many of the cuts proposed by this administration.

It is a message to the unemployed individuals, and it says, that in our efforts to balance the budget, we are eliminating their jobs, that they are no longer important enough to receive our help and that they do not have the opportunity to work their way toward a better life.

I do not believe we can afford to ignore the dire predicament of our economy. But, I also do not believe that we are going to eradicate that predicament by taking away job training and opportunities.

I urge support of this amendment.●

Mr. RANDOLPH. Mr. President, products created by the Job Corps in Jefferson County, W. Va., have been used by the government of the District of Columbia in the lessening of waste and litter.

The Corps has participated in programs to improve the land with the elimination of soil erosion.

Increased use of the Harpers Ferry National Historical Park is evidenced by the efforts of these young people, many of them from city environs as they worked to provide facilities which made this area more attractive to an increasing number of visitors.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment (UP No. 684) was agreed to.

Mr. HATCH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, we are moving along fairly well. We have had to lay a few aside and now we are getting those cleaned up.

Mr. President, one more time. I at this time as a comanager of the bill set aside the committee amendment and ask the Chair to recognize the Senator from North Dakota for the purpose of finishing up an amendment and then following him will be the Senator from Arizona, Senator DECONCINI.

UP AMENDMENT NO. 685

Mr. ANDREWS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Dakota (Mr. ANDREWS) proposes an unprinted amendment numbered 685.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the joint resolution insert:

SEC. . Notwithstanding any other provision of law or of this joint resolution:

Subchapter V of chapter 55 of title 5, United States Code, is amended by adding the following new section 5546a after section 5546:

"SEC. 5546a. Operational responsibility differential for employees of the Federal Aviation Administration.'

"(a) An employee of the Federal Aviation Administration, as such term is defined in subsection (b) of this section, shall be eligible for an operational responsibility differential equal to five percent of his rate of basic pay, and such differential is in addition to and not in lieu of any other premium pay to which the employee may be entitled.

(b) For purposes of this section, the term "employee" includes:

(1) persons occupying positions not lower than the GS–9 level in the air traffic controller series in air traffic control centers or terminals or in flight service stations, persons occupying positions not lower than the GS–9 or WG–10 level in airway facilities sectors, and persons occupying flight inspection crewmember positions not lower than the GS–11 in flight inspection field offices, the duties of whose positions are determined by the Federal Aviation Administrator to be directly involved in or responsible for the operation or maintenance of the air traffic control sytsem; and

(2) persons occupying flight test pilot positions not lower than the GS–12 level in regions or centers, the duties of whose positions are determined by the Federal Aviation Administrator to be unusually taxing and critical to the advancement of safety in the national airspace system.

The Federal Aviation Administrator may prescribe regulations to determine the application of this subsection.

(c) The provisions of section 5547 of this title relating to limitation of premium pay shall not apply to an employee of the Federal Aviation Administration who is eligible for the operational responsibility differential authorized by this section.

The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new item after section 5546:

"SEC. 5546a. Operational responsibility differential for employees of the Federal Aviation Administration."

Subchapter V of chapter 55 of title 5, United States Code, is amended by adding the following new section 5546b after section 5546a:

"SEC. 5546b. Operational currency pay for air traffic controllers".

"An employee of the Federal Aviation Administration, classified in the air traffic controller series, who is employed in an air traffic control center or terminal and who is not required as a condition of his employment to be certified by the Federal Aviation Administrator as medically qualified for and proficient in the separation and control of air traffic shall be eligible to receive upon attaining such certification of medical and proficiency qualifications an operational currency differential of 1.6 percent of his rate of basic pay while so certified".

The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new item after section 5546a:

"SEC. 5546b. Operational currency pay for air traffic controllers".

Subchapter V of chapter 55 of title 5, United States Code, is amended by adding the following new section 5546c following section 5546b:

"SEC. 5546c. Pay for on-the-job training by air traffic controllers".

"An air traffic controller selected by the Federal Aviation Administration and assigned to provide on-the-job training to another air traffic controller who is directly involved in the separation and control of live air traffic shall be eligible to receive premium pay at a rate equal to 10 percent of his rate of basic pay for the time that he provides such training, and such premium pay shall be in addition to and not in lieu of any other premium pay to which the air traffic controller may be entitled".

The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new section after section 5546b:

"SEC. 5546c. Pay for on-the-job training by air traffic controllers".

Subchapter V of chapter 55 of title 5, United States Code, is amended by adding the following new section 5546d after section 5546c:

"SEC. 5546d. Premium pay for loss of meal period".

"An air traffic controller or a flight service station specialist employed by the Federal Aviation Administration, working a regularly scheduled 8-hour period of service and who is required by his supervisor to work that

8-hour period without a 30 minute meal break shall be paid one-half hour at the rate of one and one-half times his rate of basic pay. The meal period shall be granted during the fourth through sixth hour of such 8-hour period."

The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new item after section 5546c:

"SEC. 5546d. Premium pay for loss of meal period".

Section 5532 of title 5, United States Code, is amended by adding a new subsection (f) to read as follows:

"(f) Notwithstanding any other provision of law, retired members of a uniformed service who are temporarily employed in an air traffic control function or in a related training function during a period determined by the Federal Aviation Administrator to require special air traffic recruitment efforts, shall be entitled to continue to receive full retired or retainer pay in addition to the salary for the position occupied. The provisions of this subsection shall be effective until December 31, 1984".

Section 8344 of title 5, United States Code, is amended by adding a new subsection (f) to read as follows:

"(f) Notwithstanding any other provision of law, an annuitant, receiving an annuity from the Fund, upon appointment to a position in an air traffic control function or in a related training function during a period determined by the Federal Aviation Administrator to require special air traffic recruitment efforts, shall be entitled to continue to receive the full amount of the annuity in addition to the salary for the position occupied. The provisions of this subsection shall only be applicable to annuitants who filed an application for retirement with their employing agency before August 3, 1981 or whose retirement from the Civil Service occurred before August 3, 1981. The provisions of this subsection shall be effective until December 31, 1984".

Section 4109 of title 5, United States Code, is amended by adding a new subsection (c) to read as follows:

"(c) Notwithstanding subsection (a)(1) of this section, the Federal Aviation Administrator may pay a person undergoing training as an air traffic controller at that employee's rate of basic pay for time the employee is assigned to training in excess of 40 hours in a workweek".

Section 8339(e) of title 5, United States Code, is amended by striking the period at the end of the second sentence and adding the following in lieu thereof: ", except that this provision shall not apply to an individual who has received a refund of civil service retirement deductions pursuant to section 8342 of this title covering any period in which he was employed as an air traffic controller, unless the individual redeposits the amounts refunded pursuant to section 8334 (d) of this title."

The amendments made by sections 2, 3, 10, and 11 of this Act shall take effect as of August 3, 1981, commencing with shifts beginning on or after 5:00 a.m. Eastern Daylight Time. The amendments made by other sections of this Act shall take effect on the first day of the first applicable pay period which begins after the date of enactment of this Act, except for sections 1 and 13 which shall be effective upon enactment.

Mr. ANDREWS. Mr. President, this is an amendment that puts an adjustment in the pay scale of certain FAA employees who are necessary at this particular point in time.

This amendment has been cleared by the distinguished minority leader, the majority leader, the ranking minority member of the Appropriations Committee, the Senator from Wisconsin; the chairman of the Appropriations Committee, Senator CHILES, who is ranking on the Transportation Committee and myself, of course, as chairman of the Transportation Committee.

I yield to the Senator from Alaska.

Mr. STEVENS. Mr. President, I am sure there is no disagreement about the debt we owe the men and women in the FAA who have kept our air traffic control system operating both safely and efficiently since the controllers strike in early August. Few of us would have anticipated that despite the magnitude of the controllers walk-out, our air traffic system is operating at about 80 percent of the prestrike commercial traffic levels. That kind of effort richly deserves our recognition today.

I would also add that all my conversations with the users of the air traffic system indicate convincingly that the system is operating not only the controllers who have stuck with the FAA, but also others in the FAA who have performed extraordinarily in providing that level of safety.

In the aftermath of the strike by the professional air traffic controllers, it is critical that we undertake an expedited effort to restaff our air traffic control facilities at the appropriate and necessary levels to insure the continued safety of the flying public. Special recruitment procedures and increased emphasis on controller training will be necessary. To best meet the needs of the system, I support this amendment to provide special recruitment incentives, and to assure that the current workforce receives equitable pay treatment. This amendment does not require an additional appropriation, as funding is currently present in H.R. 4209 to fully cover the costs of my proposal.

This amendment, Mr. President, will enable the Federal Aviation Administration to temporarily appoint retired military and civil service annuitants to position in air traffic control functions and related training functions without a reduction in their annuities. They would be hired to fill short-term needs, and would be used only in positions for which they are fully qualified—I want to emphasize here that safety will not be compromised in any manner by the appointment of such individuals. When the FAA Administrator has determined that the need for such a special controller recruitment effort has terminated, these special employees will return to their retired status.

Also proposing that designated classes of FAA employees receive an operational responsibility differential equal to 5 percent of their basic rate of pay in recognition of the important role they have played and continue to play in the operation and maintenance of the air traffic control system. In addition, certain personnel—such as data system specialists and planning and procedures specialists in FAA terminals and centers—would be entitled to receive an operational currency differential of 1.6 percent of their base pay.

Mr. President, the air traffic controllers who provide training to other air traffic controllers are assuming an extra responsibility on top of their already significant duties. I propose a premium pay of 10 percent of their basic rate of pay to those air traffic controllers. The premium pay would be in addition to other premium pay to which the controller is entitled.

Further, I am proposing an amendment to the training provisions of title 5 so that an air traffic controller may receive pay for time in a training status in excess of a 40-hour workweek. Pay would be at the rate of basic pay, not at overtime rates. These provisions, Mr. President, recognize that intensified training efforts may be necessary to rebuild the air traffic system in a timely manner.

Although the FAA seeks to provide each controller with time for a meal break, this is not always possible given unusual workload conditions which may arise at a particular facility. Accordingly, I am proposing that, on those occasions when a half-hour meal break cannot be granted at a reasonable time during an 8-hour shift, a controller shall be paid at one and one-half times his basic rate of pay for the time spent working rather than on meal break.

The last aspect of this amendment, Mr. President, would clarify the special controller retirement program which guarantees a minimum 50-percent annuity to a retiring controller. My proposal would amend the controller retirement statute to make clear that a controller who has withdrawn money from the retirement fund will not receive the minimum annuity of 50 percent unless he has redeposited those contributions. As presently drafted, section 8336(e) of title 5 could be construed to mean that a controller who resigns and withdraws all of his retirement contributions to be eligible for a minimum 50-percent annuity upon reemployment. Of course, that is not the intent of the provisions, and this amendment today would clarify that.

Mr. President, I urge my colleagues to support my amendment so that we can begin to rebuild our Nation's air traffic control system.

Mr. President, I ask unanimous consent to have printed in the RECORD the section-by-section analysis of the amendment.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

Section 5546a. This section authorizes designated classes of Federal Aviation Administration employees to receive an operational responsibility differential of 5 percent of their basic salary. Only designated types of employees at or above specified grade levels could be entitled to receive the operational responsibility in recognition of the fact that employees at the lower grade levels have fewer operational responsibilities. The Federal Aviation Administrator would have discretion to determine position coverage within the statutory guidelines. For example, for coverage to apply to a specific flight test pilot position, the Administrator would need to determine that the duties of the position are both unusually taxing and critical to the advancement of safety of the national airspace system; for other types of designated positions to be covered, the Administrator

would need to determine that the duties are directly involved in or responsible for the operation or maintenance of the air traffic control system. Subsection (c) of proposed section 5546a provides that FAA employees who are eligible for the operational responsibility differential are exempted from the limitation on premium pay of section 5547 of title 5.

Section 5546b. This section would provide an incentive for employees in air traffic control centers and terminals who are classified as controllers but who are not required by the FAA to maintain certification of medical and operational currency to seek such certification. It would provide premium pay of 1.6 percent of base pay to an individual who receives such certification during the period that he maintains that certification.

Section 5546c. This section would entitle air traffic controllers to 10 percent premium pay for providing on-the-job training to other controllers who are engaged in separating and controlling live air traffic. It would not apply to instructors at the FAA Academy where all training is performed under simulated air traffic conditions or to classroom training at the facilities.

Section 5546d. This section would either assure air traffic controllers an uninterrupted meal break of one-half hour's duration for each full eight hours they work or in lieu of that it would provide premium compensation for that one-half hour period should workload not permit such a break.

Sections 5532 and 8344. These sections would permit the Federal Aviation Administrator to temporarily employ at his discretion retired members of the uniformed services and Civil Service annuitants in FAA air traffic control functions or in related training functions, while permitting the retirees to retain their full annuities and full salaries for the positions occupied. The individuals covered may be employed only during a period defined by the Administrator as requiring special air traffic control recruitment efforts. An employee will be returned to his retirement status when the need for his services is determined by the Administrator to have terminated. In the case of Civil Service annuitants, they must have retired or have filed an application for retirement with their employing agency before August 3, 1981, in order to receive the benefits of this proposal; otherwise, the proposal could serve as an inducement for individuals to retire. The provisions do not provide any special tenure to these employees who are temporarily employed nor do they alter in any way the existing authority of the Administrator to separate employees on temporary appointments at any time.

Section 4109. This section would permit air traffic controller trainees to receive pay for time assigned to training in excess of 40 hours in a week. Pay would be at the rate of basic pay, not at special overtime rates.

Section 8339(e). This section would clarify the special controller early retirement program. At the present time, the law could be construed to entitle a controller to a minimum annuity of 50 percent even if he has withdrawn all his retirement contributions and failed to repay them. The amendment made by this section would make it clear that a controller is entitled to a 50 percent minimum annuity only if he has redeposited into the Civil Service Retirement Fund all withdrawals he has previously made from the Fund; otherwise, the controller's retirement will be calculated in the same manner as for other Federal employees and may result in less than a 50 percent annuity.

The final changes provide for the effective dates of the amendments.

Mr. STEVENS. It is an amendment that has no budgetary impact because the funds are available.

Mr. ANDREWS. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Dakota.

The amendment (UP No. 685) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I set aside the technical committee amendment in order for the Chair to recognize the Senator from Arizona (Mr. DeConcini).

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DECONCINI. Mr. President, I thank the chairman for recognition.

UP AMENDMENT NO. 686

(Purpose: To disapprove in its entirety the proposed deferral of budget authority for Veterans' Administration health-care facility construction)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) for himself, Mr. CRANSTON, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. MITCHELL, Mr. BRADLEY, Mr. GLENN, Mr. METZENBAUM, Mr. WEICKER, Mr. WILLIAMS and Mr. SASSSER.

Mr. DECONCINI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, strike out all on lines 1 through 5 and insert in lieu thereof the following:

(43) The Congress disapproves the proposed deferral D82-140, which would defer the amount of $91,300,000 of budget authority for the Veterans' Administration, as set forth in the message transmitted by the President to the Congress on October 23, 1981, under section 1013 of the Impoundment Control Act of 1974. Such disapproval of such deferral shall be effective upon the date of the enactment into law of this resolution and the enactment of this resolution shall, for the purposes of the Impoundment Control Act of 1974, have the same effect as passage by either House of Congress on such date of an impoundment resolution (as defined in section 1011(4) of such Act) disapproving such deferral.

Mr. DECONCINI. Mr. President, without losing my floor privileges, I am glad to yield to the Senator from Ohio to make a statement.

Mr. GLENN. Mr. President, I thank the distinguished Senator very much.

Mr. President, I rise to support the amendment by the Senator from Arizona; I am a cosponsor of his amendment as well as of Senate Resolution 239.

First, I am interested in the pending amendment because of the direct impact of this deferral on the State of Ohio, specifically on the Chillicothe Veterans' Administration Medical Center. This center is a nonaffiliated psychiatric facility located in south central Ohio. The 345-acre facility has a total authorized bed capacity of 1,107 hospital and 99 nursing home care beds situated in 13 patient buildings. Chillicothe serves the nearly 1.3 million veterans residing in medical district 13, providing health services to veterans from a wide geographic range in the Ohio, West Virginia and Kentucky area.

The mission of this health care facility is to provide quality primary and secondary care in psychiatry and primary care in medicine, rehabilitation medicine and dentistry to veterans.

In addition to general hospital care, facilities exist for the provision of intermediate care and nursing home care. Primary and follow-up care are provided through ambulatory care clinics, including podiatry, optometry, respiratory intensive care and cardiology, and through residential care follow-up. Unique capabilities exist at this facility in the provision of specialized rehabilitation medicine services, alcoholic rehabilitation, vocational rehabilitation and compensated work therapy.

The Chillicothe facility's major buildings were built during the 1920's and 1930's. The first phase of a programed facility improvement was completed in 1979. This project, costing $10 million, renovated five buildings. Phase II, which would renovate three additional buildings, was fully funded for the fiscal year 1981. It is this phase of the needed ongoing renovation program that the Administration is proposing to defer for yet another year. A report on a survey conducted by the American Legion at the Chillicothe facility notes that the unremodeled psychiatric wards are currently in violation of the life safety code due to exit deficiencies and, I understand, in noncompliance with the Joint Commission on the Accreditation of Hospitals standards on patient privacy. I believe our veterans deserve better.

Beyond my specfic interest in the Chillicothe facility, I fully share the concerns so eloquently expressed by the Senator from California (Mr. CRANSTON), when he introduced Senate Resolution 239. The deferral notice states "this amount is deferred while the administration reviews all major construction projects for VA medical facilities and considers alternative methods for providing readily available quality medical care." This is a euphemism for mainstreaming or vouchering out which could undermine the whole VA health care system.

We have an obligation to provide quality health services to our Nation's veterans and I strongly support the continued provision of that care through the VA medical care system. I believe this amendment should be adopted by the Senate in order to send a strong message to this administration that we are not interested in any proposals which threaten the continued viability of the VA medical care system.

I am glad to recommend this amendment to my colleagues with great enthusiasm. I think it is very valuable, and I compliment my distinguished colleague for bringing it to our attention.

Mr. DECONCINI. Mr. President, the amendment I am offering would disapprove the deferral (D82–140) of five major VA construction projects totaling $91.3 million.

The distinguished ranking member of the Senate Veterans Affairs' Committee, Senator CRANSTON, originally introduced this impoundment resolution on November 5, 1981, and joins me as an original cosponsor of this amendment today. Also joining us as original cosponsors are Senators RANDOLPH, MATSUNAGA, MITCHELL, BRADLEY, GLENN, METZENBAUM, WEICKER, WILLIAMS, and SASSER.

Mr. President, this amendment would disapprove the deferral of the following five VA major construction projects:

First, a research and education addition at Long Beach, Calif., in the amount of $11.4 million;

Second, a nursing home and parking garage at Washington, D.C., in the amount of $22.4 million;

Third, a phased replacement facility at Chillicothe, Ohio, in the amount of $13.7 million;

Fourth, a surgical addition at Palo Alto, Calif., in the amount of $14.8 million; and

Fifth, a facility renovation at East Orange, N.J., in the amount of $29 million.

It should be noted, Mr. President, that the deferral of the first two construction projects—those at Long Beach, Calif., and Washington, D.C.—have already been disapproved and are incorporated as part of the continuing resolution. I applaud that action but believe that the deferral of all five of the construction projects contained in D82–140 should be disapproved for the following reasons.

First and foremost, Mr. President, the message accompanying this deferral raises a fundamental policy issue. That message, which has signed by the President and transmitted to Congress on October 23 states, and I quote:

> This amount is deferred while the Administration reviews all the major construction projects for VA medical facilities and considers alternative methods for providing readily available quality medical care for eligible veterans.

Let me underscore the point that this is the only justification that the President provides for this deferral.

Now, Mr. President, what alternative methods could the Administration possibly be considering for providing readily available quality medical care for eligible veterans? The only alternative method conceivable would be some scheme whereby veterans would receive treatment in non-VA medical facilities by way of a voucher system with the Federal Government picking up the costs.

To embark upon a course of vouchering or mainstreaming veterans into the private health care sector is not only bad policy, it represents a violation of our commitment to the men and women who have served their Nation with honor during periods of war. A veteran is a unique individual, with unique health care needs and an independent health care system within the Veterans' Administration was specifically designed to meet those needs. If we begin the process of mainstreaming, or contracting out, it will surely signal the demise of an independent health care system within the VA.

Mr. President, I categorically reject vouchering or mainstreaming as a policy option. Every major veterans' organization in the country categorically rejects this concept. The Chief Medical Director of the VA, Dr. Donald Custis, emphatically rejects this idea. The Administrator of the VA, Mr. Robert Nimmo, during his confirmation hearings before the Senate Veterans' Affairs Committee registered his opposition to the concept of mainstreaming. Yet here we are, once again, wondering if the administration is seriously considering such an option. I urge every member of this body to support this amendment so we can lay this matter to rest once and for all.

Although my primary purpose for disapproving this deferral is based on my strong objections to the language of the deferral message, I believe these projects should move forward on schedule for additional reasons. Mr. President, the Nation has a moral obligation to provide quality health care to the Nation's veterans at each of the 172 hospitals within the VA medical system. Many of these facilities are antiquated and are in desperate need of renovation and repair. Others require design changes to accommodate the installation of the latest advances in medical equipment and technology. Still others require additional operating room space so veterans will not be faced with long delays for essential surgical procedures. Let me give you an example of the situation in my home State of Arizona.

The Prescott VA Medical Center has only one surgical suite. Whenever two surgical procedures are required simultaneously, one must be performed at a local hospital, and this is not an infrequent occurrence. Additionally, the surgical recovery suite is located on a different floor from the surgical suite at the opposite end of the building. Clearly, this hospital needs immediate attention if it is to fulfill its promise of quality health care for the veterans it serves, yet no construction is planned for this facility until 1984.

Mr. President, if the VA does not have adequate funding to meet the continous need for upgrading and repair of existing facilities within the system, it will be unable to maintain its current reputation as a health resource system of the highest caliber. Our veterans deserve the best medical care available and that is the type of care they have historically received. Any significant decline in the quality of care in the VA hospital system, however, will inevitably lead to its demise.

Mr. President, I believe this deferral should be disapproved for yet another reason. Our VA hospitals are already overburdened and additional pressures will inevitably be placed on the system by an increasingly aged veteran population. Twelve million World War II veterans are rapidly approaching an average age of 65. It is precisely at this point in life when most individuals require additional medical attention and care. This is not the time to be delaying construction projects when we know with certitude that an ever-increasing number of eligible veterans are going to need additional care.

Mr. President, I also believe this deferral should be disapproved because it will ultimately result in increased costs. The VA estimates that a 1-year delay of the five projects the Administration has proposed to defer will add $25.7 million to their total projected costs. A 1-year delay on the three projects not incorporated in the continuing resolution will add $17.8 million to the cost of those projects. These are not insignificant amounts, Mr. President.

If our ultimate objective is to reduce VA health care costs, it cannot be achieved by delaying essential construction projects. We can expect the cost of construction to continue to escalate and any project delays will necessarily result in the Federal Government footing a larger bill.

Mr. President, I would also note the importance that the second sentence of our amendment would add to the provision disapproving the deferral. That part of our amendment is designed to trigger the provisions of the Impoundment Control Act of 1974 requiring that, when a proposed deferral is approved, the funds be made available for obligation and authorizing the Comptroller General to enforce that requirement in court.

It is important to note, however, that, under sections 1012(B) and 1016 of that Act, the requirement that funds be made available for obligation and this enforcement provision apply only where either House of Congress has passed an impoundment resolution disapproving the proposed deferral. Section 1011(4) of the act defines the term "Impoundment Resolution" as a resolution of either House "which only expresses its disapproval of a proposed deferral."

Since the continuing resolution obviously does not meet that definition, language specifying that enactment of the provision disapproving the deferral shall have the same effect as passage of an impoundment resolution seems necessary in order for the disapproval to have the intended effect.

Mr. President, I respectfully request that the communications I have received from the American Legion, the Disabled American Veterans, Veterans of Foreign Wars, AMVETS and the Paralyzed Veterans of America in support of this amendment be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MAILGRAM MESSAGE

We seek your support for Senator DeConcini's effort to disapprove the deferral of $91.3 million in VA hospital construction appropriations.

Deferral of these funds will delay the construction or renovation of five VA facilities. This delay, when considering the impact of inflation, will result in increased construction costs.

E. PHILIP RIGGIN,
Director, National Legislative Commission, the American Legion.

Hon. DENNIS DECONCINI,
Senate Office Building,
Washington, D.C.

On behalf of the more than 1.9 million men and women of the Veterans of Foreign Wars of the United States, I urge in the strongest possible terms your support and vote tomorrow, November 19, for the DeConcini-Cranstan et al. amendment, to the continuing resolution disapproving deferral D82–140, the justification for which would be the first step in destroying the VA hospital and medical care system by contracting out medical care for disabled veterans.

ARTHUR J. FELLWOCK,
National Commander-in-Chief, Veterans of Foreign Wars of the United States.

PARALYZED VETERANS OF AMERICA,
November 13, 1981.

Hon. DENNIS DECONCINI,
Senate Committee on Appropriations, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR DECONCINI: Paralyzed Veterans of America urgently requests your support for passage of Senate Resolution 239. This Resolution was introduced by Senator Alan Cranston in response to a proposed deferral, D82–140, which would withhold $91.3 million in appropriated Veterans Administration medical funds in FY 1982. The Deferral Message indicates the Administration is seeking to delay funding while alternative methods for providing medical care for eligible veterans is being considered. This action comes at a time when VA health care facilities are already stretched to the limit in providing care to our nation's veterans. It is estimated that the delay caused by a deferral could add $25.7 million to the total projected costs for the projects concerned. The Senate has traditionally supported an independent VA health-care system with adequate funding.

Again, PVA requests your support for passage of Senate Resolution 239.

Sincerely yours,

R. JACK POWELL,
Executive Director.

DISABLED AMERICAN VETERANS,
November 19, 1981.

Hon. DENNIS DECONCINI,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DECONCINI: I have been informed of your intention to offer an amendment to H.J. Res. 357, Fiscal Year 1982 Continuing Appropriations for all Federal Departments and Agencies, when that measure is considered on the floor of the U.S. Senate.

As I understand your amendment, it would, with respect to funding for the Veterans Administration, disapprove deferral D82–140 and thereby allow the VA to proceed with five major health care construction projects that have been previously authorized.

Senator DeConcini, speaking on behalf of the 700,000 members of the Disabled American Veterans, I wish to state that you have our organization's strong and unqualified support.

As you, we believe that responsible maintenance, improvement and expansion of our VA Hospital System must continue if our nation is to fulfill its responsibility to provide quality medical care to America's sick and disabled veteran population.

You are to be commended for the leadership role you have assumed on this most important issue. I trust that you will receive the full support of your colleagues in the United States Senate.

Sincerely yours,

SHERMAN E. ROODZANT,
National Commander.

AMVETS,
Lanham, Md., November 19, 1981.

Hon. DENNIS DECONCINI,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DECONCINI: On November 12, 1981, I addressed a letter to Senator Alan Cranston expressing AMVETS approval for his proposed resolution disapproving the deferral of 91.3 million dollars of funds previously appropriated that were to be expended this year for the VA hospital construction. I am quoting two paragraphs from that letter:

"Your anxiety about the President's proposed deferral of appropriations for 5 VA major construction projects that was forwarded to the Congress on October 23 is shared by AMVETS. We feel, as you do, that there is no jurisdiction for the proposed deferral of 91.3 millions of dollar funds previously appropriated that were to be expended this fiscal year. There is no viable alternative for providing readily available quality medical care for eligible veterans. We also view the possibility of a veteran's health care program turning into a voucher system with veterans receiving health care in non-VA hospitals paid for by the Federal Government. This path, referred to as 'Mainstreaming', favored by the private Medical Sector, can lead to only one destination: The inevitable demise of the VA health care system. And, we are convinced, that such an obituary is currently being written by the Administration and others who are intent to see the passing of the VA health care system as we know it today.

"We are completely in agreement with and unequivocably endorse your resolution disapproving the deferral of major construction funds with opposition to any suggestion that there is any appropriate role for the concept of 'Mainstreaming' or 'vouchering out' veterans' health care. Your efforts in combating such attempts are greatly appreciated by the membership of AMVETS."

We would appreciate your support of the resolution.

Very truly yours,

GABRIEL P. BRINSKY,
Acting National Executive Director.

Mr. DECONCINI. I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, I am pleased to rise in support of the amendment of my distinguished colleague (Mr. DECONCINI) with whom I am pleased to serve on the Veterans' Affairs Committee. The Senator from Arizona is a great friend of our Nation's veterans. In this his first year on the committee, he has proven to be active and effective in protecting their interests.

His amendment derives from the impoundment resolution, Senate Resolution 239, which I introduced on November 5 on behalf of myself and the Senator from Arizona and eight other Senators, to disapprove the October 23, 1981, proposed deferral. D82–140, of five Veterans' Administration medical construction projects. As Senator DECONCINI has noted, our resolution has the strong, unified support of the Veterans' organizations.

These organizations and those of us supporting the resolution and this amendment clearly see the central issue here as far transcending the merits of the projects involved—the merits of which are not in dispute, all are necessary and have previously been approved by the Congress. The central issue is whether the Senate is going to endorse or reject a concept—the vouchering-out of veterans' health care services—that would undermine the very foundation of a strong, independent VA health care system to meet the needs of sick and disabled veterans and could lead to the dismantling of that system.

In his October 23 message, the President proposes to defer funds covered by deferral D82–140 "pending completion of a project review" described in the enclosed deferral report as being "while the administration reviews all major construction projects for VA medical facilities and considers alternative methods for providing readily available quality medical care for eligible veterans."

Mr. President, the only alternative to the provision of care through VA facilities that has been under consideration within and without the administration is to provide veterans with health care in non-VA hospitals by way of a voucher system, with the Federal Government paying for the care received. This is the so-called "mainstreaming" approach in non-VA hospitals, a misnomer in my view because the VA is already in the mainstream of modern medicine. That the administration is giving such an alternative serious consideration is troublesome enough; but I find it especially disconcerting that the President himself, by specifically explaining the basis for the deferral—in the transmittal message that he himself signed—apparently approves of his administration's consideration of such an alternative, an alternative that clearly is the first giant step toward shutting down the entire VA hospital system.

I unequivocally reject such an approach, and I strongly urge my colleagues do so as well. In my view, once you start down the road of vouchering, it becomes inevitable that the whole VA system will lose its identity, its vitality, and its cohesiveness and will eventually wither away.

Thus, I strongly believe that any deferral based on giving the executive branch time to explore this alternative is extremely ill-advised. It deserves to be turned down flatly and decisively by approval of this amendment. That is why I introduced S. Res. 239.

ARGUMENTS AGAINST VOUCHERING OUT

Mr. President, on November 5, in introducing that impoundment resolution to disapprove the proposed deferral, I made a detailed statement explaining why disapproval of the deferral is so important. [That statement appears in the daily edition of the RECORD for that date on pages S13032 through S13041.] I will not reiterate in full all of the views expressed in that statement, but I do feel it is important to highlight some of the arguments against the deferral.

Mr. President, the VA runs a nationwide, comprehensive health-care system through which veterans with disabilities incurred during their service are given the treatment that they need and deserve. Providing such care is a national

moral commitment of the highest order. Any suggestion such as in the President's message that our obligation to service-connected veterans can be met by government payment for their health care in community facilities is simplistic and overlooks the unique benefits of the VA system.

By virtue of its obligation to care for service-connected veterans, the VA system has developed great skill and expertise in treating the immediate and residual effects of injuries related to combat service, such as amputations, spinal-cord injuries, and many others, including the psychological after-effects of combat. Although under "vouchering-out" there may be facilities in some communities that could provide comparable care for some of these disabilities, there would be no way to insure that service-connected disabled veterans would receive either the comprehensiveness of care or the priority for getting it that they now receive in the VA system.

Moreover, any kind of vouchering system would also lead to financially needy veterans and coupled—with what appear to be inevitable cutbacks under medicare and medicaid and other Federal health-care programs—elderly veterans with non-service-connected disabilities having to go without needed medical care or receiving less than adequate care.

Substituting access in community facilities in place of the VA system would have a number of other significant drawbacks. Under legislation, H.R. 3499, just signed by the President on November 3, Public Law 97-72, and another bill, S. 266, currently passed by both Houses and awaiting resolution of differences, the VA is given a formal role as the primary backup to the Department of Defense to treat casualties of armed conflict. Any significant reduction of VA health care resources would preclude the VA from filling this very vital role.

Mr. President, the VA is a national health-care resource that is becoming ever more important as the Nation's population ages and the need for acute and extended care, health care facilities grows as a result. In anticipation of the significant increase in the number of aging veterans that will be turning to the system in the near future as the over 12 million World War II veterans reach an average age of 65, the VA has become a leader in both research on the aging process and the effects of aging and on caring for the diseases and disabilities that come with aging. Because of its extensive relationships with medical schools throughout the country, the VA's actions in this regard hold promise of far-reaching impact.

Although the primary importance of the VA's research and education efforts in cooperation with affiliated medical schools and other health care professional training institutions is to improve the quality of care provided to eligible veterans. These efforts have larger benefits for all society. Last year, for example, over one-third of all medical students received some of their training in VA facilities as did 70,000 nursing and allied health students.

CONFUSION ABOUT THE ADMINISTRATION'S POSITION

Mr. President, I thought the administration understood and appreciated the importance of and need for the VA health care system. Certainly, that was the clear impression I got when Robert P. Nimmo, now Administrator of Veterans' Affairs, told the committee just this past July 9 at his confirmation hearing—in response to a question from the committee chairman, my good friend from Wyoming (Mr. SIMPSON), on his "position on the need for a separate, an independent VA medical care program"—that:

Well, I think it is indispensable. I think that a separate independent VA medical care program represents a commitment of the people. It represents a commitment of the President.

I am fully aware that the siren song of mainstreaming and some other things have been floating around, but those are hazardous ideas that ought not to be pursued.

Mr. Nimmo reiterated this view in response to my request for clarification as to whether it was clear that his rejection of "mainstreaming" reflected the President's position. He responded:

As I understand it, I think the President has been quite clear on that.

And the Chief Medical Director of the Veterans' Administration, Dr. Donald L. Custis, has spoken out forthrightly in opposition to "mainstreaming" on numerous occasions. In a comprehensive discussion of this topic that he delivered to the American Legion Department of Minnesota the day following his meeting with the American Medical Association's board of trustees to discuss a resolution pending before that body that advocated the "mainstreaming of services to veterans", Dr. Custis stated, as he had to the AMA, with reference to the pending resolution:

To advocate such an option [mainstreaming] is entirely contrary to the historical position and commitment of the electorate and the law.

Mr. President, in light of Dr. Custis' views of mainstreaming, at a Veterans' Affairs Committee hearing on November 5, I raised with him my concerns regarding and sought clarification of the stated justification for this deferral. Dr. Custis indicated that he could provide no clarification and that he had not received any clarification on the meaning of the justification since October 23, when the deferral was forwarded to the Congress. When I asked Dr. Custis if he was concerned about the meaning of the statement, he replied "I'm confused and concerned." I certainly share his reaction in that regard.

Mr. President, I ask unanimous consent that the transcript of my exchange with Dr. Custis at the committee's November 5 hearing be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the Record, as follows:

EXCERPT FROM SENATE VETERANS' AFFAIRS COMMITTEE HEARING, NOVEMBER 5, 1981

Senator CRANSTON. Don, in my opening remarks I referred to my concerns about the ominous implications of Circular A-76, in light of the deferral of budget authority in the major construction account that the President sent the Congress on October 23.

It seems to me that the statement in the justification for that deferral that the funds were being deferred while the Administration considers alternative methods for providing readily available, quality medical care for eligible veterans, which I believe must refer to proposals to provide veterans with health care in the private sector at Government expense, maybe the first giant step towards shutting down the entire VA hospital system.

I know that Chairman Simpson feels that there is no such implication. But I would like to say that, as you know, Administrator Nimmo, at his confirmation hearing, strongly supported the need for separate and independent VA medical care system and, with reference to proposals to mainstream veteran's health care, stated that those are hazardous ideas that ought not to be pursued.

He also indicated to both the Chairman and me that the President's views on these issues were the same as his. That's what Chairman Simpson was referring to.

I'm also aware that you have repeatedly spoken out against mainstreaming proposals. Do you have any comment on what the Administration is planning by way of its consideration of these alternative methods, so-called, for providing health care to veterans?

Dr. CUSTIS. Senator, I really can shed no light on the meaning or even the implication of that phrase in the deferral request.

I've always felt that the threat—and I do indeed consider it a threat—of mainstreaming is from the private sector, and not from within the Federal establishment.

As a matter of fact, the Deputy Director of OMB, on more than one occasion, has indicated to me that OMB has no interest in mainstreaming veteran care to the private sector.

Senator CRANSTON. Are you concerned about what the real meaning of those words are?

Dr. CUSTIS. I'm confused and concerned, Senator.

Senator CRANSTON. Have you been given any clarification at all on this score since October 23 when the deferral message was sent to Congress?

Dr. CUSTIS. No, Sir.

Mr. CRANSTON. Apparently his presentation to the AMA was quite persuasive because the "mainstreaming" resolution failed to gain support. Instead, a watered-down resolution reaffirming the need to maintain the historical relationship between the AMA and the VA health-care system was adopted by the AMA this summer.

Mr. President, I would note for my colleagues' reference that the full text of Dr. Custis' very thoughtful and persuasive remarks to the American Legion Department of Minnesota on the issue of "mainstreaming" is printed in the daily edition of the RECORD for November 5, 1981, on pages S13035 and S13036.

The views, moreover, Mr. President, there was good reason to believe that of Administrator Nimmo and Chief Medical Director Custis were shared elsewhere in the administration. Earlier this year, in the June 1 issue of U.S. Medicine it was noted that—

Donald Moran, Associate Director for Human Resources, Veterans and Labor in the Office of Management and Budget assured the National Association of VA Physicians that the idea of "mainstreaming" veterans' care—that is, shifting it to the private sector—is one the Administration is neither pursuing nor even interested in.

This assurance seems totally at odds with the reference in the administration's deferral documents on to giving active consideration to "alternative

methods of providing readily available quality medical care for eligible veterans."

Mr. President, as the Senator from Arizona has noted, the American Legion, the Veterans of Foreign Wars, the Disabled American Veterans, AMVETS, and the Paralyzed Veterans of America are all strongly in support of our proposal to disapprove the deferral in its entirety.

To cite one example, in a telegram that Arthur J. Fellwock, the national commander-in-chief, Veterans of Foreign Wars, sent to each Senator today, Mr. Fellwock expressed the VFW's support for this amendment and succinctly identified the issue. He stated, with respect to the stated justification for the deferral, that it "would be the first step in destroying the VA hospital and medical care system by contracting out medical care for disabled veterans."

Mr. President, I ask unanimous consent that Commander-in-Chief Fellwock's telegram to me be printed in the RECORD at this point.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

NOVEMBER 19, 1981.

Hon. ALAN CRANSTON,
Senate Office Building,
Washington, D.C.

On behalf of the more than 1.9 million men and women of the Veterans of Foreign Wars of the United States, I urge in the strongest possible terms your support and vote tomorrow, November 19, for the DeConcini-Cranston et al. amendment to the continuing resolution disapproving deferral D82-140, the justification for which would be the first step in destroying the VA hospital and medical care system by contracting out medical care for disabled veterans.

ARTHUR J. FELLWOCK,
National Commander-in-Chief, Veterans of Foreign War of the United States.

DEFERRAL WILL RESULT IN SUBSTANTIAL PROJECT COST ESCALATION

Mr. CRANSTON. Mr. President, in addition to the need to express strong congressional disagreement with any proposal to dismantle the VA health-care system, deferral D82-140 should be rejected for sound economic and fiscal reasons. Delay in undertaking the various projects covered by the deferral can only result in increased governmental expense. According to informal contacts with VA staff, the so-called inflation cost of this deferral—the difference in the fiscal year 1983 cost over the fiscal year 1982 cost for the five projects—is $25.7 million. This inflation cost for the three projects not covered by the continuing resolution is $16.4 million. I see no valid reason to incur such additional expense for the construction of projects the need for which is not in dispute. I do not believe American taxpayers want us to spend $25.7 million—or $16.4 million—to give this administration time to consider a proposal for dismantling the VA health-care system.

TRIGGERING IMPOUNDMENT CONTROL ACT PROVISIONS

Mr. President, I would also like to note that I concur fully with the explanation given by my friend, the Senator from Arizona, regarding the intended effect of and the need for the provision in our amendment making the disapproval of the deferral effective for the purposes of the impoundment control act. It would clearly be unwise to run the risk—which we would be running if that provision were not included—that the congressional disapproval of the deferral would not be given full effect under that act.

CONCLUSION

Mr. President, I want to note that I do not consider veterans' programs and benefits to be sacred cows. The Congress achieved spending reductions in veterans' programs through the reconciliation process for fiscal year 1981 and for fiscal year 1982 in the Omnibus Budget Reconciliation Act of 1982, and has worked and is working in other ways to achieve economies in VA programs, such as facilitating the sharing of VA and DOD health-care resources through the passage of S. 266, which the Senate passed on October 27 and the House passed with amendments on November 4. But the VA health-care system must be maintained, and I believe the Senate should go on record in that regard by registering its resounding opposition to deferral D82-140 which is premised totally on consideration of ways to eliminate the VA hospital system as we know it today.

Therefore, I strongly urge that my colleagues support this amendment and, in doing so, make clear their firm support for a strong, independent VA health-care system. As I stated earlier, the central issue here is whether the Senate endorses or rejects a concept that would undermine the VA health-care system. A vote for the amendment is a vote to reject that concept.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, as a cosponsor, I rise in strong support of the amendment offered by the Senator from Arizona (Mr. DECONCINI).

Mr. President, it cannot be overemphasized that the national VA health care system is of vital importance in ensuring that all veterans, receive comprehensive, readily available health care, no matter where in the country they reside in cities, in suburbs, or in rural areas. Certainly, many community facilities around the country would be able to provide equal, if not better care for veterans. But the fact remains that there are many, many areas of this Nation which would not be able to guarantee veterans the quality care they have been promised in exchange for their military service.

I would also like to call to the attention of my colleagues the fact that over the next decade, most of the 12.6 million veterans of World War II, now averaging 59.1 years of age, will be 65 years of age and older. According to the Veterans' Administration, veterans over 65 need five times—I repeat—five times as much health care overall than those under 65. Every 5 years after 1985, another 4 to 5 million veterans will join the over-65 group, and, by 1995, there will be an estimated 8,043,000 veterans over age 65, a figure which is nearly triple the 1980 level.

VA officials predict that as a result, the demand for VA hospital facilities for patients over 65 will jump by 11,000 beds over the next 6 years. And the number of veterans needing nursing home care is projected to soar from 120,000 in 1980 to 272,000 by the year 2000.

In view of these ominous projections, Mr. President, I say to my colleagues that rather than reducing VA health care funding, rather than deferring or eliminating the construction of new VA health care facilities, rather than studying the mainstreaming of veterans health care, we should get on with the work of trying to deal adequately with the future health care needs of our aging veterans population.

Mr. President, the independence of the VA health care system must be maintained if we are to have any reasonable chance to reach this goal and fulfill our commitment to the health care of our Nation's 30 million veterans.

By adopting this amendment, the Senate can go on record in strong opposition to any plan which would in any way compromise or dismantle the VA health care system. I urge its adoption.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, I rise in opposition to this amendment. As has been mentioned by the Senator from Arizona, of the five in this resolution, two of them have already been taken care of. In the first continuing resolution, Senator DECONCINI offered the amendment on behalf of the Senator from California, Senator CRANSTON, referred it from the committee, the Subcommittee on HUD and Independent Agencies, and the full committee to the floor. I agreed to accept the deletion of those two, the overturning of the deferral. So two of the five have been taken out.

Now, with this additional attempt, I suppose I am a little bit sorry that I allowed that to take place on the last continuing resolution. I guess the crumb was not sufficient.

The thing that bothers me, if there was ever a Federal case made out of three additional facilities that are expensive, when all we are talking about is a deferral, not a rescission; we are talking about a deferral.

I cannot even understand this talk about the beginning of the removal of the whole VA health care system, 172 hospitals, because we are asked to defer the expenditures on construction on three that are questionable while the administration studies it. The resolution reads:

Disapproving the proposal to defer budget authority for Veterans' Administration health-care facility construction while the Administration considers alternative methods for providing readily available quality medical care for eligible veterans.

Now, what we are saying is we are not even giving the administration a chance to study that and make a recommendation. Maybe the Senators who are in favor of this amendment would disagree totally with the recommendations. But to insinuate that this is the opening wedge to destroy 172 hospitals by a simple request to defer while we have a study, I think is unreasonable.

But let me go further, in a HUD and independent agencies budget that provides most of the low-income housing for this country, of what we are doing. In making the cuts, I was able to cut $10 billion in the 1982 budget below the 1981 budget. Most of it in assisted housing for low income. But it really is worse than that, because all this talk about destroying the veteran program, we are increasing the veteran programs by $1.5 billion. So that means we really cut the assisted housing program and a lot of others in the HUD and independent agencies budget by $11.5 billion.

Yet we are being told here on the floor of the Senate that we are shortchanging the veterans with only a billion and a half dollar increase and we cannot have a deferral waiting for a proposal.

Now, I happen to be a member of the Reserve Officers Association, the Veterans of Foreign Wars, and the American Legion. I belong to them all. I spent 24 years in the military. I am hardly antiveteran.

We also ought to recognize that if there were ever a sacred cow, this is it. And I would go far enough to suggest that the authorizing committee, the Veterans' Affairs Committee, is a lobbyist for these organizations. They do not need to lobby for themselves. They have a committee that lobbies for them. I wonder who represents the Senators and the taxpayers. We have a committee that represents these groups.

Now, a billion and a half dollars is not peanuts. I think it is time the veterans shared in solving the problems of this country.

As I said, I spent 24 years in the military. I do not have any service-connected disability. I did not get hurt on my active duty. I did not get sick during those 24 years. Just because I get older and I served for 24 years, why are we paying massive amounts of money for non-service-connected disability? Let us take care of those who were injured in the war or because of their service they were injured. But this Veterans' Administration is the fattest pig we have that I am aware of in any budget that I deal with. We simply do not have the guts to say that. Anything they want, the VFW and the American Legion. I do not ever remember being asked, as a dues-paying member, how I felt about those. I have never been asked. I do not make those decisions for those organizations.

I do not know who gets hurt more by inflation and high interest rates than a lot of veterans who are really disabled and really have problems.

Again, I am just going to close by saying that we have an 11½ billion decrease for people for assisted housing and a lot of other programs in the $60 billion budget so we can provide an extra $1½ billion, but we cannot afford to defer.

There is no need to carry this on—it is 1 o'clock in the morning—making a big Federal case out of it. I just hope my colleagues will recognize and not forget that there is a $1½ billion increase for the veterans in this budget. I do not know who else is getting that. Everybody else is taking their share of the cuts, and I am not even asking that. I am asking for a deferral while we have a study.

So I hope the Senate would defeat this amendment.

Mr. SIMPSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. As chairman of the Veterans' Affairs Committee, I am sure that my mailroom will crank up in the next few days because of my opposition to this amendment. I share many of the sentiments expressed by the Senator from Utah. This amendment is substantially identical to Senate Resolution 239, introduced on November 5 by my good friend from California, the ranking minority member of the Senate Veterans' Affairs Committee. Both would disapprove the deferral of appropriations for certain Veterans' Administration construction projects, because, as stated by the Senator from California in his thorough and very lengthy remarks on the occasion of the introduction of Senate Resolution 239, the deferral of these projects is regarded as "the first giant step toward shutting down the entire VA hospital system."

Mr. President, I appreciate my colleagues' deep and very sincere concern for the integrity of the VA health care system. And they can rest assured that I, as chairman of the Veterans' Affairs Committee and a veteran myself, agree with their main contention that the idea of dismantling the VA hospital system and mainstreaming veteran patients into the civilian health-care system is indeed the ultimate threat to the integrity of the VA hospital system and is not in the best interests of this Nation's veterans. But I simply cannot agree, Mr. President, that this particular deferral either can or should be characterized as a referendum on the issue of mainstreaming. That is just not so.

In his October 23, 1981, message to the Congress, President Reagan included a deferral, numbered D82–140, of $91.2 million in budget authority which had been approved for expenditure on five major construction projects: Specifically a phased facility replacement at Chillicothe, Ohio, VA Medical Center—$13.7 million; a facility renovation at the East Orange, N.J., VA Medical Center—$29 million; a research and education addition at the Long Beach VA Medical Center—$11.4 million; a surgical addition at the Palo Alto, Calif., VA Medical Center—$14.8 millon; and a nursing home and parking garage at the Washington, D.C., VA Medical Center—$22.4 million. The justification for the President's deferral states:

This amount is deferred while the Administration reviews all major construction projects for VA medical facilities and considers alternative methods for providing readily available quality medical care for eligible veterans.

The deferral further notes, under the heading "Estimated Effects," that such deferral action may result in the delay of these projects while VA's medical facility construction program is being evaluated.

Out in my neck of the woods, when I used to legislate in Wyoming, we used to say, "Keep your eye on the rabbit." Mainstreaming has nothing to do with this; absolutely nothing.

Mr. President, this deferral can and will do nothing more than postpone until the end of fiscal year 1982, further expenditures on five VA construction projects—two in California, one in Washington, D.C., one in New Jersey, and one in Ohio. What the Senators from California and Arizona and their cosponsors—two of them representing New Jersey and two representing Ohio—apparently seek to do is to transform this postponement into something much larger and far more sinister, by means of placing an unfortunate emphasis and misconstruction on the language used by the Administration to justify the deferral. The Senator from California concluded in his November 5 remarks:

The only alternative to the provision of care through VA facilities that has been under consideration within and without the Administration is to provide veterans with health care in non-VA hospitals by way of a voucher system, with the Federal Government paying for the care received.

Mr. President, I do not agree, and I am certain that the administration would not agree, that mainstreaming is the only alternative to the construction of these five projects; I do not even believe that the Administration regards it as an alternative. I was reassured on this point by the testimony of Administrator Nimmo at his confirmation hearing on July 9. In response to my question:

What is your position on the need for a separate, an independent VA medical care program?

He responded:

I think it is indispensible. I think that a separate independent VA medical care program represents a commitment of the people. It represents a commitment of the President to veterans.

I am fully aware that the siren song of mainstreaming and some other things have been floating around, but those are hazardous ideas that ought not to be pursued.

I understand there is legislation now proposing that Veterans' Administration medical facilities provide a backup to Department of Defense facilities in time of a national emergency. Clearly we must have, to perform that role, an independent VA medical care program with all that that entails.

And if we were to submit to the siren song of mainstreaming, we would immediately see, I think, what you might call a "brain drain" in connection with our medical facilities. We would—if we lost the requirement and responsibility for acute care, very quickly lose the capability to care for the veterans as we are now doing.

Further than that, with the aging of the veteran population, as you alluded to earlier, we are going to have an increased requirement for acute care facilities, because as people grow older, the incidence of acute medical problems increase. We must have the capability to deal with that. I think it can only be done if we do maintain an independent VA medical care program.

A recent interview with Administrator Nimmo in the October 1 issue of U.S. Medicine indicates that his commitment to an independent VA medical care program continues undiminished after several months in office. Mr. Nimmo stated

that the original OMB proposals for cuts in medical care programs "were not all that good," that he has known President Reagan for 14 years and has "no question" about the President's commitment to a high-quality health care system, but that, as VA Administrator, he is in the process of "going back through—the VA—budget and identifying areas where I can make some further reductions if need be * * *. It may become necessary to slow some construction projects."

The article concludes by reporting:

Nimmo stated that he views mainstreaming and vouchering as the most "expensive ways possible" to deliver health care to veterans.

"All you have to do is look at CHAMPUS to know how expensive vouchering would be," he said.

"Since I think these things are bad ideas, then obviously I'm not going to close any hospitals, either," he added.

"In terms of beds, there will be no reductions unless Congress mandates them," he said. "And I don't think they're going to do that."

I ask unanimous consent that the entirety of this interview, entitled "VA Seeks to Avoid Medical Care Cuts," as published in U.S. Medicine be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SIMPSON. Mainstreaming is not going to come to pass while I am chairman of the committee. I can assure you of that.

Mr. President, the phrase "alternative methods," as used by the Administration in its justification for this deferral, should not be read out of context. It clearly and specifically refers only to "major construction projects for VA medical facilities"—that is construction; it does not refer to existing hospitals or to the entire VA medical care system. It specifically contemplates nothing more than a thorough evaluation of the "VA's medical facility construction program".

Well, Mr. President, I will not wax on into the wee hours of the morning, but I will say this to you: Enormous amounts of money are spent each year for major VA construction projects. In fiscal 1982, the total amount spent could be about $800 million. A single new hospital can cost several hundred million dollars. At this moment, the VA is working on over 1,000 assorted construction projects, both major and minor, and has plans for an additional 272 major projects to be completed within the next 5 years, at a combined estimated cost of over $5.7 billion. As to some of these projects, substantial questions have been raised. For example, the VA's No. 1 construction priority is a new hospital to replace an aging and inadequate facility in Minneapolis, Minn. When I came on the committee, they approved $15 million for it. I thought that was for the whole thing. That was only for "design and site preparation"—and next year we will be called upon to authorize an additional $267 million for actual construction. The facility that the VA wants to build will have 845 beds, but the Minneapolis Metropolitan Council, after reviewing the situation, recommended, among other things that not more than 609 inpatient beds were necessary. The council's position was based upon the recommendations of the Minneapolis Metropolitan Health Board, which is composed of 30 members, half of them consumers, and half professional providers of health care within the seven-county metropolitan area. Of course, these recommendations are in no way binding on the VA, but the VA did respond by challenging the metropolitan council's underlying assumptions regarding expected lengths of stay and discharge rates, but made no mention of the fact that the University of Minnesota, which is affiliated with the Minneapolis VA Medical Center, is presently planning to build a major replacement hospital approximately 6 miles from the proposed VA replacement hospital, at a cost of as much as $250 million. It would certainly seem appropriate for the VA to consider the full impact of this new university hospital, and to consider whether increased cooperation with, or closer location to, the university hospital would be feasible or might reduce the necessary size and expense of the proposed VA facility. Moreover, in this situation, as with all major VA construction projects, it would certainly be appropriate to evaluate and reevaluate all underlying actuarial projections of need and usage, also taking into consideration the possibility of future restrictions and tightened enforcement mechanisms relating to eligibility for VA medical care. At this point, I ask unanimous consent that the Veterans' Administration's comments on recommendation No. 1 of the metropolitan council regarding the replacement VA medical center in Minneapolis, Minn., be printed in the RECORD at the conclusion of my remarks.

These are the type of problems, Mr. President, that the administration's justification language is clearly aimed at. It does not contemplate, and certainly should not be construed by either Congress or the VA, as recommending mainstreaming, or even as requiring that the VA should cancel a few construction projects entirely and retain only x number of the most desperately needed projects. It should be construed to mean only what it says—that in light of the fact that these are times of constrained Federal resources, it has never been more important to review carefully every pending major construction project, taking into consideration all local and national needs and circumstances in order to guarantee that the project is no more extensive or more costly than it ought to be, and to assure that if a particular project is found not to warrant the priority previously attributed to it, funding should and will be deferred.

I should add, Mr. President, that we should not be obsessively concerned with the inflation cost of postponing construction, since the review occasioned by postponement might well suggest revisions, whether yielding cost-savings or not, that would more than justify the delay.

Mr. President, I do not wish to excessively dwell on the question of what is the proper interpretation of the administrations' justification language, since it may really be nothing more than a side issue. The only practical, immediate and legal effect of this deferral is to postpone for less than 1 year the construction of these five projects. No one is bound by either the statement of justification or the statement of estimated effects. They are nonbinding recommendations to the Administrator, without the force and effect of legislation, to the effect that the VA ought to review its construction programs.

On the subject of the deferred projects themselves, I should note, as did the able Senator from California in his remarks, that, with respect to two of the five projects involved, both the House and Senate have already voiced their disapproval of a deferral. During the consideration of H.R. 4034, the HUD-Independent Agencies Appropriations Act for fiscal year 1982, the House initiated a disapproval of the deferral of the Washington, D.C. nursing home and parking garage project. The Senate then proceeded to pass its own version of H.R. 4034, and in doing so, endorsed the House's action with respect to the Washington project, and added, upon the initiative of the Senator from California, a disapproval of the deferral of the research and education addition at the VAMC in Long Beach, Calif. A conference report was then worked out incorporating this additional disapproval, and the conference report was then passed by the House by a very close vote, 209 to 197. Congressional endorsement of both disapproval resolutions was further established by the incorporation of the entire conference report into the continuing resolution—now Public Law 97-51—"as if such act—H.R. 4034—had been enacted into law". In addition, it is important to note that disapproval of both these deferrals has again been included in the continuing resolution before us today, in section 101(f)(43).

However, in light of present budgetary constraints, and since I disagree with the Senators from Arizona and California that this resolution should be interpreted as a referendum on mainstreaming, I cannot support Senate Resolution 239 or the present amendment. Assuming that the Long Beach and Washington projects are funded by Congress, the net effect of allowing this deferral to stand will be to reduce fiscal 1982 appropriations by $57.5 million.

I would conclude, Mr. President, by saying this: When I assumed the chairmanship of the Veterans' Affairs Committee, a fascinating chore, I might add, I had sincere hopes that, and indeed it was my understanding from many of the discussions with my worthy colleague from California, the ranking minority member, that this committee, more than any other standing committee in the U.S. Senate, could continue to and always had functioned most effectively on a nonpartisan basis. Increasingly, however, I find the minority squared off against the majority, playing more of a partisan role, and, as in the present case, distorting what might have been a simple and practical matter of bipartisan consensus on a compelling budgetary issue

which did not even remotely call for the interjection of the nongermane and highly emotion-charged issue of mainstreaming. Such conduct serves only to impede this administration's goal and the previous administrations goal—recognized as a valid and essential one I think—of encouraging, through deferrals such as this, a uniformly cautious and responsible major construction spending policy in the VA.

Mr. President, we must indeed try to keep our eye on the rabbit; 70 percent of the people in the veterans hospitals are nonservice disabled and half of those are being treated for alcoholism. You can serve in the U.S. Armed Forces for 2 months and draw a broad variety of veterans' benefits. We are going to look into that. When you get to be 65, you are considered disabled and are entitled to draw full benefits under the compensation program. We will look into that one, too. When you are 65 years old, you can now go into the health care system, regardless of your income or your net worth, and receive the care and attention of the Federal Government. We will look into that one, too.

I do believe, Mr. President, that this deferral is an excellent and useful device for providing the Administrator of Veterans' Affairs and this administration with an opportunity to review their projects and their priorities, in this particular construction area, in order to be certain that this Nation's tax dollars are used in the most effective manner to insure for our veterans the very finest quality health care system that money can purchase. I continue to pledge my support for this goal.

EXHIBIT 1

VA SEEKS TO AVOID MEDICAL CARE CUTS

(By Nancy Tomich)

WASHINGTON.—The fiscal 1983 budget request developed by the Veterans Administration seeks to maintain the current level of medical care, agency administrator Robert P. Nimmo has said.

The 1983 request must be approved by the Office of Management and Budget before it is sent to Congress, but Nimmo indicated he is not worried about that.

What happened last March, when OMB directed a $450 reduction in the Department of Medicine and Surgery budget over two fiscal years, was that the fiscal management agency did not understand the President's intentions, Nimmo said.

"The President came to office promising he was going to cut the budget by $45 billion," Nimmo observed during an interview. "He really just had a matter of days in terms of the budget sequence to come up with those cuts.

"Unfortunately, Dave Stockman came up with some proposals which were not all that good," Nimmo said.

"The President saw the error of that, and virtually all the mistakes were corrected in the bipartisan budget amendment (which made no cuts in VA's medical care program)."

Nimmo said he has known President Reagan for 14 years and has "no question" about the President's commitment to a high-quality health care system.

"My problem is not to carry out a 'hatchet job' for OMB," he said, "but rather to continue to deliver the benefits that Congress has authorized and to do it in such a way that we, to the extent possible, contain escalating costs."

Nimmo said the agency's total budget is slated to increase by $1 billion in fiscal 1983, enough to pay cost-of-living increases in some compensation programs.

But, "out of prudence," he will try to identify areas where further reductions can be made if necessary, without "erosion" in the health care system.

The Department of Medicine and Surgery will not be affected by these reductions in terms of personnel or beds levels, he said, but may have to develop some "management efficiencies."

"I'm also going back through that budget and identifying areas where I can make some further reductions if need be. . . . It may become necessary to slow some construction projects."

"It's hard to tell what the economy will bring," he observed.

Nimmo said he and former chief of staff Edgar L. (Nick) Longworth, who resigned just two weeks after his appointment was announced, parted ways last month because they differed in their perceptions of the role Longworth was to play.

"I had in mind a coordinating position, to be sure everything that reached my desk had been properly coordinated throughout the staff and the departments of the agency. It was never meant to be a decision-making position or one in which anyone in any way was to be denied access to my office.

"It was to be a coordinating office—nothing more nor less than that," Nimmo related.

"As time went by I found it was just not working out that way. Nick and I just could not quite come to agreement on what the office was to do.

"So Mr. Longworth finally decided he probably ought to pursue other interests."

Nimmo said the other special assistants whose resignations were requested situation.

"They were people who came here on the transition team. I suppose they were for the most part Mr. Longworth's selections. But I don't really know, because I wasn't here."

The transition period now is over, Nimmo observed, "and I need those positions to put together the management team which I think the agency needs."

"That's the whole point," he said. "Those people, valuable though they may have been during the transition period, are really not management people."

Nimmo said he regards improving the management structure of the VA as his top priority right now.

"We have some tough challenges coming in the years ahead, given the aging veteran population and the increasing demands that will be placed on our health care system particularly, and at the same time try to contain costs so that our whole operation is not rejected by the taxpayer."

In the past eight years the agency's budget has gone from $11.5 billion to $25 billion. Nimmo noted.

"Unless we make some major progress in containing costs we're going to be over $50 billion in the next five to six years, just by the natural progression of things," he predicted.

"We simply have to find ways of managing better than we have been doing."

One thing he is pinning his hopes on is improvements in the agency's use of computers

VA now has a "vast network" of computers, he said, but that network has "grown like topsy" without any "strategic planning."

"Because of that we are suffering a lack of credibility both with the Office of Management and Budget and with the committees on the Hill," he said.

Nimmo asserted the constraints placed on the agency by OMB in making computer purchases—they must receive OMB approval—have come because "they've been convinced we didn't know what we were doing."

"While I wouldn't want to characterize it quite that way," he said, "I think it is clear our computer acquisition program has not been as carefully thought out and as systematicaly pursued as it should have been."

Nimmo said computers can be used to attain management efficiencies in the VA hospitals, for example.

"We simply don't know what is going on in the hospitals from day to day. We have no objective way of judging how well a hospital administrator is performing, in terms of cost-benefit ratios."

Nimmo said he could not imagine a proprietary hospital chain trying to operate without computerization.

Computers also could be used to run benefit checks on veterans in the VA hospitals, he suggested.

Nimmo said he believes the personnel changes he is making—combined with creation of a long-range planning staff to address systematic computerization—should help convince OMB the agency has mended its ways.

"And I'll do it partly by personal persuasion," he said. "I think the events of recent weeks (firing five special assistants) have persuaded a lot of people that I'm serious about running this organization and running it properly."

Another area within the agency that will be looked at for savings is the travel budget, Nimmo said.

"We have almost no way of controlling how much people travel, who travels—all those things are sort of lost in the process."

And there is a tremendous amount of money characterized as "maintenance and operating"—a categorization which makes it difficult to find waste because it is so broad.

This category needs to be broken down, Nimmo said.

Nimmo said he is concerned over the trend in Congress to legislate entitlement to care by disease categories—such as radiation exposure.

"To the extent that legislation is adopted which either enriches existing benefits or establishes new ones, it is inevitably going to cause deterioration in some of the traditional benefits," he said.

"I have gone out of my way during the last two or three months to caution veterans groups about endorsing or supporting legislation whose benefits may seem to be attractive at the moment but may cause serious erosion in some of the more traditional and important benefits.

"I've been a politican myself." (Nimmo spent eight years in the California state legislature.)

"I know how tempting it is every election year to introduce a measure that will gain some political support or seem to be popular at the moment, but will wind up costing money down the road."

That's why the national debt is almost $1 trillion, he added.

Nimmo said another area he intends to look at is the "relocation costs" borne by the agency when employes move, at a cost of between $15,000 and $18,000 per move.

With 172 hospitals, he said, people are "constantly on the move."

"It's my perception after signing off on a great many personnel actions over the past two to three months that we probably move people more than we need to."

Nimmo said he has not had much time to examine the affiliations that exist between VA hospitals and medical schools.

However he said he is concerned that at least in some instances the agency tends to locate hospitals "more because of affiliations than the veterans to be served."

He said he is not suggesting that VA has been putting hospitals where they aren't needed. But, he added, there may be a tendency to favor a site where there is an affiliation.

He said the long-range planning staff, among other things, will try to estimate the impact the aging veteran population is going to have on the medical care system.

If social security is scaled back, or if the medicare co-payment rises, VA may have to absorb patients who otherwise would have used the medicare program.

The long-range planning group will consist of about a half dozen staff members working directly under Nimmo.

They will develop criteria for determining where hospitals and nursing homes should be located. Nimmo said—criteria he said are needed to stop the trend of locating hospitals where congressmen want them.

Nimmo said he has never seen a shred of evidence that the Office of Management and Budget wishes to "do in" the VA.

"I've seen nothing to support these cries of alarm except the serious mistake that was made last March (when DM&S budget cuts were directed by OMB), and those proposals were not carried out."

Nimmo stated that he views mainstreaming and vouchering as the most "expensive ways possible" to deliver health care to veterans.

"All you have to do is look at CHAMPUS to know how expensive vouchering would be," he said.

"Since I think these things are bad ideas, then obviously I'm not going to close any hospitals, either," he added.

"In terms of beds, there will be no reductions unless Congress mandates them," he said. "And I don't think they're going to do that."

Veterans' Administration Comments on the Recommendations of the Metropolitan Council Regarding the Replacement VA Medical Center in Minneapolis, Minn.

RECOMMENDATION NO. 1, A

The total hospital bed size (acute and non-acute) should not exceed that number of beds which supportable data suggests is needed. Analysis of the data provided in this report suggest that a maximum of 609 hospital inpatient beds (acute and non-acute) be constructed at the same site to replace the present Minneapolis VAMC inpatient hospital facility.

VA COMMENT

The Metropolitan Health Board (MHB) estimate of 609 beds was determined by utilizing 1979 VA discharge rates, 1974 community lengths of stay, and adjusting the percentage of 65 and over admissions to derive 493 acute beds which were not specific to individual bed sections. Additionally, 116 non-acute beds were added which includes:

30-bed chemical dependency unit
10-bed GRECC unit
6-bed long-term neurology
30-bed non-acute intermediate care
30-bed non-acute rehabilitation
10-bed hemodialysis

Two issues related to the bed-sizing methodology used by the VA were central to the decision reached by the MHB.

1. The VA, by incorporating more recent community lengths of stay rather than the 1974 data used in the bed study would reduce the number of beds needed, and

2. The most recent patient treatment file data were not used to calculate discharge rates.

The following comments relate to these two issues.

VA's estimate of 705 beds for 1985 was developed from the application of an early version of the model which did not trend discharge rates and used the 1974 community length of stay to determine the number of acute beds. The 705 estimate from the model was the basis for the 725 beds recommended for the Minneapolis replacement hospital after consideration by VA professional staff of many health care delivery-related factors.

Since development of this estimate, several modifications have been made to improve the bed-sizing model. These modifications were agreed to by GAO. Among them are trending of VA discharge rates for the most recent four year period and use of multi-level care survey results to distribute non-acute beds.

Recent application of these modifications (May 1980) to VAMC Minneapolis resulted in the following:

1. Using 1974 community length of stay data with four years of trended discharge rates yields 789 total beds for 1985—578 of which would be acute.

2. Using 1976 community length of stay data, which is the latest data compatible with VA's disease classification system, with a four year discharge rate trend yields 787 total beds for 1985—558 of which would be acute.

In other words, if the VA had based its request for beds on the data suggested by the MHB more beds, not fewer, would be needed.

Not only has the MHB misjudged the impact of updated data on bed needs, they also misunderstood the intricacies of the model especially as it relates to non-hospital requirements. Contrary to the MHB's belief, the model does not just rearrange hospital beds. In fact, the form of the model used to size VAMC Minneapolis redistributes 201 "hospital" bed equivalents to nursing home care (40), outpatient care (130) and other alternatives to hospital care (31).

Mr. THURMOND. Mr. President, I rise today to join Chairman Simpson of the Veterans' Affairs Committee and Chairman GARN of the Appropriations Subcommittee in opposition to this amendment which would disapprove deferral of five Veterans' Administration medical facility construction projects.

My distinguished colleague from Arizona has portrayed this deferral as a first major step towards mainstreaming health care for our Nation's veterans. This assertion ignores other alternatives which may exist and which will be carefully considered. Close study of these projects could very conceivably lead to reappraisal of priorities in the VA construction program. It may be that these projects can be reduced or altered to save money. In any case, it is unfair to describe this deferral as a move toward mainstreaming.

I intend, therefore, to vote in opposition to this amendment and urge my colleagues to do the same.

(Mr. WARNER assumed the chair.)

Mr. DECONCINI. Mr. President, I thank the distinguished chairman for his untiring efforts in conducting numerous hearings. I think he has given us a fair menu this evening as to what he is going to look into in that committee. I shake for the veterans of this country that we are not only going to consider mainstreaming and vouchering, but we are going to consider every other facet of the Veterans' Administration.

It seems to me like this country can be proud of the veterans health care system that has been put together, indeed by administrations of both Democrats and Republicans, of Members in both Houses, in both parties, consistently standing up and articulating the case for the veterans.

In this case before us here I cannot conclude any other alternative. Granted, the Senator from Wyoming has far more expertise than I do from his work on the committee. Perhaps there are alternatives that he could share with us besides mainstreaming and vouchering. Yet, in submitting its deferral under the Budget Act, section 1013, paragraph 6, states the administration is supposed to submit—

All facts, circumstances and considerations relating to or bearing upon the proposed deferral, and the decision to effect such proposal, including an analysis of such facts, circumstances, and considerations in terms of their application to any legal authority and specific elements of legal authority invoked by him—

Meaning the President. It continues:

to justify such proposed deferral.

I ask unanimous consent that this paragraph be printed in the RECORD.

There being no objection, the paragraph was ordered to be printed in the RECORD, as follows:

(6) all facts, circumstances, and considerations relating to or bearing upon the proposed deferral and the decision to effect the proposed deferral, including an analysis of such facts, circumstances, and considerations in terms of their application to any legal authority and specific elements of legal authority invoked by him to justify such proposed deferral, and to the maximum extent practicable, the estimated effect of the proposed deferral upon the objects, purposes, and programs for which the budget authority is provided.

Mr. DECONCINI. It seems to me what we have here are some simple and clear words. I will read them again:

And consider alternative methods for providing readily available quality medical care for eligible veterans.

It appears to me the administration has not followed through and because of that, the fear of this Senator is that this might be the beginning.

We will recall when the administration offered its budget we had a nifty little $950 million request to cut back on veterans' health care. Fortunately, this body rose to the occasion and stopped at least half of that. I think that here we have the beginning of that effort once again. I am not prepared to take it as a partisan basis because I am more than willing at any time to grant to the Senator from Wyoming as being pro veteran, being in support of this country's veterans, but I happen to have an honest disagreement. It is not based on the fact that he is a Republican and I am a Democrat. It is based on the fact that in my interpretation, under the budget constraints that this administration and this Nation of ours finds itself in today, there are efforts, continuous efforts, to cut wherever possible. Here we have a clear effort to go back on what Congress has authorized and appropriated money for by deferring five projects or three projects. We now have the Senator from Utah indicating that, well, he threw a crumb here and it was not enough. I will take that, if he wants to call it a crumb, but I do not think it is enough.

In fact, what we have an opportunity tonight to do is to give the veterans what this body has already voted on, authorized, and appropriated. I do not think

we are asking any more for the veterans or anything less.

Mr. GARN. Mr. President, may I say again that I am amazed at the scope of this debate. Once again, we are dismantling the whole health care system.

Let me say very briefly what we are deferring. In one hospital, we are deferring new elevators, central air-conditionings, nurse call systems where applicable.

These hospitals continue to function, Mr. President. We are not talking about closing, not talking about a rescission. There is another project that would provide for correction of patient privacy, central air-conditioning, heating system again, electrical improvements.

They may very well need to be made. We are talking about deferring some remodeling and some improvements while a study is being made. That is why, frankly, as much respect as I have for my colleagues from Arizona, California, and Hawaii, the rhetoric about destroying the health care system would refer to modernization for a while and some remodeling. It is beyond my comprehension how that leads to destruction of the system.

Mr. MURKOWSKI. Mr. President, I rise in support of Senator SIMPSON's opposition to the amendment offered by Senator DECONCINI. Senator DECONCINI's amendment would reverse the deferral of money that would have funded five veterans construction projects in four States. These five projects are not on the Veterans' Administration's list of high-priority projects. Funding for two of the projects has been restored in the continuing resolution as sent to the Senate by the House.

Senator SIMPSON is entirely correct in his assertion that the issue raised by the amendment of Senator DECONCINI is one of funding five projects and should not be clouded by the extraneous issue of mainstreaming. I do not share the concern of Senator DECONCINI and cosponsors to his amendment that the resolution for deferral of funds for these projects includes language that would indicate support by the administration for mainstreaming. Such an inference from the text of the resolution is unwarranted and is in clear contradiction with the stated position of the administration.

In his September request for an additional 12-percent across-the-board cut in fiscal year 1982 appropriations levels, the President specifically exempted the veteran health care system from any reductions in funding. I think this is a clear example of his commitment to the present veteran health care system. Robert Nimmo, the new Administrator of the Veterans' Administration, said in his confirmation hearings that it was his understanding the President is personally opposed to mainstreaming as a means of funding the veteran health care system.

As a veteran and member of the Veterans' Committee, I would like to emphasize my admiration and support for the fine leadership of Senator SIMPSON as chairman of the Veterans' Affairs Committee. I am confident here, as always, that he has the best interests of the veterans of this Nation in mind in his opposition to this amendment. The issue which the Senate faces with this amendment is the funding of veterans construction projects and not the issue of mainstreaming. I hope this distinction is clear to the Senate and thank Senator SIMPSON for his efforts to make this point clear.

Mr. BRADLEY. Mr. President, the administration has proposed to defer $91.3 million in funds authorized and appropriated by law for major construction projects by the Veterans' Administration. I am pleased to cosponsor this amendment and outraged that the administration intends to hold back expenditures voted by the Congress and needed by the veterans of our country.

Mr. President, as I have argued before, there are two reasons why we should keep our commitments to veterans programs and support this amendment. The first is the commitment we as a people have made to the soldiers and sailors and airmen who have fought for our country on our behalf. These military men and women put duty to country before thoughts of self. We owe them a deep debt of gratitude, and we should not go back on our commitment to their health and welfare.

The second reason we should support this amendment is our commitment to the soldiers, sailors, and airmen of the future. Many of us are eager to avoid the need to coerce young people into the Armed Forces. One way to encourage young people to volunteer to serve in their country's Armed Forces is to make military service worthwhile; make the experience challenging and exciting; pay soldiers, sailors, and airmen a decent wage; help those recruits who do not pick up marketable skills while in the military to go to college when they get out; and, finally, promise to care for them if they are disabled in the line of duty to their country. To the extent that we do not offer these encouragements, we make it more difficult to enlist volunteers, and we make the draft more likely.

Mr. President, the $91.3 million that the administration now proposes to defer would fund five major construction projects, one in Washington, D.C., two in California, one in Ohio, and one in New Jersey. This last project is a long-overdue and oft-postponed facility renovation at the 900 bed veterans medical center in East Orange, N.J. It would correct various fire and safety deficiencies and it would provide air-conditioning in the wards. Committees in both Houses of Congress, majorities in the full House and full Senate, and the President all agreed that this renovation is needed and justified. Now the administration wants to overturn that decision.

Mr. President, we have a commitment to military men and women who have served their country well in the past. We have an obligation to those young people considering the benefits of service to their country. And we cannot allow the economic mistakes of this administration to be used as an excuse to overturn the judgment of the Congress.

I urge my colleagues to support this amendment.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DECONCINI. I ask unanimous consent that the Senator from Nebraska (Mr. EXON) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GARN. Mr. President, I move to lay the amendment of the Senator from Arizona on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment of the Senator from Arizona on the table. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

I also anounce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 58, nays 39, as follows:

[Rollcall Vote No. 414 Leg.]

YEAS—58

Eagleton	Metzenbaum	Zorinsky

NOT VOTING—3

Goldwater	Kennedy	Leahy

So the motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, there will be one additional amendment offered by the Senator from Arizona (Mr. DECONCINI) which should be a very brief amendment.

Then there will be two very brief technical amendments offered by Senator STEVENS and Senator GARN. Then we will move at that point to the leadership amendment which will be offered by the leaders, Mr. BAKER and Mr. ROBERT C. BYRD.

We have following that 14 amendments listed by Members who have contacted me. I think probably most of them will go rather rapidly.

There is one I believe that Mr. HART has that will need about an hour and perhaps one by Mr. HUDDLESTON that may require about a half-hour. I think most of them will be rather brief.

Mr. HUDDLESTON. A half-hour equally divided.

Mr. HATFIELD. Mr. President, I ask that the Senator from Arizona be recognized and we will set aside the technical amendment of the committee.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

UP AMENDMENT NO. 687

Mr. DECONCINI. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) proposes an unprinted amendment numbered 687.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 16, line 5, strike out the period and insert in lieu thereof a semicolon and "and such disapproval of such deferral shall be effective upon the date of the enactment into law of this resolution and the enactment of this resolution shall, for the purposes of the Impoundment Control Act of 1974, have the same effect as passage by either House of Congress on such date of an impoundment resolution (as defined in section 1011(4) of such Act) disapproving such deferral.".

Mr. DECONCINI. Mr. President, this amendment is, very simply, the second sentence of my previous amendment. Its sole purpose is to insure that the deferrals which have been incorporated in the continuing resolution will have the same force and effect as passage of an impoundment resolution by the Senate. Since an impoundment resolution is the only mechanism under the Impoundment Control Act of 1974 available to Congress for the disapproval of deferrals, and since the continuing resolution is clearly not an impoundment resolution, I just want to insure that language relating to these deferrals is technically adequate.

UP AMENDMENT NO. 688

Mr. CRANSTON. Mr. President, I send an unprinted perfecting amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated. The bill clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes an unprinted amendment numbered 688 to the DeConcini unprinted amendment numbered 687:

UP AMENDMENT NO. 687

(Purpose: To disapprove the Administration's plan, as described in deferral notice D82–140, to study alternative methods for providing medical care to veterans who are eligible for Veteran's Administration health care and reaffirm the Congress commitment to maintenance of the Veterans' Administration health-care system)

At the end of the matter proposed to be inserted by the amendment of Mr. DECONCINI, insert the following: "The Congress disapproves the plan announced in such deferral notice to study alternative methods for providing readily available quality medical care for eligible veterans and reaffirms its historic commitment to the maintenance of a comprehensive, nationwide Veterans' Administration health-care system for the provision of direct health-care services to eligible veterans.".

Mr. CRANSTON. Mr. President, I very much regret that the Senate has failed to approve our amendment to disapprove the deferral in its entirety. I believe that the situation giving rise to our offering that amendment clearly warranted its adoption.

However, I was pleased to hear in opposition to our amendment that the opponents do not wish to endorse the notion that consideration should be given to vouchering out or mainstreaming veterans health care services as an alternative method for meeting the health-care needs of veterans who are eligible for VA care.

I believe this is a nonpartisan position on which there is agreement on both sides of the aisle.

Therefore, I believe that the amendment I have just offered, which clearly expresses rejection of that concept as embodied in the deferral notice provides the Senate and Congress with an appropriate opportunity to go on record—Clearly and forcefully—in this regard and to reaffirm our historic commitment to the maintenance of the comprehensive, nationwide VA health care system for the provision of direct health care services to eligible veterans. In the face of that serious threat to the VA system that the stated basis for the proposed deferral presents, the Nation's veterans deserve no less than a clear, unequivocal statement from Congress that it continues its support for that vitally important network of health care services.

In the context of a provision rejecting the deferral of two of the projects involved, I believe that the pending amendment will effectively transmit the message that so greatly needs to be sent at this time to reassure the Nation's veterans of our firm resolve that the Nation's commitment to them will not be broken.

As I stated to my colleagues on the Veterans' Affairs Committee at a hearing of our committee on the day I introduced Senate Resolution 239 to disapprove the deferral, the situation created by the stated justification for the referral makes the congressional reaction to it a true watershed—a continental divide—in the history of the VA health care system. This is the time for us to stand up and be counted as advocates or opponents of that system. I believe my colleagues on both sides of the aisle strongly support the VA system.

Therefore, this is an amendment that I believe all Senators can and should support and I urge adoption of the amendment.

Mr. DECONCINI. Mr. President, I wholeheartedly and enthusiastically endorse Senator CRANSTON's amendment to my amendment. I know of no other Member of this body who has contributed more to the well-being of the Nation's veterans than my friend and colleague, Senator CRANSTON. I am indeed honored to serve with him on the Senate Veterans' Affairs Committee.

As I stated previously, my most serious objections to the administration's deferral—(D82–140) was the message which accompanied that deferral stating that these funds were being deferred "while the administration reviews all projects for VA medical facilities and considers alternate methods for providing readily available quality medical care for eligible veterans." While I regret that our previous amendment was rejected, my overriding concern is the maintenance of an independent health care system of the highest quality within the Veterans' Administration. That is the overriding concern of all the major veterans' organizations and that should be the overriding concern of every Member of the Senate.

Adoption of the Cranston amendment will simply disapprove the administration's plan, if it has one, to seek alternate sources of medical care for our Nation's veterans and will put this body on record in strong support of an independent VA health care system. This is an issue of crucial importance to our veterans and I urge my colleagues to support the Cranston amendment.

I ask for the yeas and nays on the Senator's amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. HATFIELD. Mr. President, I move to table the original amendment by the Senator from Arizona.

Mr. SARBANES. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SARBANES. Will the tabling motion carry with it the perfecting amendment proposed by the Senator from California addressed to the problem of the move of veterans to a voucher system?

The PRESIDING OFFICER. The Senator is correct.

The question is on agreeing to the motion to table.

The yeas and nays have not been ordered by the Senator from Oregon.

Mr. CRANSTON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, may I have one moment to respond to the amendment?

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Senator may proceed for 30 seconds.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. SIMPSON. Mr. President, I can do it in 30 seconds.

It is disappointing to see an amendment like this come in at this moment when we have not been aware of it. As the chairman of the Veterans' Affairs Committee, it comes right back to the same old thing that we were talking about, the nonpartisan approach on the committee. We seem to pride ourselves on that, and then we get a little whiz bang like this.

There is nothing quite appropriate about it. I do not really enjoy it.

I hope we can hurdle it in the Veterans' Affairs Committee, and I am sure we will because the Senator from California and I will be discussing it rather thoroughly.

Thank you very much.

The PRESIDING OFFICER. The question is on the motion of the Senator from Oregon to lay on the table the amendment of the Senator from Arizona.

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS) and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

I also anounce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 53, nays 43, as follows:

[Rollcall Vote No. 415 Leg.]

NOT VOTING—4

Bumpers	Kennedy	Leahy
Goldwater		

So the motion to lay on the table UP amendment No. 687 was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. HATFIELD. Mr. President, as a comanager of the bill, I now set aside the technical amendment of the bill in order that the leadership may be recognized for the offering of an amendment.

Mr. President, I ask the Chair to recognize the Senator from Tennessee.

The PRESIDING OFFICER. The Chair recognizes the majority leader.

UP AMENDMENT NO. 689

(Purpose: To reduce the total funds appropriated or otherwise made available by the joint resolution with certain exclusions, by four per centum)

Mr. BAKER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) proposes an unprinted amendment numbered 689.

Mr. BAKER. Mr. President, I would like the clerk to read the amendment.

The assistant legislative clerk read as follows:

At the appropriate place in the joint resolution add the following new section:

"SEC. . Notwithstanding any other provisions of law or of this joint resolution, the total budget authority provided by this joint resolution for payments not required by law shall be reduced by 4 per centum: *Provided*, That of the amount provided in this joint resolution for each appropriation account, activity, program and project, the amount reduced shall not exceed 5 per centum, and that no account, activity, program or project may be terminated as a result of these reductions: *Provided further*, That this section shall not apply to budget authority provided by this joint resolution for the Department of Defense Appropriation Act, 1982; the Military Construction Appropriation Act, 1982; Title IV of the Commerce, State, Justice and the Judiciary Appropriations Act, 1982; the Food Stamp program as provided for in section 101(h) of this joint resolution; for the Veterans' Administration medical care account; the Foreign Assistance and Related Programs Appropriations Act, 1982; and to any account, activity, program or project involving spending authority defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), including the Payment to State and Local Government Fiscal Assistance Trust Fund (31 U.S.C. 1221-1263): *Provided further*, That this section shall not apply to any account, activity, program or project for which funds are provided by a 1982 appropriation Act enacted into law subsequent to the enactment of this joint resolution: *Provided further*, That this section shall not apply to funding provided by this joint resolution in those cases where funding is provided by a bill, or a title of a bill, or an account in a title of a bill, which is incorporated by reference and funded by this joint resolution, at a level at or below the most recent budget request as of the date of enactment of this joint resolution:"

Mr. BAKER. Mr. President, I yield the floor. Before I do, however, I anticipate that the distinguished minority leader may offer a perfecting amendment to my amendment. I yield the floor.

UP AMENDMENT NO. 690

Mr. ROBERT C. BYRD. Mr. President, I send an amendment to the desk on behalf of myself, Mr. LEVIN, Mr. PROXMIRE, Mr. CRANSTON, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD), for himself, Mr. LEVIN, Mr. PROXMIRE, and Mr. CRANSTON, proposes an unprinted amendment numbered 690 to unprinted amendment numbered 689:

To the amendment of Mr. BAKER, add the following: "Notwithstanding any other provision of this Joint Resolution, it shall expire on March 30, 1982."

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the names of Mr. DECONCINI, Mr. PRYOR, Mr. EXON, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. CANNON, and Mr. RANDOLPH be added to my amendment as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I am prepared to say, Mr. President, that if the Baker amendment is amended by the Byrd amendment, it will still be my intention to support that amendment, as amended. The effect of my statement is to say that I am agreeable to a March 30 expiration date. It is my hope that the minority leader would be in a position to support the amendment, as amended by his amendment. Can I inquire of the minority lead of his intention in that regard?

Mr. ROBERT C. BYRD. Mr. President, it is my intention to support Mr. BAKER's amendment if my amendment to the amendment is agreed to. Let me say, however, that this does not commit any other Senator. I do not attempt to do that. It is my personal position. The reason I do that is because I believe it is vitally important that we not subvert the appropriations process by setting the precedent, for the first time that I can recall, of a least potentially wrapping all appropriations bills, with the exception of the legislative appropriation bill, in one continuing resolution that will extend throughout the entire fiscal year, through and including September 30.

We offered this amendment a day or so ago. It was defeated on a very, very close vote, almost a party-line vote. I think it is vitally important that we draw the date back to March 30. I would prefer December 18, but March 30 is the date that is addressed.

I will support Mr. BAKER's amendment if my perfecting amendment is agreed to.

In this respect, let me pay tribute to Mr. LEVIN who has put the Senate on notice, I understand, in my absence earlier today, that he intends to speak extensively if the September 30 date is not changed to March 30. I want to commend him for the position he took. He would not be alone, let me stay. I admire his dedication to his principles.

Mr. BAKER. Mr. President, I thank the minority leader. May I say that I stated earlier today, and I reiterate now, that I am prepared to announce that the Defense appropriations bill will be made the pending business or the Senate will turn to it on November 30. If the minority leader wishes me to announce that at this time, I will do it at this time.

Mr. ROBERT C. BYRD. If that is agreeable to my colleagues, that will be fine.

Mr. BAKER. I see no objection on this side.

DEFENSE APPROPRIATIONS

Mr. BAKER. I asked unanimous consent, Mr. President, that 1 hour after the Senate convenes on November 30, 1981, the Senate turn to the consideration of the Defense appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Reserving the right to object, Mr. President, would the Senator wish to make a further addition to that?

Mr. BAKER. Mr. President, if the Senate at that time is engaged in debate on another bill, including the Department of Defense authorizations bill, I ask that that be temporarily laid aside so that we may fulfill this request.

Mr. JOHNSTON. And that it be the order of business upon the finishing of the Department of Defense appropriations bill?

Mr. BAKER. I add that to my request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I think nobody is altogether happy with this hodgepodge, but I think it is the best thing that can be done under the circumstances. I am perfectly agreeable to the Byrd amendment. I would point out that the President originally proposed the March date. It has not been the position of the administration for the last several days. I know this is not personally pleasing to the distinguished chairman of the Appropriations Committee. I want my colleagues to know that I have consulted and conferred with the chairman of the Appropriations Committee and while this is not his preference or point of view, he has agreed that I may be released from the commitment I made to him in this respect.

Mr. President, I have no further debate to present.

Mr. HART. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. HART. Is the majority leader in a position to inform the Senate that the Senate has the authority under the law to grant to the President the right to discretionarily reduce funding in whatever programs he desires?

Mr. BAKER. I thank the Senator. He does have authority to do what is described in this amendment. There are sharp limitations in this amendment on what can be done. It provides for a 4 percent across-the-board cut, not more than 5 percent. It provides not more than 5 percent in one function can be changed. No program can be eliminated. There are a number of other safeguards. I think it tracks with other things we have done under similar circumstances and I am convinced we do have that authority.

Mr. LONG. How much does the Senator estimate will be saved by this amendment?

Mr. BAKER. Mr. President, let me put it this way: according to the figures I have, it would be $5.7 billion in budget authority and $3.6 billion in outlays.

Mr. ROBERT C. BYRD. Will the distinguished majority leader yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. Mr. President, I am not sure I have made myself clear in my statement. I have been in West Virginia meeting with a group.

I want to make it indubitably clear that if the amendment I have offered is agreed to, then, of course, I will support the majority leader's amendment, as amended.

Furthermore, may I ask the distinguished majority leader if he is in a position to state, if his amendment, as amended, is agreed to, or to give any assurance that the conferees on his side of the aisle will hold firm to that March 30 date in conference?

Mr. BAKER. Yes, Mr. President, I am in a position to say that I fully expect that conferees from this side of the aisle will hold very firm indeed to that date.

Mr. President, may I correct the figures I gave to the distinguished Senator from Louisiana, ranking member of the Finance Committee. We changed one proviso in the amendment after my memorandum was prepared. We added veterans medical benefits as an exemption. That would change those numbers so that the effect of this amendment would be a $5.3 billion budget authority instead of $5.7 billion and $3.2 billion in outlays instead of $3.6 billion.

Mr. HART. Mr. President, will the majority leader yield for an observation?

Mr. BAKER. Yes, I yield.

Mr. HART. Mr. President, I understand the dilemma the Senate finds itself in. I appreciate the leadership the leaders intend to give. May I say with all due respect to the minority leader, I do not find the change of date cures the fundamentally unwise and potentially illegal and, I think, marginally unconstitutional nature of the amendment as I understand it that is offered by the majority leader.

I do not think it is within the authority of the U.S. Senate or the Congress of the United States to grant to the Chief Executive of this country the arbitrary authority to cut programs willy-nilly as he chooses. I do not think it has a thing to do with the date that this authority ends. I think this is a very, very serious and unwise precedent.

I thank the majority leader.

Mr. BAKER. Mr. President, I yield now to the Senator from Idaho.

Mr. McCLURE. Mr. President, I think there may be a need to clarify the meaning of one of the provisions. Can the Senator indicate to me what is meant by the proviso that this reduction shall not reduce any bill, title or account below the budget request estimate?

Mr. BAKER. Mr. President, this is the way the proviso would work. The measuring rod is the President's budget request as of the date this joint resolution is enacted, which essentially is his September budget request. This amount would be broken down into totals for each individual appropriations bill, for each title within each appropriation bill, and finally by each individual budget account.

The amounts for each bill, title, and account in the continuing resolution would be similarly laid out.

The next step is to compare the President's estimate to those in the continuing resolution.

The first comparison is for a bill as a whole. If the continuing resolution level for a whole bill is at or below the President's request, that bill is not subject to the 4-percent cut.

If the continuing resolution level for a whole bill is over the President's request, the next step is to compare each title within the bill. If the continuing resolution level for any title within the bill is at or below the President's request, that title is not subject to the 4-percent cut.

If the continuing resolution level for a title within a bill is over the President's request, the final step is to compare each budget account within the title. If the continuing resolution level for any account within the title is at or below the President's request, that account is not subject to the 4-percent cut.

Finally, all of the above comparisons are based only on those elements of the continuing resolution that are not explicitly exempted from the 4 percent-cut.

Mr. McCLURE. Will the Senator yield further on that point?

Mr. BAKER. Yes, I yield.

Mr. McCLURE. Would it not also be the case that if, under the comparisons he has made, the test were slightly above the latest budget request and the 4-percent cut would take it below the latest budget request, the cut would be limited to that amount which would take it to the latest budget request?

Mr. BAKER. Yes, the Senator is correct, as I understand it.

I yield now to the Senator from Nebraska.

Mr. EXON. I thank my friend for yielding for a question.

Mr. President, I should like to pose this question to the majority leader. Let us assume that the amendment offered by

the majority leader and as amended by the minority leader passes and if, after conference with the House, something essentially totaling the figures that will thereby result in the continuing resolution, is the majority leader in a position to say whether or not the President is likely to approve that, or are we still faced with the threat of a Presidential veto?

Mr. BAKER. Mr. President, I thank the Senator for that question. I should have covered that in my opening remarks.

I am in a position to advise the Senate that if this bill passes with the Baker-Byrd amendment attached and survives conference in essentially that condition, the President will sign the bill.

Mr. GLENN addressed the Chair.

Mr. BAKER. Mr. President, I yield to the Senator from Ohio.

Mr. GLENN. Mr. President, I rise to express my support for the remarks of the Senator from Colorado. I think he is right on. I think what we are doing here will have great consequences. I do not like it. We, in effect, went along with the reconciliation process last year, bypassed all the normal procedures, because we realized that with a new administration, we were in effect changing direction. We went along with that.

Now, for the second year, we are going along with a new fact, a continuing resolution that bypasses all the normal procedures built up over 200 years in this body. I find it difficult to believe that we are just going along with this, this evening, but that appears to be the case.

It appears that just a threat from a President down the avenue is now enough to make us toe the mark here and just say that, in spite of the fact that we went through the authorizing process on these different bills, that we went through the appropriations process on these bills, we are all off by 4 percent or 5 percent or 3 percent or whatever percent it is that they want to pick down the avenue.

I know I gave bills in the committees that I am on far greater consideration than that. If I thought they could have been cut by 5 percent or 4 percent or whatever percent, I would have voted to cut them in the committee.

Now, here we are with all the functions of Government, except those exempted here, just saying, sure, we were 5 percent off or 4 percent off or whatever percent off; and here we are, at 2:15 in the morning, going to say that all those functions of Government now have that amount in them, that we can just toss authority to the President to make those changes. I know we are going to go and pass this, I guess, tonight, but I would not feel I was doing my duty if I did not object to this.

I think the Senator from West Virginia, in order to shorten time on this, feels he is doing the right thing. But this will hurt me very much that for 2 years now, we are bypassing all the normal procedure. I have spoken to several people on the other side of the aisle who say, well, they are going to go along with this, but they are very concerned about it and do not want to see us continue with it. I find that very disturbing, because it means we are voting as a pack on one side of the aisle or the other.

I do not like to lead any charge against it on this side of the aisle for partisan political reasons, but I think just the history of this Republic has shown that our system has been well served, very, very well served by the protections we have built into this system and the authorizing appropriation process.

Now, here, two years in a row, we are in effect going to bypass these protections by a reconciliation process one year and by this continuing resolution the second year. It goes for the full fiscal year. I think what we are doing here tonight is very unwise and shows that, in effect, we are saying that what we have really done in the committees in the past is irresponsible, was at least 4 percent off, or we would not be giving the President this authority. I think we should consider this much more closely than we are doing tonight just under the duress of the threat of a Presidential veto.

Mr. BAKER. I yield to the minority leader, Mr. President.

Mr. ROBERT C. BYRD. Mr. President, let me say for the record that the position I am taking is not a partisan position on this side of the aisle with respect to a 4-percent cut. I respect the viewpoints that have been expressed by Mr. HART, Mr. GLENN, or any Senator on this side who may wish to vote against Mr. BAKER's amendment as amended if it is amended. They have a perfect right to do so. I have some misgivings myself.

I intend to vote for the Baker amendment if it is amended by my amendment. But it is not a party position on this side. Senators may vote any way they see fit.

Mr. BAKER. Mr. President, I yield to the Senator from South Carolina.

Mr. HOLLINGS. The hour is late, Mr. President, so I will speak briefly. My colleagues have spoken eloquently on the fact that Congress is abrogating its responsibilities. But why? Cutting $3.2 billion out of a $700 billion budget does not sound very significant. After all, we have already cut this bill about $24 billion deeper than the President proposed in March. And we are only $3 billion over his September request. Why do we want to cut $3 billion more? Because the President wills that we make this cut. Why does he will it? Because of his speech on September 24. When he spoke to the American people in September he made recommendations relative to cuts in entitlements. He made recommendations on tax increases and various other measures. He did not get into any specifics then and he has not filled us in since then. His recommendations have all been abandoned: All except this title $3-billion cut that he now wants us to make.

The majority leader, the chairman of the Finance Committee, and the chairman of the Budget Committee implored the President to develop a plan to turn the economy around—to let us in Congress do something meaningful—to give reassurances to the American people and to provide an opportunity, in honesty and in all candor, for Reaganomics to work. We all know now that the Reagan plan needs major surgery.

But what this amendment does, in essence, is adulterate further the congressional budget process—by coming in with a percentage cut at this time and leaving specific funding decisions up to the President. It misleads not just Congress, in its zeal here to get out at 2 or 3 o'clock in the morning, but the public as well. So you really think that with a $3 billion cut something is really being done about the economy and about high interest rates? Will this $3-billion cut be a quick fix to straighten out the economy?

The problem is not $3 billion. The deficits over the next 3 years will average about $100 billion a year, yet the President is saying, "Don't do anything else until next year. We are not going to change our policies. So long as you cut this $3.2 billion out of the budget, then Congress will meet my budget target and that will solve the problems of the economy and everything else."

I'm sorry, but this is a total charade.

A lot of hard work had been done by the majority and minority leaders and the Appropriations Committee, and we have to move ahead. But to come in at this late hour—and it is not criticism of the leadership, minority or majority—and ask us to blindly cut $3 billion to meet the President's target is a tremendous charade. It is a $3.2 billion solution to a $100 billion problem. It just will not work.

Mr. BAKER. Mr. President, I yield to the Senator from Louisiana and then the Senator from Michigan.

Mr. LONG. Mr. President, I will vote for the Baker amendment, with or without the Byrd amendment.

We are going to vote sometime soon on a constitutional amendment to require a balanced budget, in this Congress or a future Congress. It has been reported by the committee. I believe it will pass.

When we are required to have a balanced budget, we will be doing this kind of thing with appropriation bills. All this does is to simply say that we will reduce this bill by enough, after we are through. All night long we have been adding things, and now we will try to get the genie back in the bottle.

This is nothing compared to what we will have to do if we ever pass that constitutional amendment to say that we will have to have a balanced budget. If we have that—and we are voting tonight to balance the budget—this will be nothing, just a drop in the bucket, compared to what it will take to have a balanced budget.

Having voted for some add-ons tonight, I am pleased to vote for the amendment to get this back inside what the President thinks he can sign.

Mr. BAKER. I thank the Senator.

Mr. President, I yield to the Senator from Michigan.

Mr. LEVIN. Mr. President, I am, of course, happy to cosponsor the amendment of Senator ROBERT C. BYRD. It was his position yesterday and that of Senator STENNIS, Senator PROXMIRE, Senator PRYOR, and others who spoke about what we were doing to the appropriation process if we adopted the continuing resolution which lasted to the end of the fiscal year which caused me to take

the position I took here tonight, one I otherwise would not have been prone to take, because I do not like to threaten unlimited debate to accomplish an end.

Nonetheless, their eloquence yesterday in terms of the meaning of a continuing resolution for the whole Government, to last through September 30, moved me to do that.

I also appreciate the kind words Senator ROBERT C. BYRD spoke about me tonight. I hope his amendment is agreed to. I hope the vehicle to which it is attached loses.

I hope Senator BAKER'S amendment is defeated, for the reasons that have been stated so well tonight by the Senator from Colorado, the Senator from South Carolina, the Senator from Ohio, and others.

There will be other vehicles to establish the March 31 date if the Baker amendment as amended by the Byrd amendment is defeated. There will be other vehicles by which we can keep a March 31 date without adopting an amendment which is a blank check for $3 billion outlays to the President.

We are not making the cuts as we should, as the legislative body. We are simply saying to the President, "You make the cuts where you want." I do not think that is carrying out our responsibility. For that reason, although I am delighted that the majority leader has accepted the March 31 date as part of his amendment, I am sorry that I cannot support his amendment.

Mr. BAKER. I assure the Senator that next time I will not try so hard to please him.

Mr. President, I yield to the Senator from New York.

Mr. MOYNIHAN. Mr. President, I simply want to record myself as one of those in this body who must sense that in the history of the American Republic, there never has been proposed, much less has there been enacted, such an extraordinary delegation of legislative powers to the Executive. We are frittering away the powers from Congress. We will not be well-remembered for that.

Mr. BAKER. Mr. President, I yield to the Senator from New Mexico.

Mr. DOMENICI. I thank the Senator.

Mr. President, I really was not going to speak to the substance or to those who think this is some unusual and untoward delegation of authority. I was going to suggest that we should tonight recognize the distinguished junior Senator from Georgia, who worked so hard in an effort to bring to a head the kind of amendment which is sponsored by the majority leader. The junior Senator from Georgia worked in committee, and he worked on the floor diligently on many of the bills, to attempt to get us to reduce them by some percentage figure.

I personally am aware of that, and I know that the majority leader would join me in indicating his appreciation for it; because, basically, it did lay the groundwork for what I hope will pass tonight.

I just want to say to Senators that I am sure none of us really likes this approach. I am sure we would feel much more comfortable and perhaps feel that we were doing our duty better if we were able to produce each and every appropriation bill and if, as a matter of fact, we determined with exact precision what would be spent in each and every account. I think the reason we are here is that that cannot be done. It is quite obvious that that is not going to occur.

This amendment does not do the things that others have said. It is quite precise. On many occasions in this body, we have given Presidents the kind of discretion that we have given here. The test is whether or not there are standards and guidelines against which to measure the President's actions; and the amendment that our distinguished majority leader is offering is filled with those things.

It refers to 4 percent of about 15 percent of the budget. Entitlements are not in this, and many other things. In addition, the President cannot take from any account in excess of 5 percent. In addition, if certain accounts are already below his September budget, he cannot take anything out of them.

So when you look at it, it is a pretty good exercise by this body, if it is adopted—and I hope it will be—of complying with this President's requirements and request that we reduce the outlays in budget authority. We are going to do that. It is not going to bring the budget in balance. But in terms of abandoning our priorities, I do not think it comes close to many things we have done here before.

Mr. HART. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield.

Mr. HART. Article I of the Constitution gives the appropriation power to Congress, not the executive branch. That is exactly what the Baker amendment attempts to do tonight, to transfer that power to the executive branch, and that is not in the Constitution of the United States.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BAKER. I yield to the distinguished Senator from Idaho.

Mr. McCLURE. Mr. President, I think we should put that into context, because we have also a consitutional provision that says the power of Congress to legislate cannot be delegated. Yet, we know that we constantly delegate authorities, within guidelines, and the courts have defined those guidelines.

So, aside from that parallel in the delegation of legislative authority, Congress has frequently delegated discretion in budget matters, in spending matters, to the President.

As an example, if we look back in history, in the period between 1967 and 1973, Congress gave Democratic and Republican administrations such discretion in 5 of those 6 years.

And I think that in some of those years there was much broader delegation of authority than is granted here. So it is not without precedent, and it certainly, as the Senator from New Mexico has indicated, is not without very strict limits on the delegation of that authority.

Frankly, I share the feeling with very many others that if we had more time we might be able to do the appropriations process in a more precise manner and not end up with this result.

But it was Congress that set the time on the expiration of the continuing resolution. The deadline against which we are working is a deadline that we imposed and, therefore, we have a limited amount of time and we are making the cuts. We are directing the cuts. We are giving the President a very narrow discretion within which he can exercise how those cuts may be adjusted within the various accounts.

Mr. BIDEN. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. BIDEN. Mr. President, I shall just take 2 minutes.

I think we all know it here. We are doing something that is a little extraordinary. I will not take the time tonight, because no one is interested, to debate the points that are made by the Senator from Idaho. At a minimum we are all, as one famous American in this Chamber once said, in an advertising campaign, in your heart you know we are changing the game plan a bit here.

My question is a very practical one. The Senator from New Mexico is correct. We are talking about 4 percent of 15 percent. The Senator from South Carolina is correct. We are talking about $3 billion plus, and we need $100 billion. We are talking about efforts here tonight that are really a tempest in the teapot in terms of the amount of dollars involved here.

We are going to have a cumulative deficit of tens of billions of dollars unless something fundamentally changes in the budget and economic program of the President and/or this Congress or both, hopefully both.

Here we are tonight standing on the floor, standing before America as a body that is deciding at a minimum we are going to put in question some of our own powers for 4 percent of 15 percent which will have no effect on anything, anything at all except to satisfy a President who has decided that there is a political expediency in having Congress cower.

That is what this is all about because it is 4 percent of 15 percent adding up to $3 billion plus when we need $100 billion, and we are here tonight as a great deliberative body delegating authority to the President.

We all have incredibly short memories. During the early seventies we did give such power to former Presidents which we lived to rue.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. BIDEN. I better sit down.

Mr. CHILES. I wonder if the Senator will just yield on that point?

Mr. BIDEN. I yield.

Mr. CHILES. I think I have heard that said a lot of times, as to what powers to impound funds the President used to have. I do not believe we in Congress ever gave the President such powers. I have heard it said that the Budget Act took away the President's impoundment powers. The Budget Act did not. The

President did not have impoundment powers. In every court case and every court test that has ever been made right up to the Supreme Court, the court has ruled that the President cannot have impoundment powers.

President Nixon decided to claim for himself powers to impound, and his Attorney General said he had those powers, and they came around and said it, and we in Congress got concerned and we started trying to figure how to counteract his claim and stop his impoundment attempts, and from that came the Budget Act.

But at the same time, proceeding on another track there were court cases that were working their way through the courts. In every one of those cases the court upheld the proposition that the President did not have the power to impound funds. It was not the Budget Act that took it away from him. He did not have it to start with by virtue of our constitutional duties and the power over the purse given to Congress in the Constitution.

Mr. BIDEN. I think the Senator is right. Even if he is not right, even if the Senator from Idaho is correct, what are we doing? Why are we doing this for such a small amount? Why are we doing this when we are only talking about the margin? Why are we going through this? If we want to do it let us do it. If we want to give it away let us give it away. Let them balance the budget. Give them $100 billion. Why do it? Why die on a small cross?

The PRESIDING OFFICER. The question is on the perfecting amendment.

SEVERAL SENATORS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, when we had the Reconciliation Act involving 251 separate pieces of legislation I made the record that I was going to support that procedure one time.

I am going to reluctantly support this procedure one time.

As I tried to explain earlier tonight, I believe we have gotten ourselves into this problem because we continue to put off our appropriations bills and we have not caught up now for 3 years in terms of the appropriations process. We must find a way to do it.

I hope we will do that.

Some of my friends say that this amendment delegates too much to the President, but I view this as a mandate to the administration to save at least 4 percent on each one of these items that we have not cut.

I have been on the Appropriations Committee now for 11 years, but it is hard to recall a single bill on which there was not at least a 4-percent carryover. We have tried to cut as much as we can. I cannot believe there is not 4-percent potential savings left in these bills despite the close scrutiny we have given to them.

The Senator from Delaware seems to imply that because we cannot get the $100 billion in one bill that this amount of little over $3 billion is not sufficient.

The reason is to make this gesture to the President, to the executive, the administration, to mandate them to save at least 4 percent.

I was here at the time we had the argument over the impoundment. I recall very well what happened the first time a President impounded funds. That next year Congress appropriated about twice as much for each one of those accounts, and then he impounded those.

Then about 3 years later the court held that the impoundments were not lawful in the first and second years. By that time, the third year, we were carrying, actually doubling, the accounts for appropriations. We got ourselves into this budget mess. It is now uncontrollable.

It was not the executive branch that gave the country the problem of appropriating too much money. It was Congress.

The problem we face today is, is it reconcilable? It better be or our whole monetary and fiscal system of this country is going to be seriously in trouble.

I say to my good friend from Delaware I would much rather mandate the President and the executive agencies to save 4 percent than I would to do nothing.

We are taking a step toward fiscal solvency with this savings gesture. From my point of view, it is substantial to save over $3 billion of the taxpayers' money.

Mr. RIEGLE. Mr. President, I wish to respond to the Senator from Alaska by saying if he really believes that he should come up and visit the Budget Committee one of these days and sit in on the sessions we have been having there because we are in serious trouble in this country. We have a major recession on our hands. That was not part of the Reagan administration economic plan, but it is here now. We have over 8½ million people unemployed in this country, the largest number we have had unemployed since 1939. We have a major need for a midcourse correction in the economic plan.

The people down the street at the White House want to go away for Christmas. They do not want to talk about it now. They do not want to talk about it until the 15th of January, nearly 60 days from now.

The problem we are facing is in the tens of billions of dollars. We have deficits that we are looking at 3 years out that approach $200 billion. We are still dealing with doctored economic assumptions.

You know that as well as I do, and the whole country knows now, because of the Stockman admissions, that we have not changed those false economic assumptions and to come in here now and turn the process in the Senate upside down with this kind of a small saving for what is obviously a political purpose I think just sells the country short.

If you want to talk about dealing with the problem as it really is, I think most of us here are willing to stay the whole night or for the next 2 weeks, if necessary, to try to deal with it. But we have got real problems, and to try to paper over them by creating this kind of a situation, and to put so much focus on such a small item, and in the process set aside the normal procedures of the Senate, I just think is wrong.

I do not understand exactly why you are doing it, and I do not just address this to the Senator from Alaska. I would say to the majority leader we have appropriation bills that have passed the Senate, passed the House, gone to conference, been approved, and are sitting on the calendar that could be brought up tonight, could have been brought up yesterday, could be brought up tomorrow. I do not know why they are not coming up. I do not know why all these bills are being shoveled into a continuing resolution. I do not see any justification for that. But if you want to talk about serious problems, let us talk about the fact that the economic program has spun out of control, and that is what we ought to be adjusting. But I do not hear anybody rushing forward to deal with that problem.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I appreciate the recognition on the part of the Chair.

I wanted to address a couple of questions to the majority leader about the amendment, if I might. First of all, would the majority leader inform me as to which of the appropriation bills will not be affected in any way by the proposed cuts contained in his amendment, in their entirety? I will then turn to part of the appropriations. But which are excluded altogether?

Mr. BAKER. Mr. President, I believe only three of those listed on the first page of the amendment, the Department of Defense Appropriation Act, the Military Construction Appropriation Act, and the Foreign Assistance and Related Programs Appropriation Act.

Mr. SARBANES. So foreign assistance would not be cut in any way, military construction, and defense appropriation.

Mr. BAKER. Yes.

It is my understanding, by the way, that the Senator from Wisconsin intends to offer an amendment to the Baker amendment to delete foreign assistance; that is, assuming that the Byrd amendment is adopted and the Baker amendment is open to amendment at that point.

Mr. SARBANES. Would the majority leader inform me what constitutes the most recent budget request as of the date of enactment of the joint resolution?

Mr. BAKER. September 24.

Mr. SARBANES. If we were to receive a budget request prior to the enactment of this joint resolution, would that be covered by the amendment?

Mr. BAKER. Mr. President, I assume that is true. But I would be extraordinarily surprised if between now and tomorrow midnight, when I trust we will have a continuing resolution passed and a conference report adopted by both houses and delivered to the President, that such a request would emerge.

Mr. SARBANES. I would be very surprised, too. But I think it only makes, perhaps on a fairly minor point, underscores, what the Senator from Colorado and the Senator from Ohio, the points they were making earlier in the discus-

sion on this proposed amendment in terms of the abdication of the responsibility of the role of the Congress with respect to appropriation matters and the turning over to the President of an enormous degree of discretionary power to deal with very important matters.

We have been through a very long and involved process both in committee and on the floor trying to reach some judgments as to the appropriate funding levels for a whole range of programs on which the health, the education, and, indeed, the lives of our people are involved.

Now we are coming along at this late hour and this late juncture and simply giving over to the President the authority to make significant reductions in those programs, with all of the impact that that will have. If that is not an abdication of our responsibility to exercise an independent judgment with respect to the appropriation of funds and the policy that goes with the appropriation of funds, and we know well enough that the authorizing legislation means nothing until the money is there to back it up, yet we are giving to the President in a whole range of areas where we have spent days and weeks trying to arrive at the appropriate figures for funding those programs and to make those judgments, we are simply turning that discretion over to the President, which does not seem to me to be a very well-advised move.

I would certainly hope we would not, and I assume we will not, receive a most recent budget request between the time this is passed out of here tonight and its enactment of the joint resolution, but it is certainly open under this amendment for that to happen. I think that only underscores the nature of the exercise.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, I have been listening to the arguments that have been made here, and I think that certain things are pretty clear. One, we are not going to get a continuing resolution that is not going to be vetoed unless the spending total of that resolution is cut, and I guess 4 percent is the figure it is going to have to be cut.

I think that there have also been pointed out very eloquently tonight the dangers that we have of surrendering Congress constitutional authority if we provide for the process that is now set before us in the Baker amendment, that of allowing the President to make these cuts.

As you think about that, it is not going to be the President who is going to make the cuts. It is going to be some bureaucrat who is going to make the cuts, and that bureaucrat is going to look and see, and he is going to be able to take the amount of one-twentieth out of any program, and that is the 5 percent. The President is not going to make those million dollar detailed spending decisions; some bureaucrat who no one elected will decide.

Now, we have gone through the appropriation process, through the authorization process, those programs have gone through the winnowing process and other programs have been knocked out, and we have decided as the people's representatives that some programs ought to be cut, and others sought to be maintained. Now the Baker amendment would allow one-twentieth of those best programs to be wiped out by a middle-level bureaucrat. The people are never going to be able to find out who did it. We in Congress are never going to be able to find out who did it. They are going to be faceless and nameless, and no one is going to know who they are.

We ought to have to stand and answer for it if we cut a program. We are going to stand and answer for our votes tonight. But here many of us have had the luxury, and I have voted for some amendments, of adding to some programs. Here this amendment will allow members to turn around and say that while they added to those programs, after all, the President is going to take away 4 percent of that. So Congress does not have to be responsible for balancing the budget.

Members can say it was the President's fault; the President did it. We answer our mail that way. Where in the world will we ever stop with this? If you think this is something now about 4 percent, where do you think we are going to be on March 30 when we start talking about extending the continuing resolution and what kind of authority we are going to give the President at that time?

The President is going to come out in January with some new budget figures. We know what those figures are going to be. We know how bad the deficit is going to be, and we know the kind of cuts we are going to talk about. Are we in Congress going to make those cuts or are we going to say "Let the President do it"? Maybe it will be 10 percent, maybe higher than that; give him the authority to cut 20 percent. Well, that is great. We can go and beef up those programs, write our letters to the veterans and write our letters to the schoolteachers and write our letters to the crippled children, the parents of the crippled children, and say, "I voted for that program. The bad old President cut that program."

You do not find CHILES' name on that. At the same time to the people who want us to balance the budget, we will say that we voted for the provision and allowed the President to adjust the program to make the cuts. There is something wrong with that, something wrong with answering the public in two different ways.

There is something wrong with that. How are people going to grade us? How are they going to tell what we stand for, what we think are the priorities of Government? This amendment asks us to surrender that responsibility to stand up and be counted, and it looks to me like we are about to give that away.

I am about to make a motion, and that motion is going to be that we recommit this bill to the Appropriations Committee and that we give the Appropriations Committee 5 hours—we have got 11 other amendments and they will certainly take 5 hours—that we give our Appropriations Committee—that is us—5 hours to cut 4 percent then to bring it back and give us all a chance to vote on it so that we can kind of stand up and say, "We were willing to cut this and this was the priority. These were the places where we said we had to make the cuts."

I will exempt the same things in my motion that the Baker amendment exempts, so that the procedural issue is clear. And I will make one other exemption. I will move that later, if my amendment fails, as a modification to the Baker amendment, and that is to exempt the law enforcement agencies from cuts. I think we are exempting defense here, and we certainly ought to be exempting those agencies that are defending our homes and our families, but I will argue that matter at length later.

It seems to me that if we are of the opinion that we have to have these cuts, that we have to run the Government, that the bill is going to be vetoed if we do not make 4-percent worth of cuts, then for goodness sakes, let us have the courage to make the cuts ourselves. Let us do it within the legislative process provided for in the Constitution, which gives Congress the responsibility to control spending.

Let us not surrender our duty. Let us not delegate that authority. Let us not hide behind the claim that we gave that job of balancing the budget to the President to do and it was just that kind of a point in time; that we just did not have time to do our job; that we did not want to bother to have to go through and find the cuts. That is a copout. That is really not carrying out the role that we were given to do, that we were elected to do. And I think it will preserve the process.

I listened to the distinguished Senator from Mississippi when he started speaking in the Appropriations Committee and started warning us when we were looking at the September 30 date, warning us about the continuing resolution. He said that when he came to the Senate—and that is not so many years back—when he came to the Senate there was not any such thing as a continuing resolution; they did not know what that was. That is something we generated within the last few years.

But now that we have it, look what is about to be added to that continuing resolution tonight. It looks like we are about to add a provision that we give the President the authority to make these cuts.

I guess the only thing we would have to come down here for is sundown and payday, because the rest of the time we would not have to worry much about anything. We can go on a continuing resolution and we could give the President the authority to make the cuts and let the bureaucrats make the cuts. We would not have much to do. We probably could keep getting elected because we would not ever have to determine what the priorities are. We would not ever have to take a stand as to whether we thought one program was more important than the other. That just seems to me—even at 5 minutes to 3 in the morning—that that would be a heck of a mistake for us to do.

I send to the desk a motion to recommit and ask for its immediate considera-

tion. Actually, I move that we recommit with instructions to report back specific cuts adding to 4 percent of the non-excluded programs and activities.

The PRESIDING OFFICER. The clerk will state the motion.

The assistant legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) submits a motion as follows:

I move to recommit the Continuing Resolution (H.J. Res. 357) to the Appropriations Committee with the following instructions:

"(a) that the bill be reported back to the Senate with proposed amendments to reduce specific programs or activities, other than entitlements (as defined in Section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974), including payments to the State and Local Government Fiscal Assistance Trust Fund; and other than the law-enforcement activities of the Department of Justice, the Customs Service in the Department of the Treasury, and the Coast Guard; and other than projects or activities for which funding would be made available in the Department of Defense Appropriations Act, 1982, or the Military Construction Appropriations Act, 1982, or the Foreign Assistance and Related Programs Appropriations Act, 1982; or Title IV of the Commerce, State, Justice and the Judiciary Appropriations Act, 1982; and other than the Food Stamp Program as provided for in Section 101(h) of this joint resolution; by amounts sufficient to reduce the total amount of budget authority and outlays for non-excluded programs or activities by four percent below the total amount provided for such non-excluded programs or activities in the Resolution as reported by the Senate Appropriations Committee; and that

"( ) the Resolution, containing such amendments, shall be reported back to the Senate no later than five hours after adoption of this motion."

Mr. BAKER. Mr. President, I move to table the motion and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER) to table the motion to recommit of the Senator from Florida (Mr. CHILES). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER (Mr. RUDMAN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 55, nays 42, as follows:

[Rollcall Vote No. 416 Leg.]

YEAS—55

Abdnor	Cohen	Durenberger
Andrews	D'Amato	East
Armstrong	Danforth	Exon
Baker	Denton	Garn
Boschwitz	Dole	Gorton
Chafee	Domenici	Grassley
Hatch	Mathias	Simpson
Hatfield	Mattingly	Specter

DeConcini	Matsunaga	
	Metzenbaum	

NOT VOTING—3

Goldwater	Kennedy	Leahy

So the motion to lay on the table the motion to recommit was agreed to.

Mr. BAKER. Mr. President, what is the pending question before the Senate?

The PRESIDING OFFICER. The pending question recurs on the amendment of the Senator from West Virginia (Mr. ROBERT C. BYRD) to the amendment of the Senator from Tennessee (Mr. BAKER).

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of Senator ROBERT C. BYRD to the amendment of the Senator from Tennessee. The yeas and nays have been ordered. The clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 94, nays 3, as follows:

[Rollcall Vote No. 417 Leg.]

YEAS—94

Abdnor	Cranston	Hawkins
Andrews	D'Amato	Hayakawa
Armstrong	Danforth	Heflin

NAYS—3

Hatfield	Percy	Stevens

NOT VOTING—3

Goldwater	Kennedy	Leahy

So the amendment (UP No. 690) was agreed to.

UP AMENDMENT NO. 691

Mr. PROXMIRE. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), for himself, Mr. RANDOLPH, and Mr. ROBERT C. BYRD, proposes an unprinted amendment numbered 691 to the amendment by the Senator from Tennessee (Mr. BAKER), numbered 689:

On page 1 lines 14–15 delete "the Foreign Assistance and Related Programs Appropriation Act, 1982;"

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield to my leader.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to reconsider the vote by which my amendment was agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which my amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, what this amendment does is to eliminate the exemption from the 4-percent cut for foreign aid. In other words, it would provide exactly the same treatment for foreign aid as we provide for the other parts of this bill, except the others that are exempted.

We cut 4 percent from Federal aid for education, for educational aid for the handicapped, for Environmental Protection Agency, for housing, but not for foreign aid.

We have already cut these others very sharply. As a matter of fact, on the average, we have cut domestic programs about 16 percent. Foreign aid has been shaved a little. It has been cut about 3 percent. Now we are going to cut a further 4 percent from these domestic programs and nothing from foreign aid.

Why should we not apply the same rules to the foreign aid program as we apply to all the other programs? We

would save a potential $400 million by doing this.

Mr. President, I know that there are some who will argue that the foreign aid bill is one that has requirements that are unpredictable because what happens, of course, in foreign countries is beyond our control.

But I call the attention of the Senate to the fact that this Baker resolution provides a considerable flexibility in the last sentence on page 2. It specifies, and I read:

> That the Administration may request, and upon approval of both Appropriations Committees of the House and Senate and the appropriate House and Senate authorizing committees of jurisdiction, may transfer.

Mr. BAKER. Mr. President, that was taken out.

The PRESIDING OFFICER. The Senate will be in order.

Mr. PROXMIRE. Mr. President, the fact is that the foreign aid bill, of course, is a bill that has, as I understand it, some $10 billion in it. This would cut it only 4 percent. There, therefore, would be considerable flexibility to move within that account which is already provided in the underlying resolution.

So, Mr. President, at this late hour I certainly do not intend to detain the Senate. The issue is very simple and very clear. There is no question that foreign aid in my judgment should be treated like every other program, no better and no worse. It has been treated much better up to date. But since we are making these cuts in these programs that are so important to all our citizens, we should treat foreign aid the same.

Mr. President, I yield the floor.

Mr. PERCY. I wish to indicate to my collegues in the strongest voice I can at this early hour in the morning my firm support for the position taken by the majority leader and the chairman of the Foreign Operations Subcommittee of the Appropriations Committee.

The foreign assistance programs of the United States represent U.S. foreign policy. Just the day before yesterday the President of the United States scored a major foreign policy victory with his speech on arms control, a victory which the Senate ratified today by a vote of 95 to 0. This is not a time, therefore, to give the President a foreign policy defeat by rejecting this foreign assistance request.

As I have said many times before, the current foreign aid budget has already been cut to the bone. The Foreign Relations Committee reduced the President's already austere request by $900 million. The Appropriations Committee made further reductions so that now the foreign assistance programs have been cut 16 percent from the President's March request.

Any further reductions could do significant damage to U.S. national security policy as has been eloquently stated by Secretary of State Al Haig. The President relies on these programs to keep the fragile peace in the Middle East and to provide political stability in other vital areas of the world such as Egypt, Israel, Turkey, the Sudan, and South Korea. We are not talking about a give-away program, we are talking about vital U.S. national security interests.

This bill actually provides $288 million less than the President's request for the World Banks International Development Association (IDA). To cut even further would harm U.S. foreign policy consistency and reliability, the cornerstone of President Reagan's foreign policy.

Mr. CRANSTON. Mr. President, I rise to speak just very briefly against this amendment.

The foreign assistance bill has already taken into account the 12½-percent cut requested by President Reagan. Thus another 4- to 5-percent cut would mean a cut of 16½ to 17½ perecnt in foreign assistance.

So far the budget cuts have not affected aid to Israel and Egypt. They are the prime beneficiaries of the aid bill. But given the large cuts already made it is inevitable that additional cuts will mean cuts in assistance programs involving those countries as well as others.

Fifty percent of the outlays for next year will go to three countries, Israel, Egypt, and Turkey, all nations where we have very important national security interests.

We need to show continued support to Egypt, certainly in the light of the events that have been transpiring in that country. We need to help both Egypt and Israel continue the Camp David peace process. Part of the funding needed is for the specific purpose of paying the cost of Camp David, such as relocating airfields.

I think it would be very, very unwise from the point of view of our national interests and our national security to make further cuts in this particular area.

Mr. PROXMIRE. Mr. President, will the Senator from California yield?

Mr. CRANSTON. I yield.

Mr. PROXMIRE. The Senator from California indicated we already made substantial cuts in foreign aid. What I referred to was the comparison of the present foreign aid appropriation with the appropriation of 1981 and in that comparison it is only 3-percent less compared to a very, very much sharper cut in these other programs that are so important.

The Senator is absolutely right in indicating that foreign aid is a valuable program and a useful program, and I am not trying to demean it. All these programs are good or we would not have made these appropriations.

I am just saying we should treat them alike. Of course, there are some elements here in the defense program that are absolutely essential and in which we will not make a reduction, but as to foreign aid it is very hard for this Senator to understand why we should give foreign aid a status that we do not give to aid for the handicapped, medical research and all these other domestic programs that are also fine programs.

Mr. CRANSTON. The Senate approved some aid for handicapped people today. I think we all know that our national security is deeply involved in the particular programs that we would attack by the Senator's amendment.

Mr. HATFIELD. Mr. President, as has been stated there have been already substantial cuts made in the foreign aid appropriations bill.

Therefore, I move to table the amendment proposed by the Senator from Wisconsin and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon to lay on the table the amendment of the Senator from Wisconsin.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there other Senators in the Chamber desiring to vote?

The result was announced—yeas 48, nays 49, as follows:

[Rollcall Vote No. 418 Leg.]

YEAS—48

Andrews	Garn	Metzenbaum
Baker	Glenn	Moynihan
Biden	Hart	Packwood
Boschwitz	Hatch	Pell
Bradley	Hatfield	Percy
Chafee	Hawkins	Quayle
Cochran	Hayakawa	Simpson
Cohen	Heinz	Specter
Cranston	Hollings	Stevens
D'Amato	Inouye	Thurmond
Danforth	Jepsen	Tower
Denton	Kasten	Tsongas
Dodd	Laxalt	Wallop

Durenberger	Melcher	Symms
Eagleton	Mitchell	Warner
Exon	Murkowski	

NOT VOTING—3

Goldwater	Kennedy	Leahy

So the motion to lay on the table UP amendment No. 691 was rejected.

(Later the following occurred:)

Mr. BRADLEY. Mr. President, I ask unanimous consent that my vote on rollcall vote No. 418 be changed from "nay" to "yea." It will not affect the outcome of the vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The foregoing rollcall vote has been changed to reflect the above order.)

The PRESIDING OFFICER. The question recurs on the amendment. The yeas and nays have been ordered.

Mr. BAKER. Mr. President, would the distinguished managers of the bill and the sponsor of the amendment consider vitiating the yeas and nays?

Mr. PROXMIRE. I will be glad to do it.

Mr. BAKER. Mr. President, I withdraw my request.

Mr. BUMPERS. Mr. President, would the majority leader request a 10-minute rollcall?

Mr. BAKER. Yes.

Mr. President, I ask unanimous consent that there be a 10-minute rollcall.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question recurs on agreeing to the amendment of the Senator from Wisconsin (Mr. PROXMIRE). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER (Mr. NICKLES). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 62, nays 35, as follows:

[Rollcall Vote No. 419 Leg.]

YEAS—62

Abdnor	Garn	Nickles
Armstrong	Gorton	Nunn
Baucus	Grassley	Pressler
Bentsen	Hart	Proxmire
Boren	Hatch	Pryor
Bumpers	Hawkins	Quayle
Burdick	Heflin	Randolph
Byrd, Harry F., Jr.	Helms	Riegle
Byrd, Robert C.	Huddleston	Roth
Cannon	Humphrey	Rudman

Cranston	Laxalt	Tsongas
D'Amato	Levin	Weicker
Danforth	Lugar	Williams
Dodd	Mathias	

NOT VOTING—3

Goldwater	Kennedy	Leahy

So Mr. PROXMIRE's amendment (UP No. 691) was agreed to.

(Later the following occurred:)

Mr. BRADLEY. Mr. President, I ask unanimous consent that my vote on rollcall vote No. 419 be changed from "yea" to "nay." It will not affect the outcome of the vote.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

(The foregoing rollcall vote has been changed to reflect the above order.)

UP AMENDMENT NO. 692

(Purpose: To exempt law enforcement activities from further budget reductions)

Mr. CHILES. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. CHILES), for himself, Mr. BENTSEN, Mr. NUNN, Mr. ROBERT C. BYRD, Mr. RANDOLPH, Mr. SASSER, Mr. DECONCINI, and Mr. MATTINGLY proposes an unprinted amendment numbered 692 to unprinted amendment numbered 689:

"FISCAL ASSISTANCE TRUST FUND (31 U.S.C. 1221–1263)"

Insert after the following: "the law enforcement activities and programs of the Department of Justice, the law enforcement activities of the Customs Service and the Internal Revenue Service in the Department of the Treasury, and the law enforcement activities of the Coast Guard:"

Mr. CHILES. Mr. President, what this amendment would do would be simply to exempt those law enforcement agencies who are on the line, who fight the battle against crime.

We have already exempted the Defense Department, and certainly that is necessary. But I think most of us know that one of the greatest threats we have today is not so much from the external enemy as it is from the crime that we have within the borders of our Nation.

The hour is late, I could speak a long time on this subject if I felt it was necessary. I would like to know if my amendment could be accepted?

Mr. STEVENS. May this Senator ask one question?

Mr. CHILES. Yes.

Mr. STEVENS. If I were to prevail upon the sponsor of the Baker amendment to accept the Senator's amendment, would he support it?

Mr. CHILES. I have discussed that with the majority leader and told him that it would certainly make the amendment look more palatable to me.

Mr. STEVENS. I do not find that an answer at 4 o'clock in the morning.

Mr. CHILES. Let me say, on the other hand, if this amendment is not to be accepted, maybe people should go home and get some sleep, because I am prepared to talk more than a little bit about crime and the tragedy it works on our Nation and what it is doing to my State.

We had some interesting hearings, about 5 days' worth of hearings, on the Permanent Subcommittee on Investigations of the Senate Governmental Affairs Committee. I wish everybody had been there to hear those hearings. But I am prepared now to let everybody have a chance to hear about those hearings because I think it is important for the Members to know what crime is doing to tear the fabric of the Nation and particularly the fabric of my State.

The people in my State are about as frustrated about this subject as they can be and I think there are some people in my State who would forgo their social security checks for a day or so if they thought it was because I was here trying to do something here to help battle crime.

I would like to say, Mr. President, that I hope that I will not have to do that. But I need to tell everybody that I will go for as long as I can stand here. I have those 5 days of hearings to tell you all about. Then I think there are an awful lot of things that we ought to talk about that needs to be done to fight crime. I am certainly prepared to do that.

I think, Mr. President, that most of the Members of this body recognize that if we are going to exempt defense, certainly, when we talk about crime we are talking about the enemies of our people. We are having an invasion of drugs into this country. It is an international invasion, an international conspiracy. My State happens to stick out as a peninsula and we sort of get the worst of it. But it does not all stay there. It is going to be a lot of other places as well.

I yield to the Senator from Georgia.

Mr. NUNN. I just say to the Senator that I believe he is absolutely correct in proposing this amendment. There is no more serious problem we face in this country. Certainly the invasion of drugs is just as dangerous as any external problem we face. I think the Senator is absolutely correct.

Mr. LONG. Will the Senator yield?

Mr. CHILES. Yes, I yield.

Mr. LONG. Can the Senator tell me what is involved here, what the 4-percent cut applied to this will be, how much money is involved in this amendment?

Mr. CHILES. A grand total of about $281 million.

Mr. President, I ask unanimous consent to have printed in the RECORD a table that provides budget data regarding our law enforcement agencies and the impact of exempting these agencies from the 4-percent cut.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FISCAL YEAR 1982 BUDGET REQUESTS

[Dollar amounts in millions]

Agency	January 1981 (Carter)	March 1981	September 1981	Cuts from January 1981	Senate levels in H.J. Res 357	Impact of 4 percent cut exemption
FBI	$743.6	$739.0	$696.0	$47.5	742.6	29.7

Total						281.6

Mr. LONG. Well, we just saved about $400 million by eliminating the exception for foreign aid, so if the amendment were accepted, we would still be well ahead of what the objective was of the Baker amendment. I do not think the managers would be unwilling to accept the amendment.

Mr. BENTSEN. Mr. President, if he will yield, I thank the Senator from Florida for what he has done. I am happy to support him and would like to be a cosponsor.

If the Senator from Alaska is looking for one more vote to make this amendment acceptable, he has that vote. I think this is so important that——

Mr. STEVENS. Mr. President, at 4 o'clock in the morning, I understand that. I am willing to accept it on that basis.

Mr. HATFIELD. Mr. President, I am prepared to accept the amendment of the Senator from Florida and move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 692) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. CRANSTON. Mr. President, to paraphrase the words of Paul Newman's principal adversary in the movie "Cool Hand Luke," "What we have here is a failure to enumerate."

It is amazingly easy to cut budgets when one does not have to spell out where the cuts are coming from.

All one needs is a magic asterisk to designate unspecified cuts, and one can balance one's budget in a hurry.

In the 1976 election campaign, candidate Ronald Reagan offered such a plan. "If elected President," he said, "I will balance the budget with the stroke of the pen."

A few days later, when forced to specify his cuts, his proposal proved so unpopular it was dropped entirely.

Well, President Reagan has learned something about balancing budgets. He no longer proposes them.

I oppose the move to delegate to the President our responsibility to determine the component parts of the budget.

The well-defined procedures established by the Congressional Budget and Anti-Impoundment Act of 1974 have been continuously eroded this year by the procedures supported by the Republican leadership.

The Senate has abdicated its constitutional responsibilities to exercise the power of the purse in order to rubberstamp whatever the administration sends down.

Now we are going even further. By adopting the pending amendment, we not only provide automatic support for whatever the President proposes—merely because he has proposed it. We also now don't even ask what the President proposes. We give him a blank check.

I'm glad we have voted to eliminate one of the very worst features of the measure that originally came before us: The suggestion that we should go through the entire year on a continuing resolution, that constituted an incredible abandonment of our responsibilities. I applaud the leadership and courage exerted by the Senator from Michigan (Mr. LEVIN) on that issue, and I am delighted that I was able to join with him and the minority leader, Senator BYRD, as principal sponsor of the March 30 amendment.

But the inclusion of that provision in the amendment now pending does not cure its fundamental flaws, and so I urge my colleagues to oppose the pending resolution.●

UP AMENDMENT NO. 689, AS AMENDED

Mr. GORTON. Mr. President, this 4-percent across-the-board cut in certain appropriations is not an economic or spending policy; it is a fruitless attempt to hide the fact that we now have more. To attach for a third time the same discretionary programs which were the primary subject of reconciliation and the sole subject of the President's September spending cut proposals while ignoring entitlement programs, defense spending and the need for additional revenue in order to balance the budget by 1984 is both unjust and ineffective. That balance, in turn, is essential to the lower interest rates, lower inflation, and economic recovery. We must have a program which is both balanced and fair. This amendment moves us away from that goal, not toward it.

Mr. BAKER. Mr. President, have the yeas and nays been ordered on the Baker amendment?

The PRESIDING OFFICER. They have not at this time.

Mr. BAKER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The question is on agreeing to the amendment of the Senator from Tennessee (Mr. BAKER).

The PRESIDING OFFICER. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 62, nays 35, as follows:

[Rollcall Vote No. 420 Leg.]

YEAS—62

Abdnor	Byrd, Robert C.	East
Andrews	D'Amato	Exon
Armstrong	Danforth	Ford
Baker	DeConcini	Garn
Bentsen	Denton	Grassley
Boren	Dixon	Hatch
Boschwitz	Dole	Hawkins
Byrd, Harry F., Jr.	Domenici	Hayakawa
	Durenberger	Heflin
Helms	Melcher	Sasser
Huddleston	Murkowski	Schmitt
Humphrey	Nickles	Simpson
Inouye	Nunn	Specter
Jepsen	Packwood	Stennis
Johnston	Percy	Stevens
Kasten	Pressler	Symms
Laxalt	Proxmire	Thurmond
Long	Pryor	Tower
Lugar	Quayle	Wallop
Mattingly	Roth	Warner
McClure	Rudman	Zorinsky

NAYS—35

Baucus	Eagleton	Metzenbaum
Biden	Glenn	Mitchell
Bradley	Gorton	Moynihan
Bumpers	Hart	Pell
Burdick	Hatfield	Randolph
Cannon	Heinz	Riegle
Chafee	Hollings	Sarbanes
Chiles	Jackson	Stafford
Cochran	Kassebaum	Tsongas
Cohen	Levin	Weicker
Cranston	Mathias	Williams
Dodd	Matsunaga	

NOT VOTING—3

Goldwater	Kennedy	Leahy

So the amendment (UP No. 689) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, as comanager of the bill I wish to set aside the committee technical amendment in order to take up the amendment of Mr. JEPSEN from Iowa. I ask the Chair to recognize the Senator from Iowa as the next in line for amendments.

Mr. HART. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HART. Mr. President, do the precedent and rules of the Senate permit the floor manager of the bill to instruct the Chair as to which Senator is to be recognized?

The PRESIDING OFFICER. They do not.

Mr. HART. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HART. Did the Chair notice which Senator was seeking recognition?

The PRESIDING OFFICER. The Chair did note the Senator from Oregon and also the Senator from Colorado was seeking recognition.

Mr. HATFIELD. Mr. President, I wish to respond to the Senator from Colorado.

We have on both sides been keeping the list of Senators who have asked to present amendments. For almost 2½ days we have accommodated Senators in their schedules to and from the Chamber.

This list has been in the hands of the majority leader, the minority leader, the manager on the minority side, the manager on the majority side, the assistant majority leader, and the assistant minority leader.

So, all I am suggesting is that is the only way we can orderly proceed with all the amendments that we have had.

The name of the Senator from Colorado has been on the list all this evening. And his name will be up very shortly. That is the best way we found to proceed.

Mr. HART. I appreciate the floor manager's position on this. I did not see any other Senator seeking recognition. I was prepared to offer my amendment.

UP AMENDMENT NO. 693

(Purpose: To limit the use of funds for the Federal Election Commission after March 30, 1982)

Mr. JEPSEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Iowa (Mr. JEPSEN), for himself and Mr. Armstrong, proposes an unprinted amendment numbered 693:

At the end of the joint resolution add the following:

"SEC. . Notwithstanding any other provision of this joint resolution, the funds available for expenses necessary to carry out the provisions of the Federal Election Campaign Act of 1979 shall not be available after March 15th, 1982 for the Federal Election Commission the authorization of which is not continued by statute".

Mr. JEPSEN. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. FORD. Mr. President, will the Senator from Iowa yield to me for a question?

Mr. JEPSEN. I yield.

Mr. FORD. I am going to oppose the Senator's amendment. He knows that. We had a conference back and forth.

Now that the proposal of the majority leader has been overwhelmingly supported here and the date on that amendment is March 30 and the Senator's amendment is March 30, is there any need for us to get into the discussion and then the yeas and nays as it relates to the Senator's amendment?

Mr. JEPSEN. We changed the amendment. I thought that the authorization alone was something that prompted an opportunity for people to have a voice and apply this thing by way of any reform recommendations they would want. I was advised just before I was recognized here that what the Senator said was correct.

So I changed the date from March 30 to March 15 which really is only a token, but it is a token to indicate, and if the Senator will let me finish my opening statement——

Mr. FORD. I will be glad to. I was only trying to prevent keeping us here any later for an amendment that might be moot.

Mr. JEPSEN. And the Senator would have been absolutely correct as usual, absolutely correct.

Mr. FORD. I hope that the Senator will agree with me when we debate the amendment.

Mr. JEPSEN. Mr. President, the Senator from Colorado and I are offering what we believe is a very simple, straightforward amendment. It would discontinue funds for the Federal Election Commission unless Congress moves to reauthorize the Commission. As most of my colleagues are aware, the Commission's authorization ran out on September 30 of this year.

I would like to take a moment to explain why the Jepsen-Armstrong amendment is being offered.

For several months now, Senators from both sides of the aisle have been talking about seeking reforms in the Federal election laws. Unfortunately, after many months of discussion, it still does not appear that any progress is being made.

To his credit, Senator MATHIAS, chairman of the Senate Rules Committee, has scheduled hearings on this important issue. I hope that more hearings will be held so that all persons wishing to testify on the FEC will have an opportunity to do so. In addition, I am confident that the Senate leadership will make time available on the calendar, should the Rules Committee report out a bill. What I am most concerned about, and I think a number of my colleagues share this concern, is the possibility that any reform measure the Senate might act upon, will get bottled up in a House-Senate conference committee.

Senator ARMSTRONG and I are offering this amendment to insure that this does not happen. Our amendment makes certain that Congress will address the issue of FEC reform sometime between now and March 15, 1982.

It is conceivable that between now and then Congress will approve a bill which will actually strengthen the hand of the Commission. On the other hand, Congress could decide to merely tinker with the law. Finally, Congress could decide to abolish the Commission. Whatever the outcome, the final decision will be based upon action taken on authorizing legislation. The Jepsen-Armstrong amendment will not change this process, it only acts as the catalyst for activating the process.

I cannot stress enough the fact that the only intent of this amendment is to make sure that Congress addresses the issue of FEC reform. I do not have a crystals ball so I am not in a position to predict what Congress will decide to do when next March rolls around. But if this amendment is adopted, it will make sure that something is done.

Because this amendment does not dictate a solution to the problem but rather establishes the timetable, I would hope that all of my colleagues could support this amendment. If you have any concerns about either the Commission or the law, I suggest that the proper vote would be to vote for this amendment.

As I mentioned at the beginning of my statement, Mr. President, I believe the amendment is fairly straightforward. I will therefore keep my remarks brief.

And these are the end of them.

Mr. MATHIAS. Mr. President, I oppose this amendment. I oppose it reluctantly because the Senator from Iowa and I have had a number of discussions but those discussions have led us to an agreement as he has already said to examine this and take some action on it. In fact the hearings are scheduled to begin in 4 hours and 50 minutes. The witnesses are rolling restlessly in their sleep thinking of what they are going to say in 4 hours and 50 minutes.

If we hang around here much longer, we are not going to be there for that hearing. We will miss the hearing because of the amendment.

I hope the Senator from Iowa will let us work the normal process and not run in on this continuing resolution.

Mr. JEPSEN. Mr. President, will the Senator yield?

Mr. MATHIAS. The Senator has the floor.

Mr. JEPSEN. Can the Senator in any way give me an assurance from friends of his or acquaintances, colleagues of his in the House of Representatives whom I do not know about that they will take up and consider the bill when the Senate acts upon it?

Mr. MATHIAS. Now the Senator knows that as much as I would like to give him that assurance, I am not able to do that, nor am I able to give him any assurance, nor do I think the Senator from Oregon is able to give him any assurance that the House of Representatives will like it any better in this bill than they will in any other bill.

So we all have to take our chances on that.

Mr. JEPSEN. I thank the Senator. It does reinforce the point that I had made here that my big concern was the House of Representatives will not act on it, and this will give them an opportunity to do so because it will require that it be reauthorized by statute. That is all it does. It does not point up a solution. It just sets a timetable for the process to take place.

Mr. FORD. Mr. President, I am prepared to vote. I think they were waiting for me to say something. I think the distinguished chairman of the Rules Committee said it all. This basically kills the Federal Election Commission if it is passed. It eliminates the independent oversight and meaningful enforcement of the Nation's campaign laws.

We start our hearings tomorrow. We have hearings next week. We have contracted for the Harvard report as it relates to Federal elections. We have served notice and the House has served notice, and they will not entertain this amendment on the continuing resolution. We would be eliminating the public's right to know, and I have learned very emphatically from the majority leader of the Senate when he called me a long time ago when I tried to put an amendment on a bill, when he said:

I would probably agree with the Senator from Kentucky, but it has not gone the route yet. It has not gone to the committee, it has not been discussed in the committee, and before we consider it on the floor it would have to be considered in the committee and go through the rightful process of this distinguished body.

So I say to the Senator from Iowa I regret that he wants to push this, but we are trying hard to accommodate him, trying hard to get the Harvard report in. We are going to have witnesses in, we are going to be looking at the changes, and I do not think the Senator wants to kill the Federal Election Commission, and I do not think he wants to eliminate meaningful enforcement of the Nation's campaign laws, and I ask my colleagues to oppose this amendment.

Mr. JEPSEN. Mr. President, I will not take any more time except for 30 seconds to say that I submit what we are talking about here again is setting a timetable for the process to take its course, which is a little bit of a push primarily because of the concern about the House.

I submit that any time you can get ROGER JEPSEN, Eugene McCarthy, the American Civil Liberties Union, and the American Conservative Union together there must be something to the argument, and they all agree that we need reform on the Federal Election Commission.

I yield to the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, the amendment which the Senator from Iowa and I present addresses itself not only to reform of the Federal Election Commission but to a broader problem that relates to the integrity of the appropriations process.

I am aware, as I am sure all Senators are, that there is a great deal of spending appropriated by this continuing resolution for which there is no authorization.

I wonder if the distinguished manager of the bill can tell us what dollar figure might be attached in the continuing resolution to spending for which there is no present authorization?

Mr. FORD. Mr. President, will the Senator answer this question? The authorizing legislation has been on the calendar and been there for months, and this side has not objected to taking up the authorization. Can you tell this Senator who has been objecting to this body's consideration of the authorization for the Federal Election Commission? I will be glad to proceed then with this colloquy.

Mr. ARMSTRONG. I have noted with interest—I did not address that question to the Senator from Kentucky. I was addressing it to the managers of the bill for the purpose of inquiry. I am advised there are large amounts appropriated herein which are not for purposes authorized by law, and it would be helpful, I think, to the consideration by the Senate to have some idea of what the magnitude of that is. Would anybody——

Mr. GLENN. Is the Senator talking about the Federal Election Commission or overall, the whole continuing resolution? I think that is a very interesting figure and I would like to know that also.

Mr. ARMSTRONG. I think Senators will find the figure is not just several million dollars for the Federal Election Commission but, in fact, it is several billion dollars. I do not have the figure on the tip of my tongue, but I think we are all well aware that Congress has gotten itself into the practice of continuing appropriations when no authorizing legislation has been adopted. I am not prepared tonight to tick off the list, although I could mention several appropriations.

Mr. ANDREWS. The B–1, the MX, the military, much of it is military, a whole host of which are not authorized, as the Senator knows.

Mr. ARMSTRONG. That is correct.

Mr. GLENN. Mr. President, will the Senator yield?

Mr. ARMSTRONG. Yes, I will be happy to yield.

Mr. GLENN. I do not understand the point the Senator is driving towards. But I am questioning in my own mind the question he has raised. Can the President then, if we pass this continuing resolution, exercise this 4 percent across-the-board cut in these areas for which there is no authorizing legislation passed here? Does the continuing resolution exempt him from having to have the authorization before he can legitimately spend that money?

Mr. ARMSTRONG. The Senator from Ohio raises an intriguing question to which I am not prepared to respond. But having thus attracted the attention of the body to the broader policy considerations, I would like to now return to the specific question raised by the amendment of the Senator from Iowa.

It would be, I think, a proper determination of the Senate to say, "Look, we are just not going to appropriate any more for those purposes which are not authorized by law."

Indeed it will be my purpose on some future date to offer an amendment to that end, to just say that we are going to go back to the historic process of appropriating only for those purposes which have first been authorized. That protects the integrity of the appropriations process; that protects the integrity and legislative jurisdiction of the authorizing committees.

Neither the Senator from Iowa nor I wish to go that far tonight, certainly not at 4:45 a.m. So it is the suggestion of Senator JEPSEN and myself that we set a deadline for this one particular agency for which hearings are scheduled, for which some legislative changes are widely thought to be needed, to simply say that on and after a certain date that further spending would not be in order, would not be permitted by this appropriation, unless authorizing legislation is adopted.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. ARMSTRONG. If I can continue for about 30 seconds more, I will then be prepared to yield the floor. I have said my piece.

The issue, first, is whether or not we ought to have authorizing legislation for the Federal Election Commission, and whether it can be accomplished by March 31, which, it seems to me, is the first question; and, second, whether or not it would be a good procedure for us to authorize for all appropriated amounts, and I think it will be a worthwhile and modest step in that direction, and I would urge the Senators to vote for our amendment.

Mr. DECONCINI. Mr. President, the Senator from Ohio pointed out and raised a point that is very interesting, and I will only ask the Senator from Colorado if we are going to apply this, as the Senator from Iowa and the Senator from Colorado would like to do so, to the Federal Election Commission, that maybe we ought to apply it to the defense portion that has not been authorized and, as I view all of that, as does the Senator from Colorado, I wonder if he would like to entertain the idea of expanding that and including the defense portion of this continuing resolution?

Mr. ARMSTRONG. Mr. President, if the Senator will yield, I would be happy to respond to his question. As a matter of principle I would be pleased to do exactly as the Senator from Arizona suggests, and at some future date it will be my expectation and intention to offer such an amendment, and I would be pleased if the Senator from Arizona would join me in that effort.

I think the practice of appropriating for projects, for functions, which are not authorized by law is basically injurious to the process. Why then single out the Federal Election Commission for that particular treatment tonight? The answer is very simple. That judgment was made by Senator JEPSEN in consultation with a number of people around this room with whom he has been working for several months to obtain some way of focusing the attention of the Congress on the need for authorizing legislation for this particular agency.

Specifically, I believe this formulation was arrived at in consideration of Senator JEPSEN's and others' removing their holds from the Treasury, Post Office appropriation bill which contains the Federal Election Commission appropriation, at least that is my understanding and, perhaps others know more about it.

So this not something that is a spur-of-the-moment idea.

It is simply an orderly way to bring the matter before the body, and in the same spirit I would invite others to joint the Senator from Arizona and myself in looking for a process by which we could get everything authorized before it is appropriated. I think it is too ambitious to do tonight, but over the next several months it would be proper to do it.

Mr. DECONCINI. It seems to me if the Senator wishes to do that, and I would like to participate in such an exercise, it seems improper for me at least to single out one agency today. That makes me fear that this maybe is really an intent that the Federal Election Commission see its day to be buried, and I would much rather see us do it on a basis where no single agency is singled out tonight unless we are prepared to expand that amendment and go the route the Senator from Colorado suggested.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

UP AMENDMENT NO. 694

Mr. FORD. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. FORD) proposes an unprinted amendment numbered 691.

Mr. FORD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Since April 30, 1981, the authorization bill has been at the desk. The Rules Committee performed its job

and somebody has had a hold on it. I have now amended your amendment to include the authorization, and we will see who has a hold on the funds for the Federal Election Commission.

SEVERAL SENATORS. Vote!

Mr. STEVENS. Mr. President, I request the amendment be read. I cannot quite understand the Senator's statement.

The PRESIDING OFFICER. The clerk will read the amendment.

The legislative clerk read as follows:

At the end of the amendment add the following:

That section 314 of the Federal Election Campaign Act of 1971 (2 U.S.C. 439c) is amended, in the second sentence thereof, by—

(1) striking out the word "and" where it appears immediately after "1978", and

(2) by inserting immediately before the period at the end thereof the following: ", and $9,746,000 for the fiscal year ending September 30, 1982".

Mr. STEVENS. Mr. President, I do not want to seem obtuse, but I do not quite understand what my friend from Kentucky is attempting to do. I have seen many bills that have passed the Senate which have included items making various appropriations subject to authorization. The question of the items in the defense bill come from a matter of tradition of how new weapons systems have been handled for agencies that have general authorization already. We have had the B–1 started and stopped through the appropriation process in the past. I do not think however, this example is relevant to the FEC.

The question about the FEC involves its status with respect to the authorization process. It is my understanding that each of the major Presidential candidates involved in the most recent Presidential election asked us to modify the FEC. I say to my friend from Kentucky, we have tried to reach an agreement, concerning the FEC authorization bill. But, we have been unable to reach an agreement because every time we come up with some kind of a formula dealing with needed reform, someone voices objection.

It is just an authorization, as you know, to continue the FEC, to make no major changes in it. We are awaiting these hearings the Senator from Maryland has agreed to hold, and that is the main reason for the delay in the authorization bill.

I do support the concept that the FEC ought to be reauthorized before we get to the time of March 31, which is the date we agreed upon as the expiration date for the continuing resolution.

Mr. FORD. No, March 15, by the amendment.

Mr. STEVENS. March 15. The amendment offered by the Senator from Iowa says the authorization bill ought to pass by March 15, so we can tell whether it ought to be included in the continuing resolution or whatever else might take its place as a result of the appropriations process. But I do not know how we are going to address this issue as far as making any changes in it unless there is some limitation on the further expenditures of Federal funds without authorization. There is no authorization for the FEC today.

Mr. FORD. Will the Senator yield to me for just a moment so we might enter into a discussion?

Mr. STEVENS. Yes.

Mr. FORD. One of the complaints that has been raised by the proponents of this amendment has been that there is no authorization is because the majority will not let the bill be taken up. And the reason the majority will not let it be taken up is because there is a hold on your side.

No. 2, the majority leader announced the other day that he was not going to have any holds on bills any more, but this one has been on board now since April 30. The Rules Committee did their job. We are allowing one or two people on that side to hold up the authorization and now complain about the FEC, that we cannot put it in this bill because there is no authorization.

I just want to say to the good Senator that I understand what is happening here. I hope he understands what I am doing, because I am putting the authorization now on this amendment, amending this amendment, and that authorization is there. I think the appropriation implies authorization. I think that implies authorization. So, if we appropriate on this bill, that is implied authorization.

We know, and the Senator that proposed the amendment knows, that the House will not take it. He wants a symbolic vote here tonight. And I think that is wrong. I think it is absolutely wrong.

So, I say to my good friend, I have done what I think is proper here. The Rules Committee did their job. We are trying to do your job.

We contracted with Harvard for their report, which will be here in January. We are having hearings today. We are having hearings next Tuesday. The Senators that objected to what is going on in the FEC and want to make some changes have every right to come and testify and let it go through the normal process. Here we are shortcutting it.

Mr. STEVENS. I do not want to debate the FEC with the Senator now, because I think this is what the debate is leading up to.

The amendment offered by the Senator from Kentucky is redundant. The money for the FEC is in the other bill and it is incorporated in the continuing resolution. That is why this amendment is necessary, to find some way to tell the Congress that you have to reform the FEC before we continue to fund the agency after March 31. I support this position. If you want to get into the reasons, I will be glad to do it. I think it is a little early in the morning to do it, but this is a reasonable position.

I know the Senator from Kentucky has supported amendments in the past that limited appropriations to authorizations. I have, and I am sure that other Members of this body have as well.

This is a reasonable way to put a constraint around us. The Senator is right, I have told the Senator that in all probability it cannot survive the conference. But it would certainly indicate this Senate's position that something must be done about the authorization of the FEC.

Again, I do not know who intends to do what about this amendment. I hope the Senator would withdraw it. It is a redundant amendment. Let us have a vote on the Jepsen amendment one way or the other. It would be an item discussed in conference. The Senator from Kentucky is absolutely correct, the House is not going to take it. It is my understanding they will not take it. But at least I think we ought to get the Senate on record that we want to stop the further expenditures of money by the FEC without authorization.

The timing and practices of the FEC are subject to question.

The impact of what this FEC is doing is judge, jury, advocate, and investigator. The whole array of opinions that come across Senator's desks—are literally meaningless. I do not know what we can do to get it back under control except by having a provision which says you cannot spend any more money unless it is specifically authorized by Congress.

This is a redundant amendment, I say to my good friend from Kentucky. The funds referenced are untimed within the other bill now. Why do you want to add it here again?

Mr. FORD. Because, I say to my good friend from Alaska, the distinguished majority whip, we were given the impression that there was no authorization and that was the reason for the amendment.

Mr. STEVENS. But this is not an authorization. This is appropriation. The Senator is right, the money in the other bill implies authorization, I say to the Senator from Kentucky. This does not imply it any further. This is not a necessary amendment to be offered in the process right now.

If the Senator from Kentucky wants to offer the authorization bill and have that debated here, that might be another thing. But, as other Senators have said here tonight, if that happens, then there might be a long conversation on this floor.

(Mr. ROTH assumed the chair.)

Mr. FORD. Well, I have heard that before tonight. And everyone who has said that has won.

Mr. STEVENS. I said it.

Mr. FORD. Everyone who has said that "It is going to be a long night if I don't get my amendment on" has won.

Mr. STEVENS. I did not say that. I did not say I want anything on my amendment. I said anyone who attempts to get that FEC authorization bill in this bill tonight is going to be here for a long time. And there is no need for that redundant amendment because the money is already incorporated in this bill.

I think it is high time we had some action by the Senate to put some parameters around this FEC. I supported the FEC. I was on both committees that worked on the FEC at the time it was authorized. I sat on the conference in two capacities and worked on it. I believe in the FEC. But when I see what has happened to it, I cannot believe what they have done after having sat there and having been part of the original group that set forth the congressional intent as to what the FEC would do.

Mr. DECONCINI. Will the Senator yield?

Mr. STEVENS. Yes.

Mr. DECONCINI. Could the Senator from Alaska recollect about his motion in the committee?

Mr. STEVENS. I made a motion in the committee to take the money out entirely. My motion was defeated.

Mr. DECONCINI. That is what I thought. If the Senator will continue to yield, it seems to me that that is an indication that we are trying to end this agency.

Mr. STEVENS. No, no. I told the committee at the time that we knew the position of the House. In order to get their attention, a strong Senate position must be taken. I expected we would compromise and come out about the same place and have enough money to run the FEC until March. I so stated in committee. The whole idea was to end up with a compromise with the House as to how long we would fund the FEC for this fiscal year. That is the intent of this amendment, to fund the FEC through March 15 and if it is not authorized by that time, they cannot have any more funds, unless it is continued on March 31 when this particular working restriction expires.

You have to recognize what the Senator from Iowa has done. The issue comes before us again on March 31. If it ceases on the 15th, it can be addressed again on the 31st. I thought it was eminently fair to take this approach.

Mr. DECONCINI. Will the Senator yield for a question?

Mr. STEVENS. Yes.

Mr. DECONCINI. Is the Senator really telling me, as apparently he is telling the Appropriations Committee, that this is really symbolic?

Mr. STEVENS. No. I want the funds for the FEC limited to the period of time that I would consider reasonable for authorization of the FEC.

Mr. DECONCINI. The Senator from Alaska has already said that he does believe that the Senator from Kentucky is correct, that the House will never accept it. Are we not really talking about something symbolic here?

Mr. STEVENS. Well, I think the House will accept some concept of limitation of funds on the FEC as a compromise in this resolution. I do not think they would do what I want to do, to cut the funds out entirely until we got the authorization.

Mr. SARBANES. Will the Senator yield for a question?

Mr. STEVENS. Yes.

Mr. SARBANES. If the amendment of the Senator from Iowa is not adopted, what is the status of the FEC?

Mr. STEVENS. They can continue until March 31 to spend funds.

Mr. SARBANES. And if the amendment is adopted, what is the status?

Mr. STEVENS. They can continue to spend funds through March 15.

Mr. SARBANES. Why is it proper for the Senator from Iowa to come to us now for 45 minutes in this context when, as a consequence of the amendment offered by the minority leader to the amendment of the majority leader, the March 30 date was established in any event with respect to this agency and the others in this bill? It seems to me he ought to withdraw the amendment or we ought to go to a vote on the amendment offered by the Senator from Kentucky and resolve the situation.

All of the things that the Senator has just asserted are in the bill right now effective March 30. We have been tied up here now for almost an hour because of this amendment for 15 days.

Mr. STEVENS. We are trying to put a fence around the FEC to compel an authorization bill to be passed. This amendment will do it.

Mr. SARBANES. The fence is there. March 30.

Mr. STEVENS. That is no fence at all. It will just be continued again and again as it has been in the past. So many programs have been continued through the appropriations process without any authorization at all. The Senator from Colorado is absolutely right about that. There is program after program that is funded in this continuing resolution that has no authorization at all.

Mr. FORD. Mr. President, will the Senator yield for a question?

Mr. STEVENS. Yes.

Mr. FORD. I ask the distinguished Senator from Alaska, is he aware of who made the motion in the Rules Committee to approve the authorization of the Federal Election Commission?

Mr. STEVENS. I say to my good friend from Kentucky I do not know the answer to that question.

Mr. FORD. It was the majority leader of the Senate who made the motion in the committee. That is No. 1.

Now, No. 2, that has been held at the desk since April 30. There has been no reason for us not to have an authorization for the Federal Election Commission, unless there is a hold placed on it. The leadership has not called it from the calendar to be acted upon. Is that correct?

Mr. STEVENS. Mr. President, the Senator is partially correct. I have been one who has been trying to coordinate a bipartisan group to try to evolve a plan to see what we could do to bring about some sort of a spur to the enactment of a bill which contains some reforms as opposed to the reauthorization of the FEC without any response of the prior Presidential candidates or all the people who asked us to make changes in the FEC.

Mr. FORD. I will ask this question: Would the Senator agree that probably the attitude of the Rules Committee may have changed since January, and that we now have a new chairman, with hearings working? Harvard has been paid and their report will come in January. Does that not mean that we are on the right track to get the kind of reform the Senator wants?

Mr. STEVENS. I will answer the question this way. I see my good friend behind me. He has responded, I would say, in part to the conversations that have taken place at times concerning the FEC. As chairman of the Rules Committee, and I am sure the Senator from Kentucky has cooperated in this, he is scheduling hearings now. When we first started these discussions, there was no such response. It is true now that we have hearings scheduled.

Now that we have hearings scheduled I am quite hopeful that we will get an authorization bill passed. This amendment would assure that we would get an authorization bill passed which would make it effective, to make sure there is no misunderstanding, for the 1984 election. No one is attempting to deal with the 1982 election. It is too late to do that. We are looking to the 1984 election.

The Senator from Kentucky knows as well as I know of the letters and communications the Congress has received from those involved in the Presidential election in 1980. Some response is mandated by the Congress in this session if it is not going to turn into a political football in terms of the 1983 approach to the 1984 election. That is what we are working on.

Mr. MATHIAS. Will the Senator yield for a question?

Mr. STEVENS. I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. It seems to me that the Senator from Alaska has raised a question that should be addressed. Why are we picking out the Federal Election Commission as the one agency without an authorization that we are going to cut off early under the continuing resolution? We are saying the Federal Election Commission can only go to the 15th of March and everybody else can go to the 31st of March. Why make that invidious comparison between this agency and all other agencies?

If the intent is to jerk the chain, it will be perfectly possible to jerk the chain 2 weeks later. If the intent is to create another kind of a crisis situation, we have enough crises around here. We do not have to invent any more. We do not need artificial crises.

This amendment takes us without any prior discussion or notice by surprise at 4:30 in the morning. We have not had preparation for it. The net effect of a prolonged debate on this is that we are going to call off the hearings and the whole process will be delayed.

● Mr. PELL. Mr. President, the issue raised by this amendment is not one of the proper level of funding which should be made for a Federal agency. Rather the issue is whether there should be an independent Federal agency charged with overseeing and administering the Federal electoral process.

This is a question which has been thoroughly debated by the Congress and decided on a number of occasions. Both in the creation of and subsequent amendments to the Federal Election Campaign Act and in annual authorizations for the Federal Election Commission the Congress has clearly stated that such an independent body should exist.

Thus, until the Congress in the proper fashion reverses itself and decides that such an agency should not exist—and I stress that the Congress has not done so—the Federal Election Commission should be provided the necessary funds to carry out for the full fiscal year the tasks mandated by law.

This amendment is a type of guerilla warfare being waged against an agency which is merely trying to the best of its

ability to fulfill the duties assigned to it in law by the Congress.

The Senate could properly debate at considerable length the manner in which the Federal Election Commission over the years has carried out its mandate. I personally happen to think the Commission has performed well under very difficult circumstances and constraints. However, I recognize that there are many of a different view and I respect their views.

But the performance of the FEC is not a proper issue to be debating here and now during consideration of the continuing resolution.

The Committee on Rules and Administration reported an FEC authorization bill to the full Senate on April 30. I believe that bill is the proper forum for debating the issues raised in the amendment by the senior Senator from Iowa and I would suggest to him that he use his influence with the leadership to have this legislation called up and debated by this body.

This is a back door attempt to dismantle or at least cripple an agency properly established by statute and I urge my colleagues to reject it.●

Mr. CRANSTON. Mr. President, I move to lay the amendment offered by the Senator from Iowa on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DECONCINI. Mr. President, does that in effect table the amendment of the Senator from Kentucky?

Mr. CRANSTON. Yes.

The PRESIDING OFFICER. It does not table it, but it carries with it the amendment of the Senator from Kentucky.

Mr. DECONCINI. I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Iowa. The yeas and nays have been ordered. The clerk will call the roll.

Mr. JEPSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JEPSEN. Mr. President, I withdraw my request.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The result was announced—yeas 65, nays 31, as follows:

[Rollcall Vote No. 421 Leg.]

YEAS—65

Andrews	Bradley	Chiles
Baucus	Bumpers	Cochran
Bentsen	Burdick	Cohen
Biden	Byrd, Robert C.	Cranston

	Nickles	

NOT VOTING—4

Goldwater	Leahy	Stennis
Kennedy		

So the motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, many Senators have asked about the remaining amendments. Let me update the situation.

We have Mr. LEVIN, who I urge the Chair to recognize next in the pecking order; then Mr. HART; then Mr. GARN; then Mr. STEVENS; then Mr. DOLE, who has three; Mr. HUDDLESTON, and Mr. ANDREWS.

We have about 10 amendments remaining, and I believe there will be a rollcall vote on at least one, possibly two.

So I urge all Members to be as brief as possible.

At this time, as a comanager of the resolution, I set aside the committee's technical amendment, in order that the Senator from Michigan may present an amendment.

Mr. LEVIN. I would like to review some language included in the joint statement of managers on the Interior appropriations bill that provides the funding levels requested in the continuing resolution before us today. This was discussed yesterday by Senators JACKSON and JOHNSTON and I am sorry that I did not have the opportunity to raise this with them at that time. As an active participant in the consideration of the Alaska National Interest Lands Conservation Act and as one particularly interested in the question of the Arctic National Wildlife Refuge, I am concerned with the enforcement of the law and the management of the refuge.

The joint statement of managers as part of amendment 12 on page 10 reads:

Within available funds, the Service is . . . to provide $300,000 for the North Slope study for transfer to the Geological Survey. This will permit the Survey to discharge its duties as the lead agency in assessment of oil and gas exploration development and production on the Arctic Wildlife Refuge pursuant to Section 1002 of Public Law 96-487. There is no objection to initial development on new Alaskan refuges while the refuge management plans are being prepared.

Yesterday's discussion covered two of the major difficulties with this language and I thank my colleagues for clarifying the record first as pertains to the proper administration of activities occurring on the refuge by the Fish and Wildlife Service and not the Geological Survey, and second to make perfectly clear that this language in no way authorizes any leasing, development, or production of oil and gas from the coastal plain of the Arctic National Wildlife Refuge unless and until specifically approved by an act of Congress.

There is a third problem with the joint statement. The sentence which reads, "There is no objection to initial development on new Alaskan refuges while the refuge management plans are being prepared" would seem to suggest that "development" on new refuge lands in Alaska can begin before the statutory requirement for compatibility tests based on comprehensive management plans is met. This would be a clear violation of both the Alaska Lands Act and the Refuge Administration Act, as amended, just as was the language in the previous sentence suggesting that the Geological Survey is the lead agency in assessment of oil and gas exploration development, and production.

Quoting from U.S. District Court Judge James Von der Heydt's November 2, 1981 decision:

From a review of the Refuge Act, ANICA, and the legislative histories of both acts, the court holds that Secretary Watt's transfer of § 3142 (d) and (h) functions from FWS to USGS, and his assignment to USGS of lead responsibility for approving § 3142(e) plans, was a clear error of judgment beyond his statutory authority.

Accordingly, it is ordered . . .

(4) That defendant James Watt re-assign and delegate to defendant Director of the U.S. Fish and Wildlife Service full responsibility for all of the requirements under § 1002 (d), (e), and (h) of the Alaska National Interest Lands Conservation Act.

I believe that this decision accurately reflects congressional intent as to the management of the refuge.

I ask unanimous consent to have printed in the RECORD the letter to Secretary Watt that Senator JACKSON and I sent earlier this year. It includes the colloquy between Senators JACKSON and NELSON that discussed the role for the Fish and Wildlife Service:

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON ENERGY
AND NATURAL RESOURCES,
Washington, D.C., May 20, 1981.

Hon. JAMES G. WATT,
Secretary, Department of the Interior, Washington, D.C.

DEAR MR. SECRETARY: One of the most volatile issues in the Alaskan Lands debate was the treatment given the Coastal Plain of the Arctic Wildlife Range.

As you are no doubt aware, the House-passed bill would have designated the area as wilderness, with no exploration whatsoever for oil and gas. The amendment reported by the Committee on Energy and Natural Resources would have provided for a com-

prehensive resource assessment—including wildlife, wilderness, and oil and gas values—of the Range's Coastal Plain. The compromise reached on the Senate floor, and enacted into law, allows seismic exploration on the Coastal Plain to begin after a baseline study is conducted and the appropriate safeguards are developed to guide these activities. This language was designed to carefully balance protection of the Range's outstanding wildlife and subsistence resources with analysis of its potential oil and gas reserves.

On March 12, you issued a directive transferring lead agency responsibilities for implementing Section 1002 of the Alaska National Interest Lands Conservation Act (P.L. 96-487) from the U.S. Fish and Wildlife Service to the U.S. Geologic Survey. Having now had an opportunity to carefully review the directive, we would appreciate additional information and clarification of several matters.

First, the major premise of the compromise as it pertained to the baseline study required under Section 102(c), was that some new environmental information was needed to ensure the development of adequate guidelines for assessing seismic exploration plans. We applaud your initiative in moving quickly to implement this section of the Act. However, it is imperative that sufficient time be allowed for the collection of the new data; that these data be used in developing the guidelines; and that this data-gathering process continue throughout the period of seismic exploration.

Second, we would appreciate your assurance that all the relevant expertise within the Department will be involved in preparing the guidelines and the environmental impact statement required by Section 1002 (d). In particular, the legislative history of the compromise is quite clear on the importance of the Fish and Wildlife Service's role:

"Mr. NELSON. Although the bill does not explicitly say so, I would assume that it is your intent that the Fish and Wildlife Service have the lead within the Department of the Interior in designing the criteria and guidelines to protect the caribou, other wildlife and their habitat. Of course, other agencies would also be involved and consulted, but it seems to me appropriate that the FWS play the key role in this program. Does the Senator agree?

"Mr. JACKSON. Yes, I believe it is appropriate for the FWS to have the lead responsibility for developing the wildlife protection stipulations, in coordination with the appropriate offices of the Interior Department."

Third, and most important, we are unclear as to where the final decision on approving exploration plans will rest. Your directive states that "it shall be the USGS Director's responsibility to approve the exploration plans with the concurrence of the FWS." Since FWS is the land managing agency, wouldn't it have the final say on activities occurring on lands under its jurisdiction?

Finally, your directive is silent on which agency will fulfill the requirements of Section 1002(f), "Modification to Exploration Plans." Again, because it is the land managing agency, we assume that FWS will perform this function. Are we correct in this assumption?

We hope that by raising our questions with you now, we can avoid any misunderstandings later. We look forward to hearing from you soon.

Thank you.

Sincerely,

HENRY M. JACKSON,
U.S. Senator.
CARL LEVIN,
U.S. Senator.

REGARDING OIL AND GAS ON THE ARCTIC PLAIN

Mr. TSONGAS. I thank the Senator from Washington (Mr. JACKSON) and the Senator from Louisiana (Mr. JOHNSTON) for clearing up a potentially serious matter regarding the arctic wildlife refuge coast plains study and wildlife refuge management plans authorized in the Alaska National Interest Lands Conservation Act (Public Law 96-487).

My concern is over the language referred to by the Senator from Washington in the statement of managers accompanying the Interior appropriations bill for fiscal year 1982. At first glance, that language might be viewed as a backdoor attempt to amend ANILCA or the Wildlife Refuge Administration Act. As a principal cosponsor of the compromise Alaska lands bill, which was enacted last December, and a survivor of one of the most heated legislative battles ever to be visited upon the Congress, I was relieved to hear that my colleagues on the Appropriations Committee were not attempting to reopen the debate on that act through the language in question.

For those who might be contemplating amending ANILCA for whatever reason, I would urge that the dust be allowed to settle on that statute for a while. Otherwise, all of the divergent interests and organizations who participated in the Alaska lands debates would be reactivated to resume the battle all over again. At the moment, there appears to be a truce of sorts regarding the Alaska Lands Act. It should remain that way for now. I am therefore relieved to hear that there has been no breaking of that truce here by our colleagues attempting to amend this historic act without the benefit of full public hearings and debate.

UP AMENDMENT NO. 695

(Purpose: To require department and agency heads to act to meet the funding levels for guarantees and insurance provided for in this joint resolution subject only to the absence of qualified applicants)

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes an unprinted amendment numbered 695.

Mr. LEVIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the joint resolution, add the following new section:

"SEC. . Notwithstanding any other provision of this joint resolution, subject only to the absence of qualified applicants, and within the limits of funds and authority available, the head of each department and agency for which authority to enter into commitments to guarantee or insure is provided for in this joint resolution shall enter into commitments to guarantee or insure in the full amounts provided for in this joint resolution or other applicable law."

Mr. LEVIN. Mr. President, the amendment I offer here today would clarify the intent of Congress with respect to guaranteed and insured loans. This amendment simply requires the head of each agency and department to enter into commitments to guarantee or insure loans, mortgages, and so forth, specified by Congress, subject only to the availability of qualified applicants.

For many guarantee and insurance programs, Congress has established in authorizing legislation and appropriations bills ceilings which limit total commitments. The Appropriations Committee, has in some instances already specified in report language that the administration is to utilize guarantees to the full amounts authorized.

However, the administration on November 5, 1981, announced a proposal to reduce fiscal year 1982 loan guarantee commitments by $20.4 million in 14 programs administered by nine departments and agencies. This announcement flies in the face congressional actions setting program levels and explicit committee statements. This unilateral action also raises serious questions about the institutional role of Congress; whether our efforts to establish levels for guarantee programs has any meaning at all when the executive branch arbitrarily makes changes without notification, let alone approval.

It is my belief that the authorizing committee made careful analyses of the need for program levels for guarantees which they set. It is also my belief that the authorizing committees expected these guarantees to be used without arbitrary limits imposed which bear no relation to that need. My amendment clarifies the congressional intent in this regard.

This amendment, however, does not set a "floor" on the amount of guarantees which must be utilized during the life of the continuing resolution. It is not my desire to require agency and department heads to meet a specific level of guarantees if there are not qualified applicants. Rather, it is my desire to see such agency and department heads utilize guarantees for qualified applicants without arbitrary limits being imposed.

Mr. President, I understand this amendment has been cleared on both sides of the aisle.

Mr. GARN. Mr. President, as I have indicated in my opening statement in reference to the HUD-Independent Agencies appropriations subsection, the administration has proposed reductions of $20.3 billion in new commitments for loan guarantees during fiscal year 1982. Eighty percent of the total reductions occur in programs under the jurisdiction of the HUD Subcommittee. I would like to note that the conferees on the HUD appropriations bill has established a loan guarantee level of $68.25 billion for GNMA mortgage backed securities. This limitation is $4.25 billion above the requested level. In addition, the conferees have established a loan limitation of $225 million for the community development action grant—section 108 loan guarantee

program. Since the Budget Control Impoundment Act does not specifically address the issue of loan guarantees and credit control, it is possible that the administration could restrict loan guarantee levels below the ceilings provided in appropriations acts. It is my belief that the Congress establishes these ceilings to permit the commitment of loan guarantees, to eligible applicants, up to the level provided in such acts. If we wish to limit or restrict the credit activities of various programs, the Congress would do so by reducing the limitations contained in the appropriations acts.

Therefore, I will accept the amendment offered by my distinguished colleague and assure him that both the Banking Committee and the Appropriations Committee will be looking into this issue of loan guarantees and we will exercise our option to reduce the ceilings in the event this seems to be in the interest of the economy. Until such time that we make that decision, I believe that the Senator's amendment clarifies the intent of Congress and squarely places the responsibility with us, where it belongs.

Mr. President, the Senator from Michigan is correct. I am willing to accept this amendment but mainly because it is 5:30 in the morning. If it were a different time of day we would have a longer discussion about the effects of loan guarantees and availability of credit in the credit market on interest rates.

Beyond that I will simply accept it reluctantly.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan.

The amendment (UP No. 695) was agreed to.

Mr. LEVIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, the next Senator on the list we have is Senator HART.

I wonder if the Senator from Colorado will be willing to enter into a time agreement on his amendment.

Mr. HART. I will indeed.

Mr. President, I ask unanimous consent that this amendment occupy not more than 20 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, does the Senator wish to ask for the yeas and nays?

Mr. HART. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATFIELD. Mr. President, I as comanager of the bill set aside the committee technical amendment in order that the Senator from Colorado will be able to present an amendment.

UP AMENDMENT NO. 696

(Purpose: To appropriate funds for the Environmental Protection Agency and the Council on Environmental Quality according to the conference report on the HUD-Independent Agencies Appropriations Act)

Mr. HART. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. HART) proposes an unprinted amendment numbered 696 (for himself, Mr. STAFFORD, Mr. LEAHY, Mr. EAGLETON, Mr. RANDOLPH, and Mr. BURDICK):

On page 9, line 14, delete all through line 7 of page 10, and redesignate the following items accordingly.

Mr. HART. Mr. President, this amendment is offered on behalf of myself and my cosponsors, Senator STAFFORD, Senator LEAHY, Senator EAGLETON, Senator RANDOLPH, and Senator BURDICK.

The amendment would restore the operating budgets of the Environmental Protection Agency and the Council on Environmental Quality to the level in the conference report on the HUD-independent agencies appropriations bill which I believe was adopted in September.

The amount of money compared to that in the overall budget and many of the figures that we dealt with over the past day or so is not all that great.

This amendment covering both these agencies would add back $130 million to the operating budget.

But, Mr. President, the significance of this money for these two agencies is great. Even with this amendment the EPA operating budget would be cut by almost 12 percent of the 1981 level instead of the over 21 percent as proposed by the committee in the continuing resolution and the Council on Environmental Quality's operating budget would be cut by almost 68 percent instead of by almost 72 percent.

Mr. President, I emphasize even with this amendment that the budget of these agencies is being cut substantially.

The further cuts proposed by the Appropriations Committee would be so deep that I think this country's fundamental environmental laws would be in jeopardy.

Mr. President, what is at stake here is not just the budget of the EPA, it is the ability of the lead environmental agency of the Government to carry out the mandate given it by Congress and that mandate is law and it includes the Clean Air Act, the Clean Water Act, the Toxic Substances Control Act, the new superfund law, the Solid Waste Disposal Act, and the Conservation Recovery Act.

Mr. President, what ever mandate was given, whomever among elected officials of the Federal Government in 1980 it was not a mandate to reverse the progress this country has made in the past 10 or 12 years in cleaning up this country's environment and giving us a healthy environment for ourselves and for future generations.

I do not think anyone would claim that that was the purpose of whatever the outcomes of the recent election. Yet if we take the step that is advocated by this resolution and do not add back the funds that is exactly what we are going to be doing, reverse the 10 or 12 years of progress in the environmental area and giving the people of this country a less healthy and less safe environment in which to live.

We will be seriously jeopardizing the ability of this Government and the Environmental Protection Agency to carry out the laws which we have passed and ordered to carry out.

So, Mr. President, in a word, I ask the Senator to seriously consider adding back these funds. The cut in the Environmental Protection Agency's budget will still be in the range of 12 percent if we do not add those funds back, that cut will go up to almost 22 percent and make it for all practical purposes make the EPA unable to carry out much of the mandate which Congress and the laws of the United States have given it.

Mr. President, I reserve the remainder of my time.

Mr. GARN. Mr. President, in the full Appropriations Committee a similar amendment as this was debated on the basis of a 14 to 8 vote.

I am a little bit surprised at some of the comments made because they do not take into consideration some of the add-ons that were put back in by me as chairman of the subcommittee in the full committee.

The Senator from Colorado mentioned the superfund. The superfund was restored back to the $200 million level, fiscal 1982 level, and I also suggest that the "Dear Colleague" letter that was sent out is a little misleading in that it does not show the $200 million superfund at all.

In the conference report, the Hart amendment, or the continuing resolution it makes a considerable difference in the amount of money available, the total of $1,289,411,000 rather than $1,623,130,000 shown in the chart.

I suggest that that is one big difference; $200 million is quite a bit of money in the superfund and that full amount was restored to that full amount.

In addition, EPA under the amendment entered in the full Appropriations Committee could transfer back the entire $69.9 million back in their salary account.

I also suggest that it has been ignored that in most of the critical areas I added back in over $12 million. There were conference add-ons for clean lakes, water quality manpower planning and training, academic training, State rural water training and technical assistance, the Chesapeake Bay programs, and the Great Lakes program, stationary source enforcement, energy review and permits, pesticides certification and training, environmental emergency response and prevention, and the proposed reductions from the committee do not affect at all

EPA State and local grants programs. None of these are reduced even from the March level:

Air quality, water quality, public water system underground injection control, hazardous waste management, pesticides enforcement, and toxic enforcement.

I am a little bit surprised at the impression that somehow we are cutting and that these add-ons that were put back in are not being considered and particularly the superfund restored to the $200 million level.

This simply adds where we are $40 million over the September request. This simply puts us $170 million over.

I reserve the remainder of my time.

Mr. HART. Mr. President, I hasten to point out in response to the Senator from Utah that his substitute amendment before the committee added just under $13 million to the President's request. By action taken within the past hour in adopting the Baker amendment, the 4-percent across-the-board cuts, that will reduce the funding for EPA by $14½ million, thus completely eliminating the Garn substitute in the committee.

All the things the Senator from Utah just said were added back just got struck out.

So this money will add the funds the Senator from Utah was talking about and other much needed operating funds to carry out the mandate of the EPA.

Mr. GARN. Mr. President, to assume that the additional 4-percent cuts will occur in the same area simply is not correct. In salary account, $69 million, there will be no 4-percent cut whatsoever the way the Baker amendment works, and I am not going to go through that whole scenario of the bill, title, and account. But many of those areas being below would be exempted, and research and development would not be reduced.

I am not going to take the time, even the full 10 minutes, to go back and argue all of these points. We have done it in the Appropriations Committee; it has been done over and over again, and the areas in which this money was put back in were in critical areas, and those would stay and not be affected by the 4 percent.

There is still the transferability I talked about, and I did not mention the $24 million restoration beyond the $13 million he mentioned, which I also said was restored to the superfund. I will just add that all of these items are in conference with the House at higher levels.

SENATOR RANDOLPH SUPPORTS FULL FUNDING FOR ENVIRONMENTAL PROGRAMS

Mr. RANDOLPH. Mr. President, I am pleased to join with several of my colleagues in sponsoring an amendment to provide funding for the Environmental Protection Agency and Council on Environmental Quality at the level that was agreed to by House and Senate conferees in September of this year. The level of support contained in this amendment is lean at best. The additional $130 million in reductions proposed for these programs by the administration and the Appropriations Committee could prove crippling. The conference agreement figures contained in this amendment signify a considerable effort on both sides to conform to the administration's request for serious budget reductions in a reasoned and responsible fashion.

I have repeatedly registered my deep concern as to the Environmental Protection Agency's ability to carry out its responsibilities with greatly diminished fiscal and human resources. Not only is the Agency already behind in meeting many program deadlines, the hazardous waste regulatory program under the Solid Waste Disposal Act and the fledgling superfund program both require a greatly increased commitment from the Agency. The figure agreed to in conference represents a reduction of $160 million from the amount actually spent in fiscal year 1981. The revised figure reported by the Appropriations Committee suggests a further cut amounting to 80 percent of the cut this Agency's budget has already sustained compared to what it spent in the prior fiscal year.

One activity that has been severely affected by these budget cuts is the research and development program. This area is responsible for investigating toxic health effects and providing necessary information for setting standards as required by law. I am concerned as to the implications of further reduction of support for this important function. Additionally, with increased delegation of responsibility to States for carrying out the environmental programs, I doubt the ability of the Agency to provide both the technical assistance and resources needed to make this delegation effective.

In the case of the Council on Environmental Quality, the budget figures agreed to in conference represent less than one-third of the amount actually spent by the Council last year. The reorganized version of this group where personnel levels have been reduced by two-thirds but the legislatively mandated responsibilities remain unchanged, was budgeted at slightly more than $1 million A further $125,000 cut to the Council's budget represents a further 12-percent reduction. This percentage removed from such a small account could further impede the Council's ability to carry out its responsibilities.

While it is clear that the American public wants a less wasteful Government, it is also clear they do not want a retreat on the Federal Government's commitment to work toward cleaner and hea!thier environment. This is evidenced by national polls and witnessed by the volume of mail I receive from West Virginians. They are deservedly concerned that the air they breathe, the water they drink, and the lakes and streams they enjoy, are threatened by a diminished commitment on our part to provide the necessary framework to continue the progress we initiated in writing good laws and building a strong agency to carry them through. They are even more deservedly concerned about the implications a retreat now might represent to the world of the future.

The proposal before us is a worthy amendment. It represents a realistic view of budgetary constraints, tempered by a recognition for the benefits we all will realize in maintaining an adequate level of support for these vitally important functions within the Federal Government. I urge my colleagues to join me in supporting this amendment.

Mr. HART. I doubt that any Senators on the floor, including the Senator from Utah, the distinguished majority leader, the Senator from Tennessee, know exactly what the 4-percent across-the-board cut will be in any agency, including EPA.

I think the action the Senate has taken in the early hours is an action where we will not know the cuts agency-by-agency, program-by-program for months—we will not know, let alone tonight—where we have cut 4 percent from the EPA. This money will restore it, and I ask all of our colleagues to think very seriously about what is going to lead to a healthier environment for the people of this country.

I am prepared to yield back the remainder of my time.

Mr. GARN. I am prepared to yield back the remainder of my time.

I move to table the Hart amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah to lay on the table the amendment of the Senator from Colorado. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Vermont (Mr. LEAHY) would vote "nay."

The PRESIDING OFFICER (Mr. HATCH). Are there any other Senators who wish to vote?

The result was announced—yeas 59, nays 37, as follows:

[Rollcall Vote No. 422 Leg.]

YEAS—59

Abdnor	Garn	Murkowski
Andrews	Glenn	Nickles
Armstrong	Grassley	Packwood

NOT VOTING—4

Goldwater	Leahy	Stennis
Kennedy		

So the motion to lay on the table UP amendment No. 696 was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, as comanager of the bill, I would now set aside the committee technical amendment in order that Senator STEVENS might offer an amendment.

UP AMENDMENT NO. 697

(Purpose: To conform section 280A to section 162(a) of the Internal Revenue Code)

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 697.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert:

SEC. . (a) Subsection (f) of section 280A of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following paragraph:

"(4) Coordination with section 162(a)(2), etc.—

Nothing in this section shall be construed to disallow any deduction allowable under section 162(a)(2) (or any deduction which meets the tests of section 162(a)(2) but is allowable under another provision of this title) by reason of the taxpayer's being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units)."

(b) The amendment made by this section shall apply to taxable years beginning after December 31, 1981.

Mr. STEVENS. Mr. President, this is a technical amendment which has been cleared with the chairman and ranking minority member of the Finance Committee.

It is a slightly embarrassing position. I want to call the Senate's attention to the fact that after the Senate had voted to adopt the amendment I offered at the time the continuing resolution was before the Senate the last time dealing with expenses of Members away from home, the Joint Committee on Taxation staff came to visit me and worked with my staff and the Finance Committee staff subsequently trying to resolve the situation they described because of section 162(a)(2) of the Internal Revenue Code.

I am informed that under that code, a married Member of Congress who had a member of the family who lived with him for more than 2 weeks in 1 month would make it impossible for the Member to deduct any portion of his living expenses because of the provisions of 162(a), which is the so-called vacation home or home-away-from-home section which prevents the deduction of expenses if a home is used for more than 2 weeks a month.

The amendment before the Senate now is a totally technical amendment to require coordination of 162(a) with section 280A, which was amended by the section which the Senate adopted previously.

As a technical amendment, it will insure that the vacation home concept will not apply to Members of Congress.

Ironically, as existing law stands, I am informed that a person who is not married who has such a home would not be affected by this provision.

Mr. President, this has been cleared all around. I hope the Senate will accept it and accept my apology for the error of the previous amendment.

Mr. HATFIELD. Mr. President, the amendment has been checked and it is acceptable.

Mr. DOLE. Mr. President, recently we enacted a change in the Internal Revenue Code to allow Members of Congress the same business deductions that this country has allowed all other businessmen. Specifically, the Internal Revenue Code has long recognized that ordinary and necessary expenses of a businessman incurred because he must be away from home on business are deductible in determining his taxable income.

Until this year, however, Congressmen have been limited in the amount of living expenses in Washington that are deductible. This limit was set at an arbitrary and obviously inadequate $3,000 per year.

This amendment is essentially technical in nature. It assures that no deduction otherwise allowable will be denied merely because it conflicts with the rules limiting deductions relating to a residence under a very technical interpretation of section 280A of the Internal Revenue Code. A Member could be denied a business deduction because he was fortunate enough to have his family with him in Washington. This is a very unfortunate and unintended limitation on the business expense deduction, and this Senator cannot conceive of anyone who would argue that any Member should be denied a business deduction because his family was willing to come to Washington to join him.

This amendment will assure that no technical interpretation of the Internal Revenue Code would cause this unreasonable result. This Senator strongly believes that this change is long overdue. There is no reason why, in the face of the inflation which has escalated the costs of living in the Washington area so greatly over the last several years, the arbitrary $3,000 limitation should not be removed. No one can argue with a straight face that living in this area costs only $3,000 a year. This limitation is an anachronism which should have been removed from the law long ago.

Mr. HATFIELD. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 697) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I would now set aside the technical amendment of the committee in order that the Senator from Utah (Mr. GARN) may offer an amendment.

UP AMENDMENT NO. 698

(Purpose: Changes the amounts available for FEMA in accordance with the most recent budget request (no net impact on budget authority))

Mr. GARN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. GARN) proposes an unprinted amendment numbered 698.

Mr. GARN. Mr. President, I ask that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 15 strike "$324,720,000" and insert "$301,694,000".

On page 10, line 18 strike "$73,364,720" and insert "$93,879,000".

On page 10, line 22 strike "$122,134,320" and insert "$121,829,000".

On page 11, line 2 strike "$65,087,440" and insert "$67,906,000".

Mr. GARN. Mr. President, I believe this amendment has been cleared on both sides. I have checked it with the distinguished ranking minority member, Senator HUDDLESTON. He has no problem with the amendment.

Mr. President, on Tuesday the full committee accepted my amendment to reduce FEMA's salaries and expenses account from the conference agreement level of $83,369,000 to the administration's proposed September budget level of $73,364,720. Today, however, I received from the administration a revised budget amendment to increase the agency's salaries and expenses account to $93,879,000. Therefore, the amendment I am offering would provide FEMA with an additional $20,510,000 for salaries and expenses and A.T. & T. tariff increases. This amendment will not have an impact on the total budget authority since it is financed through offsetting reductions elsewhere within FEMA.

The 12-percent reduction in FEMA's salaries and expenses originally proposed would have, according to the administration, required that FEMA's entire work force be furloughed for 25 percent of the fiscal year. Such a drastic furlough would have completely disrupted FEMA's ability to perform its very vital national security mission as

well as the agency's responsibility of responding to major civil emergencies.

I have checked with the distinguished ranking minority member (Mr. HUDDLESTON) of the subcommittee and he sees no problem with this amendment.

Mr. HATFIELD. Mr. President, the Senator is correct. The amendment is acceptable, and I move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 698) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GARN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Now, Mr. President, I would set aside the technical amendment of the committee in order that the Senator from North Dakota may offer an amendment.

Mr. ANDREWS. Mr. President, I yield to the Senator from Washington.

UP AMENDMENT NO. 699

(Purpose: To provide emergency relief for highways damaged by the eruption of Mount St. Helens volcano)

Mr. GORTON. Mr. President, I send an amendment to the desk, in behalf of myself and Senator JACKSON, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. GORTON), for himself and Mr. JACKSON, proposes an unprinted amendment numbered 699.

Mr. GORTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. . Notwithstanding any other provision of law or of this joint resolution, of the fiscal year 1982 Highway Trust Funds available for emergency relief, $17,000,000 shall be made available for damaged highways or for the prevention of damage to highways in the area affected by eruptions of the Mount St. Helens volcano.

Mr. GORTON. Mr. President, this amendment earmarks $17 million from the highway trust funds available for emergency relief in connection with the prevention of damage to highways caused by the eruption of Mount St. Helens volcano. It is, in effect, a reprograming of moneys appropriated for that purpose, which were appropriated last year. It has been approved by the chairman of the subcommittee.

Mr. JACKSON. Mr. President, I join in Senator GORTON's amendment to earmark $17 million from the fiscal year 1982 highway emergency relief funds for preventive work in the Mount St. Helens area.

Mr. President, the Corps of Engineers has stated that a normal year would move an estimated 35 million cubic yards of sediment through the Toutle River into the Cowlitz and Columbia Rivers.

I am concerned that a major storm would move significantly more sediment with unknown impacts on the level of protection.

Preventive work to protect the highways and urban areas needs to be accomplished this year. Otherwise, the flood threat along the river could increase dramatically.

I expect, and Senator GORTON agrees, the Federal Highway Administration to seek out and use the Corps' engineering expertise in any preventive work that needs to be accomplished.

Therefore, Mr. President, I urge adoption of this amendment.

Mr. ANDREWS. Mr. President, the problems in the Mount St. Helens area are still very, very much evident. The Senators from Washington have brought this to the attention of the committee. The committee has no objection. This does not add to the cost of the bill. I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 699) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I will set aside the committee technical amendment in order that the Senator from Kansas can offer two amendments.

UP AMENDMENT NO. 700

(Purpose: To prevent Federal judges from receiving again a pay raise notwithstanding the contrary intent of Congress)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 700.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add at the end of the bill the following new Section:

"SEC. . Notwithstanding any other provision of law or of this Joint Resolution, none of the funds appropriated by this Joint Resolution or by any other Act shall be obligated or expended to increase, after the date of enactment of this Joint Resolution, any salary of any Federal judge or Justice of the Supreme Court, except as may be specifically authorized by Act of Congress hereafter enacted; *provided, further,* that nothing in this limitation shall be construed to reduce any salary which may be in effect at the time of enactment of this Joint Resolution nor shall this limitation be construed in any manner to reduce the salary of any Federal judge or of any Justice of the Supreme Court."

Mr. DOLE. Mr. President, this amendment can be disposed of very quickly. It was offered to an earlier appropriations bill on behalf of myself and the distinguished Senator from Florida (Mrs. HAWKINS).

What the amendment does is to put an end to the automatic, backdoor pay raises for Federal judges. We had an example of that here about 2 months ago, the so-called midnight pay raise for Federal judges.

The amendment addresses a major problem in existing law which permits a virtual automatic salary increase built into the statutory system.

Under the Salary Adjustments Act of 1975 and the Pay Comparability Act of 1970, each year the President passes on to Congress recommendations made by the Department of Labor for increasing judicial salaries.

Should Congress manage not to vote down these increases before midnight on September 30 of a given year, they automatically take effect for the next fiscal year. This year Congress missed the deadline by only 27 minutes and, in an effort to give effect to its intent to cap judicial salaries, even went so far as to stop the clock before midnight. Despite this last minute rush of activity and even though salary increases for other Federal employees were capped, the country has still been saddled with judicial salary increases that Congress did not intend to authorize.

The reason is the Supreme Court's holding last winter in the case of *United States* v. *Will,* 449 U.S. 200. There, the Court ruled that article III of the Constitution prohibits alteration of the salaries of Federal judges on or after October 1 because the new rates vest on that date. A present failure by Congress to move quickly enough, even though a delay of only a few minutes, can have harmful consequences for congressional budget plans.

My amendment would remedy this situation by prohibiting judicial pay increases unless they were specifically authorized by Congress. I urge my colleagues to support this amendment.

Mr. President, let me make it clear that I am not one of those who oppose pay increases for Federal judges or Members of Congress, but it seems to me that we have to bring some semblance of reason to the entire system. This would be a step in the right direction.

I know of no objection to the amendment.

Mr. HATFIELD. Mr. President, the Senator is correct. The amendment has been reviewed and is perfectly acceptable to the committee and to the managers. I move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 700) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 701

(Purpose: Substitute amendment relating to the application or Revenue Ruling 81–216 and certain other regulations)

Mr. DOLE. Mr. President, I offer an amendment in the second degree in the

nature of a substitute to the committee amendment for myself, Senators D'AMATO, WEICKER, STEVENS, METZENBAUM, BRADLEY, MOYNIHAN, and DIXON. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) for himself and Senators D'AMATO, WEICKER, STEVENS, METZENBAUM, BRADLEY, MOYNIHAN, and DIXON, proposes an unprinted amendment numbered 701:

In lieu of the language proposed to be inserted, insert the following:

SEC. 112. (a) None of the funds appropriated by this Act may be used to—

(1) enforce Revenue Ruling 81–216 or the proposed amendments to Income Tax Regulations § 1.103–7 and § 1.103–10 which were published in the Federal Register on October 8, 1981, or

(2) propose, promulgate, or enforce any ruling or regulation reaching the same result as, or a result similar to, such Revenue Ruling or Regulations,

in connection with a qualified issue, or

(3) issue rulings or regulations which treat as exempt from taxation under section 103(b)(6) of the Internal Revenue Code of 1954 any interest earned on unobligation the proceeds of which are used for a disqualified facility.

(b)(1) For purposes of subsection (a), the term "qualified issue" means a single issue (whether or not part of a composite or multiple series of issues)—

(A) all of the obligations of which are directly or indirectly guaranteed or secured by—

(i) a State or political subdivision thereof or an instrumentality or either, or

(ii) in the case of an issue all of the proceeds of which are used for agricultural purposes, a qualified person (within the meaning of section 46(c)(8)(D) of the Internal Revenue Code of 1954 determined without regard to clauses (iii) and (iv) thereof), and

(B) none of the proceeds of which are used in connection with a disqualified facility or a facility with respect to which, at any time before January 1, 1987—

(i) any disqualified person used more than 5 percent of the facility, or

(ii) more than 25 percent of the facility is (in the aggregate) used by disqualified persons.

For purposes of subparagraph (B), use by a related person (within the meaning of section 103(b)(6)(C) of such Code) shall be treated as use by the disqualified person.

(2)(A) For purposes of paragraph (1), the term "disqualified person" means a person (other than an exempt person within the meaning of section 103(b)(3) of such Code) which has aggregate capital expenditures for any purpose which, for the period beginning October 1, 1979, and ending September 30, 1982, exceed $25,000,000.

(B) For purposes of determining the aggregate capital expenditures of any person under subparagraph (A), there shall be taken into account the capital expenditures of all persons which are—

(i) related persons (within the meaning of section 103(b)(6)(C) of such Code) with respect to such person; or

(ii) guarantors of any portion of the issue with respect to which a determination is being made under this subsection other than a guarantor which—

(I) is a State or a political subdivision thereof or an instrumentality of either, or

(II) in the case of an issue all of the proceeds of which are used for agricultural purposes, a person described in paragraph (1)(A)(ii).

(C) For purposes of this paragraph, the term "capital expenditures" has the meaning given such term by section 103(b)(6)(D) of such Code, except that such term shall not include any amount paid or incurred by the taxpayer which constitutes a qualified research expense (within the meaning of section 44F(b) of such Code).

(c) For purposes of subsection (a) and subparagraph (b)(1)(B), a "disqualified facility" is any private or commercial

(i) golf course,

(ii) country club,

(iii) massage parlor, or

(iv) tennis club.

(d) It is the sense of the Senate that after August 23, 1981, and until Congress enacts legislation which affects section 103(b)(6) of such Code, the Secretary of the Treasury or his delegate should in all cases enforce any ruling or regulation described in subsection (a)(1) or (2) in a manner consistent with the provisions of subsection (a).

Mr. DOLE. Mr. President, this amendment is cosponsored by a number of Senators who have been working on this amendment for about 3 weeks. I commend the distinguished Senator from New York (Mr. D'AMATO) for his untiring efforts. I also commend his staff, my staff, and Senator METZENBAUM and his staff and others, Senator STEVENS and Senator WEICKER and their staffs for their efforts.

What we have done is try to tighten up the issuance of multiple lot industrial development bonds and to send a signal about tightening the issuance of all IDB's.

This amendment is intended to replace an amendment sponsored by those Senators I have mentioned and adopted by the Appropriations Committee. Their original amendment would have prohibited the Treasury Department from enforcing revenue ruling 81–216, a ruling interpreting present law to prohibit multiple lot or umbrella bonds—those bond issues where an issuer or corporate user strings together a series of bond issues with some form of common or "pooled" security. The substitute puts certain limits on the original amendment.

It is important, crucially important, however, to note that neither the original amendment nor this compromise substitute in any way amends substantive law. Both speak only to the enforcement of the law—neither changes the Internal Revenue Code.

BIG BUSINESS IDB USE

Why then is this substitute amendment important? It is important because it sends the message that these bonds, this Federal credit subsidy, is not for big businesses.

The ruling that spawned this amendment, and the proposed regulations that would replace that ruling, do not merely affect small business and the State-sponsored umbrella bond programs designed to provide small business with federally subsidized credit. They also affect big business and big business multi-State or multicounty bond issues.

Prior to 81–216, it was common practice for major corporations—manufacturers, motel chains, fast food franchisors—to float multiple lots of $1 million bonds—all commonly guaranteed by the parent corporation or sold to a single investor—to finance capital expenditures all over the country. A fast food chain, for instance, could float a $20 million linked series of bonds in $1 million lots—each lot for a different hamburger stand in 20 different counties—but all lots backed not just by one stand but also by the credit of the national chain. The bonds holders, in such a case, certainly do not believe they are investing in a part of a single $1 million bond issue. They look to the credit of the national chain and the revenues from all the bond-financed projects for security. Ruling 81–216, and the proposed regulations, would prevent this.

If the substitute is not accepted, we benefit not just the Mom and Pop grocery stores and the little tool and die manufacturer in a dying northeastern city. We help Dow Chemical and McDonalds, too.

In fact, it appears that overriding 81–216 without any limits as the resolution now does, would disproportionately help big business—of the composite or multiple lot issues that have been submitted to the IRS for "grandfather" relief from 81–216, 75 percent are to be used by big business, corporations with nationally known names.

While the IRS cannot disclose the taxpayers' names, they have given us figures and broken down those figures by industry group. There have been requests for relief for $1,093 billion in bonds. Of that $319.8 million are for big, nationally recognizable businesses:

	Millions
Big textile companies	$48.8
Big chemical companies	116.7
Big hotel/motel companies	66.9
Big fast food companies	114.2
Big private hospital operators	25.8
Other big business	445.5

Though the IRS cannot disclose taxpayers' names, commercial sources can, and they confirm that big business was the primary target of 81–216. Moody's Bond Survey, dated August 17, 1981, for instance, shows a number of composite issues for big corporations planned for late August, presumably forestalled by 81–216:

	Millions
Dow Chemical	$21.7
St. Regis Paper	5.5
American Stores Co	17.25
W. R. Grace & Co	4.6
Kimberly Clark	3.0
RCA Corporation	2.0

Other information obtained by the Treasury under circumstances where taxpayers confidentially need not be maintained shows a similar pattern of big business use:

	Millions
International Paper Co	$12.15
J. P. Stevens & Co., Inc	30.3
Spring Mills, Inc	5.7
The Bendix Corporation	12.7
Scott Paper	8.8

Information compiled by the Congressional Budget Office on big business use of composite IDB's is truly eye-opening. Since January 1977 a large number of large corporations have issued millions of dollars worth of composite bonds. Let me read you a few examples:

	Millions
Airco	$10
Armco	17.4
Burlington Industries	17
Colt Industries	24
Container Corp. of America	15.7
Dow Chemical	35.7
General Motors	6.8
B. F. Goodrich	10.1
Hoover Universal	30.2
International Harvester	11.4
Kroger	10.8
McDonalds	42
Nabisco	6.7
PPG Industries	10
Ralston Purina	12.1
Safeway	14.3
Union Company	25
Weyerhaeuser	51.4

These companies have done nothing wrong—I do not criticize them for using composite IDB's—I criticize myself and Congress for permitting them to use composite bonds. And I shall continue to press for a substantive change to the code that will stop these companies from using any IDB's—composite issues or otherwise.

The National Federation of Independent Businesses, a leading small business organization, just completed a poll of their membership on the use of small issue IDB's generally. 40,000 to 50,000 members responded. These are true small businesses—the average member has 8 employees and $500,000 annual gross sales—the sort of business that is the backbone of American enterprise—the source of the most jobs and the most new ideas. The results? Only 37 percent were for the continued availability of any small issue IDB's—any small issue bonds, not just composite bonds. Forty-nine percent were opposed to the issuance of any small issue bonds. The real small businessmen know who use this credit subsidy—they know that large- and moderate-sized businesses can use these bonds, particularly composite bonds, easier than they can. They want this abuse stopped.

A vote against the compromise substitute is, quite simply, a vote for big businesses continued exploitation of this program. If we send big business that message today we may as well junk any responsible plans to reform IDB's into an effective, small business capital formation tool. If we send big business that message today we might as well vote for Federal credit subsidies for everybody.

ONLY THE BIGGEST OF BIG BUSINESS ELIMINATED

The compromise substitute would limit big business use of composite bonds, and composite bonds only, with a $25 million, 3-year capital expenditure limit; $25 million over 3 years is not much of a limit. It only eliminates the biggest of big business—the Fortune 1,000—the type of corporation that, on the average, has more than $150 million annually in business receipts and that has more than $150 million in total assets. These megacorporations constitute only one-tenth of 1 percent of all corporations. If these companies were prohibited from using any small issue IDB's—and that is not what we are doing today—we would be taking a very small bite, about 16 percent, out of the total small issue IDB program—16 percent out of $9.2 billion of bonds that result, this year alone, in over a billion dollars of lost revenue to the Treasury.

For my taste, this is too small a bite. I would prefer a $10 million limit, or even smaller, to take this credit subsidy away from big business. The top one-tenth of 1 percent—companies with $150 million in annual receipts—seems a pretty select group. My definition of big business goes quite a bit deeper.

I accepted this compromise $25 million figure only because it is a step in the right direction—not because it is where I would like to stop. When the Finance Committee considers substantive IDB legislation I would like to consider a lower limit. I hope the small business community, in the interim, will seriously consider whether we should cut a little deeper than the top one-tenth of 1 percent.

STATE OR LOCAL BACKING

The second message this substitute sends is that State and locally guaranteed or backed bonds are to be favored over bonds that are issued without that backing. In the composite or multiple lot area, this means that State-backed programs such as New York's Job Development Authority or Connecticut's small business program would be permitted if this amended the Code while McDonalds-backed composite bonds are not.

Where a State or locality puts some of its credit on the line, then we are relatively assured that a responsible State or local official will look carefully at the users of these bonds. Where no State or local commitment is required, not even the most responsible public official can withstand the pressure to hand out a Federal credit subsidy to just about anybody—because it does not cost him anything at all. And we cannot blame him, really, since his competition in the neighboring State will be under the same pressure and just may give in.

State or local backing makes it easier to say no—easier for States and localities to target the Federal credit subsidy to those who deserve it.

SUBSTANTIVE LEGISLATION SHOULD GO FURTHER

To eliminate all the abusive uses of IDB's, substantive legislation ought to go further than this amendment would indicate. The limits in this amendment are a step in the right direction but ought to be much tighter. In addition, we should consider putting a limit on the total amount of bonds any one firm has outstanding at any given time. Further, the combination of the accelerated cost recovery system that we enacted this year, when added to tax-free financing is too rich. Substantive legislation ought to soak up some of the excess gravy and prohibit the full use of both ACRS and IDB's. Procedural restraints are also necessary.

In sum, then, this substitute sends a message—a little garbled perhaps—but clear in one respect at least: big business should not use IDB's. I wish the message could be stronger but, for the time being this will suffice.

NO PRACTICAL EFFECT

Neither this amendment nor the one it replaces can change substantive law. Neither amendment can restore the so-called status quo of August 23, 1981, the date 81-216 was published. Neither amendment will have a practical effect—this tempest in a teapot is symbolic—and the signals sent are far from clear.

Why will neither have a practical effect? Because no appropriations measure can have a practical effect in the tax-free bond area. Only a change to substantive law, a change to the Internal Revenue Code, can reverse the effect of revenue ruling 81-216, and substantive law cannot be changed on an appropriations bill or continuing resolution. All we can do here is prohibit enforcement of an interpretation of law for a limited period.

Why will the enforcement prohibition not work? Remember that tax-exempt bonds cannot be sold without a tax lawyer's opinion or a ruling letter from the IRS stating that the bonds are exempt. No tax lawyer will render an unqualified favorable opinion on a multiple lot bond issue just because the IRS cannot enforce their regulations for a few months. Call them—my staff called several reputable bond counsel and all agreed—they could not issue a clean opinion, appropriations rider or not appropriations rider.

An appropriations rider will not give the tax lawyer adequate comfort and unless he's comfortable, the all-important clean tax opinions will not be forthcoming. The result? Nothing—no tax opinions, no bonds. Until the Finance Committee holds hearings on this issue and marks up a bill, and until Congress amends the code, this is as it should be.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. DOLE. Yes, I yield.

Mr. HATFIELD. Mr. President, I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, the Senator from Kansas has spoken about the efforts that have been made to bring this amendment about.

Mr. President, the vitality of the industrial revenue bond program is threatened by a few egregious abuses. These abuses represent a small percentage of the IRB program, but the revenue loss they represent is by no means inconsequential. I believe that these abuses must stop.

An IRB is nothing more than a federally-subsidized loan to a private business. This subsidy makes good sense when it is used to create jobs and to preserve a community's economic base. But it makes no sense, Mr. President, for the taxpayers of this country to subsidize private country clubs, golf courses, tennis clubs, and even massage parlors.

The amendment offered today, Mr. President, will in no way restrict the use of IRB's for the purposes for which they were intended—encouraging productive investments.

What it does, Mr. President, is prohibit the Internal Revenue Service from issuing regulations or rulings permitting IRB financing for golf courses, country clubs, tennis clubs, or massage parlors. It also prohibits the use of umbrella bonds to finance these activities.

I believe that these small changes in the IRB program are a good first step in

making this program more productive and more valuable to the taxpayer. And I believe that these changes make good business sense.

I urge the Senate to eliminate the abuses in the IRB program and to adopt this amendment.

I ask unanimous consent to have several newspaper articles pertaining to this subject printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Cleveland Press, Apr. 29, 1980]

COMMISSIONERS AID RACQUETBALL CLUB BUILDERS ON BONDS

(By Betty Klaric)

For the second time, Cuyahoga County commissioners have helped builders planning to construct a racquetball club on a site in Mayfield Heights.

The commissioners yesterday approved $1.3 million in tax-free, low-interest industrial revenue bonds (IRBs) for William M. Weber, Alan W. Wood and Gerald B. Medinger, general partners of the Eleven Co.

The three will use the money to buy land and build a two-story recreation club opposite Golden Gate Shopping Center.

Last year, the commissioners approved a $1,685,000 IRB for another firm to build a racquetball club on the same site. The bonds never were issued, however.

IRBs allow firms to borrow money at below-market interest rates—in this case at 12 percent for 18 months and then at 14 percent from Ohio Savings Corp.—because the interest income is not taxable for federal income tax purposes.

Referring to the recent Press series on the county's IRB program, Commissioner Robert Sweeney declared:

"From time to time, we get a reaction from the media concerning the recreation industry and IRB financing. This board is of the opinion that recreational industry development is important as well as any other area of business activity."

He predicted there will be more and more applications for IRB financing for recreation as leisure time increases.

Commissioner Edward Feighan said Squire, Sanders & Dempsey is the only local firm that has refused to act as bond counsel on recreational IRBs.

Lawyers from Squire, Sanders question whether the Ohio Constitution authorizes such IRBs.

Ronald Neill, attorney with Calfee, Halter and Griswold and bond counsel for the Eleven Co., told Feighan, "Of the bond counsels active in the Cleveland area, only one first categorically refuses to be involved in recreational facilities."

Neill told The Press that the persons involved in the Eleven Co., are different from those in the bond issue previously approved for this property.

The Eleven Co. will lease the facility to be operated as a private club by the Mayfield Racquetball Club Inc. Neill said membership will be open to all.

Also approved yesterday was a $1.2 million IRB for Cablevision Entertainment Services Inc. to provide cable services in Bedford Heights.

After approving a $700,000 IRB for the Oatey Co. to renovate and equip a plant at 4700 W. 160th St., the commissioners said they would not actually issue the bonds unless the firm agrees to improve its present minority hiring of four of 114 persons.

PUBLIC ASSISTANCE, FEIGHAN CHARGES—STOUFFER GETS NOD FOR BOND FINANCING

(By Gary R. Clark)

The Stouffer Corp. obtained initial approval by Cuyahoga County commissioners yesterday for $1 million in industrial revenue bonds despite protests from a union local and a complaint that the firm was already the beneficiary of a form of public assistance.

Commissioners Robert E. Sweeney and Virgil E. Brown, as the first step in the bond financing, voted to employ the law firm of Squire Sanders & Dempsey to act as bond counsel for Stouffer, which plans to build two restaurants on the plaza level of the new National City Bank building at E. 9th St. and Euclid Ave.

Commissioner Edward F. Feighan voted against hiring the bond counsel. He called tax-free revenue bonds a form of public assistance, and said Stouffer was already the beneficiary of another public assistance program.

Feighan said the bank building was awarded tax abatement by the city of Cleveland, which would permit Stouffer to pay lower rents for the two restaurants than would have been paid without it.

A Stouffer representative said the firm would actually pay higher rent at the bank building than in most other locations. Feighan however, argued that the rent would have been even higher without tax abatement.

The revenue bond issue was to have been before the commissioners last week, but was removed from the agenda at Sweeney's request. He was out of town last week, but his presence yesterday gave Stouffer a majority vote for the bond financing.

Sweeney said he favored issuing the bonds because the project would improve the economic vitality of the area, although, he said, he was aware of the problems unions have had with Stouffer.

Last week, Local 10 of the Hotel, Motel, Restaurant Employees and Bartenders union asked the commissioners to reject Stouffer's request. The union has been involved in a lengthy fight with Stouffer over employee representation at Stouffer's Inn on the Square.

Sweeney, however, said the Stouffer project would result in 80 new jobs, 16 of which were guaranteed for minorities.

Brown said he believed employees had been "unfairly dealt with" by Stouffer, but that that was not a legal reason for denying the revenue bond financing.

[From the Washington Post, Sept. 17, 1980]

INDUSTRIAL LOANS SUBSIDIZE ARRAY OF VIRGINIA FIRMS

(By Thomas Grubisich)

When a group of investors decided to build a golf course in Virginia Beach, one of the first places they went to find financing was not a bank but a little-known public agency called the Virginia Beach Development Authority.

Although a golf course might not seem to be what an industry-hunting agency would want, the investors were not disappointed.

The development authority quickly approved the project, giving the investors a document called a "resolution of inducement" that they could take to almost any bank and cash in for a low-interest, $1.5 million loan subsidized indirectly by American taxpayers.

While many people might question the propriety of public support for such a project, officials of the Virginia Beach Golf Club, which plans to build the course, see it differently. "It will enhance the [tourist] industry," said the club's attorney, Thomas C. Broyles. "Right now, people don't come to Virginia Beach to play golf because the courses are extremely busy."

The arrangement—called "welfare for business" by critics—is not unusual or illegal in industry-hungry Virginia. Businesses there have financed everything from executive aircraft to race-car tracks and supermarkets with publicly approved loans that used to go almost exclusively to finance factories, warehouses and other more traditional industries.

Thanks to what is generally conceded to be one of the least stringent laws in the nation covering industrial development bonds, all a Virginia development authority has to do, if it has any doubts, is to get a local circuit court judge to endorse a "petition of validation," which states that a project is qualified under Virginia law for a loan that will be exempt from both federal and state income taxes. Such petitions are frequently sought—and routinely given.

"It's a good deal for everyone," insists Alfred Shilling, a Richmond lawyer who has handled so many of the transactions that he's known in Virginia municipal circles as "Mr. Bond Counsel." Beneficiaries of the program, Shilling says, include both the borrowers—who get low-interest loans—and banks and other lending institutions, which don't have to pay any income taxes on the interest they make on the loans. By eliminating the taxes, businesses often are able to get loans that cut in half their financing costs.

Shilling makes no apologies for the program. "We've got welfare for the farmers, we've got welfare for the poor—this is just another level of subsidy," he said.

Critics say the program is making losers of the American taxpayer. In 1979, the tax-free loans nationwide cost the U.S. Treasury about $1 billion, according to a study by the Congressional Budget Office.

Virginia authorities aren't alone in their enthusiasm for such financing schemes. A Chester, Pa., development agency issued a bond for a night spot featuring topless go-go dancers, an arrangement that has not gone unnoticed on Capitol Hill.

"It appears we're looking at a very wasteful federal subsidy program to promote construction of massage parlors, dirty bookstores and fast-food restaurants," complains Rep. Sam M. Gibbons (D-Fla.), chairman of the House Ways and Means oversight subcommittee. "The whole idea would be silly if it wasn't a waste of federal dollars."

Yet Congress, which created the scheme in 1968 to help industry-poor regions, has set few limits on the scheme's use and set no reporting requirements, leaving that up to the states. That's just the way the Virginians like it.

Take the Norfolk industrial authority, for example. It recently approved industrial bonds for two firms—Virginia Chemicals and the Royster Co.—so they could buy private aircraft to ferry their executives to branch plants. The authority's justification was that when commercial airlines dropped their Norfolk service, the companies' executives had no easy and quick way to get to their branches."

I don't feel a bit uncomfortable," said one authority official. "If the companies didn't have adequate transportation, they might leave Norfolk."

In another celebrated case, an industrial authority in Chesapeake issued bonds to finance construction of a supermarket in a Richmond suburb. The rationale: construction of the grocery would help farmers in Chesapeake.

The bonds have also generated friction between localities. The town of Lexington, in the Shenandoah Valley southwest of Washington, is fighting efforts by the industrial authority in surrounding Rockbridge County to grant a $2 million bond to the giant Kmart retail chain to build a store near the town. In a case it is appealing to the Virginia Supreme Court, Lexington is arguing that the new Kmart would adversely affect the two small department stores located in its downtown.

(Largely by using subsidized bonds, Kmart has been able to become the second biggest retailer in the United States in less than a

decade, passing long-established companies like Montgomery Ward. According to the yet-to-be-published Congressional Budget Office study, Kmart, between 1975 and 1979, built 60 stores in 18 states with a total of $126 million in low-cost bonds.)

The biggest commercial project to be endorsed for a low-cost loan in Virginia is a Daytona-style race-car speedway that would be built in Dinwiddie County southwest of Petersburg near the North Carolina border. The speedway, which would be built by Paul Sawyer Associates of Richmond, would cost $8.5 million.

In Northern Virginia, the most controversial project to date was the Fairfax Economic Development Authority's recent approval of a $7 million office building to be built by direct-mail wizard Richard Viguerie, who has been a longtime champion of the free enterprise system. After his loan application was approved by the agency, Viguerie said he saw no reason why he should let his philosophical attitudes stand in the way of his using a program that could save him money.

While many businesses have been able to benefit by low-cost loans granted through industrial development bonds, the lending banks have profited too. Because almost all banks are in the highest tax bracket—46 percent—almost half of the interest on their conventional loans goes for federal income taxes. That means that a conventional loan at, say, 13 percent, will return a profit of only about 7 percent. But a tax-free loan, based on current lending practices, would be about 8½ percent, or almost 25 percent more profitable than the higher interest conventional loan.

EACH NEW JOB TO COST $350,000 AT GARAGE

(By Betty Claric)

Cuyahoga County's issuing $4.9 million in industrial revenue bonds to build a downtown parking garage employing five persons may be one of the most costly ways to create jobs, comparisons show.

It is estimated that each of the parking garage jobs will cost taxpayers more than $350,000, compared to estimates of $7,600 to $22,650 to provide jobs under other programs.

The IRB involves more money per job than any other IRB approved so far by the county.

The $350,000 estimate comes from a formula used by the U.S. Treasury Department to estimate national annual revenue losses through tax-free bonds.

The $4.9 million in bonds were approved by county commissioners for Alvin Krenzler, business developer and Appeals Court judge, for a garage and parking lot on the former site of the Hippodrome Building and Theater.

The IRB job creation estimate compares with an $8,000 average cost for jobs created under the federal Urban Development Action Grant program, according to a Washington UDAG spokesman.

Labor Secretary Ray Marshall recently estimated the Federal Government spends an average of $118,730 for each job created under its revenue sharing program.

Marshall put the cost of each job created through local public works projects at $22,650 and through the Comprehensive Employment and Training Act's public service employment at $7,630.

The cost for each job that might be generated as the result of a general personal income tax cut was estimated by Marshall at $20,230.

A Washington spokesman for the Economic Development Administration said that it invests an average of $13,500 for each job created in the private sector as the result of its public works grants.

The $350,000 per job cost under the Krenzler IRB represents a conservative estimate of the taxes that would be paid over the life of the bonds if the project was privately financed.

What makes IRBs attractive to investors is that the interest income is exempt from federal income taxation.

The federal tax subsidy is reflected in lower interest rates for borrowing money to finance a project.

The public purpose for IRBs is to create and preserve jobs and aid the economy. County Commissioner Robert Sweeney points out that the project also will create temporary construction jobs and subsequently add to local and federal tax revenues.

The major portion of the parking garage IRBs are to be sold at a 10% interest rate that will be adjusted every three years for a term of 20 years.

Cynthia Wallace, as economist on the revenue estimating staff of the U.S. Treasury Department, makes projections of revenue to be lost through issuance of all kinds of taxfree bonds throughout the country.

That is done, she explained, by assuming the taxes that would have been paid had the same project been financed on the private taxable market, instead of with taxfree bonds.

Assuming the bond buyer is in the 30% federal income tax bracket—a conservative estimate for buyers of tax-free bonds, according to Ms. Wallace—it would take a 14% taxable interest rate to attract a buyer of a 10% tax-free interest bond, she said.

To allow for the fact that the interest rate on the IRBs for the garage will be adjusted every three years, she said it would be reasonable to assume an overall tax rate of 12% for financing on the private lending market.

Using the 12% rate and a 30% tax bracket, the federal tax subsidy for the garage over 20 years would be $1,852,200.

Over the 20-year-life of the bonds, assuming a 12% interest rate, the total amount of interest to be paid by Krenzler would be $6,174,000, according to calculations by the county's Office of Budget and Management.

Using these figures, the cost per job comes to 370,440.

Ms. Wallace cautioned that variables may be present in local situations on individual bonds. However, she said that using a 12% interest rate and a 30% tax bracket were very conservative assumptions.

Defending the commissioners' approval of the garage IRBs. Sweeney said it is not fair to calculate the IRB job cost because of Krenzler's plans to build either one or two 22-story office building next to it.

"I'm positive the other buildings will be built and this will be an excellent improvement for downtown Euclid Ave.," said Sweeney. He said he assumed IRBs would be sought for their construction, too.

Mr. HATFIELD. Mr. President, this is the last of the committee amendments that had been set aside. The amendment now offered by Mr. DOLE and his colleagues will provide a solution to that problem that we faced all during the consideration of the bill. So I say that it is totally acceptable to the committee. We shall be very happy to dispose of it.

Before I move its adoption, I yield to the Senator from New York for comments, since he was the mover of the amendment in the committee itself.

Mr. D'AMATO. Mr. President, this compromise is not a precedent for future legislation, it is offered in the spirit of compromise.

The main purpose of this compromise is to send a clear message that this Congress is steadfast in its support of the IDB program.

While the stand-alone IDB program is necessary for economic development and local officials should have the option of authorizing an IDB to any firm, the multiple lot program is primarily to provide tax-exempt financing to small businesses and give them a better chance to compete in today's inflationary economy.

The first part of this amendment makes it clear that this Congress believes that the IRS was in error when it issued Revenue Ruling 81–216. We have with this amendment prohibited their enforcement of this ruling and prohibited them from issuing any new rulings or regulations which would have a similar effect.

This amendment clearly protects the "Aggie Bond" program. We have to remember that IDB's in multiple lots are just as important to agricultural users as they are for small businessmen.

For every dollar of IDB's issued the Federal Government receives more back in taxes than they lose in a tax exemption. This is because of the tremendous feedback effects resulting from higher corporate profits, more people with jobs, and fewer people on the unemployment rolls.

The final section of this amendment expresses the sense of the Senate that even after this appropriations bill is over, the Secretary of the Treasury should continue to enforce the IDB program as if this amendment is still in effect. We must never again have a ruling from the IRS as outrageous as 81–216.

The 19–1 vote in the Appropriations Committee made clear our intention to prohibit the enforcement of 81–216 without any qualifiers on this ban on enforcement. This substitute is offered merely in spirit of compromise. We will have further legislation in this area. We will strengthen the IDB program, but for now an all encompassing sense of the Senate resolution is necessary to keep the IRS from ruining the IDB program.

Mr. President, the primary purpose of this compromise amendment is to send a clear message that this Congress is steadfast in its support of the industrial development bond program. This amendment is offered in the spirit of compromise and should not be taken as a precedent for future legislation in this area.

While I believe that the single issue stands alone, a IDB program is very necessary to promote economic development and local officials should have the option of authorizing an IDB to any firm, the multiple lot program is primarily used to provide tax-exempt financing to small businesses and give them a better chance to compete in today's inflationary economy. In fact, it is a necessary lifeline to these small businesses.

The first part of this amendment makes it clear that this Congress believes that the IRS was in error when it issued Revenue Ruling 81–216. This amendment has prohibited the enforcement of this ruling and prohibited them from issuing any new rulings or regulations which would have a similar effect.

The Dole, D'Amato, Weicker, Stevens amendment clearly protects the "Aggie Bond" program. We must remember that

IDB's in multiple lots are just as important to agricultural users as they are for small businessmen. In addition, for every dollar of IDB's issued the Federal Government receives more back in taxes than they lose in a tax exemption. This is because of the tremendous feedback effects resulting from higher corporate profits, more people with jobs, and fewer people on the unemployment rolls.

Finally, this amendment expresses the sense of the Senate that even after this appropriations bill is over, the Secretary of the Treasury should continue to enforce the IDB program as if this amendment is still in effect. We must never again have a ruling from the IRS as outrageous as 81–216.

Mr. President, I thank the distinguished chairmen of the Committee on Finance (Mr. DOLE), Mr. HATFIELD, and Mr. METZENBAUM, in addition to Senator STEVENS, Senator WEICKER, and their staffs, for having worked out a compromise in a most difficult situation. I think it is important that industrial revenue bonds be maintained and I think this compromise goes a long way toward indicating our intentions to the Treasury Department yet curing some of the deficiencies that exist.

Mr. SASSER. Mr. President, I rise in strong opposition to the substitute amendment put forth by Senator DOLE that would seriously restrict the use of industrial development bonds.

During this time of economic recession when we badly need to encourage more economic growth and investment here we have an amendment that would strike at the heart of State and local economic developments throughout the country.

In my own State of Tennessee, industrial development bonds have proved very successful.

For example, in the city of Memphis, the Center City Commission has issued some $7 million in industrial revenue bonds that have resulted in the rehabilitation of a total of 7 building encompassing some 219,000 square feet. The projects themselves generated some additional 180 construction jobs and have helped spur some $75 million dollars in additional downtown construction which is leading to a tremendous revitalization of the downtown Memphis area.

In another case, in a largely rural area, we find that the Dayco Corp. based in Dayton, Ohio has used a $7.5 million industrial revenue bond together with $4.2 million in other financing to finance a major plant expansion in Dyersburg, Tennessee which recently helped create an additional 170 jobs for this rural area.

Indeed, Dayco's use of industrial revenue bonds in this area since 1960 helped create some 1,100 jobs.

The use of industrial revenue bonds is central to State and local economic development programs in many urban and rural areas. The bonds represent a willingness on the part of the local community to help in the process of job creation and job expansion. And this whole process is free of any interference from Washington.

But now what do we have here?

Now we have the distinguished Senator from Kansas, Mr. DOLE, offering an amendment that would virtually shut down the industrial bond precess. I know that the Senator is very concerned about our Nation's economic recovery. That is why he took the lead in enacting the President's tax plan which provided for such substantial reductions in the taxes of American business. And I must say that I fail to understand why he is offering an amendment that works in such a contrary direction to the President's desire to have a strong economic recovery.

I understand that the intent of the Dole amendment is ostensibly to curb the well publicized abuses in this otherwise valuable program. I question, however, whether this is the best way to go about seeking a cure.

The Dole amendment has a deceiving appeal. Placing a cap on the size of a firm that may avail itself of the small issue exemption sounds, at first blush, like a reasonable and simple solution. Once this precedent has been established, however, it becomes that much easier to come back later and limit, or cap, all issues of industrial development bonds.

I am fearful of setting such precedents. I am reluctant because of the appreciation I have for the tremendous value of this program to the industrial development of my State and others. He would risk sacrificing the many benefits of the program by acting hastily now.

The distinguished Senator from Kansas has already pledged to introduce legislation on this issue by next year. He has promised to hold extensive hearings on the subject as well. I applaud this commitment because I know that we need to know more about the program before we change it.

The purpose of the program is industrial development and job creation. Creating artifical distinctions now on the basis of the size of the user may very well sacrifice development and new jobs that we can ill afford to lose.

In the 20-year period ending in 1970, almost 78,000 new jobs were created in Tennessee as a result of IDB financing totaling $439 million. Speaking as one whose State has had this kind of success with the program—Tennessee development authorities in 1980 alone issued $274 million worth of IDB's—I am not eager to do anything that would jeopardize this valuable development tool.

Mr. WEICKER. Mr. President, I am very pleased to be a cosponsor of the amendment offered by the chairman of the Finance Committee, Senator DOLE. I believe the amendment represents a practical and reasonable solution to the problem created by the Internal Revenue Service when it issued Revenue Ruling 81–216 on August 24, which paralyzed the small-issue, composite industrial development bond (IDB) program in most States.

The amendment is the product of literally weeks of negotiations to develop an appropriate Senate response to Revenue Ruling 81–216, and makes some modifications in the amendment adopted in committee as part of the continuing resolution.

The amendment we are offering today would apply solely to composite, or "umbrella" bond programs and would have the effect of reversing the IRS action for companies whose capital expenditures are less than $25 million. In other words, qualified companies could continue to participate in umbrella bond issues and economic development authorities could revert to their prior practice of packaging or pooling small issue IDB's into multiple lots. In short, Mr. President, by adoption of this amendment, we are returning to the status quo of pre-August 24, 1981 for qualified companies.

I am gratified that my original bill, S. 1635, introduced on September 17, is the genesis of the amendment before us today. I introduced that bill in an effort to suspend IRS enforcement of Revenue Ruling 81–216 because I felt it came at the worst possible time for small business and for local economic development. Interest rates were at record high levels—and are still astronomical, particularly for small business; and conventional economic development aid was being cut to the bone. The last remaining opportunity for reasonable cost financing for small business, and for promoting local economic development, the tax-exempt industrial development bond, would be destroyed if IRS had its way.

True, there have been some abuses in the IDB program. But these were concentrated in large part in the so-called "stand alone" program, not the umbrella bond program. Of course, some of the participants in the composite program were not small businesses in some States, but IRS does not have the legal authority to prevent their participation. Instead, IRS essentially killed the whole small issue umbrella bond program with Revenue Ruling 81–216. They used a shotgun when a scalpel would have been better. To get at a few alleged abuses, IRS went after all small issue umbrella bond programs.

In Connecticut for example, where all umbrella bond repayments are guaranteed by the appropriate jurisdiction and where small business is nearly the exclusive user—acknowledged to be one of the finest such programs in the United States—the umbrella bond program ground to a complete halt. Small businesses that had commitments in the pipeline were denied IDB's and the entire State economic development program was threatened with extinction.

I introduced S. 1635 because I could not believe the Senate would sit back and permit the IRS to throw the baby out with the bathwater by sweeping away the entire small issue IDB program with a stroke of the pen. Senate enactment of our amendment sustains my original position and tells the IRS in no uncertain terms that they were wrong; that they went beyond their authority; and that Congress wants the tax-exempt umbrella bond program to go forward for the qualified companies even where bonds are pooled into a multiple lot that may exceed $1 million.

Mr. President, this amendment is not a perfect solution to the revenue ruling program. If I had my druthers, we would simply reverse the ruling by legislative

veto. But I understand the concerns of my good friend from Kansas and want to have the participation of the Finance Committee in the solution we work out. I think we have that unanimity in this amendment and I only hope IRS will heed our intent and permit the issuance of multiple lot IDB's upon enactment.

In this regard, Mr. President, I know there is some concern among bond counsels that subsequent legislation could jeopardize the tax-exempt status of bonds issued under the provisions of this amendment. I wish to make it clear that it is my understanding that any subsequent substantive legislation will not have a retroactivity provision.

Furthermore, I wish to reemphasize that this amendment applies only to the umbrella or composite bond program. While I share the desire to rid the IDB program of any abuses, the amendment was precipitated by Revenue Ruling 81–216. Nothing contained in this amendment, therefore, should be construed to represent a precedent for any subsequent IDB program reform legislation. I hope we will have such legislation and intend to continue working closely with the Finance Committee to develop the appropriate language. But I wish to make it clear that I do not feel bound to extend any provision of this amendment to that bill.

Mr. President, the small issue industrial development program has been a very productive program. In Connecticut, the umbrella bond program has been responsible for making loans totaling more than $195 million to growing small businesses since 1973. Those bonds went to over 518 companies and created 9,400 new jobs. In addition, they allowed another 19,500 jobs to be retained. Needless to say, this program has been very important to Connecticut's economy and has been an enormous source of Federal tax revenues.

In summary, Mr. President, Revenue Ruling 81–216 has been counterproductive as it applies to State run umbrella bond programs. Adoption of this amendment will put the Senate firmly on record that the pooling of these small issue development bonds for qualified companies should go forward. I urge my colleagues to support this amendment.

Mr. DOLE. Mr. President, will the Senator from Oregon yield for a moment?

Mr. HATFIELD. Yes.

Mr. DOLE. Mr. President, as the principal author of the amendment now being considered, I would like to clarify one detail of the amendment. Under the amendment as it has been worked out with the Senator from Ohio (Mr. METZENBAUM) and others, "massage parlors" are made ineligible for IDB financing. This Senator wants to make it clear that the term "massage parlor" does not encompass every facility in which a massage is given. Real massages are given in Elizabeth Arden facilities, at YMCA's, and in legitimate sports clubs. We do not aim to disqualify such facilities from using IDB financing provided they otherwise meet the tests provided in this legislation and under existing law. We only seek to disqualify facilities the principal activity of which purports to be the giving of massages.

Mr. President, these are legitimate massage parlors as opposed to others that Senator METZENBAUM had in mind.

Mr. ROTH. Mr. President, will the Senator add my name as a cosponsor?

Mr. DOLE. I ask unanimous consent that that be done, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 701) was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I move adoption of the excepted committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The excepted committee amendment, page 21, lines 9 through 22, was agreed to.

The excepted committee amendment is as follows:

SEC. 112. (a) None of the funds appropriated by this joint resolution may be used to—

(1) enforce Revenue Ruling 81–216 or the proposed amendments to Income Tax Regulations sections 1.103–7 and 1.103–10 which were published in the Federal Register on October 8, 1981, or

(2) propose, promulgate, or enforce any ruling or regulation reaching the same result as, or a result similar to, such revenue ruling or regulations.

(b) It is the sense of the Senate that after August 23, 1981, the Secretary of the Treasury or his delegate should in all cases enforce any ruling or regulation described in subsection (a) (1) or (2) in a manner consistent with the provisions of subsection (a).

Mr. HATFIELD. I move to reconsider the vote, Mr. President.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, we are down to the last two amendments. I no longer have to set aside the committee technical amendment. I yield at this time to the distinguished Senator from Kentucky (Mr. HUDDLESTON) for the purpose of offering an amendment.

UP AMENDMENT NO. 702

(Purpose: To decrease the appropriation for bilingual education.)

Mr. HUDDLESTON. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON) proposes an unprinted amendment numbered 702.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution add the following new section:

Sec. . Notwithstanding any other provision of this joint resolution, the dollar amount of funds made available under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981 (contained in such reported bill on page 48, line 13), shall be $126,553,000.

Mr. HUDDLESTON. Mr. President, this amendment will reduce funding for bilingual education from the committee's recommendation of $143,810,000 to the President's requested level of $126,553,000. This funding level represents a 12-percent decrease in funding for bilingual education which the President asked for in late September.

Mr. President, we are all aware that most education programs have had funding reductions this year. The basic State grant program for education of the handicapped is funded at $69 million below the reconciliation level. The State grant program for vocational rehabilitation is funded at $44.8 million below reconciliation. Adult education is $10 million below reconciliation. Pell grants are $276 million below the reconciliation level.

However, bilingual education is not experiencing any reduction from the amount authorized in reconciliation. Full funding has been provided for bilingual education and I strongly believe this is not justified. The effectiveness of bilingual education is questioned year after year. I am deeply concerned about the direction that this program is taking and believe that in a time of fiscal uncertainty, we cannot provide full funding for this program while other more important education programs have funding levels well below those authorized in reconciliation.

The Department of Education recently completed a report, which has yet to be officially released, which shows that bilingual education programs are not working. This report examined over 300 documents concerning bilingual education which makes it the most comprehensive review that has been done on the program to date. The report concluded that the case for the effectiveness of transitional bilingual education is so weak that exclusive reliance on this instruction method is clearly not justified. Too little is known about the problems of educating language minority students for the Federal Government to prescribe a specific remedy for helping them.

The report also noted that there is no justification for assuming that it is necessary to teach nonlanguage subjects in the child's native tongue for the student to make satisfactory progress in school. It pointed out that immersion programs, which involve structured curriculums in English for both language and nonlanguage subject areas, show promising re-

sults and should be given more attention in program development.

This report shows that there are major problems with the bilingual education program and hence little justification for the Federal Government to continue to pour money into the program when other areas of education are suffering.

Congress passed the Bilingual Education Act as a means of providing transitional English language instruction for students whose main language was not English. The idea was to get these students to learn English as quickly as possible so they could be placed in the regular classroom environment. Yet, this is not happening.

The Bilingual Education Act requires an individual evaluation of a child who has remained in the program for 2 years so that the need for continued services can be established. However, even officials of the Department of Education admit that there is no enforcement of this provision. There is nothing to encourage the directors of bilingual programs to see that students learn English as quickly as possible. As a result, students can remain in the program indefinitely, which is clearly contrary to the intent of Congress.

The recent Department of Education report notes that intensive English programs are showing promising results and should be given more consideration in developing programs for limited-English speaking students. These programs provide an effective means of directing the bilingual education program back to its original goal of providing transitional instruction to help assimilate students into the regular classroom environment.

The results of this report support similar findings that came from a national evaluation of bilingual education that was completed in 1977 by the American Institutes for Research (AIR). In this study, it was found that students in bilingual education programs were doing no better at learning English or any other subject than non-English speaking students who had been placed in regular classes. A large number of the project directors who were interviewed for this study indicated that even after students were able to function in English, they remained in bilingual programs.

The case for bilingual education has not been proven. Admittedly, few studies have been done on which method of instruction is best for teaching language-minority students English. However, of the studies that are available, it is clear that bilingual programs are no better, and in some cases even worse, than programs which teach students English as quickly as possible. Thus, it is difficult to justify full funding when other education programs have experienced large reductions.

Finally, we must remember that this country was built on the foundation of a number of different immigrant groups who merged together to form one unique society. We were only able to do this by having the immigrants learn the language that binds us together—English. By learning this common language, they were able to be quickly assimilated into society. That was the goal of the bilingual education program when it first started—to teach students English so that they could become a part of our unique society. Unfortunately, we find that this goal has been lost. Consequently, I do not believe we can continue to promote a program whose focus has gone beyond congressional intent. The funding reduction I am proposing conforms with the President's request to reduce funding an additional 12 percent. I urge the adoption of this amendment.

Mr. President, I think it is clear that this is a program that has proven not to be working. It is simply asking that the funding be reduced to the level that the President has requested.

Mr. SCHMITT. Mr. President, I am sorry that the Senator from Kentucky has chosen to offer an amendment that would further decrease the level of funding for bilingual education, which was already decreased by $17.5 million from the fiscal year 1981 level. The committee justified this on the basis of two other actions. One is that we have begun to weight this funding more toward increasing the supply of teachers who can work toward English proficiency in the elementary grades, where the greatest difficulty of bilingual education exists, where, in my experience, and I am sure in the experience of Senator DOMENICI, as we grew up in New Mexico, we saw more and more of our non-English proficient friends in kindergarten and elementary school fall farther and farther behind because they were never given the opportunity to learn English to the point where they could compete directly with others.

In addition, at Senator HUDDLESTON'S request and with my own personal efforts to strengthen along the lines he has suggested, the committee has included strong report language as follows:

The Committee places a high priority on programs which enable language minority students to learn English and be assimilated as quickly as possible into the regular classroom environment. The Committee directs the Secretary of Education to give preference to funding bilingual education programs in school districts which include an intensive English course in their program of instruction.

Mr. President, even though we have moved that far to accommodate the Senator and to make realistic adjustments in this program—downward adjustments—the Senator now asks for an additional $17 million to be cut from the program.

The amendment, to that degree, would eliminate services to at least 132 local school districts, and potentially as many as 77,000 young children would not be served.

Mr. President, the success of bilingual programs can be directly attributed to the supply of teachers in the field, as I indicated, and we are weighting our emphasis toward that problem. The Senate level in this area of $32 million is the same as the A–1 level for training. Further reductions proposed would defeat the purposes of the program.

I hope the Senator from Kentucky will accept the efforts to date of the committee, to improve the emphasis of the program, to emphasize English proficiency, and recognize that the reports from which he has quoted no longer have any high degree of credibility within the Department of Education or within the education or within the educational community. They are out of date.

We are looking forward to a continued evaluation of this program and hope that the efforts of the committee over the last 2 or 3 years to improve the emphasis on English proficiency, to improve the overall efficiency and quality of the bilingual program, will become obvious in the very near future.

So, Mr. President, I hope the Senate will not agree to this cut. It is not necessary. In fact, it is only on top of reductions that already have been made in this program, as in most other programs under this bill.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 702) was rejected.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 703

Mr. HATFIELD. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 703.

Mr. HATFIELD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, strike out lines 24 and 25 and insert in lieu thereof: "for in the conference report and joint explanatory statement of the committee of conference (H. Rept. 97–345) filed in the House of Representatives on November 19, 1981, as if such Act had been enacted into law."

Mr. HATFIELD. Mr. President, this is simply a technical amendment to adjust the reference figure for the energy and water appropriation bill in the continuing resolution to the conference figure, because a conference has been held subsequent to the passage of the bill by the Senate and in the present language, which is the bill as passed by the Senate. So I move the adoption of this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 703) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ANNOUNCEMENT OF POSITION ON UP AMENDMENT NO. 677

Mr. BRADLEY. Mr. President, I was unavoidably absent on the Hatfield motion to table the Sasser amendment. If I

were present, I would have voted no and I ask to be recorded accordingly.

PROGRAM LEVELS FOR WIC AND CSFP

Mr. EAGLETON. Mr. President, I am pleased that the joint resolution includes an amendment I offered in committee to protect the special supplemental food program for women, infants, and children (WIC) and the commodity supplemental food program (CSFP) from reductions in participation.

The first continuing resolution required that current participation levels in these programs be maintained. The Department of Agriculture took nearly a month to allocate WIC funds to States under the continuing resolution, and the program continued to operate during this period only because States had unspent fiscal year 1981 funds available. Now, these unspent funds are virtually all gone, and many States have no funds to continue operating beyond November 20. If the Department again takes several weeks to allocate funds, many WIC programs will close their doors in the interim, and hundreds of thousands of pregnant women, infants, and children may be denied WIC prescription foods for several weeks when these foods are needed.

The resolution, therefore, provides that all funds appropriated for these programs in the first quarter of fiscal year 1982 must be allocated to States immediately upon enactment of this joint resolution. Normally, the Secretary would have to wait up to 30 days until OMB apportions these moneys, before payments could be made to the States. However, because such a delay would cause chaos in the States, we have waived the provisions of section 665(d)(2) of title 31 United States Code and have directed the Secretary to allocate all first quarter funds immediately—which means within a few days and not a few weeks, so that States have their full first quarter allocation in hand before December 1 when they begin issuing December benefits.

As the Senate report and floor action on the Agriculture, Rural Development, and Related Agencies Appropriations Act makes clear, the first quarter WIC allocation is one-quarter of the $942 million WIC appropriation—or about $235 million—minus the $85 million to $90 million in funds distributed under the first continuing resolution. This means that the remaining first quarter WIC allocation is about $145 million to $150 million, and this amount must be fully allocated to States immediately upon enactment.

The joint resolution also contains a provision to insure that irreparable harm does not result to WIC and CSFP participants in the event that the administration submits a special message deferring or rescinding any part of the funds made available under this joint resolution. When a deferral is submitted, the Executive may normally operate a program at the reduced level that is being sought. While the situation regarding a rescission is less clear, it is likely that the administration would similarly seek to operate programs at the lower level while any rescission request is pending.

If this occurs in the WIC or CSFP programs, however, incalculable harm will result. WIC and CSFP are two of the only Federal programs in which benefits are provided on a monthly basis to eligible participants—but in which the program is funded as a discretionary program rather than as an entitlement. As a result, a deferral or rescission would lead to hundreds of thousands of women, infants, and children being thrown off these programs for several months even if Congress ultimately disapprove the rescission or deferral.

The Congress has made clear on many occasions this year that it will not agree to a reduction in the WIC program. It would be tragic if as many as two-thirds of a million persons at nutritional risk were terminated from this program due to a deferral or rescission request, only to have such a request rejected.

The resolution insures that this will not occur. It requires that while a deferral or rescission regarding the WIC or CSFP program is pending, funds may not be impounded or otherwise withheld from obligation to the extent that any such withholding of funds would cause participation to fall below September 1981 levels. To that extent it requires the obligation and outlay of this budget authority within the meaning of the terms of section 1400(4) of title 31 United States Code. The resolution guarantees and requires that all States at least maintain September 1981 participation levels during the time any deferral or rescission is pending. Any reduction of caseload below the September 1981 levels in any State—or any action by the Secretary to fail to provide any State sufficient funds to maintain September 1981 caseloads—would be a clear violation of the joint resolution.

The resolution also stipulates that the Secretary may not seek to spend at a lower rate during a deferral or rescission by reducing food packages provided to participants. The resolution calls for maintaining benefit levels during the time a deferral or rescission is pending, by which we mean that the WIC food packages must be maintained. This is also consistent with the provisions of section 17(c) of the Child Nutrition Act which prohibits the Secretary from ratably reducing the amount of foods that may be provided under the WIC program.

The Secretary makes projections on the amounts that the WIC and CSFP food packages will cost in fiscal year 1982, and the Secretary would be required to use these projections in determining minimum funding needs necessary to maintain September participation during the time any rescission or deferral is pending.

These provisions of the continuing resolution are fully consistent with the Impoundment Control Act (ICA). Section 1001 of the ICA (31 U.S.C. 1400(4)) provides that nothing contained in the ICA or amendments made by the act supercede any provision of law "which requires the obligation of budget authority or the making of outlays thereunder." Essentially, the ICA provides that the Congress can enact legislation which requires the expenditure of moneys and thereby exempt all or part of those moneys from a rescission or deferral. This is what we have done in this continuing resolution.

In addition, nothing in the continuing resolution would preclude the administration from requesting a rescission to its September budget level. If approved, the rescission would take effect. The language of the continuing resolution is carefully limited to the time period during which a rescission is pending and action by Congress on a rescission request has not been completed. The continuing resolution language would, in effect, rule out deferrals below the funding levels needed to maintain the September 1981 caseload.

Despite this, I would hope that the administration would not seek any deferral or rescission of these important programs, and would faithfully carry out the provisions of this resolution that fund these programs. The resolution incorporates the conference agreement on the agricultural, rural development, and related agencies appropriations bill, which provides $942 million in fiscal year 1982 funds for the WIC program, and requires that these funds be combined with unspent funds from fiscal year 1981 and be fully utilized. The conference agreement requires overall average fiscal year 1982 WIC participation to be brought as close as possible to the historic 2.2 million participation level. This means that the Secretary must immediately bring participation back to the 2.2 million level in as expeditious manner as possible, recognizing this is likely to take a few months, and then maintain participation at the 2.2 million level for the duration of the fiscal year. There are clearly sufficient funds provided for this to be accomplished. This will bring overall average fiscal year 1982 participation close to the 2.2 million benchmark, as the conference agreement directs.

The Secretary must also fully utilize all available resources for the commodity supplemental food program, and serve the maximum number of participants consistent with available resources.

MEDICALLY UNDERSERVED AREAS

Mr. CRANSTON. Mr. President, for myself and the distinguished Senator from Massachusetts (Mr. KENNEDY), I would like to ask the able Senator from Missouri (Mr. EAGLETON), as a member of the Appropriations Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, certain questions regarding language in Senate Report 97–268, accompanying H.R. 4560, the Labor, Health and Human Services, Education, and Related Agencies appropriations bill for fiscal year 1982. That bill as reported is, in part, incorporated by reference in the continuing resolution. The report, on page 31, states:

> The Committee directs that there be no change in the criteria or the application of such criteria for designating medically underserved areas consistent with the criteria in section 905 of the Omnibus Budget Reconciliation Act of 1981. This does not preclude the use of up-to-date census data.

We would like to clarify briefly the intent of the language in the committee report with the Senator from Missouri, who was the proponent of this language in the committee. Our first question is

whether the report language is intended to preclude changes in the weighting of the values used in computing the index of medical underservice (IMU) that is used to identify MUA's.

Mr. EAGLETON. Mr. President, the language is not intended to have that effect. What is intended is that the existing criteria be retained, including the four criteria used in computing the IMU—the infant mortality rate, the primary care physician per population ratio, the percentage of population aged 65 or over, and the percentage of population with family income below the poverty line—and other present criteria not reflected in the IMU scoring. However, there is no intention to preclude changes in the weights used in computing the IMU, such as the weighting changes that the Department of Health and Human Services has proposed in connection with its October 14, 1981, notice in the Federal Register, on page 50677. In that notice, the Department stated that it was adjusting the weights for two of the IMU criteria for which new data had become available—infant mortality and primary care physician per population—and that its purpose in making the adjustment was so that the values for these criteria in computing the IMU "would remain stable notwithstanding the changes in national data regarding" those criteria.

Mr. CRANSTON. Mr. President, our next question relates to what the direction not to change "the application of such criteria" was intended to preclude.

Mr. EAGLETON. Mr. President, as the distinguished Senators from California and Massachusetts are aware, the Department, in the October 14 Federal Register notice and a followup October 28 notice, on pages 53320 through 53359 of the Federal Register, has proposed the dedesignation of a vast number of MUA's based on the use of countywide data in cases in which the designation was originally based on subcounty data. We consider such a change in the application of the criteria to be unfair to the community health centers (CHC's) concerned. Thus, the direction not to make any changes in the application of the criteria is intended to require the Department, in considering the possible dedesignation of an MUA, to use subcounty data corresponding specifically to the data on which the designation was originally based for the geographic area or population group concerned.

In this connection, I would note that the report language specifically exempts the use of up-to-date census data from the preclusion. This is because census data, which is used for the subpoverty population and the population over age 65, is readily available on a subcounty basis and thus poses no problem in terms of its application to the criteria. We expect the relevant 1980 census data to become available in the spring or summer of 1982.

Mr. KENNEDY. Mr. President, I thank my good friend, the Senator from Missouri, for making these important clarifications. As ranking minority member of the Labor and Human Resources Committee and a reconciliation conferee for consideration of the provision that was enacted as section 905 of the Omnibus Budget Reconciliation Act of 1981, I would note that, in my view, implementation of the report language in accordance with the clarifications that the Senator has provided would be fully consistent with the criteria in section 905 of the reconciliation measure.

Mr. EAGLETON. Mr. President, I am very pleased that the distinguished Senator from Massachusetts agrees with me that implementation of the report language in the manner I have described would be consistent with that provision of the Omnibus Budget Reconciliation Act of 1981.

Mr. CRANSTON. I thank both Senators for the clarification and assurances that they have provided. Both of them have a long history of constructive, effective work in helping to insure that medical care is available to those members of our society who would otherwise lack access to it. Their efforts here today are further evidence of their dedication to that goal.

Mr. BRADLEY. Mr. President, I wish to state to Senator SCHMITT, when I learned that the Senate Appropriations Committee provided no funding for the State student incentive grant program for fiscal year 1982, it was my intention to offer an amendment to provide funds to continue the program. I now understand that, under House Joint Resolution 357, the continuing resolution which is before us, the $76.7 million level recommended in the House-passed Labor, Health, and Human Services, and Education Appropriations Act is the level at which the SSIG program will be continued. I refer to the provision on page 3, lines 8 through 16 of House Joint Resolution 357 as amended by the Senate Appropriations Committee.

Mr. SCHMITT. Mr. President, the Senator from New Jersey is correct. While the full committee has agreed to eliminate funding for the program in fiscal year 1982, a program cannot be eliminated through a continuing resolution when only one House has deleted funding for it. So, according to the provision to which he referred, since the SSIG program is included only in the House version of the Labor, Health, and Human Services, and Education appropriations bill, SSIG would be continued at the lower of the appropriation recommended by the House or the current rate. Since both of these levels are $76.7 million, with passage and signing of Senate Joint Resolution 357, SSIG would be funded at $76.7 million in fiscal year 1982, pending final action on the regular bill.

Mr. BRADLEY. Mr. President, I appreciate this clarification by the Senator from New Mexico.

BUSINESS ENERGY TAX CREDITS

Mr. WALLOP. Mr. President, I would like to rise at this time in support of section 113 of the continuing resolution concerning the energy tax credits which was added at the request of the distinguished Senator from Arizona, Mr. DECONCINI. While I have some concerns about the exact wording of that section I joined with the Senator from Rhode Island (Mr. CHAFEE) in the introduction of Senate Resolution 232, on which this section 113 is based, and I strongly support its intent.

I have long been interested in the subject of tax incentives to encourage energy conservation. In fact, on September 25, 1979, during the last Congress, I introduced my first bill in this area. That legislation was followed toward the end of that Congress by a revised bill, S. 3006. That legislation was the subject of hearings before the Senate Committee on Finance last year and was the predecessor to S. 750, which was the subject of hearings earlier this fall and is presently pending before the Finance Committee.

To say that those most recent hearings evidenced strong support for the concepts embodied in S. 750 would be a distinct understatement. Nine separate panels of witnesses all testified strongly in support of the continuation and improvement of the existing scheme of energy tax credits. While the Treasury Department was not able to support the legislation at that time, they did adopt a position of neutrality on my proposal and agreed to continue to work with us to fine tune it. That process is now underway and we hope to have legislation which the administration can support ready for introduction early next year.

It is important to note that what we are talking about now are investment decisions. Industrial efficiency investments are in direct competition for the capital expenditures of any industrial entity. S. 750 is designed to provide a limited priority to those investments which will either save energy or result in the production or use of energy other than oil and gas. Industrial energy conservation, together with the use of alternative energy sources, is of interest and concern to the entire Nation. That message is made quite clear by looking at the strong list of cosponsors of S. 750, including the distinguished Senator from Rhode Island (Mr. CHAFEE) and the distinguished Senator from Arizona (Mr. DECONCINI). These cosponsors, who now number in excess of 15, come from both sides of the aisle. Further, they are representatives from energy-producing States, as well as from energy-consuming States. It reflects a kind of philosophical unanimity which is of obvious benefit to the country.

As my colleagues in the Senate are well aware, during the debate on the President's tax bill the distinguished Senator from Massachusetts (Mr. KENNEDY), offered an amendment which contained the essence of my legislation. While I was unable to support Senator KENNEDY'S efforts at that time, I assured him it was not because of the merits of the issue, but rather that I felt it was an inappropriate time for the Senate to consider this matter. At that time I assured him, with the support of both the distinguished chairman of the Finance Committee (Mr. DOLE) and the distinguished majority leader (Mr. BAKER), that the Senate Finance Committee would move expeditiously to consider my legislation and other energy tax credit legislation pending before it.

We have done that as evidenced by hearings which I chaired in the Energy and Agricultural Taxation Subcommittee on two bills—my bill, S. 750, and S. 1288, a bill to provide tax credits for the commercial sector, introduced by Senator DURENBERGER. I would like to advise the full Senate at this time that it is my firm intention to move early next year to urge the Finance Committee to consider this or similar legislation. The energy credits for industrial energy conservation and alternative energy production are generally scheduled to expire at the end of 1982. Thus I feel it critical that we begin to send the signal that they will be renewed in some form as early as possible in the next session of this Congress.

I see the distinguished chairman of the Finance Committee (Mr. DOLE) is on the floor and I wonder if I might have his attention. He and I have discussed the issue of energy tax incentives at various times and I appreciate the support he has given me as we have attempted to develop a consensus within the committee on the future for these incentives. As he knows, I am very concerned about the industrial conservation and alternative energy production tax credits which are generally scheduled to expire at the end of 1982. As he also knows, I am anxious to have the Finance Committee consider those credits and, in particular, legislation on which I recently held hearings, S. 750, and I wonder if he might give us some guidance as to his plans for the Senate Finance Committee.

Mr. DOLE. Yes, I would. First let me express to the Senate my sincere appreciation of the fine work that Senator WALLOP has done this year as chairman of our Subcommittee on Energy and Agricultural Taxation. This is one of the most difficult jurisdictional areas within the Finance Committee's purview and I think Senator WALLOP has demonstrated outstanding leadership in the way in which he has handled his responsibilities to date.

Mr. WALLOP. I thank my distinguished chairman very much.

Mr. DOLE. As I have indicated previously to the distinguished Senator from Wyoming (Mr. WALLOP). I, like he, believe that the Finance Committee must try to address the issue of these expiring energy tax credits early in the next session of Congress. I suspect that we will have a variety of very significant tax issues presented to us in the next session and it is my view that consideration of the energy tax credit issues ought to proceed, together with our consideration of those other issues. I think the distinguished Senator from Wyoming (Mr. WALLOP) has done a fine job in preparing the background and laying the foundation for consideration of his legislation and I look forward to working with him next year when the full Senate Finance Committee begins its consideration of his proposals. I should caution, however, that we may very well face the task of raising a substantial amount of additional Federal revenue next year and any extension of energy credits will have to be consistent with our overall fiscal objectives.

Mr. WALLOP. I certainly agree with my distinguished chairman that any extension or restructuring of these credits must fit within responsible budget limitations. I thank the Senator from Kansas (Mr. DOLE) for his support and look forward to working with him next year on legislation to make the energy credits more effective to achieve their originally intended goals.

As I mentioned earlier, while I support section 113 of the continuing resolution, I do have some questions about its effect. If I might have the attention of my distinguished colleagues the Senator from Rhode Island (Mr. CHAFEE), the Senator from Oregon (Mr. HATFIELD), and the Senator from Arizona (Mr. DECONCINI), I would like to ask two questions.

First, I am concerned that this section of the continuing resolution may be viewed as being somewhat inflexible in its application and may restrict the Finance Committee's ability to do certain things. For example, while I have always strongly supported the concept of energy conservation and alternative energy production tax credits, it is my feeling that some of the credits are not working as intended. In other words, the essence of my proposal, S. 750, is not only to extend the credits but to improve their effectiveness. To that end, that legislation along with other proposals which I currently have under consideration, would make several improvements to the existing structure of the energy tax credits. My specific question, then, is first, is it the intent of this section as well as the original resolution to not only prevent premature termination of the existing tax credits, but also to encourage the Finance Committee to consider selective extensions of the effective period for these credits, for example, some of those which are presently scheduled to expire in 1982?

Second, is it the further intention of the authors of this provision and the original resolution that the Finance Committee will have the flexibility to make improvements within the structure of the credits and not be encouraged merely to continue the credits or extend them in their current form if, indeed, it is the feeling of the Finance Committee that the current form of the credits needs improvement?

Mr. CHAFEE. First, let me thank the distinguished Senator from Wyoming (Mr. WALLOP) for the interest he has shown in this area and his continued leadership on the issue of energy tax incentives.

In response to your specific questions, it is clearly my view that the intent of the original resolution is to express the sense of the Senate in support of the existing incentives, and it is also my understanding that the language of the continuing resolution reflects that same intent. It is entirely consistent in my view for the Finance Committee to begin to examine these credits next year and to consider extending some of the credits and making them more effective. I do not feel that this resolution in anyway hampers your proposed approach to these credits. In fact, I believe it indicates to the Senate Finance Committee the strong support that exists within the Senate for the concept of these credits and that recommended improvements are certainly welcome.

Mr. DECONCINI. I agree with the interpretation of the Senator from Rhode Island. It is certainly not my intent to eliminate or even interfere with the proper role of the Finance Committee. I do find it important, however, that this body express clearly at this time its support for the continuation of those Federal tax incentives for energy conservation and the development of renewable energy sources which we have provided for in sections 38, 44C, and 44D, and other appropriate sections of the Internal Revenue Code of 1954. I deeply appreciate the support given by the Appropriations Committee and I thank the distinguished chairman for his patience. I would also like to commend my distinguished colleagues, Senator CHAFEE and Senator MATSUNAGA, for their leadership in gaining such broad bipartisan support for the resolution. I believe there were 64 cosponsors at last count.

Mr. HATFIELD. That is also my understanding of that language in the continuing resolution.

Mr. WALLOP. I appreciate very much the response of the Senators and I would like to congratulate the Senator from Arizona (Mr. DECONCINI) on his most timely and effective work in the Appropriations Committee in urging this language be included in the continuing resolution, and also recognize the outstanding work of the Senator from Rhode Island (Mr. CHAFEE) and the Senator from Hawaii (Mr. MATSUNAGA). Let me indicate to you that that was my interpretation of the original resolution and why I strongly support section 113 of the continuing resolution. These credits should be examined and I look forward to working in the Finance Committee with the distinguished Senator from Rhode Island (Mr. CHAFEE) in that effort. He has always been an extremely effective member of the Finance Committee whose views are widely listened to by the members of that committee and of the Senate as a whole and it would be of great help to me to be able to count on his assistance in bringing that legislation forward.

Mr. CHAFEE. I thank the Senator from Wyoming (Mr. WALLOP) for his kind remarks and I assure him that as I have taken a strong interest in the resolution here before us I likewise will be anxious to participate in the Finance Committee deliberations on the Senator's bill and on other issues relating in general to the existing structure of energy conservation and alternative energy production tax incentives.

Mr. WALLOP. I look forward to the Senator's assistance. Of particular interest to me, as the Senator knows, are the two areas of industrial energy conservation and alternative energy production development. On the energy conservation side I have been working for some time now on a proposal which would allow industry more flexibility in making investments that would qualify for these tax incentives. The current industrial energy

conservation incentives are quite restrictive and in my view where they work, they work somewhat by accident. That is not to say, as I have stressed many times, that they should be eliminated. Rather, it says to me that rather than merely extending them, because I think the concept is good, we ought to look at how to make them more effective. My legislation would improve upon the list approach of current law by providing a new category of investment which would require the taxpayer only to show that his investment had resulted in a saving of so much energy per unit of output. Further, the legislation contains provisions designed to assure that those investments which are so cost effective that they ought to go forward on their own will only receive a reduced credit. Likewise, the legislation would only grant a reduced credit to those investments which are so expensive that they are not sufficiently cost effective that they ought to receive the same level of tax encouragement.

I believe this approach is workable. The vast majority of the witnesses that appeared before my subcommittee last month likewise so believe and I am anxious that the Finance Committee now should get on with the process of consideration of my legislation.

The second area of deep concern to me has been the development of effective incentives for alternative energy development. S. 750, in its current form, contains incentives for the conversion of industrial facilities from the use of oil and gas to coal, and for the production of alternative fuels. We heard considerable testimony at our hearings that other areas of alternative energy development likewise need to be addressed in the development of effective incentives. For example, the current tax incentives, as they have been administered by the Internal Revenue Service, has discriminated against the development of our extensive oil shale and tar sand resources. I am considering legislation to address that imbalance. Further, the application of these credits to synthetic fuel facilities is an area that needs further consideration to provide an effective tax credit incentive as a complement to the commitment we made when the Senate approved the Synthetic Fuels Corporation to assist a limited number of commercial-sized synthetic fuel facilities.

I notice that the distinguished majority leader (Mr. BAKER) is currently on the floor. He and I have discussed this previously and are currently working on legislation in this area. My concern in the synthetic fuels area is that we carry through on the commitment that we made in the last Congress to encourage at least the beginning phases of the development of this potentially important industry. I believe this is still an important goal and that we cannot afford to move away from it merely because of changing perceptions of the need for such a program due to temporary surpluses of oil in the worldwide markets. There are several things we need to do with the existing credits to perfect their application to the synthetic fuels industry. This must be done early next year to make possible the development of these facilities and to carry forward our commitment to those investors who have placed at risk millions of dollars of their own capital on the expectation of a continued program of effective tax incentives to encourage the development of this fledgling industry. In my view three things need to be done to carry out that commitment. First, consideration needs to be given to revising the effective date provisions for the energy credit on these facilities so that development of the facilities can count on the credit for investments made after 1982. Second, the language of the credit as it applies to synthetic fuel facilities needs to be clarified to avoid an extremely restrictive interpretation which IRS has taken which has effectively eliminated the credit for a substantial part of the investment in equipment needed to make these facilities operable. Third, because these projects have such a long construction period, revision needs to be made to the recently passed accelerated capital recovery system to allow accelerated depreciation to be claimed during the construction period. The allowance of progress expenditure depreciation was an essential figure of all of the originally proposed capital recovery schemes, but was removed at the last minute from the Economic Recovery Tax Act in order to allow for the leasing rules. Disallowance of progress expenditure depreciation will have a major impact on the economic viability of these high-cost long construction period synthetic fuel facilities. I know the distinguished majority leader shares my concerns and perhaps he might like to comment at this time.

Mr. BAKER. I thank the distinguished Senator from Wyoming (Mr. WALLOP) for his leadership in this area. The Senator from Wyoming is correct in recognizing my interest in synthetic fuels development. As he knows, I am particularly concerned as to the need to make the existing credits an effective investment incentive for synthetic fuel facilities. As the distinguished Senator from Hawaii (Mr. MATSUNAGA) indicated in his remarks upon the introduction of Senate Resolution 232, one of the projects which could be significantly affected by actions in the energy credit area is a synfuel project in my State. Failure to extend the existing tax credits applicable to that project would have a severe impact on the ability to arrange private financing for the facility. Development of some first generation commercial synfuel facilities which tap some of our vast eastern coal resources must be a national priority if we are to attain our goal of energy self-sufficiency. The beauty of the tax credit approach is that it does not require governmental intervention into select projects on a project-by-project basis. Thus, the tax incentives of which we speak would be available to private entrepreneurs willing to make the necessary financial commitments on their own to go ahead with these projects.

I would like to take one more moment, Mr. President, to thank the distinguished Senator from Rhode Island (Mr. CHAFEE) for his interest and leadership on this matter. This section of the pending legislation—section 113—is based on his initiative, Senate Resolution 232. I support the intent of that resolution and appreciate the opportunity to engage in this colloquy to clarify the flexibility intended by its author.

In closing, again let me thank you, Senator WALLOP, for your leadership in this area and express my support to you of your efforts to have these issues considered early next year by the Senate Finance Committee.

Mr. WALLOP. I thank the distinguished majority leader for his comments and look forward to his continuing support in this area.

I would also like to thank my distinguished colleagues for their leadership in this area and indicate my continued support for their efforts.

MENTAL HEALTH BENEFITS FOR FEDERAL EMPLOYEES

Mr. D'AMATO. Mr. President, I introduced an amendment on November 5 to maintain Blue Cross/Blue Shield's mental health benefits for Federal employees at the 1981 level because Blue Cross had reduced the copayment from 80–20 to 70–30 in 1981 with no limit to the visits; and for 1982 they are proposing to reduce the copayment to 50–50, with a limit of 50 visits. There is something wrong with the Federal employees health benefit program when the Director of the Office of Personnel Management can discriminate against one class of patients by arbitrarily telling the insurance carriers to take their cuts out of mental health.

The American Medical Association supports my amendment because they believe that mental health benefits should be equal and comparable to medical benefits. What is equal and comparable? When mental health benefits are counted as a supplemental benefit equally in every way as medical benefits, that is "equal and comparable." For example, if the duration and frequency of visits to treat medical disorders is determined by medical necessity, then the duration and frequency of visits to treat mental and nervous disorders should be similarly treated. Putting an arbitrary limit of 50 visits on the treatment of nervous and mental disorders denies the mental health professional the opportunity to prescribe a correct and optimal amount of treatment, and denies those Federal workers the right to intensive psychotherapy or psychoanalysis, which may necessitate daily visits.

If the copayment for the supplemental is 80–20, then it should be 80–20 to both medical and mental disorders. If the deductible is $100, then it should be $100 for medical and mental. The same lifetime coverages should apply to both medical and mental. This is what I believe "equal and comparable" to mean.

In my correspondence with my colleagues, I have said I realized OPM's economic shortfall; I did not ask for more benefits or more money from the Federal Government. As a Senator from New York, I have received thousands of letters and calls from Federal employees asking me to encourage OPM not to make mental health benefits one of the primary targets of the cuts. I feel the cuts would have been more reasonable had they been made equally.

I understand Senator STEVENS' posi-

tion. As chairman of the Postal and Civil Service Subcommittee, he is concerned that Blue Cross would drop out of the 1982 season leaving over half the Federal employees without that coverage. I also am encouraged that both Senator STEVENS, and the House Civil Service Subcommittee are prepared to revamp the entire Federal employment health benefit program early in 1982.

There is a need to have a governmental comment and review, to have the negotiations open, and to provide a system whereby mental health benefits are offered on the same footing with the supplemental medical benefits. I look forward to participating in the hearings that Senator STEVENS will be holding on this subject. I also believe there is a need for expert testimony in this field to factually correct some of the misconceptions regarding this treatment; certainly, if we were talking about heart disease, we would want testimony from a cardiologist. I would like to suggest that a mental health professional from the State of New York testify in behalf of the American Psychiatric Association and the American Psychoanalytic Association.

I want to commend Senator STEVENS and his staff for the cooperation they have given to me and my staff on working toward a solution to this problem.

Mr. STEVENS. Mr. President, I would like to commend Senator D'AMATO for his willingness to recognize the reality of the situation we face.

It is important we let the 1982 Federal employment health benefit program follow this year's course without further interference. Due to spiralling costs and budget constraints, we need to look seriously at revamping the program. To make any changes at this time, however, could prove disastrous.

I have asked the GAO to start an in-depth study of alternative methods of providing insurance for Federal employees, and I am committed to holding hearings in early 1982 on this subject. At that time, I would be pleased to have the distinguished Senator from New York testify, as well as a New York mental health professional representing the American Psychiatric Association and the American Psychoanalytical Association.

I am prepared to support adequate coverage for mental health benefits. Mental health care should be treated the same as other forms of health care. If reductions in Federal employee health care should become necessary, no form, including the mental health benefit, should be forced to bear a greater share of the reductions.

Mrs. HAWKINS. Mr. President, I am pleased to associate myself with the remarks of my distinguished colleagues from Alaska and New York, Senators STEVENS and D'AMATO, concerting mental health benefits under the Federal employee's health benefits plan. Earlier this year, during the consideration of legislation to establish a mental health, alcoholism, and drug abuse block grant, I fought to insure that Federal funding for mental health would not be discriminated against. I was afraid that the stigma against mental illness and the reluctance of mentally ill individuals to express their need for Federal assistance in this area would result in a loss of funding for this critical area. Fortunately, through the efforts of Senator HATCH and other members of the Senate Labor and Human Resources Committee, we were able to insure an earmarking of funds for mental health programs which would phase out as States absorbed the administration and distribution of funds under this block grant.

It is for these reasons that I supported the proposed D'Amato amendment. And it is for these reasons that I support the efforts of Senator D'AMATO and Senator STEVENS to review the procedures of the Office of Personnel Management that resulted in this reduction in mental health benefits. I am concerned that mental health benefits under the Federal employees health benefits plan is being unfairly discriminated against. The Office of Personnel Management is faced with making reductions in the Federal cost under the FEHB program. I realize that these reductions in health benefits must be made, but I am concerned that a unilateral decision was made by the Office of Personnel Management, notwithstanding clear congressional expressions of concern, that mental health benefits be reduced.

Last April, the chairman of the Senate Labor and Human Resources Committee joined Senators D'AMATO, DOMENICI, and WARNER in a letter to OPM and Blue Cross-Blue Shield urging that "Federal employees coverage for outpatient psychotherapy be restored to the previous level of 20-percent payment by the employee and 80 percent by insurance, and that the $50,000 lifetime limit on treatment for nervous and mental disorders be removed"; the OPM and Blue Cross-Blue Shield have chosen to not only ignore this congressional recommendation, but to further reduce the Federal copayment and impose a visit maximum as well.

Mr. President, I am concerned that the Office of Personnel Management took this unilateral action in defiance of congressional intent, and without considering the effect that this reduction will have on the individuals who are dependent upon these health benefits. Because of the stigma that still exists concerning mental illness, many individuals are reluctant to seek the professional help they need. This action by the Office of Personnel Management seems to reinforce this stigma, by deeming mental health benefits the most expendable.

I support and am grateful for Senator STEVEN's initiative to hold hearings to revamp the entire Federal employees health benefits program. I support his and Senator D'AMATO's efforts to insure that mental health benefits will be provided on an equal and comparable basis to medical benefits.

ENERGY CREDITS

Mr. MITCHELL. Mr. President, I am pleased to note that the continuing resolution contains the basic thrust of Senate Resolution 232. This resolution, which has gained the support of over 60 Senators, expresses the sense of the Senate that the existing tax credits for conservation and renewable energy development should not be eliminated or reduced.

I have addressed the Senate before on my views of the importance of the tax credits and of the need for Senate Resolution 232. I believe that the credits are essential to maintaining a balanced energy policy. With the budget cuts already enacted, the credits are the only conservation and renewable energy sources. Furthermore, the announcement by the President that the administration is considering a proposal to repeal the energy credits has made businesses and individuals reluctant to pursue energy related investments. An affirmative statement by the Senate in support of the credits will encourage them to continue their investment.

One of the tax credits that is protected by the resolution is an 11-percent credit for investments in hydroelectric facilities. This credit is especially important for Maine, because hydroelectric energy is one of our few indigenous energy resources generally available throughout the State.

The National Alliance for Hydroelectric Energy has prepared a paper discussing several issues involved in the effect of the tax credit on hydroelectric energy development. I found the paper very informative and would like to share it with my colleagues.

I ask unanimous consent that it be included in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

ASSESSMENT OF ENERGY TAX CREDITS

ISSUE

The repeal of the Energy Tax Act is contrary to the underlying premise of the program for economic recovery that was enacted this spring.

DISCUSSION

The proposed repeal of the energy tax credit is inconsistent with the administration's program for economic recovery. Earlier this year, the administration asked Congress to reduce or completely eliminate many of the direct spending energy programs that were enacted during recent years. In urging the acceptance of these recommendations, the administration assured Congress that existing tax incentives for energy conservation and alternative energy production would be retained and that they would provide the added incentive needed to stimulate energy development. In the case of the hydropower industry, the administration recommended the complete elimination of DOE's small-scale hydropower program on the ground that the combined 21 percent energy and regular investment tax credit for hydropower projects provides a sufficient incentive for hydropower development:

The administration will propose a 34 percent reduction in energy supply programs in geothermal, energy storage, electric energy systems, energy impact assistance, environmental studies, uranium resource assessments and hydropower as part of the general effort to employ market forces instead of bureaucratically-administered programs to achieve national energy goals. These reductions will:

Terminate subsidies for all additional small hydropower demonstrations since sufficient incentives are already provided through a 21 percent investment tax credit

and through credit programs in the Department of Agriculture.*

Many members of the private sector and many members of Congress supported the President's program because of the administration's assurances that the tax incentives for alternative energy development would be retained. The repeal of the energy tax credit would be a direct repudiation of this basic understanding between the administration and its supporters in Congress and the private sector. It would also undermine the very foundation of the energy program contained in the President's economic recovery program.

ISSUE

The Energy Tax Credit for hydropower projects will not result in revenue loss to the Treasury because the cost of the credit will be more than offset by increased tax revenues to the Treasury.

DISCUSSION

The energy tax credit represents an initial cash outlay by the government to stimulate the development of hydropower projects. However, because of the additional taxes that will be collected on the operating profits of the additional hydropower projects which are developed as a result of the credit, the energy tax credit results in a net revenue gain, not a net revenue loss, to the Treasury. Initial projections by the National Alliance for Hydropower Energy indicate that the total additional tax revenue generated for the Treasury by projects which would not have been built without the credit is at least 1.5 times as great as the total revenue loss attributable to the credit.

ISSUE

If the administration proposes the repeal of the energy tax credit, it will further undermine the confidence of Wall Street and the business community in its economic recovery program.

DISCUSSION

Since it assumed power, the Reagan administration has pursued conflicting policies regarding the energy tax credit. It urged Congress to reduce or completely eliminate many of the direct spending energy programs enacted during the Carter administration, relying on the availability of the energy tax credit to stimulate alternative energy development and energy conservation. At the same time, however, it proposed extremely restrictive "at risk" rules as part of the Economic Recovery Tax Act. If enacted in the form proposed by the administration, these rules would have substantially diminished the impact of the energy and investment tax credits. These proposals sent conflicting signals to the energy industry, and certainly contributed to the business community's lack of confidence in the administration's program.

Congress accepted many of the administration's recommended cuts in direct spending programs, but expressly exempted many energy projects from the proposed at-risk rules. The energy industry had just begun to adjust to the changed climate created by these congressional actions when the administration announced its intention to seek repeal of all of the tax incentives for alternative energy development and energy conservation. This has once again created uncertainty regarding the future of the alternative energy industry. This continuing atmosphere of uncertainty has further aggravated the lack of confidence on the part of industry and Wall Street in the President's economic recovery program, and is reminiscent of the constant changes in policy which were so damaging to national confidence during the Carter administration.

In order to restore confidence in the consistency of the administration's policies and in order to permit the critical development of renewable domestic energy resources, the Treasury Department should pursue policies which are consistent with the prior actions of the administration and Congress, and should not propose the repeal of the energy tax credit.

ISSUE

Other incentives do not provide adequate support for hydropower development.

DISCUSSION

It has been argued that incentives provided in the recent economic recovery tax act are adequate to stimulate hydropower development. However, this is simply not the case. Preliminary studies conducted by the National Alliance For Hydroelectric Energy demonstrate that the replacement of the ADR depreciation system with the ACRS system will only increase the return to hydropower developers by merely 5 percent (see the following table).

RETURN ON EQUITY

With Energy Tax Credit:

	Percent
ADR	21.7
ACRS	22.8

Without Energy Tax Credit:

	Percent
ADR	12.1
ACRS	12.7

While the research and development credit is of some interest in refining hydropower equipment design, established technology is now available off-the-shelf to equip new facilities. Thus, the research and development credit will leave little impact on the growth of installed hydropower capacity.

ISSUE

If the energy tax credit for hydroelectric development is repealed, energy decisions will not be based on the true cost of energy alternatives, and the lack of parity between hydropower and the oil industry will be exaggerated.

DISCUSSION

One argument that has been raised to justify the repeal of the energy tax credit is that without the credit, energy will be priced to reflect its true cost and energy choices will therefore be based solely on the relative cost of various forms of energy. However, this is not the case, since energy choices would still be distorted due to heavy subsidies which remain in place for conventional sources of energy, and particularly for imported petroleum. Oil and gas receive a substantial subsidy as a result of the deduction for intangible drilling and development costs and the availability of percentage depletion.

A particularly substantial subsidy for the use of imported oil is the "DOD surcharge"—the incremental portion of the defense budget necessary to "protect" our heavy dependence on Middle East and other foreign sources of petroleum. It is estimated that a quarter of our defense budget is spent to protect our foreign sources of energy. This is equivalent to $20 per barrel of imported oil, bringing the total cost of imported petroleum to more than $55 per barrel.

The federal government has also provided substantial subsidies to the nuclear industry. These subsidies include funding for research and development and for commercialization. Over the years, billions of dollars have been spent on these subsidies. The subsidies are not reflected in the cost of energy to the consumer, but are instead paid out of general tax revenues.

If the hydropower tax credit is repealed, while substantial subsidies for imported petroleum and other conventional sources of energy remain in effect, market forces will be skewed and will not truly determine energy choices. In fact, Government incentives will actually encourage the use of conventional energy forms over the use of hydropower as an energy source. This result is clearly contrary to both our near term and our long term national interest. The energy tax credit for hydropower is necessary to offset, in part, this imbalance.

ISSUE

The energy tax credit for hydropower projects is necessary to encourage hydropower development.

DISCUSSION

Many energy projects, and particularly hydroelectric projects, entail such high capital costs that they do not ordinarily provide a sufficient rate of return to attract investors. While the availability of the energy tax credit has made these energy projects attractive to a variety of corporate and individual investors, these investors would probably not invest in such projects if the energy tax credit were repealed.

The typical return on equity of the 90th percentile of Fortune 500 corporations in 1980 was 22 percent after taxes. With the energy tax credit, a typical hydropower project offers a return of 22.8 percent after taxes. However, without the energy tax credit, the return on investment of a typical hydropower drops by 44 percent to 12.7 percent. Because this reduced rate of return is actually less than can be realized on many other, more conventional investment, few investors would be interested in hydropower projects if the energy tax credit were repealed.

ISSUE

Constant changes in government policy have created a particularly unfavorable climate for the development of the emerging hydropower industry.

DISCUSSION

Although hydropower is one of the oldest forms of energy production—having supplied 40 percent of U.S. power in 1940—the small-scale hydropower industry is essentially a new industry. Even under normal circumstances, a new industry is uncertain and precarious in its infancy. However, the constant reversals of federal policy and the substantial periods of uncertainty surrounding the regulatory and financial climate for hydropower development have dramatically increased the risks associated with the industry. This administration cannot expect the industry to develop into a flourishing, self-sustaining industry amidst the constantly changing signals from Washington. If the hydropower industry is ever to develop into a stable industry, which is capable of making a substantial contribution to the resolution of the nation's energy crisis, the administration must begin to give it consistent treatment.

ISSUE

The energy tax credit has been an effective incentive.

DISCUSSION

The energy tax credit, in combination with other Federal incentives, has been an extremely effective incentive for hydropower development. This is demonstrated by the substantial rise in the number of preliminary permit applications filed with the Federal Energy Regulatory Commission. In 1976, only two such applications were filed. By the end of 1981, it is expected that more than 1,800 applications will have been filed. These 1,800 applications represent more than 18,000 megawatts of installed capacity. This dramatic increase is in large part due to the stimulative effect of the hydropower credit.

ISSUE

Renewable energy resources can make a significant contribution to the resolution of the nation's energy crisis.

DISCUSSION

Studies show that the total energy potential from hydropower, geothermal energy, wind energy, cogeneration and waste recycling is almost 5 billion barrels of oil equivalent (BOE) per year. The latter is equal to

*The President's Budget Reform Plan, White House, (1981), p. 4–18.

approximately 13 million BOE per day which is about twice our daily oil imports.

The national interest requires the maximum development of these renewable resources in order to minimize our dependence on increasingly insecure foreign energy sources. Energy tax credits can have significant impact in stimulating this development. It would be a serious mistake to withdraw the critical support provided by energy tax credits at this time.

ISSUE

The energy tax credit is particularly important under current economic circumstances to offset the impact of rising interest rates.

DISCUSSION

The energy tax credit is a necessary incentive to promote the development of the hydropower industry. However, it is particularly important in these times of rising interest rates. Interest rates during recent months have been unusually high, and are not expected to decrease substantially in the foreseeable future. The energy tax credit on a typical project which must be financed at 21 percent interest has the same effect as an 8 percent reduction in the interest rate. Even at 13 percent interest, many hydropower projects barely provide a sufficient return on investments to attract investors. Without the benefit of the energy tax credit, these hydropower projects would be completely unjustifiable.

IN SUPPORT OF ENERGY TAX CREDITS

Mr. CHAFEE. Mr. President, I commend the Appropriations Committee for including in the continuing appropriations resolution section 113 which states the following:

It is the sense of the Senate that the President of the United States should not include in his recommendations for revenue enhancements any recommendations which would have the effect of reducing Federal tax incentives for energy conservation or the development of renewable energy sources.

This language, which was brought before the committee by Senator DECONCINI, parallels Senate Resolution 232 which I introduced last month with Senator MATSUNAGA, Senator DECONCINI, and a broad bipartisan coalition of 60 other Senators. In addition, an identical resolution circulated in the House of Representatives has been cosponsored by 260 Members of that body.

Our intent is quite simple and direct. We are sending the administration a clear message that Congress will not accept a reduction or early termination of the conservation and renewable energy tax incentives now in the Internal Revenue Code.

Each year since 1977, these tax credits have helped about 5 million taxpayers, both businesses and individuals, make expensive energy-saving investments. The credits offset from 15 to 40 percent of the cost of purchasing and installing items ranging from insulation and weatherstripping to solar and wind energy systems. They were enacted for a limited period of time, most expiring by the end of 1985, to help Americans help their country achieve the important goal of independence from imported foreign oil.

It is clearly the view of a majority of the Senate and House that the energy tax incentives for conservation and renewable energy supply will remain in place in the Tax Code. Furthermore, Mr. President, we take this opportunity to reassure both the purchasers and manufacturers of energy equipment qualifying for the various tax credits that they may proceed with their investment plans with the certainty that Congress will stand behind these tax incentives.

At this point, I would like the RECORD to show that the following Senators are firmly in support of the existing energy tax credits: Mr. CHAFEE, Mr. MATSUNAGA, Mr. PELL, Mr. RUDMAN, Mr. MITCHELL, Mr. STAFFORD, Mr. DODD, Mr. DURENBERGER, Mr. BAUCUS, Mr. LEAHY, Mr. GOLDWATER, Mr. TSONGAS, Mr. PACKWOOD, Mr. CRANSTON, Mr. DECONCINI, Mr. BURDICK, Mr. LEVIN, Mr. RIEGLE, Mr. KENNEDY, Mr. HATFIELD, Mr. EXON, Mr. COHEN, Mr. ZORINSKY, Mr. D'AMATO, Mr. HART, Mr. HUDDLESTON, Mr. QUAYLE, Mr. ANDREWS, Mr. PERCY, Mr. SPECTER, Mr. BRADLEY, Mr. HEINZ, Mr. HAYAKAWA, Mr. ARMSTRONG, Mr. BOSCHWITZ, Mr. RANDOLPH, Mr. HEFLIN, Mr. HUMPHREY, Mr. BUMPERS, Mr. PRYOR, Mr. SARBANES, Mr. FORD, Mr. GORTON, Mr. WILLIAMS, Mr. CHILES, Mr. MELCHER, Mr. JACKSON, Mr. CANNON, Mr. INOUYE, Mr. METZENBAUM, Mr. HOLLINGS, Mr. SCHMITT, Mr. SASSER, Mr. WALLOP, Mr. DIXON, Mr. STEVENS, Mrs. HAWKINS, Mr. KASTEN, Mr. PROXMIRE, Mr. EAGLETON, Mr. MOYNIHAN, Mr. WEICKER, and Mr. MURKOWSKI.

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS AMENDMENT TO THE CONTINUING RESOLUTION

Mr. GLENN. Mr. President, during markup of the continuing resolution—House Joint Resolution 357—on Tuesday of this week, Senator ABDNOR added language to the bill which will prohibit the premature reorganization of the Bureau of Alcohol, Tobacco and Firearms (BATF) of the Department of the Treasury. The pertinent language is as follows:

Provided no funds are made available pursuant to this resolution to accomplish or implement a proposed reorganization of the BATF before March 15, 1982, such reorganization plan may be implemented after March 15, 1982, unless disapproved by the House and Senate Committees on Appropriations.

Shortly after the Senate began consideration of House Joint Resolution 357 yesterday, the Senator from South Dakota (Mr. ABDNOR) and I engaged in a colloquy in which he assured me that it was his intention, as well as the intention of the Committee on Appropriations, that BATF's arson enforcement program would be maintained and effectuated under any ultimate reorganization plan that is finally approved.

Because of the limitation language and the assurance I received from the subcommittee chairman, I did not go forward with my proposed amendment to insure adequate funding levels for BATF's arson enforcement program. When the Senate completes action on House Joint Resolution 357 today or tomorrow, I will urge the conferees to insist on an adequate level of funding for this worthwhile program.

Arson in the United States: Represents the highest rate of arson in the world; has become this Nation's fastest growing crime, quadrupling in the last 10 years and increasing tenfold in dollar losses; represents 25 percent of all fires and also 25 percent of your fire insuance premiums; kills 1,000 people annually; injures as many as 10,000 more; causes direct property losses of at least $1.3 billion; and results in indirect losses estimated at up to $15 billion.

The most effective Federal program aimed at cracking down on those who put the torch to property is the antiarson program of the BATF. The BATF arson enforcement program has been a model of Federal, State, local cooperation. Through it, the Federal Government has provided vital assistance to States and localities which bear the major law enforcement responsibility in this area. This is attested to by the recent adoption of a resolution in support of the program by the International Association of Chiefs of Police.

BATF has organized national response teams capable of responding to any location in the country within 24 hours to assist in major arson investigations which have, in the 12 months which ended August 31, 1981, resulted in 8 indictments out of 21 investigations, with 4 cases being determined to be accidental and the remaining 9 cases still under active investigation; initiated 667 arson investigations which resulted in 303 suspects being recommended for prosecution during fiscal year 1980, with a ratio of 45 defendants per 100 investigations compared to the national average of 9 defendants per 100 investigations. In addition, 79 defendants were convicted during fiscal year 1980 and cases are still pending against others; organized task forces, such as the one which solved the MGM Grand Hotel fire in Las Vegas; achieved conviction rates in arson cases of 40 percent, 60 percent, 81 percent, and 91 percent in Philadelphia, Chicago, Houston, and Los Angeles, respectively; conducted arson-for-profit training courses for State and local investigators; and provided laboratory assistance in complex cases.

BATF's antiarson program is cost-effective. In fiscal year 1980, BATF's investigative efforts resulted in $54 million in "insurance dollars saved"—the potential payout saved for arson-related claims. Moreover, the elimination of the program would result in what I consider inexcusable waste—the waste of the invaluable human resources present in the technical and investigative expertise of the Bureau's special agents in this field, who are the product of extensive experience and training.

The Treasury Department's reorganization plan is a hasty and ill-conceived plan under which as many as 2,200 employees, including 330 in the arson enforcement program, may lose their jobs. The Department has not bothered to study what the impact of such a reorganization would be on the agency's law enforcement activities. The Department's proposed unilateral action would deprive Congress of its prerogative to examine the reorganization plan and its potential impact on BATF's law enforcement activities.

At present, we have virtually no details or specifics about the plan, nor the rationale or policy behind it. I ask unan-

imous consent that a Treasury newsletter be printed in the RECORD at the conclusion of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GLENN. Mr. President, this is the extent of the information I have been able to obtain from the Department concerning the reorganization. Similarly, I have not received any response to my letter dated October 1, 1981, to Secretary Regan expressing my concern about the BATF's arson program vis-a-vis the proposed reorganization, except to say that my letter was received.

This unilateral action by the Treasury Department operating under a veritable cloak of secrecy is totally unacceptable. Congress must hold hearings on the reorganization plan, especially since it would abandon BATF's arson enforcement program.

The elimination of this program is opposed by the International Chiefs of Police. I ask unanimous consent that a recent resolution by the ICP be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. GLENN. Mr. President, the elimination of this program is also opposed by countless others who are engaged in the fight against arson daily. A recent letter I received from George J. DuBong, Esq., of the San Diego district attorney's office is illustrative. In his letter, Deputy District Attorney DuBong stated that:

Arson is a growing crime which poses a serious danger to the population. With the assistance of agencies such as BATF, we have been able to commence a program to attempt to combat this problem. In 1978 we only prosecuted six (6) cases; in 1979 we prosecuted twenty-three (23) cases and in 1980, after forming the special arson unit, we were able to prosecute seventy-seven (77) arson cases and have continued to increase those numbers in 1981. These figures do not reflect the number of investigations being conducted over the last two years of sophisticated arson-for-profit groups affecting Interstate Commerce or connected to organized crime. The loss of the BATF agents qualified as arson specialists would not only be a severe blow to the attempts to combat this crime, but also would be a tragic waste of money.

Despite the reorganization plan, the arson enforcement program is consistent with the administration's goals of getting tough on crime and promoting the concept of federalism. As its statistics indicate, BATF has been effective in fighting the violent crime of arson while striking the appropriate balance of Federal-State cooperation.

The arson enforcement program is also consistent with the administration's goal of assisting State and local authorities and expanding Federal jurisdiction over arson. In a recent statement before the Senate Judiciary Committee's Subcommittee on Criminal Law, Attorney General William French Smith stated:

The Federal Government should not and cannot usurp the primary criminal justice authority of the states. But that does not mean each must go its separate way, paying no heed to how it might assist the other in such a matter of common concern.

He continued:

The Federal Government has a fundamental responsibility to investigate and prosecute * * * complex white collar crimes that defy the ability of state and local governments operating under more limited jurisdictional constraints to deal with effectively.

This is precisely the role that BATF performs. BATF's enforcement approach has been structured toward the investigation of "arson-for-profit" schemes related to commercial or industrial interstate activities, especially those schemes perpetrated by members of organized crime, white-collar criminals, members of organized arson rings, or violent criminals. Priority attention is focused on assistance to State and local agencies who are experiencing significant arson problems that span multijurisdictional boundaries and/or exceed the capabilities of local authorities.

The Attorney General also stated that the administration will support legislation that would expand Federal jurisdiction over arson, that is, amend 18 U.S.C. 844(i) "to allow Federal authorities to investigate arson fires of buildings used in or affecting interstate commerce started by any means * * *" Since the investigative jurisdiction for BATF's arson enforcement program emanates from the statutory enforcement responsibilities defined in chapter 40 of title 18, United States Code, including 18 U.S.C. 844(i), it is the appropriate agency to fulfill the Federal responsibility of investigating and prosecuting these type of arson crimes.

In its report on September 22, 1981, the Senate Appropriations Committee also recognized that BATF "is in a unique position to combat certain types of arson crimes under the 'explosive jurisdiction' mandated in title 11 of the Organized Crime Control Act of 1970 and title 2 of the Gun Control Act of 1968." The report continues:

In defining the term "explosive" in Title 11, Congress made clear its intent to cover every conceivable type of explosive material utilized by the criminal element to damage or destroy persons and/or property. BATF has the statutory jurisdiction and the responsibility to attack explosives-related arson crimes that warrant Federal attention or assistance. BATF has initiated a realistic approach to the fight against the arson crime problem by selectively focusing on the investigation of explosives-related arson-for-profit schemes directed toward commercial/industrial interstate activities, when the perpetrators of these crimes are suspected members of organized crime, white collar criminals, members of organized arson rings, or other violent criminals. BATF's arson program further provides for investigative assistance to state and local authorities experiencing a significant arson problem, especially when the nature or magnitude of the problem exceeds their jurisdiction or resources. BATF has promoted and applied the task force approach to attack identified arson problems in specific areas. BATF has four national response teams located in the Midwest, Northeast, Southeast and Western regions of the country. These teams have the capability of providing a 24-hour response to any location in the country to assist in the investigation of explosives-related incidents of extreme, major proportions.

Mr. President, I hope that my colleagues in both Houses of Congress will join me in continuing this extremely effective arson enforcement program within the Department of Treasury.

EXHIBIT 1

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS FUNCTIONS TO BE REASSIGNED

The Department of Treasury announced today that the functions and personnel of the Bureau of Alcohol, Tobacco and Firearms (BATF) will be reassigned to the U.S. Secret Service and the U.S. Customs Service.

Upon the completion of certain administrative and technical measures and Congressional appropriation of necessary funds, the statutory firearms and exlosives enforcement functions and personnel will be reassigned to the Secret Service; the alcohol and tobacco revenue collection and regulatory functions and personnel will be reassigned to the Customs Service. Both the Secret Service and Customs are part of the Treasury Department.

The Bureau of Alcohol, Tobacco and Firearms as a separate organization will no longer exist.

The reorganization will improve the effectiveness and efficiency of both Customs and the Secret Service. It will allow a significant sayings in administrative costs and will provide a more effective utilization of personnel in the Department.

Personnel whose positions are affected as a result of the phaseout of BATF will be given every possible assistance for placement in other positions within the Treasury Department. Treasury Department bureaus have been requested to give preference to BATF employees when hiring to fill vacant positions.

EXHIBIT 2

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS ANTI-ARSON EFFORTS 1981

Whereas, The International Association of Chiefs of Police is a professional law enforcement association comprised of chief law enforcement administrators from the United States and 66 nations; and

Whereas, Arson and arson-related crimes represent a significant and growing law enforcement problem in the United States; and

Whereas, The widespread and indiscriminate character of arson crimes result in death and injury to targeted and innocent victims alike, thereby creating a serious hazard to public safety, causing billions of dollars in property loss yearly; and

Whereas, Arson schemes are often complex, multijurisdictional and geographically unconfining in nature, with the presence of organized crime and white collar criminals further compounding the problem for state/local agencies acting alone; and

Whereas, The Bureau of Alcohol, Tobacco and Firearms active role through the application of Arson Task Force units, National Response Teams, training, laboratory and technical expertise has provided, in concert with other federal agencies, invaluable assistance to state/local agencies in addressing violent arson crimes on a national basis; now, therefore, be it

Resolved, That the International Association of Chiefs of Police opposes any curtailment to federal anti-arson activity and support; and be it further

Resolved, That the International Association of Chiefs of Police supports and endorses the continued efforts of the Bureau of Alcohol, Tobacco and Firearms to address those elements of arson-related criminal activity that warrants federal emphasis; and be it further

Resolved, That copies of this Resolution be forwarded to the President of the United States, the Attorney General of the United States, the Director of the Office of Manage-

ment and Budget and to other appropriate parties interested in the prevention and control of arson.

FUNDING FOR VETERANS' PROGRAMS

Mr. CRANSTON. Mr. President, as ranking minority member of the Veterans' Affairs Committee, I would like to comment on the funding levels provided in the second continuing resolution for fiscal year 1982, House Joint Resolution 357, now pending before the Senate.

VETERANS' ADMINISTRATION PROGRAMS GENERALLY

With respect to Veterans' Administration programs generally, I was pleased to note that with respect to two major VA accounts—the medical care account, which funds the operation and maintenance of VA health-care facilities, and the general operating expenses account (GOE), which funds the administration of all VA benefit programs other than health care—the Appropriations Committee rejected, as did the House in its version of this resolution, the large cuts that the President had recommended in the levels set forth in the conference report on H.R. 4034, the HUD-Independent Agencies Appropriations Act, 1982.

The administration's position on the appropriate fiscal year 1982 funding levels for these accounts was dealt with in a recent exchange of correspondence—printed in full on pages 26870-26871 of the daily edition of the CONGRESSIONAL RECORD for November 5, 1981—between myself and the Administrator of Veterans' Affairs Robert P. Nimmo. In Bob Nimmo's November 5 letter to me in response to my October 20 letter to him, he stated:

For the record, I did meet with the Deputy Director of OMB, Mr. Ed Harper, and other OMB senior officials to discuss the September 30 revisions and to express my particular concern about the magnitude of reductions in the Medical Care and General Operating Expenses appropriations. Based on our discussions and on their understanding of the President's commitment to a high quality VA health care system and to the maintenance of the current benefit service level, it was agreed that the Administration would not oppose restoration of $296.9 million in Medical Care and $55.8 million in General Operating Expenses, as reflecteed in the Conference Report for 1982 appropriations. As I have already noted, we are functioning under the Continuing Resolution with this understanding.

In conclusion, I am quite pleased at having been able to work effectively within the Administration to protect those essential veterans programs that the President so strongly supports.

Thus, insofar as those two accounts are concerned, the House of Representatives in passing this resolution and the Senate Appropriations Committees in reporting it were in agreement that fiscal year 1982 funding should be provided at the HUD-Independent Agencies conference report levels and, I am pleased to note, the Administration acquiesced in those decisions.

Also, I am gratified that the distinguished majority leader (Mr. BAKER) agreed to my suggestion to him that his amendment to make an overall 4-percent reduction in various accounts expressly provide an exception for the VA's medical care account.

With respect to the remaining nonentitlement VA accounts, the Appropriations Committee recommended the same cuts from the HUD-Independent Agencies conference report as the President has proposed, and those accounts, together with the GOE account, are all subject to the 4-percent-reduction provision adopted by the Senate—without my support, I might add. I believe that these cuts are unwarranted but, since the House has, in its version of this continuing resolution, adopted the HUD-Independent Agencies conference report levels, I believe that there is room for satisfactory outcomes to be achieved.

Thus, Mr. President, I would hope that—based on the House action on the HUD-Independent Agencies conference report as well as on this continuing resolution—the House conferees would resolutely resist any cuts substantially below the conference report levels for the VA nonentitlement accounts other than medical care and GOE.

GI BILL CORRESPONDENCE TRAINING BENEFITS

Mr. President, I note, with respect to appropriations for the veterans' readjustment benefits account, that the continuing resolution as reported would incorporate the funding level proposed in the President's September 30, 1981, revised budget request $1,938,800,000, which is $280 million higher than the level previously requested by the administration. The basis for this increase is, according to the revised budget request, to "provide funds to handle increases in trainee caseloads and average payments." In addition, the President's budget request notes that this level "reflects offsets due to the termination of assistance for flight training, the reduction in assistance for correspondence courses, and the elimination of the education loan program."

I would also note that, since this is an entitlement account, it is also excluded from the 4-percent-reduction provision.

Thus, the President's budget request and the pending resolution take into account the cost savings related to veterans' readjustment benefits that were signed into law by the President in section 2004 of the Omnibus Budget Reconciliation Act of 1981, Public Law 97-35. Specifically, the level now contained in the pending continuing resolution reflects the modification made in the authority for GI bill benefits.

Thus, with specific reference to benefits for correspondence training, the pending measure provides funding based on the reduction, from 70 to 55 percent—in the portion of the established charges that the VA pays under section 1786(a) of title 38, United States Code—that took effect under the Reconciliation Act with respect to course work completed and submitted after September 30, 1981.

Mr. President, it is important to note that the continuing resolution provision for the veterans' readjustment benefits account specifically supercedes the provision in the conference report on H.R. 4034—H. Rept. No. 97-222—the HUD-Independent Agencies Appropriations Act, 1982, for that account.

As I discussed that conference report provision in my statement on an amendment to S. 266, the proposed "Veterans' Administration and Department of Defense Health-Care Resources Sharing Act"—which appeared on pages S12255-7 of the daily edition of the RECORD for October 27, 1981—some question existed as to whether a veteran's entitlement to GI bill correspondence training benefits would be considered as continuing to exist under the HUD-Independent Agencies conference report as incorporated by reference into the first continuing resolution, House Joint Resolution 325.

In my view, the entitlement did continue, and I am very pleased that, by including the President's revised budget request for the readjustment benefits account, which includes funding for correspondence training, this second continuing resolution as it will be passed by the Senate, would resolve all doubt on that score. Under the pending measure, GI bil benefits for correspondence training clearly would continue to be available.

DISABLED VETERANS OUTREACH PROGRAM

Mr. President, I initiated a November 4 letter, in which nine of my colleagues on the Senate Veterans' Affairs Committee joined, to the distinguished chairman of the Subcommittee on Labor-HHS-Education Appropriations (Mr. SCHMITT) to express our strong support for funding of the disabled veterans outreach program (DVOP) in fiscal year 1982 at the level of $43 million, the same level approved by the House in H.R. 4560, the Labor-HHS-Education Appropriations Act, 1982.

This program, which is conducted pursuant to section 2003A of title 38, United States Code, which I authored in the Veterans' Rehabilitation and Education Act of 1980, is one of the most successful and significant efforts addressing the problems of unemployment among disabled veterans—specifically among service-connected disabled Vietnam-era veterans. Since its inception in 1977, DVOP has contributed to the placement of more than 174,000 disabled veterans in jobs.

On November 12, Chairman SCHMITT advised me by letter that the full Committee on Appropriations had approved, in connection with H.R. 4560, an earmarking of the $43 million we had requested for DVOP in fiscal year 1982. This level, as he pointed out in his letter, would fund the staff level—approximately 2,000—required by title 38 for the program.

Mr. President, I am very grateful to the Appropriations Committee for taking this action, and I would note that section 101(a) of the continuing resolution as reported would provide a $43-million funding level for this important program to help disabled veterans secure productive employment.

I ask unanimous consent, Mr. President, that the November 4 and November 12 letters to which I referred be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., November 4, 1981.

Hon. HARRISON SCHMITT,
Chairman, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, Committee on Appropriations, Washington, D.C.

DEAR JACK: We would like to convey to you, and to the members of the Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, our strong support for the Disabled Veterans Outreach Program (DVOP) and for funding of this program in fiscal year 1982 at the level of $43 million—the level already approved by the House of Representatives in H.R. 4560. We believe that the DVOP program, which is conducted pursuant to section 2003A of title 38, United States Code, as added by the Veterans' Rehabilitation and Education Act of 1980, is one of the most successful and significant efforts addressing the problem of unemployment among disabled veterans—specifically among service-connected disabled Vietnam-era veterans.

Under the DVOP program, veterans—most of whom are disabled Vietnam-era veterans—are assigned to local employment service offices and other locations. It is their job to identify other disabled veterans in need of employment assistance and to provide needed employment services, including counseling, job development, and placement. This program is designed to employ on the DVOP staff formerly unemployed disabled veterans who understand the needs of other veterans in the same predicament and can serve as models demonstrating to employers how well disabled veterans can work when given a chance. A heavy emphasis is placed on the development of, and placement in, private sector jobs.

The success of the DVOP program has been impressive. To date, more than 174,000 disabled Vietnam-era veterans have been placed in jobs as a result of DVOP efforts. The DVOP program is also a very effective complement to the veterans' readjustment counseling program, which is conducted by the Veterans' Administration and through which Vietnam-era veterans still encountering difficulties in making successful transitions from military to civilian life may seek assistance at storefront "Vet Centers". The number one problem expressed by veterans who have sought assistance at the Vet Centers is unemployment. Thus, the DVOP program, through referrals from the Vet Centers functions as an integral part of the readjustment process.

We therefore request Jack that you give careful consideration to our interest in and commitment to the DVOP program in connection with your considerations.

We would appreciate your favorable consideration of this request. Please let us know if we can provide any additional information concerning DVOP or any other matter.

With warm regards,
Cordially,
Alan Simpson, Chairman, Alan Cranston, Ranking Minority Member, Strom Thurmond, Robert T. Stafford, Bob Kasten, Jeremiah Denton, Frank H. Murkowski, Jennings Randolph, Spark M. Matsunaga, and George Mitchell.

U.S. SENATE,
Washington, D.C., November 12, 1981.

Hon. ALAN CRANSTON,
Committee on Veterans' Affairs, Washington, D.C.

DEAR ALAN: Thank you for your letter expressing support for funding the Disabled Veterans Outreach Program (DVOP) at $43,000,000 in fiscal 1982.

The full Appropriations Committee in marking up the Labor-HHS-Education Bill last week provided $680,200,000 for employment services, which includes $43,000,000 for DVOP. While the Committee recommendation for the Employment Service is lower than the House level, it is $81,380,000 above the President's September budget request of $598,820,000, and it will provide approximately 2,000 staff for DVOP.

With best wishes,
Sincerely,
HARRISON H. SCHMITT,
Chairman, Labor-HHS-Education Appropriations Subcommittee.

Mr. CRANSTON. Mr. President, although it is clearly possible for all VA programs to be funded at adequate levels in this resolution and that the agency will, therefore, be able during the period covered by the resolution to carry out our commitment to meeting the needs of our Nation's veterans, I remain concerned that the regular appropriations bill, H.R. 4034, is still awaiting final action.

Thus, I urge, in order for the VA operations to be placed on a secure footing with adequate funding for the entire year, that prompt action be taken on the conference report on H.R. 4034.

DISBURSEMENT OF LIEAP FUNDS

● Mr. STAFFORD. Mr. President, I have a question for the Senator from New Mexico, the Chairman of the Subcommittee for Health and Human Services Appropriations.

Mr. Chairman, I have been advised by the State of Vermont that the Office of Management and Budget has adopted a policy which would restrict the release of money to the States to equal quarterly installments under the low income energy assistance block grant. That would mean the State allocations would be released in equal amounts in October 1981, January 1982, April 1982, and July 1982. As the chairman is well aware, it is not a quarterly need for the northern tier States. Funds released in April and July 1982 would be of little use. Vermont and the other northern tier States clearly need the money released now to meet the home heating needs of the needy during the winter. The Senator from New Mexico recognized this problem and put the Appropriations Committee on record in the report on H.R. 4560, that the Office of Management and Budget (OMB) and the Department of Health and Human Services (HHS) should exercise flexbility in disbursing the money for the program to reflect the needs of the States.

Therefore, my question to the Senator from New Mexico is: Does the chairman intend that the language in the report on H.R. 4560 apply to disbursement of low income energy assistance funds under this continuing resolution? In addition, does the committee mean by the term flexibility that OMB and HHS should provide advance release of most of the funds to meet winter's needs?

Mr. SCHMITT. The Senator from Vermont is correct. The committee in its report has directed both the Department of HHS and OMB to apportion funds for the low income energy program in a timely and reasonable manner. Clearly this would mean that States like Vermont would receive most of their money in the winter months●

HUD AND INDEPENDENT AGENCIES APPROPRIATIONS CONFERENCE REPORT

● Mr. MOYNIHAN. With regard to the conference report on the HUD and independent agencies appropriations bill, I am concerned about 1982 appropriations for the National Science Foundation. I would like to ask the distinguished Senator from Utah (Mr. GARN), if it is the Senator's understanding that the Foundation will still have expendable funds for science education?

Mr. GARN. Yes; under the Senate proposal the Foundation will have $20,000,000 for science education; this is $11,288,000 over the administration's September request.

Mr. MOYNIHAN. I am interested, in particular, in the science education activities of an organization in New York, the Children's Television Workshop. Will funds be available to continue programs like the Workshop's educational television series "3–2–1 Contact"?

Mr. GARN. It would be my strong recommendation that the Foundation continue to fund "3–2–1 Contact" although, of course, NSF is free to choose how it will expend these funds. Our subcommittee in the Senate heard testimony from the Children's Television Workshop this year and it is clear that this program is doing a fine job of presenting science education to a large audience.

Mr. MOYNIHAN. I thank the Senator from Utah. I understand that this series has a wide audience and it seems a reasonable way to help educate our young people in the scientific discipline.●

U.S. FIRE ADMINISTRATION

● Mr. KASTEN. Will the Senator yield for a question?

Mr. GARN. I would be glad to yield to the Senator from Wisconsin.

Mr. KASTEN. As chairman of the authorizing subcommittee for the U.S. Fire Administration, an agency within the Federal Emergency Management Agency, I am concerned about FEMA's proposal to eliminate totally its support of the technical research work done at the Center for Fire Research in the Department of Commerce.

Since 1979, when the Fire Administration was moved from Commerce to FEMA, Congress has appropriated funds to FEMA to be "passed through" to the Center. In 1982, this passthrough was expected to be $4 million, representing nearly half of the Center's funds.

The record our subcommittee developed in connection with the reauthorization of the Fire Administration last spring indicated that the work done at the Center was of high quality and very important to our Nation's fire prevention effort.

The passthrough was specifically authorized in the authorizing legislation we subsequently developed. I fear that totally eliminating FEMA's support for the Center will severely cripple this program.

Do I understand correctly that the Appropriations Committee has directed FEMA to continue its support of the Center for Fire Research?

Mr. GARN. The Senator is correct. FEMA is directed to make $4 million available to the Center for Fire Research as contemplated in the March budget revisions.

Mr. KASTEN. I thank the Senator for his response.●

FLATHEAD RIVER BASIN FUNDING

● Mr. BAUCUS. Mr. President, this year's appropriations process has, understandably, created many uncertainties about funding for many programs.

Last July, during the Senate's consideration of the HUD-Independent Agencies appropriations measure, I queried Senator GARN on the floor about funding for the Flathead Basin environmental impact study. Begun nearly 5 years ago, this study is in its last year. For reasons I have noted often in the past, it is critical that this study be completed. Last July, the distinguished Senator from Utah and Chairman of the HUD Appropriations Subcommittee assured me that EPA's budget contained funding to complete the study.

Mr. President, I wish to again ask Senator GARN if it is his understanding that funds agreed upon in July to complete the study will be available under the continuing resolution we are considering today. As I understand the continuing resolution, it provides that the HUD-Independent Agency programs will be continued at the rate of the conference committee agreement. I understand, too, that this agreement contains funding to complete the Flathead River Basin study.

Mr. GARN. Mr. President, my distinguished colleague from Montana, Senator BAUCUS, is quite correct. Let me again commend him for his diligent efforts in seeing this study through to its completion.

Mr. BAUCUS. Mr. President, I thank my distinguished colleague, Senator GARN.●

IMPACT AID PROGRAM

● Mr. EXON. Mr. President, I would like to engage in a colloquy with the distinguished chairman of the Senate Appropriations Subcommittee on Labor, HHS, and Education regarding the impact aid program.

Mr. President, I have been concerned for some time that the current regulations for the impact aid program discriminate against a small number of impacted districts in this country, and I believe this situation should be corrected. The Department of Education has also recognized that there is a problem in this area, and the Department is in favor of a change in the regulations. Unfortunately, this small, noncontroversial change has been lost in a much larger effort to revise all regulations for the impact aid program, and these new regulations are stalled in the executive branch.

Mr. President, I would very much like to see the following amendment added to the funding bill now under consideration.

In calculating a local contribution rate under Chapter 45 of the Code of Federal Regulations, Part 115, a local educational agency may choose to delete impacted districts' data from any proposed group of comparable education agencies. Notwithstanding any other provisions of this Act, a local educational agency's 1982 payment will be calculated as if this provision had been in effect for 1981.

If this addition were made it would solve the problem. However, I understand that the chairman is reluctant to add legislative language to appropriations bills, and I respect the chairman's wishes in this regard.

Therefore, I am happy to join with the distinguished chairman in this colloquy so that the intent of Congress is established for the record, and so that the Department of Education may be guided by this colloquy in its future impact aid calculations.

Allow me to explain briefly the purpose and effect of my proposed change. As we all know, the impact aid program is designed to help local school districts which, because of a Federal presence in that area, have inadequate local resources to support a respectable educational program. The relative need of the impacted districts is expressed in terms of a per-pupil rate of support. There are several different methods by which this rate can be determined, and the methods are chosen by each State education agency for the impacted districts in that State. In a few States, the method which is most appropriate is distorted by the fact that the impacted district itself must include its own financial data along with nonimpacted districts in order to determine its rate, upon which Federal payments are made.

Let me give you a simple example. Suppose an impacted district with local financial resources of $200 per pupil is compared with five other districts with a resource base of $2,000 per pupil. The way the impact aid program is suppose to work is that the impacted district should receive a Federal payment to bring it up to the $2,000 level. However, under the current impact aid regulations, the impacted district must average itself in with the other five districts. The average per-pupil support in this example is $1,700 for the six schools, and the inclusion of the impacted district in the calculations lowers its rightful Federal support by $300 per pupil. If other impacted districts are included in the comparable group as well, the distortion can be even greater. This can make a real difference in the educational program that the school can offer.

The President, I am told that the number of districts that would be affected by my rule change is minimal. Only a few school districts in a few States would be able to use the change I am suggesting, according to both the Federal Department of Education and the Congressional Research Service. No additional appropriations would be necessary to make this minor regulation change.

Mr. President, the reason I am interested in this modification is that school districts in Nebraska have been discriminated against because of the present method of calculation. Three of these districts are very small districts with a large percentage of Indian children. Other districts are located near Offutt Air Force Base, and are highly impacted because of the location of the Strategic Air Command Headquarters.

Mr. SCHMITT. I am pleased to enter into this colloquy with the Senator from Nebraska. I appreciate the point the Senator has made about the need for this rule change, and I have checked with the Appropriations Committee, headed by the Senator from Oregon to see if he was aware of this problem and if he recommended handling it through this colloquy. I am pleased to report that the chairman agrees that this change is appropriate.

I will also bring this matter to the attention of the House in the conference committee, so that the intent of the Senate is clearly reflected in conference action.●

● Mr. JOHNSTON. Mr. President, section 101(g) of House Joint Resolution 357 provides funds for various activities and projects in the Department of the Interior at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference (H. Rept. No. 97–315) as approved by the House on November 12, 1981. I commend the chairman of the Interior Subcommittee, the distinguished senior Senator from Idaho, for including language during committee markup to clarify the legislative history of this report by particularly pointing out that the directives include those clarified on the House floor on November 12, 1981.

This is especially important with respect to understanding the conferees action on the States assistance portion of the land and water conservation fund. As many of my colleagues will remember, as passed by the Senate, H.R. 4035 included about $99 million for the Federal share of the land and water fund and $100 million for assistance to States and local governments.

Due to the severe budgetary constraints we faced in conference, and despite the persistent efforts many of us made to find a way of continuing this program at even drastically reduced rates, the conferees were unable to find an acceptable compromise and fiscal year 1982 funding was deleted entirely.

I and many other conferees were disappointed by this decision, Mr. President, but we were pleased that the conferees adopted language specifically noting the importance of this aspect of the fund and stating that the decision was not a decision to terminate the program in perpetuity, but that the funding recommendation was made for fiscal year 1982 alone. We all hope that the administration will request funds for the program in fiscal year 1983 and urge those officials to do so. Language to this effect is included in the House debate on H.R. 4035 as reported from conference on November 12.

Assistance to States and local governments provided through the Land and Water Fund is one of the best examples of creative federalism we have. For a very modest initial investment, State and local governments have carried the major fiscal and management responsibilities for meeting our Nation's park and recreation demands. The provision of these facilities has frequently lessened management pressures and costs at a number of Federal sites and has provided easily accessible recreation opportunities to literally hundreds of millions of Americans each year.

Mr. President, a recent article in the New York Times dramatically illustrates the impact of cutting off the Federal share of the State assistance provision, and I ask that this article be printed in its entirety at the end of my remarks.

I hope we will be able to resume funding for this program in fiscal year 1983, that the administration will find a way to submit a budget request for it, and that State and local governments will be able to find a way to bridge this 1-year gap. It is certainly my intent to try to accomplish these goals.

The article follows:

[From the New York Times, Nov. 16, 1981]

FEDERAL FINANCING FOR STATE'S PARKS CUT FROM BUDGET

(By Deirdre Carmody)

All $15.4 million in Federal funds for New York State parks has been eliminated as part of the Reagan Administration's budget cuts, according to the State Parks and Recreation Commissioner.

"What is the degree of the cut?" said the Commissioner, Orin Lehman. "It isn't 30 percent, it isn't 50 percent. It's 100 percent."

The cuts, which Mr. Lehman described for the first time in an interview, have eliminated all four programs through which the state received Federal assistance for its parks in the past. Besides the $15.4 million received last year, the cuts will cost the state more than 1,000 federally financed park jobs, some of which have already been phased out.

JONES BEACH PROGRAM HARD HIT

One of the hardest-hit programs is the six-year, $26 million rehabilitation of Jones Beach that was announced by Governor Carey last year. The Federal Government had been scheduled to provide half the money. The Jones Beach project is considered important because facilities are deteriorating and badly in need of repair while attendance keeps growing.

Many other projects throughout the state will have to be abandoned or seek funds elsewhere. These include pocket parks, tennis courts, rehabilitation projects, sewer lines, swimming pools, dams and athletic fields.

Money provded by the Federal Land and Water Conservation Fund in the past ranged from $860,000 for rehabilitation of the Broadway malls in Manhattan to $360,000 for an ice skating rink for the town of Fulton in Oswego County.

The elimination of Land and Water Conservation Fund grants, which have provided New York State with $172 million since 1965, is the most drastic cut. Over the years, these funds have gone to more than 1,000 state and local parks and recreation projects. The money for these grants came from offshore oil leases.

"The fund was originally set up because Congress realized that most Americans use their own local parks or state parks more than they use the national parks; it was set up to help the states and communities and enhance outdoor receration," Commissioner Lehman said in an interview. "It was considered a partnership between the Federal Government and the states."

Some of the programs, such as the Young Adult Conservation Corps, began being phased out several months ago. Other cuts went into effect on Oct. 1, with the start of the 1982 Federal fiscal year. The combination of budget cuts was completed Nov. 5 when a Senate-House conference committee eliminated the Land and Water Conservation Fund.

SEEKING A BOND ISSUE

Commissioner Lehman said that the cuts would be so detrimental to maintenance of the state parks system that the was "hopeful" the Governor and the Legislature could be persuaded to put a parks preservation bond issue on the ballot next year.

"We are hopeful that the Governor and the Legislature might see fit to have a park preservation bond act in 1982," Mr. Lehman said. "We've checked it with some of the people in the Governor's office. They've encouraged us to go ahead. They've said, 'Bring us your plan and we'll see.' "

He said that the proposed bond issue would be "in the $400 million area." Recreation bond issues have been approved by the voters of New York State since the first one was proposed by Gov. Alfred E. Smith in 1924.

In addition to the Land and Water Conservation Fund, the other programs that have been eliminated are:

The Urban Park and Receration Recovery Program, which had awarded a total of $11.7 million in grants to New York State since 1978. Nineteen cities and five counties were eligible for these funds.

The Comprehensive Employment and Training Act, known as CETA, under which the State Parks Department was able to employ 650 workers, who were paid with Federal funds. These unskilled workers did painting, cleanup, conservation and restoration jobs.

The Young Adult Conservation Corps, a federally financed employment program that provided the state last year with 360 workers aged 16 to 33. These workers repaired structures, built camps, fixed picnic areas and did other similar jobs.

ASKING FOUNDATIONS TO HELP

To mitigate the effect of the cuts, Commissioner Lehman said, the state is now "going heavily after foundations, corporations, and friends' groups" to take over some of the projects.

He pointed out that the Reagan Administration had said from the beginning that little money would be available to build new parks. He said, however, that New York State had been way ahead of the Administration, having decided seven years ago not to spend money on acquiring new land, but to use funds to take care of the existing parks.

Parks officials point out that the parks have never been as popular as they are now, because people have more leisure time and are preoccupied with health.

BUILT DURING DEPRESSION

Many of the facilities in the state were built during the Depression and are in serious need of maintenance and repair, the officials said.

In addition, as the economy bites more and more into people's purses and it becomes more expensive to travel, people are staying home and using their local parks. Recreation has also become a year-round pastime. As a result, golf courses that were once deserted when they were covered with snow have now become cross-country skiing areas, and parks that were empty during the winter are now used year-round by joggers.

"We do understand the frustration of the American public with taxes, waste and inefficiency," Commissioner Lehman said. "I don't think anyone objects to eliminating that and we know that budgets have to be cut. What we object to is being shut out."●

PUBLIC BUILDING PROJECT APPROPRIATIONS

● Mr. STAFFORD. Mr. President, I note that H.R. 4121, the Treasury, Postal Service and General Government Appropriations Act as reported from the Appropriations Committee and section 111 of the continuing resolution contain funds for several public building projects that were not included in S. 533, the Public Buildings Act of 1981.

My colleagues will recall that S. 533 passed the Senate last May 6 by a vote of 93 to 0. Passage represented the culmination of more than 3 years' effort by the Committee on Environment and Public Works to reform and reorganize the public buildings program of the General Services Administration.

Among the significant changes, the bill requires—for the first time in the history of the Government's building program—continual long-range planning to foresee and meet the Government's building needs, establishes policies and priorities to be followed in locating Federal offices and administering the program, sets up organizational and procedural frameworks that promote better architectural design, and establishes a goal on the amount of leased space that can be used to satisfy the Government's permanent office needs.

However, title VIII marks the bill's most significant departure from existing practices in the public buildings program. It establishes building authorization procedures much like those in use in the military construction program. It is designed to provide the Congress with the information necessary in order to authorize an annual program for GSA as the orderly framework for the agency's annual appropriation. In this way Congress can oversee program management and establish priorities. This procedure also affords the reconciliation process of a Senate-House conference, together with the constitutional safeguard of final action by the President, that goes along with almost every other program of Government.

The Committee on Environment and Public Works has been greatly concerned that the present system of authorization by resolution is inadequate and inappropriate. Under the current system, proposed projects are referred to the Committee on Environment and Public Works of the Senate and Committee on Public Works and Transportation of the House one by one, throughout the year, without regard to the availability of appropriations, and without any logical explanation of the priorities of needs represented by the proposals. They do not require the consideration of the full Senate or House. They do not require the concurrence of the President. They do not fall within the provisions of the Congressional Budget Act of 1974 and therefore are outside the congressional budget process.

This piecemeal, ad hoc procedure by which building projects have been authorized for years contrasts sharply to the bill's orderly and fiscally disciplined public buildings planning and approval procedures. Passage of S. 533 and the similar bill passed by the Senate last year (S. 2080) marked the first time in over 20 years that the full Senate had debated and voted upon policies, procedures, and projects relating to the Nation's building policies.

Mr. President, I am very concerned that inclusion in the appropriations bill (H.R. 4121) of a number of unauthorized projects which are also not a part of S. 533 represents a betrayal or turn away from the reforms that the Committee on Environment and Public Works has worked for 3 years and continues to work hard to institute and which were unanimously adopted by the Senate.

Mr. HATFIELD. Will the Senator yield?

Mr. STAFFORD. I would be happy to yield to my friend from Oregon, the chairman of the Appropriations Committee.

Mr. HATFIELD. I understand the concern of the chairman of the Committee

on Environment and Public Works. I share a number of the concerns you have raised, and I support your efforts to develop a new, comprehensive legislation on public buildings. Such legislation has passed the Senate twice by overwhelming margins, and I voted in favor of both S. 2080 last year and S. 533 earlier this year.

Yet, the continuing failure on the part of the House to act leads to a situation where the authorization bill (S. 533) is not enacted. I certainly do not want to indicate or imply that inclusion in this bill of unauthorized public building projects means that we are not supportive of the reforms and policies contained in the Public Buildings Act. Nor is it our intention to ignore or bypass the authorizing committee. Were S. 533 to be enacted, I would make every effort to see to it that unauthorized projects were not included in the Treasury-Postal Service appropriations bill.

Mr. STAFFORD. Mr. President, I appreciate the remarks of the Senator from Oregon and I look forward to working with him in the future on these important matters.●

IN SUPPORT OF WEICKER AMENDMENT (UP NO. 671)

● Mr. CHAFEE. Mr. President, I support Senator WEICKER's amendment to add $200 million to the low-income fuel assistance program. The administration has proposed a budget of $1.4 billion for the program and the Senate has proposed $1.65 billion as compared to the funding level in fiscal year 1981 which was $1.85 billion.

As a cosponsor of the Weicker amendment, I want to express my concern about the adverse consequences of cutting the program funding below the fiscal year 1981 level. In my own State of Rhode Island, the program provided assistance to nearly 30,000 households this year. The number of eligible households is expected to rise to nearly 34,000 in the next year. If the administration figure is finally approved, Rhode Island's share of program money will drop from $12.4 million, which is the amount received in 1981, to $8.4 million. If the Senate figure is adopted, the State's share will drop to approximately $9 million. Even the Senate figure of $1.65 will have a devastating impact on the State's ability to help the truly needy this winter.

I realize that if the Weicker amendment is adopted, it will put the continuing resolution level nearly $700 million over the administration's September budget request. However, we should not be trying to balance the budget from social programs alone. I urge my colleagues to join with me in supporting the Weicker amendment.●

● Mr. BRADLEY. Mr. President, the resolution now before the Senate for final approval would provide necessary interim funding for the entire range of Federal Government programs and responsibilities until regular appropriations bills are enacted into law. Without such a resolution, the Government could not legally proceed beyond midnight tomorrow, except to assure the national security and to protect life and property.

Under the pressure of this time deadline and under the threat of a Presidential veto, some very unwise provisions have been added to the continuing resolution. Most damaging, I believe, is the 4 percent across-the-board cut in the nondefense portion of the budget, excepting only social security, medicare, veterans' pensions and other entitlement programs required by law. I cannot support these reductions in funding—which not only hurt our chances for real economic growth, but, in many cases, will have devastating effects on many Americans.

Mr. President, before I get into my specific objections. I would like to establish the framework for my opposition to this resolution.

Mr. President, in the debate on the budget and Federal spending, it is important to recognize that some Government spending is essential to achieve economic growth, and only economic growth will provide us with the revenues that we need to fulfill our commitments to the elderly, to the poor and to the disabled. Only economic growth can give us the optimism about the future that will assure rising living standards for the next generation.

I oppose this resolution because the reductions in appropriations for key programs will impair our country's prospect for a bright economic future.

Mr. President, in order to promote economic growth, you need investment. But investment is more than simply investment in new plant and equipment. I do not think there is much dispute in this body that our industrial plant has deteriorated; that it consists of plant and equipment which was built for a world where oil was $3 a barrel, not $40 a barrel; that it does not produce as much output per unit of input as it should; and that we invest 10 percent of our GNP versus 15 percent for West Germany and 20 percent for Japan. We need new plant and equipment. And we have amply provided the incentives for such investment in this year's tax bill.

But increased investment in new plant and equipment is not sufficient. There are three other kinds of investment that are required.

First is the investment in our economic infrastructure, in the railroads and highways and mass transit systems of our country. Look at the next decade and project where we are going to get our economic growth. Hypothesize a growing world economy. You would have to argue that we must increase our exports, moving away from an investment-led economy to an export-led economy. If you look at those areas where we have an advantage, Mr. President, clearly one of those is coal. The problem is that you cannot get the coal from the mines to the ports because the railroads are not good enough. We must rebuild our railroads, ports, bridges, highways, and mass transit systems if we are to move people to jobs and goods to markets.

What would this resolution do to promote this vital rebuilding? Mr. President, I must report that it would do great harm. It would allow up to 5 percent further reductions in the already inadequate amounts recently approved by the conferees in the transportation appropriations bill. For urban mass transit research and training, this Congress has already approved reductions of nearly $6 million under last year's levels. For railroad research and development, this Congress has already approved reductions of $11 million under last year's levels. For Amtrak, this Congress has already approved reductions of over $160 million under last year's levels. And, this Congress has already approved reductions of over $13 million for airport research, engineering, and development.

Mr. President, these funds for urban mass transit, for the railroads, for the airways, for the highways, and for other aspects of our vital transportation infrastructure are directly related to getting the economy back on the path of sustained growth.

Mr. President, there is a second kind of investment that is equally important and is complementary to our investment in plant and equipment and in economic infrastructure. That is investment in people, in programs which help to assure their health and in providing opportunities for obtaining the education and training required for full participation in the economy. What we need, Mr. President, is a work force that is healthy, a work force that is trained, a work force that is skilled, a work force that has a view of future improvements in the standard of living that will assure maximum contributions to the economy.

What would this resolution do to promote a healthy, trained, powerfully motivated work force? Mr. President, I must report that it would do great harm. Again, it would allow up to 5-percent further reductions in the amounts provided in the appropriations bill, resulting in budgets well below the funding levels envisioned in the omnibus Reconciliation Act we passed just last July.

Let me review some of the appropriations cuts already approved by either the Senate or House committee, from which another 5 percent could well be subtracted. For the maternal and child health block grant, which provides essential prenatal care and primary and preventive services to low-income mothers and children, the House committee has approved reductions of $40 million below the reconciliation level of $373 million. The reconciliation amount reflected cuts of 17 percent below the 1981 level. The block grants for primary health care, preventive services and alcohol, drug abuse and mental health services, each of which suffered sharper reductions in the Reconciliation Act, would be threatened with additional 5-percent cuts.

Turning to education, the resolution before us would allow up to another 5 percent in funding cuts in title I of the Elementary and Secondary Education Act, a program that aids those school districts in the country that enroll significant numbers of disadvantaged children. The Senate committee has already approved a reduction of almost $100 million below the fiscal year 1981 appropriation and approximately $475 million below the funding authorized in Reconciliation.

Title I aid translates into school books and classroom and lab equipment which enable these low-income children to learn

and advance up the educational ladder. The opportunity to get an adequate education can mean a great deal to the future employability of these students. If such opportunities are not provided, there is a very real danger that these young people, many of them living in our central cities, will develop little or no stake in our society. By the 1990's these young Americans will not be 10 or 15 but in their 20's and 30's, still with few skills, no jobs and no stake in our society. That will be precisely the time, in the mid-1990's, when we will face a labor shortage, precisely the time we will need all the available manpower we can marshal.

Mr. President, we must make sure that these individuals have an adequate education. We must also make sure that they have an opportunity to go on to college or to other postsecondary education so they can develop their skills as fully as possible. The economic development potential of this country depends upon the maximum efficient utilization of our manpower. To lose any potential contributions through cutting back on aid to the most disadvantaged school districts in the country, or through inadequate funding of Pell grants and other assistance to needy students is surely a false economy.

Our programs of Federal assistance for education constitute but one part of our investments in human capital. If we look at our labor force, we see many citizens who are out of work, experienced workers who no longer have jobs because of competition from abroad. Competition from other economies did not appear overnight. People are buying foreign automobiles because they get 40 miles a gallon and are quality products. Not only the automobile industry is affected; other industries in this country have already lost their competitive advantage or will in the near term.

What we in Government must be concerned about are the people working in those industries. To be consistent with maximizing our economic growth, we have to make sure that those individuals are retrained from the less competitive sectors of our society to the more competitive sectors. We need a serious retraining program which will equip experienced workers with the skills that will enable them to move into the more vibrant parts of the private sector that are going to contribute the most to the growth potential of this country in the next decade.

This resolution, in providing for severely reduced levels of funding for worker retraining under trade adjustment assistance and youth training programs, severely undermines our national interest in a skilled, motivated work force, both now and in the 1990's.

Mr. President, the third area requiring a strong Federal commitment is our important investments in research and development. We must make sure that we remain on the cutting edge of technological change if we are to retain our competitive advantage in the world economy. Yet this resolution would allow additional 5-percent reductions in funding for the National Science Foundation.

NSF's programs in science education and research are of great importance and the program of instrumentation grants will help to modernize the teaching laboratories where our future scientists learn their craft and develop the skills that are essential to putting us back on the path of vibrant economic growth. The resolution would also allow 5-percent cuts in funding for the National Institutes of Health, the vital center of our extraordinary biomedical research efforts.

In recognition of the importance accorded to NIH's impressive record of contributions to our understanding of disease, and to the development of approaches to treatment and prevention, both appropriations committees have approved funding which exceeds the 1981 level. Still, the Senate version, which would prevail under this resolution, falls below the House level by $16 million and would be vulnerable to additional losses of $19 million.

Finally, Mr. President, NASA must be added to the list of threatened R. & D. agencies.

Already, budget cuts have endangered a large part of NASA's nondefense program—those in space science, space applications, aeronautics, and space technology. These are precisely the areas which, in the next decade and beyond, are going to give this country the kind of commercially valuable competitive advantage that it can attain only if the Government makes these expenditures. By reducing NASA's nondefense funding, we are really handing Japan and West Germany an enormous opportunity to catch up and to compete with us in the economically productive uses of space. To throw away our current advantage in space should be unthinkable; with this resolution, we will be starting down that path.

Mr. President, the reductions in nondefense programs called for under the continuing resolution should be rejected. The economies to be achieved by the additional 4 percent across-the-board cut are false economies. To realize short-term budgetary savings, larger long-term objectives are imperiled. The future health of our economy requires a more farsighted view. It requires investments in plant and equipment, in our economic infrastructure, in human capital, and in research and development. The resolution cut all of those investments and we cannot afford to postpone them.

For these reasons, Mr. President, I must oppose this continuing resolution and urge my colleagues to do likewise.●

● Mr. CHILES. Mr. President, I would like to take the opportunity to clarify with Chairman HATFIELD the funding levels in this continuing resolution. The last continuing resolution stated that programs would be funded at a level "not exceeding" funding levels specified in House-passed appropriations bills or current rates of funding. This provision caused considerable confusion and controversy. In many cases, the administration used that provision to withhold obligation of funding intended by Congress. It is my understanding that this resolution specifically provides funding at exactly the rate referenced in the House or Senate bill. Under the terms of this resolution, therefore, the administration will have to fund programs at the rate provided in the relevant bill or conference report.

Mr. HATFIELD. Mr. President, Senator CHILES is correct in his understanding. We have worked to hold spending in this resolution down to the lowest possible level, while still setting congressional priorities for specific programs. In any case where the administration disagreed with those priorities, it would have to submit a rescission or deferral request in accordance with the Budget Act. I would hope that the rescission and deferral procedures be used only for limited issues of policy disagreement, rather than for a wholesale attempt to rewrite appropriations bills.

Mr. CHILES. I thank the distinguished chairman for this clarification. Would the chairman also agree that deferrals, as provided for in the Budget Act, are intended to be used for temporary delays in funding, and not to make a change in the annual funding level?

Mr. HATFIELD. The Senator from Florida is correct.

Mr. CHILES. I thank the chairman once again.

Mr. President, I would like to ask a question to clarify the impact of this amendment.

In the 1980 supplemental $350 million was made available for emergency relief highway projects. Of that total, I am informed $22 million remains available.

When the $350 million was first made available in the 1980 supplemental up to $50 million was to be made available for reconstruction of the Sunshine Skyway Bridge across the mouth of Tampa Bay.

The highway department is scheduled to pay out approximately $19 million of the funds remaining from the 1980 supplemental to the State of Florida for the Sunshine Skyway Bridge this fiscal year.

Am I correct in assuming that this amendment will not impact the scheduled payment of emergency relief funds to the State of Florida?

Mr. GORTON. I thank the Senator from Florida for his question and would like to assure him that this amendment will not impact the scheduled payment of funds to the State of Florida. My amendment has the effect of earmarking fiscal year 1982 emergency relief funds and will not impact those moneys made available through the 1980 supplemental.●

LOW-INCOME ENERGY ASSISTANCE

● Mr. HEINZ. Mr. President, I am pleased today to cosponsor this amendment, which will assure that the low-income energy assistance program will continue to respond to the urgent needs of so many elderly, poor, and handicapped people. I simply wish to make two points.

First, this amendment does not bust the budget. It simply brings the funding for this program right up to the level that we all agreed to in the August reconciliation bill. It does not spend 1 penny more than that level.

Second, the importance of this program to older Americans cannot be overstated. As we were reminded in Pennsylvania only last week by the new rate increase of the Philadelphia Gas Co. The elderly are among the most vulnerable to astronomical increases in fuel costs since their incomes often cannot keep pace

with rapid rises in home energy costs. They are the people now paying nearly 30 percent of their incomes on energy, as opposed to 8 percent for the average household. And they are the people who are least able to adjust to sudden changes in the cost of energy since they are less physically able to cope with temperature changes than other individuals.

When President Carter moved to decontrol the price of oil, we as a nation decided that a substantial part of the revenues from a windfall profits tax should be set aside and refunded to those hardest pressed by rising energy bills. This obligation to people living on low and fixed incomes remains today. We would be breaking a solemn commitment should we fail to provide the aid they need to cope with the precipitous increases in fuel prices we have experienced. Benefits indexed to inflation such as SSI, social security, and others offer partial relief, but increases in home energy costs clearly continue to outstrip benefits. In the past 5 years alone, from March 1976 to March 1981, energy costs have risen 122.8 percent, compared to a 58.6-percent increase in the Consumer Price Index.

Mr. President, the need this program addresses is clear and urgent. I am well aware that the great challenge facing us today is to make effective and responsible use of stringently limited funds. The low-income energy assistance program does so. An oversight hearing on this topic was held by the Special Committee on Aging, of which I am chairman. Witnesses ranging from elderly recipients to State administrators unanimously testified that countless poor and elderly Americans literally could not afford to stay in their homes without this program. Furthermore, this amendment does not increase funding for low-income energy assistance; rather, it merely keeps funding constant with regard to last year's program and this year's Omnibus Reconciliation Act.

Home fuel prices are not going to come down this winter, and the winter is not going to be any warmer. I believe we must take this opportunity to maintain our support for this vital program.●

Mr. HATFIELD. Mr. President, I know of no other amendments at this time.

If an order has not been entered for the yeas and nays, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the joint resolution.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time.

The PRESIDING OFFICER. The joint resolution having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The result was announced—yeas 70, nays 26, as follows:

[Rollcall Vote No. 423 Leg.]

YEAS—70

Abdnor	Exon	McClure
Andrews	Ford	Melcher
Baker	Garn	Murkowski
Baucus	Gorton	Nunn
Bentsen	Hatch	Packwood
Boren	Hatfield	Percy
Boschwitz	Hawkins	Pressler
Burdick	Hayakawa	Proxmire
Byrd, Harry F., Jr.	Heflin	Quayle
	Heinz	Randolph
Byrd, Robert C.	Helms	Rudman

Glenn	Nickles	

NOT VOTING—4

Goldwater	Leahy	Stennis
Kennedy		

So the joint resolution (H.J. Res. 357), as amended, was passed.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I move that the Senate insist on its amendments to House Joint Resolution 357 and request a conference with the House of Representatives on the disagreeing votes of the two houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. HATFIELD, Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. LAXALT, Mr. GARN, Mr. SCHMITT, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. RUDMAN, Mr. SPECTER, Mr. PROXMIRE, Mr. STENNIS, Mr. BYRD of West Virginia, Mr. INOUYE, Mr. HOLLINGS, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. BURDICK, Mr. SASSER, Mr. DECONCINI, and Mr. BUMPERS, conferees on the part of the Senate.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, it is now 9 minutes before 7 in the morning. The Senate convened on yesterday morning at 10 o'clock.

I understand what an arduous undertaking it is for the Members to sustain such a diligence of effort for that length of time. But I believe it was the only practical course and I wish to express my appreciation to all Senators, to staff and to the officers and employees of the Senate for remaining through the night and permitting us to complete action on this continuing resolution.

We have conducted 25 rollcall votes since 10 a.m. Thursday. I believe there were 15 rollcall votes on Wednesday. Mr. President, that is a prodigious amount of work. I commend everyone for their participation and I once again express my appreciation to all Senators.

I especially express my appreciation to the distinguished chairman of the Appropriations Committee and the manager of the bill, Senator HATFIELD, and the distinguished ranking minority member and comanager of the bill, Senator PROXMIRE.

THE ALASKAN GAS PIPELINE

Mr. PERCY. Mr. President, I would like to express my deep concern with one provision of the waiver package—the so-called prebilling provision which allows consumers to be charged for the cost of building the pipeline before the project is actually completed. I share with opponents of the waiver package a distaste for shifting the risk of building the pipeline system to consumers—a risk that the financiers are unwilling to take themselves.

However, I feel that we can not leave untapped the 100 to 200 trillion cubic feet of potential natural gas reserves in Alaska. Although the need for the gas does not seem pressing now, sometime in the future I expect we will be thankful that we have pushed ahead with the project. In addition, our repeated assurances to the Canadians can not be ignored. They have accepted our assurances in good faith and we must back these assurances up. In addition, I have received personal assurances this morning from Canadian Ambassador Peter Towe that, and I quote:

> There is no advantage to a Canadian sponsor for taking advantage of precommencement billing and that every effort will be made, on the Canadians part, to ensure that various segments of the pipeline are completed simultaneously avoiding the need for pre-billing.

I deeply regret that we only have one shot at this waiver package. I am reluctantly voting for it. It is a costly insurance policy, but necessary. However, if an alternative financing mechanism can be found in the future, I would gladly support it and would actively discourage FERC from accepting the use of the prebilling provision.

START

Mr. HAYAKAWA. Mr. President, it was with full agreement and great respect that I listened to President Reagan

deliver his speech on the approaching negotiations with the Soviet Union about medium-range nuclear weapons in Europe. I have long believed that President Reagan would prove to be one of those Presidents who will be long remembered for his efforts to reduce the threat of nuclear war which hangs over all mankind. I believe that his speech on November 18 shows that the United States is indeed serious about arms control.

There has been a great deal of discussion about the President's plan to modernize our strategic nuclear forces. Many people have wondered whether this plan is a prelude to a renewed arms race or the prelude to serious negotiations. The President's speech should convince all who are willing to listen that the security of the free world is not in the hands of a warmonger.

We have all heard about the antinuclear demonstrations which have been staged in many parts of Europe. There have even been demonstrations in the United States. Like the President, I understand the concerns of the people, for the prospect of a nuclear war is indeed unthinkable. However, we must not forget that unless we are prepared to face the very serious and real questions which are posed by the threat of nuclear war we will only increase the level of insecurity and thereby increase the possibility of a nuclear war. Ignoring the threats of nuclear war will not make them go away—they will only make them worse. The President has faced those threats, and I believe that his plans for negotiations will insure that the peace is preserved.

There is a great deal of talk, especially in Europe, that NATO's plan to deploy cruise missiles and Pershing II missiles is a plan to fight a nuclear war in Europe which would leave the United States untouched. I believe, Mr. President, that a close examination of the facts will reveal that just the opposite is the case. The Soviet Union has long declared that any American warhead landing on the Soviet Union will be considered to have originated in the United States, thus leaving the United States open to nuclear attack. Since the proposed missiles would be American, their deployment would insure that the United States and her NATO allies would not be "decoupled," and that the United States would automatically become involved in any nuclear exchange in Europe. I believe that this principle is important, for it eliminates the possibility of a limited nuclear war. By guaranteeing that all nuclear conflicts become strategic exchanges, we can insure that both sides will realize that no one will win such a war.

Mr. President, I am very pleased with the new acronym "START," which stands for Strategic Arms Reduction Talks. I believe that it is important that we do work for arms reductions, not just arms limitation. SALT II set the limits so high that neither side would want to exceed them anyway. I hope and trust that that will not be the case this time.

Finally, I would like to emphasize the importance this speech should and I believe will have on those of our allies who in the past have questioned the sincerity of our devotion to arms control. The President has offered the Soviet Union the chance to reduce the spending on nuclear weapons. If they reject this offer, the world must see that they, and not we, are the threat to world peace.

Thank you, Mr. President.

ADDITIONAL STATEMENTS

IMPACT OF RAIL COAL RATES

● Mrs. HAWKINS. Mr. President, this week a distinguished Floridian, Mr. Ross Workman, delivered a message to the annual convention of the National Association of Regulatory Utility Commissioners, an organization that I formerly belonged to as a Public Service Commissioner from Florida, which should be of interest to each of us. The title of Mr. Workman's well researched address was "The Escalating Impact of Rail Coal Rates on Electric Utility Customers: What are the Defenses?" His answer to this question is: Competition!

As Mr. Workman points out, one way to keep energy costs down to encourage development of interstate coal slurry pipelines. For this reason, I decided to be an original cosponsor of S. 1844, the Coal Distribution and Utilization Act of 1981. This act furthers the development of coal pipelines by extending to some the ability to obtain necessary rights-of-way through the Federal power of eminent domain. Mr. Workman makes a compelling case for coal pipelines and for the adoption of S. 1844.

Mr. President, I ask that the full text of Mr. Workman's address be published in the RECORD.

The address follows:

REMARKS OF MR. ROSS WORKMAN

The title of our topic today is rather long—"The Escalating Impact of Rail Coal Rates on Electric Utility Customers: What Are the Defenses?" But I think I can sum up my answer to the question in one word—competition.

Few things are quite that simple, of course, so to be specific, the competition that I have in mind is that provided by coal slurry pipelines. One must also recognize the need for a diversity of transportation modes, including conveyor, truck, rail, barge, pipelines, or some combination of these, but today I'm going to talk primarily about coal pipelines.

Before discussing coal pipelines, which I believe are a partial though significant solution to the country's coal transportation needs, I will briefly review the nature and scope of the problems facing coal users and producers in the U.S. today.

With close to one-third of the world's reserves of coal, the United States should be well on its way to energy independence. The energy plans of both the Carter and Reagan Administrations called for dramatic increases in U.S. coal production, with current levels doubling sometime in the 1990s. Unfortunately, those plans are endangered by often inadequate and increasingly expensive transportation facilities that have helped make U.S. coal prices the highest in the world.

It is ironic that at the same time that we are trying to increase coal exports, a number of domestic coal users have found it cheaper to import coal from abroad. In recent years coal has been imported from such widely varying sources as Australia, Canada, Poland, and South Africa. And it was used in such diverse states as Florida, Louisiana, Minnesota, Texas, North Dakota, Alabama, and Washington. In addition, some southern utilities are considering coal imports from South America.

Because of escalating transportation costs, we are running the risk of pricing American coal out of world markets. What is worse is that those same escalating costs are also inhibiting the use of our own coal at home, a condition that is placing severe economic pressures on electric utility ratepayers.

From 1967 to 1980, variable rail costs in the United States rose 265 percent. Approximately two-thirds of rail rates are made up of variable costs, with the remaining one-third being composed of fixed costs. Coal pipelines enjoy a decided advantage when it comes to such costs. Coal pipelines are capital intensive, with approximately 70 percent fixed costs and only 30 percent variable costs. This helps protect pipelines from the more severe effects of inflation and can help stabilize rising energy costs.

It is worth reviewing the case of the City of San Antonio as an example of what the rise in rail rates has meant to one utility. In May, 1973 San Antonio's municipally-owned utility decided to build two coal-fired generating units, based in part on a rail rate quotation of $7.90 per ton from the Powder River basin to San Antonio. The rate is now $24.98 per ton. In the past five years alone, the rate has increased over 128 percent. That experience, although extreme, is by no means unusual.

While there were some regulatory restraints on rail rates in past years, they were largely removed last year with enactment of the Staggers Rail Act of 1980. Without effective competition, unregulated rail rates are expected to climb even more sharply in the future.

But competition is possible in the form of coal slurry pipelines, which are noiseless, safe, out of sight underground, and economically attractive for transporting large volumes of coal over long distances. Pipelines do not block traffic, divide towns, or create hazards at grade crossings. Coal slurry is nontoxic and nonflammable, and coal pipelines are environmentally superior to other transportation modes. More important, perhaps, is that pipelines are the only practical alternative to railroads in the long-distance, overland transportation of coal.

There is nothing new or experimental about coal pipelines. The technology was proved in Ohio more than 20 years ago. From 1957 through 1963, a 108-mile coal pipeline operated reliably in that state. Faced with competition from the technically proven Ohio pipeline and other proposed pipelines, the railroads agreed to allow unit trains for coal hauling for the first time. This produced a price reduction of almost 50 percent on coal traffic throughout the utility's service area. With this major victory for competition established, the pipeline was put in mothballs. Since then, various railroad spokesmen have claimed this proved that the line was a failure. The beneficiaries of the 50 percent rate reduction in Ohio, as well as the users of unit coal trains throughout the country, would disagree.

Encouraged by the success of that first coal pipeline, President Kennedy asked Congress in 1962 to help the depressed coal industry in Appalachia by providing eminent domain rights for other pipelines. His Secretary of Interior, Stuart Udall, urged—in words that remain timely—that coal pipelines be added "to the arsenal of tools available to our economy to combat rising energy costs."

America has one coal pipeline operating now, the Black Mesa Pipeline system, which carries approximately five million tons of coal per year over 273 miles from Arizona to the 1500 Mw Mohave Generating Plant in southern Nevada. In its 11 years of operation the Black Mesa pipeline has achieved over 99 percent operating availability, and it has transported the coal at costs substantially less than shipping by rail. It is interesting to note that this coal pipeline is owned and operated by the Southern Pacific Railway.

The struggle that was joined in 1962 to obtain Federal eminent domain legislation for coal slurry pipelines continues today, and the need for competition in the transportation marketplace is greater today than ever before. Nine pipeline projects are being proposed in the U.S., as shown on this slide.

To be more specific about the benefits of coal pipelines, I would like to turn briefly to the pipeline our Coalstream Pipeline Company is proposing to build. In broad terms, our 1,500-mile pipeline will bring more than 50 million tons of coal per year from the Illinois Basin and Appalachia to 16 electric generating plants in Georgia and Florida. In addition, an export facility, to be located somewhere along the southeastern coast, would add another 10–15 million tons per year to our pipeline total. Cost of the project, if completed late in this decade, is estimated to be about $5 billion.

A recent study by A. T. Kearney, Inc., compared the projected maximum rail and coal pipeline rates for transporting coal to the plants our pipeline will serve. The study found that, if the pipeline were built, possible savings in coal transportation costs for the 16 selected generating plants could amount to $54 billion over the first 20 years of the line's operation.

The report points out that, even if the pipeline were not built, just the threat of slurry pipeline competition following enactment of eminent domain legislation would probably result in coal transportation savings arising from the potential competition between the railroads and the proposed pipeline.

And there are other benefits, as outlined in a 1980 study by National Economic Research Associates, Inc. NERA indicated that the Coalstream Pipeline would lead to the production of 17.3 million tons of additional coal per year in Appalachia and the Illinois Basin; the addition of $432 million to the economies of the coal-producing states; the creation of approximately 5,200 new jobs for the area's miners; a reduction in the nation's oil imports and an improvement in the balance of payments; and an increase in tax revenues to the states involved.

Faced with such an impressive array of benefits from coal slurry pipelines, some railroad spokesmen fall back on well-worn arguments in opposing them. One contends that pipelines will skim off the cream of the coal-transportation business and damage railroads economically. Another is that the railroads can handle all the increase in coal traffic expected to develop by 1990 and beyond.

We disagree. As an example, recent studies based on authoritative coal demand forecasts confirm our long-held belief that our proposed Coalstream Pipeline's expected transportation of 54 million tons of coal per year to Southeastern utilities would not cause the railroads any revenue loss and that, in fact, they must be prepared to handle significantly increased amounts of tonnage by 1990. It should be noted that most of the generating plants scheduled to burn the increased volumes either have not yet been built, or they remain to be converted to use coal.

The studies show that:

(1) The Coalstream Pipeline could transport 49 percent of the total volumes of coal projected to be needed in the Southeast by 1990.

(2) At the same time, other transportation methods must be prepared to handle an 81 percent increase in their current volumes, or a growth from slightly over 31 million tons in 1980 to a projected 56.4 million tons in 1990.

These results are in line with Data Resources, Inc. projections, which concluded that should all the proposed coal slurry pipelines in this country be built, nationwide rail traffic must increase from a level of 468 million tons in 1980 to more than 675 million tons in 1990.

If the U.S. is to achieve that kind of increased coal production and use, it will require a concerted effort on the part of all transportation modes to get the coal to the marketplace. If the nation is to approach its goal of energy independence, coal slurry pipelines must become an integral part of the expanding transportation system.

Coal slurry pipelines are obviously an idea whose time has come, but they face a serious obstacle, largely as the result of opposition by the railroad industry. What is needed is Federal eminent domain legislation, similar to that afforded interstate natural gas pipelines.

The bill before the current Congress, H.R. 4230, The Coal Pipeline Act of 1981, was introduced in July by Congressman Morris Udall and an impressive list of co-sponsors presently totaling 36. It is one of the most balanced of the coal pipeline bills to be considered by the Congress in recent years.

As an aside, we see the Association of American Railroads' frequently expressed concern over pipeline water supplies as little more than a diversionary tactic. While we fully recognize the importance of water to the states, we emphatically reject the claim that The Coal Pipeline Act of 1981 will in any way infringe on the right of any state to control its own water. In fact, the state water law provisions in H.R. 4230 give the states greater control over their water resources than any legislation already in existence.

Moreover, the shipment of coal by pipeline uses considerably less water than would be required to convert it into electricity in a mine mouth powerplant or into a gas or liquid in a synthetic fuel plant. Water in the pipeline is neither wasted, nor consumed; it is merely transported with the coal to the distant powerplant where both coal and water will be beneficially used. The pipeline water will amount to about one-eighth of what is required for cooling tower make up.

Further, H.R. 4230 mandates that a "public convenience and necessity" standard be satisfied before any coal pipeline can have the right to eminent domain at the federal level. Passage of the bill should be a priority for a country that believes in competition and needs to achieve energy independence. America should not be priced out of burning American coal.

In conclusion, I might point out that this is not the first time a new transportation mode has been opposed by an established one in this country. Back in the 1820s, Governor Martin Van Buren of New York reportedly wrote to President Andrew Jackson on behalf of the American canal system, which was being threatened by a new form of transportation known as railroads.

Among the reasons given by the governor for opposing the railroads was the serious unemployment that would result. And among the jobs threatened were those of captains, cooks, drivers, lock tenders, boat builders, and tow-line, whip and harness makers, many of whom he claimed "would be left destitute."

As an indication of the kind of rhetoric that is occasionally used in these debates, I would like to read the final paragraph of the governor's letter.

"As you may well know, Mr. President, 'railroad' carriages are pulled at the enormous speed of 15 miles per hour by 'engines' which, in addition to endangering life and limb of passengers, roar and sport their way through the countryside, setting fire to crops, scaring the livestock, and frightening women and children. The Almighty certainly never intended that people should travel at such breakneck speed."

We often feel that somewhat the same type of arguments are being put forth today to oppose coal slurry pipelines. In at least one respect we think our transportation system would meet with Governor Van Buren's approval. Our pipelines will move coal at the eminently reasonable pace of four miles per hour.

Thank you very much.●

MILITARY MANPOWER AND THE ALL-VOLUNTEER FORCE

● Mr. COHEN. Mr. President, I would like to share with my colleagues some good news from the Department of Defense about military manpower and the All-Volunteer Army. I would also, however, like to offer a caution at the same time.

I am asking that an article from this morning's Washington Post and a report issued yesterday by Defense Secretary Caspar Weinberger be reprinted in the RECORD. They both point out that last year yielded encouraging success in both recruiting and reenlistment in the Armed Forces. The dramatic results in both fields are heartening to those of us who have been consistent supporters of the All-Volunteer Force.

We cannot, however, allow ourselves to be satisfied with the statistics shown in 1 year. Our national security demands that we continue to pay close attention to the needs of our military personnel and that we continue to do all we can to improve retention of existing troops and enlistment of new ones. I would ask that my colleagues carefully review the material which follows. While the figures announced by the Department of Defense are a source of encouragement, we must maintain a thorough-going commitment to our military personnel which transcends one set of statistics.

Mr. President, I ask that an article on the All-Volunteer Force and a press release on the All-Volunteer Force be printed in the RECORD.

The material follows:

PRESIDENT PRAISES MANPOWER GAINS OF ALL-VOLUNTEER FORCE

President Reagan reported yesterday that there were impressive military manpower gains in 1981 and said this shows the all-volunteer system is the best way to go in peacetime.

"The success of this past year shows that the voluntary system can work and represents the best way to meet our manpower requirements in times of peace," said Reagan in a statement coinciding with a Pentagon report on recruiting, reenlistment and quality performance in the past year.

Defense Secretary Caspar W. Weinberger called fiscal 1981, which ended Sept. 30, "one of the best recruiting and reenlistment years since the inception of the all-volunteer force, both in terms of quantity and quality."

And Pentagon manpower chief Lawrence Korb pitched in with a claim that fiscal 1981 was the "first time the services met and exceeded their authorized strength" since the draft ended in mid-1973.

All this added up to an attempt by the Reagan administration to neutralize arguments by critics in Congress and elsewhere who have contended the all-volunteer force is a failure and that the country should return to the peacetime draft.

In his statement, Reagan said all of the armed services met their recruiting goals in fiscal 1981, that reenlistment rates were up, that test scores had improved dramatically and that the services enrolled the highest ever proportion of high school graduates among volunteers.

Reagan and Weinberger credited the fiscal 1981 gains to higher pay, increased enlistment and reenlistment bonuses, improved educational benefits and "increased appre-

ciation and respect" for men and women in uniform.

Left unmentioned was what many military manpower specialists say privately is an important factor—the high rate of unemployment which makes military service more attractive to youths who might otherwise take jobs in the civilian economy.

Under prodding from Congress, the percentage of high school graduates rose in all services, with the most dramatic increase registered by the Army which reported that 78 percent of its male recruits last year held high school diplomas. This was an increase of 29 percent over fiscal 1980. The Army has had the most difficulty in attracting high school graduates.

The Pentagon reported that 61 percent of those eligible for reenlistment last year signed up for additional hitches, a rise of some 6 percent from the previous year.

The percentage of blacks in the armed forces decreased by about 1 percent to 19 percent in fiscal 1981. The black content of the Army remained at 30 percent, highest of all the services.

SECRETARY OF DEFENSE WEINBERGER ANNOUNCES YEAR-END RESULTS OF VOLUNTEER FORCE ACCESSIONS, REENLISTMENTS ARE ENCOURAGING

Secretary of Defense Caspar W. Weinberger today announced that the year ending September 30, 1981, was one of the best recruiting and reenlistment years since the inception of the All-Volunteer Force (AVF), both in terms of quantity and quality.

Each Service met its strength objectives and there was a significant improvement over FY 1980 in both the number and proportions of new recruits who scored average or above on the enlistment test. In addition, the Armed Services as a whole recruited a higher percentage of high school diploma graduates in FY 1981 than ever before, even during conscription.

The reenlistment rates also improved for every Service over FY 1980 levels. The improvement was not restricted to the Active Force. Secretary Weinberger noted that the preliminary FY 1981 Selected Reserve results also show significant increases over the FY 1980 experience particularly in the Army components.

The Secretary of Defense cited a number of reasons for this year's strong performance. These include increases in pay and the total compensation package provided by the Congress, increased recruiting resources, a variety of training and assignment enlistment options, enhanced educational benefits, and the growing support and appreciation of the American public for our young men and women in uniform.

Looking forward to the rest of the 1980s, the Secretary stated that the Department should be able to recruit and retain sufficient numbers and types of volunteers to man the force if the all-volunteer force continues to receive the support of Congress and the American people. Secretary Weinberger stated that examples of this support include the recently enacted pay raise, the requested recruiting and retention funds and the quality of life improvements needed to allow the Department of Defense (DoD) to remain competitive with the civilian sector in FY 1982.

Complicating the challenge of meeting future manpower requirements is the shrinking pool of military aged youth and Secretary Weinberger cautioned that recruiting may become more difficult in the years ahead. Moreover, such factors as a dramatic expansion of requirements could exacerbate the situation. To meet these challenges, military service must remain an attractive option to our youth and we must maintain the management flexibility to react to unforeseen events.

Secretary Weinberger noted that Defense exceeded the Congressional restrictions on the "quality" of accessions in FY 1981. While Defense was committed to man the force with the right number and kinds of recruits, the Congressionally-mandated restrictions hinder management flexibility and could affect our ability to meet manpower requirements in the future.

CONGRESSIONAL CONTROLS ON QUALITY ACCESSIONS

[Fiscal year 1981 DOD Authorization Act]

Fiscal year	Maximum percent category IVs	Minimum percent high school graduates
1981	25 DOD Average	65—Army Males.
1982	25 Each Service	65—Army Males.[1]
1983	20 Each Service	No Restrictions.

[1] Added as part of FY 1982 DOD Authorization Act.

In summary, Secretary Weinberger made the following points:

The Services met their recruiting goals in fiscal year 1981 and exceeded the Congressional recruit quality constraints.

Fiscal year 1981 was one of the best recruiting and retention years since the beginning of the All Volunteer Force and the fiscal year 1981 results represent a major improvement over fiscal year 1980 statistics.

Preliminary results show that fiscal year 1981 was a good year for the Selected Reserves and particularly for the Army Reserve and Army National Guard.

Continued support from Congress and the public is essential for success in the future.

MILITARY END STRENGTHS

Secretary Weinberger stated that the active force strength of the four Military Services at the end of fiscal year 1981 was 2,082,000. All Services attained their planned end strength.

ACTIVE MILITARY STRENGTH END OF FISCAL YEAR 1981 [1]

[Thousands]

Service	Congressional authorized fiscal year 1981 end strengths	Actual	Actual as percent of authorized
Army[2]	780	781	100
Navy	540	540	99+
Marine Corps	191	191	100
Air Force	569	570	100
DOD Total	2,080	2,082	100

[1] Excludes active duty military personnel paid from Civil Function and Reserve and National Guard appropriations.
[2] This reflects the Army legislation which revised upward the FY 1981 end strength by 4,700.

Note: Numbers in all tables may not add due to rounding.

Secretary Weinberger noted that the FY 1981 performance was the first time since FY 1974, the first full year of the AVF, that DoD completely met its authorized strength.

ACTIVE FORCE END STRENGTH

[Thousands]

	1964	1972	1973	1974	1975	1976	1977	1978	1979	1980	1981
Authorization	(1)	2,553	2,329	2,190	2,149	2,091	2,093	2,085	2,056	2,052	2,080
Achievement	2,687	2,512	2,252	2,161	2,127	2,081	2,074	2,061	2,024	2,050	2,082
Percentage of Authorization	(1)	98	97	99	99	99	99	99	98	99+	100

[1] Congressional end strength authorizations were established in FY 1972.

A review of the strength data shows that both the female and black content of the Services changed slightly in FY 1981 relative to FY 1980. Female content increased by almost 14,000 or one half percent to nine percent, while black content decreased a percentage point.

TOTAL ACTIVE DUTY MILITARY STRENGTHS

[Total end strength [1] thousands]

Service	Fiscal year 1981			Fiscal year 1980		
	Total	Female	Black	Total	Female	Black

Marine Corps	4	20	4	21
Air Force	11	13	11	14
DOD total	9	19	8	20

[1] Represents reported strength (officers and enlisted, excluding officer candidates).

RECRUITING SUMMARY

The Secretary of Defense said that the Military Services achieved 101 percent of their overall recruiting objective for FY 1981. This was true for all three general categories of personnel for which objectives were established: Non-prior service (NPS) male, NPS female, and prior service personnel.

ENLISTED ACCESSIONS—ALL SOURCES

[Thousands]

Service	Fiscal year 1981 Objective	Actual	Percent of objective	Fiscal year 1980 Objective	Actual	Percent of objective
Army	136.8	137.9	101	172.8	173.2	100
Navy	101.9	84.3	102	96.6	97.7	101
Marine Corps	42.6	44.0	103	43.7	44.3	101
Air Force	81.0	81.0	100	74.7	74.7	100
DOD total	362.3	367.3	101	387.8	389.9	101

Note—Nonprior Service Accessions. The four Services recruited 327,800 NPS people in Fiscal Year 1981. This included 268,100 males and 41,700 females.

FISCAL YEAR 1981 RECRUITING RESULTS

[Thousands]

NONPRIOR SERVICE ACCESSIONS—MALE

Air Force	76.9	86	14	71.8	81	19
DOD total	327.8	87	13	359.8	86	14

EDUCATION

Secretary Weinberger noted that the number of male high school diploma graduates recruited by all of the Services for FY 1981 was 25,000 above the number recruited last year. This is about a 12 percent increase. The Army recruited over 11,000 more male high school graduates and increased its proportion of male graduates from 49 percent in FY 1980 to 78 percent for FY 1981. Additionally, the Services increased the percentage of female non-prior accessions with high school diplomas from 86 percent in FY 1980 to 92 percent in FY 1981.

Secretary Weinberger stated that he was particularly encouraged by the proportion of new recruits who were high school graduates. Experience has demonstrated that a high school graduate is twice as likely to complete a three-year tour as is a nongraduate. Such performance not only improves force readiness but does so in a manner that is cost-effective for the American taxpayer.

NONPRIOR SERVICE ACCESSIONS—MALE & FEMALE HIGH SCHOOL DIPLOMA GRADUATE

[Total Numbers (Thousands)]

Service	Fiscal year 1981 Male	Female	Total	Fiscal year 1980 Male	Female	Total
Army	77.5	17.2	94.7	66.5	19.3	85.8
Navy	60.4	9.4	69.7	56.3	9.5	65.8
Marine Corps	30.4	2.3	32.8	30.2	2.3	32.5
Air Force	57.8	9.6	67.4	47.9	11.4	59.3
DOD total	226.1	38.5	264.6	201.0	42 5	243.5

PERCENTAGE OF NPS ACCESSIONS

Service	Fiscal year 1981 Male	Female	Total	Fiscal year 1980 Male	Female	Total
Army	78	94	80	49	87	54
Navy	74	93	76	73	87	75
Marine Corps	79	100	80	77	100	78
Air Force	88	88	88	83	82	83
DOD total	79	92	81	65	86	68

Comparisons with previous years shows that in fiscal year 1981 DOD brought in a higher percentage of high school diploma graduates than ever before, even during conscription.

A look at the trends in educational levels of Army accessions show similar results to those of DOD. In fact, the Army improvement in the proportions of high school graduates for fiscal year 1981 over previous years is more significant than it is for DOD as a whole.

The Services prefer to enlist individuals with higher Armed Forces Qualification Test (AFQT) scores because these recruits can be trained quicker and are more likely to qualify for specialized training in more occupational areas.

Secretary Weinberger indicated that the number of non-prior service enlistees DOD-wide who scored average or above on the AFQT increased by 21,700 in fiscal year 1981 over 1980. This represents an increase from 69 percent in fiscal year 1980 to 82 percent during fiscal year 1981. The Army experienced the largest increase going from 50 percent to 69 percent.

NON-PRIOR SERVICE ACCESSIONS—MALE & FEMALE AFQT CATEGORIES I-III

[Thousands]

Service	Fiscal year 1981 Number	Percent	Fiscal year 1980[1] Number	Percent
Army	81.5	69	79.3	50
Navy	80.6	88	72.5	82
Marine Corps	35.7	87	30.6	73
Air Force	71.4	93	65.0	91
DOD total	269.2	82	247.5	69

[1] Revised FY 1980 AFQT Distributions.

The AFQT scores of military accessions have fluctuated over the past two decades. From FY 1964–FY 1976, the proportion of new recruits in Categories I and II remained fairly constant. The percentage of enlistees in these two categories declined from FY 1977 through FY 1980; however, there was an increase in the proportion of above average recruits in FY 1981. In addition the percentage of average and above recruits (Category I–III combined) is higher in FY 1981 than it has been since FY 1978.

Once again the AFQT comparison made for DOD are particularly true for the Army.

BLACKS

The proportion of black non-prior service accessions declined from the previous fiscal year. In FY 1981, the percentage of blacks entering the military was 19 percent compared to 22 percent in FY 1980.

NON-PRIOR SERVICE ACCESSIONS—MALE AND FEMALE BLACKS

[Thousands]

Service	Fiscal year 1981		Fiscal year 1980	
	Number	Percent	Number	Percent
Army	32.2	27	47.2	30
Navy	11.5	13	11.8	13
Marine Corps	7.3	18	9.7	23
Air Force	10.8	14	10.8	15
DOD total	61.8	19	79.6	22

PRIOR SERVICE ACCESSIONS

The following table shows FY 1981 recruiting results for prior service personnel. As with their NPS objectives, the Services met or exceeded their requirements for this category of accessions and exceeded FY 1980 results. Increasing the number of prior service accessions not only decreases the demand for NPS enlistees but also reintroduces more senior trained and skilled people into the force.

PRIOR SERVICE ACCESSIONS

Service	Fiscal year 1981			Fiscal year 1980		
	Objective	Actual	Percent of Objective	Objective	Actual	Percent of Objective
Army	20.0	20.0	100	15.0	15.0	100
Navy	10.3	12.3	120	8.6	9.7	112
Marine Corps	2.2	3.1	140	1.8	2.5	137
Air Force	4.1	4.1	100	2.8	2.8	100
DOD total	36.6	39.5	108	28.3	30.1	106

REENLISTMENT SUMMARY

Secretary Weinberger said that the Navy, Marine Corps and Air Force all reenlisted more men and women than last year. Although the Army's reenlistment rate was higher for FY 1981, it reenlisted 4,900 fewer people because fewer people became eligible this past fiscal year. DOD-wide reenlistments increased by 16,700 or nine percent. The percentage of eligible separatees who reenlisted increased from 55 to 61. All Services reenlisted a higher proportion of eligibles in FY 1981 than they did in FY 1980.

FIRST TERM AND CAREER REENLISTMENTS

[Thousands]

Service	Fiscal year 1981			Fiscal year 1980		
	Eligibles	Reenlistments	Percent	Eligibles	Reenlistments	Percent
Army	116.7	77.9	67	133.0	82.8	62
Navy	94.3	51.5	55	86.3	41.6	48
Marine Corps	36.8	15.9	45	35.0	12.4	35
Air Force	93.5	61.6	66	89.1	53.5	60
DOD total	341.4	206.9	61	343.4	190.3	55

DOD-wide first-term reenlistment rate increased by 3.9 percentage points and the number of first-term reenlistments increased by nearly 4,700 over FY 1980. All Services experienced increases in their first-term reenlistment rates. The Army rate increased by 4.4 percentage points, but the actual number of reenlistments in FY 1981 declined due to a decline in the number eligible to reenlist.

FIRST TERM REENLISTMENTS

[Thousands]

Service	Fiscal year 1981			Fiscal year 1980		
	Eligibles	Reenlistments	Percent	Eligibles	Reenlistments	Percent
Army	38.8	21.3	55	50.3	25.4	51
Navy	55.1	23.0	42	53.7	19.7	37
Marine Corps	23.9	6.3	27	19.4	4.5	23
Air Force	43.9	18.8	43	24.2	15.1	36
DOD total	161.6	69.4	43	165.5	64.8	39

While the number eligible for career reenlistment in FY 1981 increased by 1,900 or one percent over FY 1980, the actual number of career reenlistments in FY 1981 increased by 12,000 or 10 percent. The Navy, Marine Corps, and Air Force increased both career reenlistment rates and numbers; the Army rate increased, but the number of reenlistments declined slightly. Navy increased its career reenlistment rate (5.8 percentage points) and its career reenlistment number (6,700 or 31 percent) over last year.

CAREER REENLISTMENT

[Thousands]

Service	Fiscal year 1981			Fiscal year 1980		
	Eligibles	Reenlistments	Percent	Eligibles	Reenlistments	Percen
Army	78.0	56.6	73	82.7	57.4	69
Navy	39.2	28.6	73	32.6	21.8	67
Air Force	49.7	42.8	86	46.9	38.4	82
Marine Corps	13.0	9.6	74	15.7	7.9	50
DOD total	179.8	137.5	76	177.9	125.5	71

Current first-term reenlistment rates are among the highest ever experienced.

Career reenlistment rates continue on an upward trend after several years of decline.

Particularly heartening is the turnaround in Navy Career Reenlistments.

This increase in rates for personnel in a second or subsequent term of service will help in reducing the Petty Officer shortfall.

PRELIMINARY SELECTED RESERVE MANPOWER AND STRENGTH ASSESSMENT AND FY 1981 RECRUITING RESULTS

Secretary Weinberger also announced that preliminary results for end FY 1981 indicate that the Selected Reserve strength was 899,000 as of September 30, 1981. This represents a gain of approximately 48,000 personnel since the end of FY 1980, and an increase of about 92,000 Selected Reservists since September 30, 1979.

PRELIMINARY SELECTED RESERVE STRENGTH [1]

[Thousands]

Component	Fiscal year 1981	Fiscal year 1980	Change from September 30, 1980
Army Reserve National Guard (ARNG)	390.0	366.6	+22.4
Army Reserve (USAR)	225.0	206.6	+18.4
Naval Reserve (USNR)	87.9	87.0	+.9
Marine Corps Reserve (USMCR)	37.0	35.4	+1.6
Air National Guard (ANG)	98.3	96.3	+2.0
Air Force Reserve (USAFR)	61.6	58.9	+2.6
DOD total	898.8	850.8	+48.0

[1] Includes full-time reservists serving on Active Duty Guard/Reserve (AGR) status.

Secretary Weinberger also stated that preliminary recruiting results for end FY 1981 indicate that the Selected Reserve achieved 106 percent of its overall recruiting objective for the fiscal year. Only the Naval and Marine Corps Reserves did not attain their recruiting objectives in FY 1981.

PRELIMINARY SELECTED RESERVE RECRUITING RESULTS
ALL SOURCES

DOD total	121.0	123.8	110

Fiscal year 1981 data is preliminary. Data source for actual results is the Reserve Components Common Personnel Data System (RCCPDS) as reported in "Official Guard and Reserve Manpower Strengths and Statistics."●

LET US BE ECONOMIC COPYCATS

Mr. CRANSTON. Mr. President, a good friend of mine who chairs the Foothill Group, Inc., and serves on the board of directors of the American Business Conference—a coalition of the 100 fastest-growing businesses in the country—and on the board of the Center for Democratic Policy here in Washington, recently published a thought-provoking article which appeared on the Op Ed page of the Los Angeles Times on October 16. Because I feel he has something worth saying, not only about the Democratic Party but about the sort of economic alternatives we should be looking for, I would like to share Don Gevirtz' piece with my colleagues. I ask that his article be reprinted at this place in the RECORD.

The article follows:

[From the Los Angeles Times, Oct. 16, 1981]

DEMOCRATS AS ECONOMIC COPYCATS—PARTY MUST NOT LET DEFECTORS PUSH IT INTO THE GOP'S POSTURE

(By Don L. Gevirtz)

It may be understandable, from the short-term perspective, that many Democrats are plunging into the "conservative tide" that Ronald Reagan's election was said to represent. But such defections are exasperating to those of us Democrats who believe that it is time to reassert the party's once-strong leadership in economic affairs.

The defectors and fence-sitters would not only strip the Democratic Party of its very reason for being but also turn it into a copycat accomplice to the poorly devised and fundamentally unfair economic policies of the Republicans under Reagan. And the officeholders who present themselves as Democrats with Republican sympathies risk being the next to feel the frustration of Americans who sit out elections by the millions asking, "What difference does it make who wins?"

Those of us who believe that it does make a difference must make that difference clear by constructing an identifiable, clear-headed alternative to the cliche that American politics consists of Democratic welfarism on one side and Republican supply-side capitalism on the other.

At the very core of this challenge is finding a definition of our attitude toward capitalism itself. We must start abandoning many of the anti-capitalist overtones that have marked elements of Democratic thinking since the New Deal. Our quarrel with the Republicans should be not over the desirability of the free-market system but over how to make it fair, efficient and open to the entrepreneurial impulses of the American people.●

The Republican approach to capitalism, blindly allowing for the random accumulation of capital by large economic units, is deeply flawed. It is fundamentally inefficient, ineffective, without compassion and ultimately subversive to the long-term health of the free-enterprise system. Just nine months after Reaganomics arrived in Washington, business bankruptcies shot up a staggering 42% compared to the previous year, the worst jump in more than a decade. More than 90% of the failures occurred among enterprises with liabilities under $1 million. In fact, rather than being the beneficiaries, small and medium-sized businesses have become the prime victims of Republican policies.

The Reagan economic program decidedly favors large, multi-national corporations over small, innovative companies, which have provided four-fifths of all new jobs for American workers over the past decade. A prime example can be seen in Reagan's bill that favors the depreciation schedules of large, equipment-oriented companies over smaller firms concentrated in labor-intensive service and retail fields. Nor will this long-term depreciation scheme be very helpful to our high-technology entrepreneurs, fighting for their lives against determined Japanese competition, since their equipment changes very rapidly.

In Reagan's celebrated business tax cuts, nearly 80% will accrue to the 1,700 firms with more than $250 million in assets, with big oil chomping off $70 billion alone, thanks to its loyal friend in the White House.

Even the stratospheric interest rates that appeal to Reagan's strict monetarists are proving far less harmful to big corporations, which can utilize their full tax liability, than to small firms, which lack the scale of profitability to take full advantage of the tax benefits. The situation is particularly appalling for new enterprises faced with high startup costs and short-term losses.

These policies favoring large economic units are also undermining the innovative process, which is vital if we are to improve our productivity and meet the Japanese challenge in the marketplace. Large units simply are not as innovation-oriented as smaller, entrepreneurial companies. A National Science Foundation study concluded recently that small businesses produce 24 times the number of innovations per federal research dollar that large firms do.

Fifty percent of productivity increases in the United States between 1948 and 1969 were the direct result of entrepreneurial technological innovation. Research-intensive manufacturing industries boosted the nation's export surplus in that period from $5.9 billion to $29.3 billion, while industries without strong innovative tendencies, such as autos and steel, declined $16.5 billion, and by the late 1970s represented key contributors to the nation's persistent trade deficit. In the last decade, the output of technology-oriented enterprises has grown three times that of the low-technology big corporations so favored by Reagan. Problems faced by big corporations when trying to develop new technologies were typified in Exxon's inability to implement an electric-motor breakthrough after acquiring Reliance Electric expressly for that purpose.

The shortsightedness of Reagan's economic program could provide the Democratic Party with its fundamental political opportunity in the 1980s. Party leaders and officeholders should actively support and even spearhead the battle for increased incentives for business. We also must make it clear that our economic policies are directed primarily toward encouraging the growth of such industries as micro-processors and information technologies, which have the best chance of providing new economic and productivity growth in the nation.

The Democratic Party pledge to the coming dynamic young generation of entrepreneurs, and to the nation at large, must be one based on the benefits of a new "open capitalism" that encourages new companies, innovation, exports and jobs. To this end, the party should also identify itself with innovations involving employee ownership, stock options and incentives for minority businesses.

This posture would reconcile the party's now-alienated traditional constituencies, including workers, farmers and minorities. We would all become equal partners in resisting disastrous economic measures that, for example, now encourage companies like Du Pont to borrow millions to acquire Conoco while the average citizen cannot even finance a modest home.

The Democrats must become the party of economic as well as social diversity, linking the social progressiveness of the past with the forces now forging the future of technology and economic life. Already, on most non-economic issues facing the nation—abortion, the equal rights amendment, environmental protection, Social Security and checks on Pentagon waste—there is ample reason to believe, according to recent polls, that Democratic Party positions are closer to the majority opinion of Americans than those enshrined in the hard-right 1980 Republican platform.

Identification with decentralized, entrepreneurial capitalism has a long political tradition in America, and it is a tradition that must stand at the core of the Democratic Party's policy if it is to survive and thrive in the coming decade of challenge and change.

SENATOR PETE DOMENICI: WISE WORDS ON WATER POLICY

Mr. MOYNIHAN. Mr. President, much has been said in recent times of the manner in which this Nation has come to be divided amongst its various regions: the Frostbelt against the Sunbelt, the East versus the West and so forth.

This is all the more reason to pay particular attention to those who say

we must find equitable national approaches to problems which confront all parts of the country. Water policy, for example, has been desperately torn by profound regional interests yet it is an area which cries for solutions truly national in scope.

It is not, then, an insignificant occasion when a Senator from the West says that his region must work with those from the East to fashion a national water policy. Those from the West know, perhaps better than most, the importance of water and the role the Federal Government can play in bringing it to areas which need it. I have remarked often that it is a subject those from the East have not addressed with appropriate enthusiasm.

All this by way of saying that Senator PETE DOMENICI has offered us some excellent guidelines for effecting sensible water policy reform in an address he delivered earlier this month to the National Water Resources Association.

Senator DOMENICI says, and I quote him:

Unless we in the West develop a greater mutual understanding and alliance with the East in analyzing water issues and problems—an alliance that allows everyone to address his own particular water problems—I fear we may never see this vital program flourish again. And flourish it must.

The Senator, as he is on so many occasions, is absolutely right, although I must note that I have an interest of sorts here since Senator DOMENICI and I have collaborated on a bill, S. 621, which would enshrine many of the principles of which he speaks. We were told, at first, that Congress would never relinquish its role in water project selection and funding yet our bill has not been forgotten and it seems that more and more people are willing to give it more than casual consideration.

Well they should. As the State motto of New Mexico is something like crescit eundo ("it grows as it goes"), so too our bill grows on those who pay it more than a little attention.

In that spirit, I hope my colleagues will study Senator DOMENICI's thoughtful address and I ask that it be printed in the RECORD:

The material follows:

WATER POLICY OPPORTUNITIES FOR THE 1980's

There are two distinct honors that I carry with me to this platform this morning.

It is, first, a particular pleasure to welcome this great convention of the National Water Resources Association to my hometown and to our great State of New Mexico. Your presence here for your 50th annual convention recognizes the growing significance of Albuquerque as an important convention center, as well as the leadership of so many New Mexicans, particularly Steve Reynolds, in our national water resources development effort.

Secondly, it is a particular honor for me to join in your warm welcome for our great Secretary of the Interior, Jim Watt. I know that you share my feeling that we finally have a Secretary of the Interior who understands our problems in the West, a man who is not afraid to tackle the difficult issues, and a man who is equally right. He and I may occasionally disagree on issues—such as the need to continue Federal support for water research and desalination efforts, and for an independent board to coordinate national water policy.

But we're in tune 99 percent of the time. I am proud of that.

My only complaint, frankly, is with your executive vice president, Pat O'Meara. Now, Pat is a great leader. He is an articulate and thoughtful spokesman for water resources development. But his decision to put me on the program immediately after Jim Watt and right before Manny Lujan's luncheon speech certainly will assure that what I have to say will probably go unnoticed.

Despite that burden, I shall give it a try. I will make the effort because this is a period that is critical in the development of a wise, forward-looking water resources development program and policy. It is critical because new realities force us to reexamine our entire national approach on water project development. And it is critical because we finally have leadership in Washington that understands our problems.

We have just emerged from a period of darkness in evaluating water issues.

We faced uncertainty over the issue of what is called Federally reserved water rights. While that issue remains a vexing one—one which will require continued litigation and hard work—Jim Watt has made certain that we are on the road to a sound resolution.

We also confront the need to clarify and modernize the 1902 Act, to straighten out the problems relating to acreage limitations. I know that you share my sense of gratitude on this issue to my colleague, Representative Manuel Lujan. In his very important position as the ranking Republican on the House Interior Committee, Representative Lujan has taken the leadership to develop a sound approach to resolve the acreage limitation issue. I know that you were as pleased as I was to hear Secretary Watt discuss the Lujan bill with such enthusiasm.

Senator McClure, who is Chairman of the Senate's Energy Committee, plans soon to introduce a companion bill on our side. That may occur as early as this week. I hope that we will be able to hold House and Senate hearings on this issue sometime next month.

We need to get the acreage limitation issue resolved. And soon.

In addition, there are other issues now pending in the courts. One involves a direct attack on the ability of a state to manage its own waters for beneficial use. I share Jim Watt's belief in the sanctity of state control of water. That is essential to New Mexico and the West. If we in New Mexico lose this case, it could dramatically affect the development of water throughout the West, and its appropriations for the benefit of the people of the state. It is not too drastic to say that this case threatens the ability of every state in the West to control its own waters and, thus, its destiny.

But that issue, wisely, lies outside the responsibility of Washington. What rests in our sphere of responsibility is the program of water resources development undertaken by the various water resources agencies—the Bureau of Reclamation, the Army Corps of Engineers, and the Soil Conservation Service.

Everyone in this hall believes, as I do, that America needs more, not less, spending on Federal water development. But we also confront a run-away budget, one that now requires controls over spending for water projects, as with any other program. However painful, decisions like that are essential for the future economic development of the nation.

Let me illustrate what is going on. Later this week, the Senate will consider a Corps of Engineers appropriation for construction that is 10 per cent below last year's appropriation. The reduction recommended by the Appropriations Committee for the Bureau's construction program stands six percent under last year's construction appropriation.

Such declines in spending on water development are not new. Every year, while inflation eats away at the value of the dollar, spending has held steady or declined. The result: A dramatic drop in water development.

Spending on construction of Bureau projects, in constant dollars, is down by more than 25 percent over the past 15 years. The program of the Corps of Engineers has suffered even more—it is down by more than 50 percent over the same span.

This is just a tip of the iceberg of indicators demonstrating the fact that our water development effort lies in disarray. Put another way, the program is crumbling.

Between the Corps and the Bureau, we have an authorized—and unbuilt—backlog of work that totals some $50 billion.

It takes a generation—about 26 years—simply to get a typical water project from the point when the study starts until construction begins. It then takes many more years to complete construction.

We haven't seen any major authorization effort since the mid-1970's.

We haven't had any new starts for years.

Everything is done on an ad hoc basis.

There are no priorities.

And the states, often, are simply on-lookers.

I believe we must make some dramatic improvements.

Fortunately, this Administration understands the problem. Besides Jim Watt, we have Garrey Carruthers from New Mexico, who serves as the Assistant Secretary of the Interior for Land and Water. Bill Gianelli, who used to run California's water program, now oversees the work of the Corps of Engineers. Both men are doing outstanding jobs. These men are true friends of water development.

But I must reiterate my view that the time for major changes and improvements in the program is upon us. We need to reform the system at a time when we have friends in control, rather than those who oppose water development.

Personally, I believe we must approach this challenge with several principles in mind.

First, there must be greater state involvement. That is the touchstone of the Reagan-Watt philosophy. State leadership is wise. It represents the only approach that is likely to get the job done. We must develop a program and legislation that builds upon this concept.

Secondly, we must develop a workable mechanism for identifying and selecting priority water development projects. We must encourage rational choices among sound alternatives—not simply approval of whatever comes out of the pipeline.

Our current ad hoc approach to project selection simply fails to provide the public confidence we must have that our water project dollars are spent wisely.

Frankly, I don't believe Congress can be an effective forum for priority decisions among hundreds of sound, plus some not-so-vital projects.

Congress can—and must—make the policy choices. We can set the level of spending. But we simply cannot select wisely among the merits of various projects in various states. The result is what we see now—a little bit of everything, without any identification of priorities and with lots of public apathy.

Let me give you an example. If there was ever a water issue that deserved priority treatment, it was the depletion of the Ogallala Aquifer. As most of you know, the Ogallala is a vast aquifer stretching from Nebraska south through Colorado, Kansas, and Oklahoma into Texas and New Mexico. It is the breadbasket of our Nation, the feeding ground for much of our cattle, the foundation of much of the agricultural economy in the West.

And it is running dry.

Thanks to some legislation I developed a few years ago, a High Plains-Ogallala Study will soon be completed by the Commerce Department, working with the Corps of Engineers. That study will give the people of the High Plains states a series of options designed to reverse the depletion of the Ogallala waters—options from improved irrigation techniques to the possibility of major interbasin transfers of water. Unless we act, we may see an end to diversified economic growth in the West. If the High Plains area is permitted to return to dryland farming, the entire economic structure of much of the West will shift, and shift dramatically.

And yet there was no Federal concern over this issue until a couple of years ago. I am convinced that if the states had been permitted to become involved more directly in the water program, and if they had been charged with setting priorities, we would be much farther toward a sound solution for the Ogallala.

And, thirdly, we must confront the issue of project financing and cost-sharing. I have the great honor to serve as Chairman of the Senate's Budget Committee. This is a most challenging and exciting job, working to assure the implementation of President Reagan's program.

From that position, as well as from listening to Jim Watt today and examining the recent trends in water project development, there can be no more crucial issue for the water resources program than financing. We simply cannot expect any dramatic increase in Federal spending, without some new allocation of costs—either upfront financing, cost-recovery financing, or both.

Let me quote to you a sentence from President Reagan's most recent economic message:

"When the Federal Government provides a service directly to a particular industry or to a group of citizens, I believe that those who receive the benefits should bear the costs."

President Reagan has already developed proposals for cost-recovery from the commercial users of the inland waterways and our ocean ports. His top water experts—the men who are sharing this platform with me—are working on other cost-sharing initiatives, ones that we must address in the months ahead.

Unless we do, I see a continuing erosion of our water development program, which is so vital to a sound America.

As many of you know, I have developed my own proposal to improve the overall water resources program, to get water development moving forward. I, of course, am referring to S. 621—the so-called Domenici-Moynihan bill.

While many of its technicalities may need to be tinkered with, I remain convinced that its basic philosophical tenets are sound. They are ones upon which we can build with pride and effectiveness for the latter years of this century.

S. 621 creates a program that would allocate Federal dollars among the States, giving the States the responsibility for selecting most projects to be built by the Federal agencies.

In other words, S. 621 puts the States in the drivers seat. It provides greater certainty of funding to each State. It provides an automatic authorization process to short-circuit the tedious delays now built into the program. It creates an automatic process to clean out the deadwood—the old projects that no longer have local support.

And it requires a level of cost-sharing—25 percent—that I believe represents a sound starting point for discussion.

I know that there are those who say Congress will never relinquish its role in project selection and funding. Maybe that is so. Under S. 621, Congress would still review each of the big- multi-State projects.

But I believe our water resources effort will continue to suffer until the responsibility for progress can be shifted more fully to the States and to the beneficiaries.

And, I know there are those who wonder how in the world a Senator from New Mexico can gang up with a liberal from New York to develop a "water reform" bill. Haven't I been hoodwinked?

The answer is no! Maybe it's the other way around.

Unless we in the West develop a greater mutual understanding and alliance with the East in analyzing water issues and problems—an alliance that allows everyone to address his own particular water problems—I fear we may never see this vital program flourish again.

And flourish it must.

Water is our life!

Water is our future!

Unless we begin to pay more attention to creating a realistic program for the latter years of this century, we may lose that future.

Let us work together to avoid that danger.

Thank you.●

Mr. LYLE J. MOORE

● Mr. HAYAKAWA. Mr. President, I want to take this opportunity to recognize the outstanding career and loyal service in the communications field by Mr. Lyle J. Moore.

For 30 years, Mr. Moore has been intimately involved with the telecommunications aspects of many campaign both in the State of California and nationwide. His services with the Bell System included positions at all corporate levels with responsibility for planning, organizing and providing communication facilities. For the last 20 years, political customers have been his primary responsibility with assignments ranging from the establishment of systems through compliance with Federal and State campaign laws.

His specific assignments are recorded in the annals of history. In 1960 he was responsible for the communications at the Democratic National Convention in Los Angeles and organized and directed communications programs for the Nixon/Lodge campaign and debates. From the mid-1960s on, his path continued to link with that of Richard Nixon during various tours, the National Convention in San Francisco, and a 1969 State dinner in Los Angeles. Most recently, he had had administrative responsibility for communications during President Reagan's campaigns since 1966.

Lyle Moore is a native Californian. He was raised and schooled in Los Angeles and is currently a resident of San Gabriel with his wife and two children. He is a U.S. Army veteran of the World War II era, a member of the American Legion, on the executive committee of the Southern California Marine Radio Council, and in 1969 was Commander of the Flotilla 24 U.S. Coast Guard Auxiliary.

Aside from his job-related political activities, he has worked with the parties on local, State, and national levels to develop a more effective system of voter registration and election participation. The City of Los Angeles has seen fit to recognize his contributions to the communications industry numerous times. He received two Los Angeles City Council Resolutions, one for Planning and Organizing CCIR (International Radio Consultative Committee) 9th Plenary Assembly, and another for Outstanding Record of Accomplishment in the Field of Communications Locally, Nationally and Internationally. The Los Angeles Board of Supervisors awarded him a Resolution for Leadership in Developing Programs, National and International for New Systems of Communications and Navigation, and the Republican County Central Committee gave him a resolution for designing a News Release System for Political Candidates.

Mr. President, I am pleased to recognize the contributions of Mr. Moore.●

AUTHORITY TO RECEIVE MESSAGES

Mr. BAKER. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to receive messages from the House of Representatives during the recess of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 6 P.M. TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business this morning it stand in recess until the hour of 6 p.m. today.

The PRESIDING OFFICER. Without objection, is is so ordered.

RECESS UNTIL 6 P.M. TODAY

Mr. BAKER. Mr. President, if there is no other business to come before the Senate, I move, in accordance with the order just entered, that the Senate now stand in recess until the hour of 6 p.m.

The motion was agreed to, and at 6:52 a.m., the Senate recessed until Friday, November 20, 1981, at 6 p.m.

Brig. Gen. Kenneth C. Leuer, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Kenneth E. Lewi, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Bernard Loeffke, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Joseph C. Lutz, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Robert G. Lynn, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Bobby J. Maddox, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Phillip H. Mason, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Church M. Matthews, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. James F. McCall, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Thomas P. McHugh, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John H. Mitchell, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John H. Moellering, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Robert F. Molinelli, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Gerald E. Monteith, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. James E. Moore, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Donald R. Morelli, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Robert D. Morgan, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John T. Myers, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Cecil N. Neely, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Col. (promotable) Cecil N. Neely, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Thomas C. Nelson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Stephen E. Nichols, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John W. Nicholson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. William E. Odom, [redacted], Army of the United States (colonel U.S. Army).

Brig. Gen. William G. O'Leksy, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Hardin L. Olson, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Allen K. Ono, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Donald M. O'Shei, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Joe S. Owens, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Dave R. Palmer, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Ellis D. Parker, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Julius Parker, Jr., [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Burton D. Patrick, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Christian Patte, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. August R. Pede, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Benjamin J. Pellegrini, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Col. (promotable) Harry D. Penzler, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Donald S. Pihl, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Col. (promotable) James Piner, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Robert W. Pointer, Jr., [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Bobby B. Porter, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. William E. Potts, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Colin L. Powell, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Charles G. Prather, IV, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Roger J. Price, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John P. Prillaman, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Hugh J. Quinn, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Frank A. Ramsey, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Lloyd K. Rector, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Leonard J. Riley, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert W. Riscassi, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Colonel (Promotable) George R. Robertson, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Thurman D. Rodgers, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John E. Rogers, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. William C. Roll, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Jimmy D. Ross, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Col. (promotable) Jackson E. Rozier, Jr., [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Crosbie E. Saint, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Col. (promotable) Thomas A. Sands, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. William R. Sarber, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Richard A. Scholtes, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Henry J Schumacher, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. H. Norman Schwarzkopf, [redacted]

[redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) James T. Shelton, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Mark J. Sisinyak, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Joseph J. Skaff, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Henry G. Skeen, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Anthony A. Smith, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Douglas S Smith, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Isaac D. Smith, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Scott B. Smith, [redacted], Army of the United States (colonel, U.S. Army).

Brig Gen. Tommie G. Smith, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Harry E. Soyster, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. David W. Stallings, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Lynn H. Stevens, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Eugene L. Stillions, Jr, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Carl W. Stiner, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. George R. Stotser, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Tracey E. Strevey, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Roy M. Strom, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Leroy N. Suddath, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert J. Sunell, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. William E. Sweet, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. James R. Taylor, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. James A. Teal, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Charles E. Teeter, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. James E. Thompson, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Francis J. Toner, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Gary L. Turner, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Guthrie L. Turner, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. William G. T. Tuttle, Jr., [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Nathan C. Vail, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. James W. van Loben Sels, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Robert E. Wagner, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John F. Wall, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Chester L. Ward, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Gerald G. Watson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Henry G. Watson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Ronald L. Watts, [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Carlton P. Weidenthal, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Sidney T. Weinstein, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Donald P. Whalen, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Albin G. Wheeler, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Orren R. Whiddon, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Howard C. Whittaker, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert D. Wiegand, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Richard W. Wilmot, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. William P. Winkler, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Leonard P. Wishart III, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. George K. Withers, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Frederick F. Woerner, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Col. (promotable) Jack D. Woodall, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Col. (promotable) Stephen R. Woods, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John J. Yeosock, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Robert S. Young, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Ronald W. Zeltman, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

IN THE NAVY

The following-named officers of the U.S. Navy for permanent promotion to the grade of rear admiral in the line and various staff corps, pursuant to title 10, United States Code, sections 5780, 5781, and 5791, or sections 611(a) and 614 of the Defense Officer Personnel Management Act (Public Law 96–513), as applicable, subject to qualifications therefor as provided by law:

LINE

Austin, Robert Clarke
Baldwin, John Ashby, Jr.
Booth, Peter Blake
Cassidy, Thomas Joseph, Jr.
Cooper, Daniel Leander
Davis, George Wilmot, Jr.
Felt, Donald Linn
Grich, Richard John
Hogan, Edward Joseph, Jr.
Howe, Jonathan Trumbull
Johnson, Roger David
Johnston, Fred William, Jr.
Kearns, William Anselm, Jr.
Klein, Verle Wesley
Martin, Edward Holmes
McArthur, John Chester
McCardell, James Elton, Jr.
McCarthy, Paul Fenton, Jr.
McCauley, William Frederick
Moore, Charles Julian
Moore, Virgil Wayne, Jr.
Myers, Lowell Richard
Parker, Jackson Knowles
Parker, John Theodore, Jr.
Peebles, Edward Metcalfe
Piotti, Walter Theodore, Jr.
Roane, Donald Patterson
Smith, Dickinson Miller
Smith, William Dee
Taylor, Clinton Wagner
Watson, Thomas Campbell, Jr.
Wellman, Harold Nixon
Williams Allen Dean
Wyatt, William Claudius, III
Young, Harold Lawrence

MEDICAL CORPS

Lowery, Clinton Hershey
Seaton, Lewis Hiram

The following-named officers of the U.S. Navy for permanent promotion to the grades of commodore and rear admiral when eligible in the line and various staff corps, pursuant to sections 611(a) and 614 of the Defense Officer Personnel Management Act (Public Law 96–513), as applicable, subject to qualifications therefor as provided by law:

LINE

Addams, John Franklin
Almstedt, Theodore A., Jr.
Arthur, Stanley Roger
Aut, Warren Edward
Batzler, John Richard
Box, Roger Elden
Chang, Ming Erh
Chatham, Walter Lewis
Demars, Bruce
Donnell, Joseph Stover, III
Dunleavy, Richard Michael

EXTENSION OF REMARKS

FUTURE DIRECTIONS FOR THE SPACE PROGRAM

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. HORTON. Mr. Speaker, on September 16, 1981, the Washington chapter of the National Contract Management Association had the first of a new series of workshops and dinner meetings devoted to procurement issues facing individual agencies and to related agency programs. At this first meeting, which focused on NASA, Mr. Robert F. Allnut, NASA's Associate Deputy Administrator, presented an excellent summary of the space program's future outlook.

Bob, who served with me on the Government Procurement Commission in the early 1970's, presented an excellent summary of the space program's future. I found his remarks illuminating and I commend them to my colleagues.

The text follows:

THE PAST IS PROLOGUE

The growth of aviation can be thought of as divided into four distinct segments: first, demonstration of technology feasibility; second, rapid expansion of the technology base; third, convincing demonstrations of the utility of the technology in both commercial and military applications and, finally, the routine use of a highly efficient and reliable technology for commerce, trade and national defense.

In the emerging period from 1903 to 1927, from the Wright Brothers to Lindbergh's flight across the Atlantic, aeronautics technology was developed and used to accomplish one of mankind's oldest dreams—to fly! Advances during this period provided positive proof of the technical feasibility of aeronautical flight.

An entire technology base was created in order to solve problems which had never previously been encountered, problems involving aerodynamic design, airframe structures and propulsion systems. This period in aviation history clearly demonstrated that it was technologically feasible to build and fly machines that could expand our world from two to three dimensions.

The period from 1928 to 1939, from Lindbergh to World War II, was a time when aviation proved its utility as a carrier of mail, passengers, and high-value goods. Numerous flight instruments and controls were developed to create an all-weather capability. All-metal structures became firmly entrenched as the baseline for future aircraft with the introduction to service of such advanced aircraft as the Douglas DC-3. The initial motivating force for these advances was the use of aircraft to transport mail, a communications market. However, as aircraft capability evolved, a market began to develop rapidly for passenger transportation as well.

The third phase in the evolution of aeronautics created the mature basis for the aviation markets of today. Activities from 1939 to 1954, ending with the Korean War, were stimulated by a rapid infusion of funds and technology to develop airplanes into highly efficient machines. While the technology thrusts were intended to improve the efficiency and performance of military aircraft to accomplish their missions, the lasting effect of these technology developments was to provide viability for a much broader range of aircraft uses.

Aviation had now proven its maturity and worth. The technology from the war years was exploited to produce a series of new and derivative designs which could be used to change the character of the civilian marketplace. From 1955 to the present, the civilian marketplace has shaped the direction and pace in the continued evolution of aviation. Since 1955, the now-diversified field of aviation has captured nearly all of the intercity domestic mail business in the United States, the bulk of commercial passenger traffic, and a newly expanding, large fraction of the cargo transportation market.

THE ANALOGY TO SPACE

As with the early decades of aviation, the first two decades in space show evidence of evolving with distinct phases. In the 1960's large investments were made in the technologies necessary to enable growth in space mission objectives, starting from the broadcast of the faint beeps of Sputnik and Explorer as they circled the Earth to the explorations of Apollo astronauts on the surface of the Moon and the routine activities of orbiting cosmonauts in Soyuz. The decade of the 1960's was clearly analogous to the first twenty-year period of aviation; we proved that space flight and space systems were technologically feasible; just as the first period in aviation had proven that aircraft flight was feasible. The technologies that made these space accomplishments possible were similar to those in aviation, including new propulsion, power, structural and electronic systems. This era provided the impetus for low weight and high reliability in all subsystems. This rapid development proved by the end of the first decade in space that technology imposed no serious limitations on the dream of manned exploration of this new frontier from the Earth as far as Mars and Venus, our immediate neighbors.

In the United States, the 1970's brought a phase of consolidation and assessment of our future technology directions, and like the second period of the aviation era, we focused our technology in directions required to demonstrate utility. The 1970's proved beyond doubt that expensive space activities could be justified by more than just the challenge of adventure and the spur of international competition. Comsats, Landsats, Metsats, Seasat, and other applications spacecraft firmly demonstrated the advantages of relating to our own planet from the vantage point of near-earth space—the area that former NASA Administrator Tom Paine calls "the new continent." Again, as with aviation, communications was the first competitive market for the demonstration of utility. Intelsat's "Early Bird" satellite in 1965 led the way to radio, telephone and television communications, as the first arena for the commercial exploitation of space.

Space programs also were embraced by the scientific community as a valuable tool for gaining new understandings of our universe, often at a breathtaking rate. Skylab, the U.S. manned laboratory designed to demonstrate a number of applications of space, provided both an opening and a fiery close to a decade of demonstrating that space technology and space systems are more than just novelties. Most importantly, the United States Government made a significant commitment to the future by the development of a new kind of space transportation system, centered on the Space Shuttle. The dedication of a major share of the U.S. space budget to the development of Shuttle technology will, after our current birth pains, accelerate the transition to an expansive and thriving commercial activity in space. This decade was clearly one of preparation by the U.S. and Western Europe. Shuttle, TDRSS, Spacelab and Europe's Ariane launch vehicles each reflect substantial investment toward new capabilities for the 1980's.

As we now move into that decade, it is interesting to reflect on how far we have come and to compare our present state of maturity with the corresponding period in the evolution of aviation. While we have come a long way down the path to demonstration of utility, the task is not truly complete until we have demonstrated the operational usefulness of the Space Shuttle. Therefore, a fair comparison of our present status in space with an equally mature period in aviation is the mid-1930's. The present state of evolution of space systems seems to compare with the Ford Trimotor aircraft of 1933. The space equivalents of aviation's Concordes and wide-bodied jets can be expected near the end of this century.

With this analogy in mind, what can be said about space activities in the decade of the 1980's? Every sign points to a decade of vigorous activity. This activity will clearly be international in character, highly sophisticated in its technology, and rich in its contribution to scientific knowledge; and it will be activity that has an important commercial dimension as the economics of space flight become increasingly attractive.

Let me divide my version of the next 20 years into two categories—the Soviet Union and other international space powers; and, for the United States, national security, communication, remote sensing, space science, and space transportation and other logistics.

INTERNATIONAL CHARACTER OF SPACE

Europe's launch vehicle, the Ariane, has had two successful test launches and is scheduled to become operational next year. To fly on Ariane, ESA is developing operational communications satellites for point-to-point and maritime applications, and is studying L-Sat, a large communications technology satellite with the potential for direct broadcast applications. ESA is also planning land and ocean monitoring satellites as part of its Earth Observations program. France is developing Telecom, an operational point-to-point communications

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

satellite, and is cooperating with Germany to develop two TV Sats, direct broadcasting satellites to serve both countries. France also is developing the SPOT remote sensing satellite for launch in 1984. Arianespace, the company created by the Europeans to operate the Ariane system, is pursuing an aggressive worldwide marketing effort to attract non-European commercial customers.

Japan has developed and flown a family of launch vehicles, and is planning the H rocket, a new, heavier launcher for the mid-80's. After purchasing a first generation of experimental point-to-point broadcast and meteorology satellites, Japan is working on the next generation, which will incorporate a significant level of Japanese industrial participation. India has also successfully orbited test payloads on their homemade satellite launch vehicle, SLV-3. An Indian-built Earth observation satellite was launched by the Soviets in 1979, and a more ambitious operational remote sensing satellite is planned for launch aboard an Indian launch vehicle later in the 1980's. China has successfully orbited eight satellites and plans a geosynchronous launch capability early in this decade. Brazil has plans for a national launch vehicle to be developed and flown in the mid-1980's. Both China and Brazil are considering their own meteorological and remote sensing satellites.

Estimating what the Soviet Union will elect to do in their own space programs is difficult for a Western observer due to Soviet restrictions on the flow of information. The Soviet Union has stated its long-run goals, at several levels of authority, although without a public timetable.

The Soviet Union also has shown an awareness of the potential of reusable vehicles, and various Russian space officials have stated their own convictions that such development is essential. Considering the Soviet effort to maintain a position of leadership in space and the continued high level of Soviet flight activity (three to four times that of the United States), they have more compelling reasons to develop a reusable shuttle as a cost-saving device.

The Russians also speak confidently of building a large and permanent orbital station for many personnel to be used in conducting Earth applications work and scientific observation of the stars and as an orbital assembly, checkout, and launch facility to send manned expeditions to the Moon and planets. Certainly the Russians have accumulated an impressive record of long-duration space missions which have had as one objective studying man's ability to tolerate extended working stays in space. By their actions and their word, the Russians have made clear their intention to establish permanent manned occupancy of near-Earth space.

UNITED STATES SPACE EFFORTS

As we turn to the United States, the first point to be made is that the space arena is no longer dominated by NASA. For some years now, commercial communications by satellite have provided a large, growing and profitable market for communication companies, as well as satellite, earth terminal and electronic subsystem suppliers. In addition, the defense space budget is, to a first order, equivalent to NASA's. Our activities, because of their exploratory and high technological risk nature, receive the lion's share of media and public attention, but NASA is only a small and dwindling share of the total market.

About the national defense space mission, I will say little. Satellite communications, weather observation, and surveillance play central and rapidly expanding roles in our national security, as they do for the Soviet Union and, increasingly, for others. Inevitably, the very importance of these assets leads to plans for their attack and defense. The next two decades will see major strides in systems of these types along with, one would hope, discussions of how to avoid an ever continuing space weapons race. For the present, however, it is absolutely crucial to our national security that we be able to plan on secure national defense assets in space in a variety of threat situations.

In the civil sector (and technologies developed here can directly aid the national defense sector as well), we at NASA need to work on three key mission-limiting technologies—energy, data processing and transportation. We have programs to do each. I will just touch on the need for the first two, and then spend a minute on the third.

When NASA has finished work on the next generation of space electrical power systems—say in 1990—the cost per kilowatt hour in space will still be 1,000 times what it is on Earth. The day will come in this century when we will be processing materials commercially—"manufacturing" if you will—in Earth orbit. But power cost will severely limit what we can economically do until we get them much lower.

We have driven data processing costs from $100 per megabit to just over $5. And we hope to reach $1 by 1990. That's the good news. The bad news—also actually good—is that we are designing satellite instruments that can gather far more information—that's far more megabits—about the Earth. At $1 per megabit, it will cost a third of a billion dollars annually to process the data from one satellite in the 1990's.

Now for transportation. To satisfy the transportation and orbital operation needs of science and applications space missions and of national security space missions, NASA will complete the development and production of a fleet of Space Shuttles. NASA is participating with the U.S. Department of Defense in the development and production of the Inertial Upper State for use with the Shuttle in relatively low energy missions, and NASA is working with the European Space Agency in the Spacelab development. In addition, we are developing high energy orbital transfer vehicles to move satellites in low Earth orbit into geostationary, Earth departure and other high energy orbits, and to retrieve satellites both near and remote from the Shuttle.

We must, none of us, in the euphoria of engineering success on the first flight, lose sight of the Shuttle's real nature: it is a tool not an objective in its own right. It is a tool for opening space to activities formerly prohibited by cost or difficulty. It is a tool for whole new imaginative explorations of our universe—with man-tended machines like the upcoming Space Telescope that will see outward to edges of the universe and backward to the beginning of time. It is a tool that can allow rich new relationships with our international friends and peers, as we cooperate in such diverse areas as infrared astronomy, development of the Shuttle Spacelab payloads, or monitoring of global ocean conditions. It is a tool that can bring the high-vacuum, zero-gravity environment of space within the reach of our innovative commercial and industrial institutions—from which I confidently expect to see flow new products, unique processes, fresh industries, and new jobs. It is a tool for the Defense establishment which relies heavily on space systems to offset major imbalances between ourselves and our possible enemies. It is a tool for the future, a future of technological challenge and reward. It is, above all, a tool for the expansion of human horizons and the elevation of human aspirations.

A major use of this tool will be for space sciences. The mid-1980's will see the launch, via the Space Shuttle, of the 2.4-meter diameter Space Telescope—the most powerful astronomical telescope ever built. This device will provide an order of magnitude increase in capability for extragalactic astronomy and observational cosmology. The Space Telescope will carry the space science revolution—the veritable explosion of our knowledge of the universe—from the 1970's into a period of continuing and astounding discoveries in the 1980's and the 1990's. By the late-80's we hope to fly the Gamma Ray Observatory, a significant follow-up to the High Energy Astronomical Observatory series, and a Venus Orbiting Imaging Radar, to map the cloud-covered surface of Venus.

The first exploration of the solar system in its third dimension—away from the ecliptic plane—will occur through the launch of Europe's International Solar Polar Mission in 1986, and we will continue our investigation of the planets with a 1985 launch of the Galileo Mission to obtain more detailed reconnaissance and exploration of Jupiter and her moons—a miniature solar system in itself.

The 1990's also will see optional land, sea and atmospheric monitoring systems checking continuously from space on the health and vitality and general status of our environment and our resources. Some of these will, I believe, evolve into internationally-sponsored systems, while others will remain purely national or perhaps privately owned.

Fierce competiton in the field of satellite communications will, I believe, abate little, if at all, over the coming two decades. Jockeying for priorities in the relatively limited region of geosynchronous orbit will continue. The trend toward larger and larger spacecraft to occupy these limited positions will accelerate when the Shuttle's large payload bay and high energy upper stage is available. Dependent in large part on the outcome of NASA's research in new frequency bands and large structures, we may indeed see shared platforms in this Manhattan in the sky in the 1990's.

Finally, in transportation, I believe we will see by the 1990's a reusable Soviet Union launch system of some sort, and a second generation U.S. system as well. The speed with which these systems come into being will depend in no small measure on the uses foreseen for them. Any of several factors—heightened international tensions, or selection of the space option either for tapping solar energy or for nuclear waste disposal, as examples—could hasten these developments.

Clearly, mankind's adventure in space has hardly begun. The practical benefits of space have barely been tapped. Between now and the turn of the century the outlook for space is rich in rewards for the human mind and spirit, and rich in response to man's practical needs. These rewards can be for our society, to benefit all people. As Saint-Exupery has said, "As for the future, our task is not to foresee, but to enable it." NASA is working hard to enable a bold, bright future in space. I feel confident that we will have the vision and the perseverance to continue.●

EEC EXTRA-TERRITORIALITY THREATENS INTERNATIONAL INVESTMENT

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. SCHULZE. Mr. Speaker, once again I rise to alert the Congress to the increasing threat to world trade posed by proposals now under consideration in the European Community.

A new wave of radicalism is sweeping across Europe and is a new force threatening the ability of industrial nations to work together as trading and investing partners for a greater common good.

The President has powers to react to discrimination that effects U.S. commerce. My bill, H.R. 4407, makes explicit the implicit power to retaliate in the area of discrimination against U.S. direct investment overseas.

The United States has the least restrictive investment rules of any country in the world. It is our belief that the free market system will produce the best decisions, most of the time. This is no less true in the case of trade in goods and services than in the case of investment. We need clear-cut authority to retaliate against unreasonable, illegal, or discriminatory treatment by foreign governments.

The EEC proposals would be an unconscionable extension of properly sovereign jurisdiction to regulate within Europe. The following article from the International Herald Tribune, Tuesday, October 27, 1981, explains the impact of several current proposals circulating within the European Community.

[From the International Herald Tribune, Oct. 27, 1981]

EEC PROPOSALS WORRY LARGE U.S. COMPANIES

(By Craig Anderson and Marie-Martine Buckens)

BRUSSELS.—Increasing disquiet among U.S. multinational companies over efforts by the EEC to clamp down on the activities of large companies has led to attempts on both sides of the Atlantic to counteract the moves.

This week in Washington, three bills are to be presented to the House that would enable the administration to intervene directly or take retaliatory action if U.S. business interests are adversely affected by the activities of foreign states. Meanwhile, in Europe, more attention is being given to relaying the opinions of U.S. business leaders to Common Market policy-makers.

"There are currently pending in the EEC three legislative initiatives of particular concern to U.S. businesses which have affiliates or subsidiaries in Europe," said Joan Worden, a Washington business consultant.

"All appear to share a wholly unwarranted suspicion of transnational enterprises and all would impose radical and burdensome disclosure requirements and legal liabilities not only upon European subsidiaries but upon parent companies in the U.S. as well."

One plan, the Vredeling-Davignon proposal—named after Henk Vredeling and Etienne Davignon, its sponsors on the EEC Commission—would require companies to inform and consult with employers on decisions that would affect the interests of workers.

Bart Fisher, a Washington lawyer who advises U.S. companies on EEC affairs, said of the proposal: "The obligation to disclose what may be highly confidential data could wreak havoc in business operations."

The so-called seventh company law directive, now being discussed by the EEC's Council of Ministers, also has U.S. businesses concerned. It would require all large companies to publish consolidated accounts. But it is the third proposal, called the "ninth directive," that is seen as the most radical and potentially damaging.

Mrs. Worden said that the effect of this measure would be that, "in the event that a non-EEC parent made a decision detrimental to the interests of a subsidiary in the Common Market, the members of the board of directors of the parent could be held liable for the resulting damage, with unlimited personal liability."

Karl Gleichman, who heads the EEC Commission's multinationals department, siad: "It remains to be seen what the attitude of the U.S. administration will be towards these [EEC] bills. We expect to be contacted officially by the American government and cannot comment at this stage."

Mr. Gleichman added, however, that it was "curious to see Americans complaining about the extra-territoriality of laws. Often, it is precisely this aspect of U.S. antitrust rules which other countries complain about."

Under the bills to be presented to the U.S. House of Representatives on Wednesday, the president would be able to restrict investments in the United States from the countries involved, and U.S. citizens could be banned from divulging business information.

In Brussels, moves are afoot to strengthen the voice of U.S. business. The U.S. mission to the EEC has traditionally played a low-key role in promoting the interests of U.S. companies in the Common Market, but there have been reports that in the past few months the mission has been instructed to increase such efforts. Officials in the mission would not comment on the reports.

The corporate community is also taking action. Anne Harrington of the U.S. Chamber of Commerce in Brussels said: "American investment in Europe is substantial. Current EEC moves might not result in mass withdrawals, but expansion and investment could certaintly be affected."

Miss Harrington, citing the emergence among U.S. businesses of "a more coherent strategy towards the Common Market," noted that representatives from the U.S. Chamber of Commerce in the United States, for the U.S. National Foreign Trade Council and U.S. Chambers of Commerce in Europe met recently in an attempt to link their positions on EEC policy.●

AN OUTSTANDING EDUCATOR, EUGENE F. VARGAS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. STARK. Mr. Speaker, today I wish to honor the memory of an outstanding citizen of my district, Eugene F. Vargas, who passed away suddenly last month. At the time of his death, he was principal of Alisal School in Pleasanton, Calif. He had been an educator in the area for 25 years.

Gene grew up in Pleasanton, attending local schools. He played football for St. Mary's College in Moraga, but found his college career interrupted by the Korean war. He was stationed in Korea and Japan while in the military, but was able to resume his education at the University of San Francisco after the war.

Gene began teaching in Pleasanton in 1960 and was eventually principal of four schools. Often called the dean of local principals, Gene was a dedicated educator who always worked to promote professional growth, both in himself and in others. He had a fine ability to train administrators; he believed in his staff; he was a good listener who never forgot his friends or the people he grew up with.

Gene was a model to many people through his energetic approach to everything he confronted. He was admired for his honesty, openness, and generosity. He never forgot that his primary service was to the children of the district, and they knew it. In a memorial tree planting ceremony at Alisal School on October 23, 1981, the following was part of the children's feelings about him:

> We consider ourselves very lucky to have had a great principal like Mr. Vargas. He was more than just a principal. He was a good man who truly cared about us all. He would take the time to visit our classes and teach us . . . things. Mr. Vargas was nice to all the kids . . . but he was also stern when he needed to be . . . He will be remembered by everyone and live on in our hearts.

Mr. Speaker, I ask you, and all my colleagues in the House, to join me in honoring the memory of this fine man.●

CHARITY BEGINS AT HOME: SETTING TOP-LEVEL FISCAL EXAMPLES

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, in this time of concerted attack against the ravages of inflation, we in

Congress are making difficult expenditure reductions that only represent a small amount of the waste and fat that must still be pruned from the Federal Government. We are doing this because a decrease in high Federal expenditures will likely result in the reduction of the punishingly high inflation rate we now face.

All must sacrifice in order to fight the war on inflation. All must band together and make changes that will result in an improvement in the national economy. An excellent way to conduct this effort is to have "Uncle Sam"—a great progenitor of inflation himself—make some changes in pay scales.

Edward A. Morse of Port Washington, N.Y., has been thinking about how to do this for a long time. Mr. Morse was a financial affairs writer for the Associated Press for 16 years and has added much food for thought to the debate on how best to reduce inflation. In 1974, he authored an article for the New York Times entitled "Napoleon's Patch on Uncle Sam's Breeches." Using interesting and historical parallelism, Morse shows how Napoleon made efforts to improve national revenue collection in early 19th century France. Other later examples of American corporate and governmental salary restraint are offered.

While I am not an advocate of all of Mr. Morse's points, I believe that his thoughtful article deserves to be prominently considered by all economic policymakers. This 1974 article is as timely now as it was when it was authored. I offer Mr. Morse's article for the benefit of my colleagues:

NAPOLEON'S PATCH ON UNCLE SAM'S BREECHES

(By Edward A. Morse)

PORT WASHINGTON, N.Y.—Napoleon, who commanded the finances of a nation as well as its armies, once ordered his astounded tailor to patch a pair of riding breeches that were worn through at the seat.

This was typical of the frugal young Corsican who at the age of 30 took virtually absolute power as First Consul in 1800. Within a few months he averted national bankruptcy. He quickly stopped a raging inflation and balanced the budget every year in which he held office. He won so much confidence among the bourgeoisie that French Government bonds, which sold at 12 francs the day before he took office, advanced to 44 within his first year of power and reached 94.40 in seven years.

Even at the close of his career in 1815, after three disastrous military campaigns and two invasions of France itself, the country was financially sound, according to the historian Albert L. Guérard. Of course, the economics of France and the rest of the world in the Napoleonic era was simple compared to today's confusing mosaic.

How did Napoleon pull France out of the economic morass so promptly? According to Vincent Cronin's recent, excellent biography, "Napoleon Bonaparte," in his initial months as First Consul Napoleon saved France from imminent bankruptcy by raising five million francs from French and Italian bankers and nine million from a lottery.

For longer-term results he introduced a new and much tighter system for collecting income tax. It worked wonders. Meanwhile he put firm reins on the budgets of all his ministries.

The young Bonaparte thus became not only the creator but the admired embodiment of the national will during the years when he achieved so much for France in peaceful fields. Waterloo came much later.

The absence of strong leadership and a clear-cut national will to confront inflation and stop it has been commented upon in the press. True, America, 1974, is not France, 1800. But perhaps a patch or two on Uncle Sam's breeches in places where they have worn thin will stimulate national will.

Sporadic efforts have been made to provide inspiring example. As a member of the first Nixon Cabinet in 1970, George W. Romney, Secretary of Housing and Urban Development, proposed that the nation's leaders set an example in the fight against inflation, which was so much milder then, by refunding 25 per cent of their salaries to the Treasury. At the Cabinet meeting where he made his suggestion, the only response was dead silence.

After waiting in vain a couple of weeks for some support to develop, Mr. Romney refunded the equivalent of 25 per cent of his $60,000 salary to the Treasury. It was a lonely gesture.

President Ford asked Congress on Aug. 31 for a three-month delay of a 5.5 per cent pay increase to take effect Oct. 1 for all 3.6 million Federal employes "Federal employes," Mr. Ford said, "as one of the largest groups of workers in the country, have a special role to play in the fight against inflation because we in Government set the example." The Senate, however, refused to defer the increase.

Mr. Ford could set a really striking example if he wished. In times like these it would not be a crippling sacrifice for a President to refund 25 per cent of his $200,000 salary. After all, a President's expense allowances and perquisites are abundant.

What an example this would set for other high-ranking officeholders, not only in the Federal Government but in the states, cities, counties—even down to the level of well-paid administrators of local school districts whose salaries rise generously as homeowners are continuously squeezed by rising school taxes.

Business executives then could emulate politicians in setting examples, really sharing national leadership. Our most highly paid industrialist, Richard C. Gerstenberg, chairman of General Motors, might refund 25 per cent of his annual $923,000 and make do with a mere $692,250.

After such a gesture, Henry Ford, of the Ford Motor Company, and Lee A. Iacocca, its president, each of whom received $865,000 in salary and bonus, could surely do no less than return 25 per cent and struggle along on $648,750 each.

Undoubtedly, Harold S. Geneen, chairman of the International Telephone and Telegraph Corporation, would not want to be left out of the club. A similar cut would shave his $814,299 annual income to $610,724. This could be catching and sweep the public-spirited executive echelons of all of Fortune magazine's 500 corporations in a great patriotic war against inflation.

The whole thing would leave quite a few extra dollars around for badly needed corporate development, new jobs and even for trimming a few prices here and there. And, of course, let us not forget some of our very well-paid union leaders.

Granted, this would only be a small start in the fight against the complexities of inflation. But isn't a small start exactly what we've been waiting for?●

VETERANS' DAY ADDRESS

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. MAVROULES. Mr. Speaker, I would like to share with my colleagues a speech that one of our country's most distinguished educators delivered at the Commonwealth of Massachusett's Annual Observance of Veterans Day.

Dr. John R. Silber, President of Boston University, is universally acclaimed as a promoter of high standards in education.

Dr. Silber's remarks inspire renewed dedication to the cause of freedom and the role veterans have played defending this freedom.

I commend his thoughts to you as a source of inspiration to us all.

VETERANS' DAY ADDRESS BY JOHN R. SILBER

Governor King, Commissioner Collatos, Distinguished Guests, Friends.

I am deeply honored to take part today in this ceremony. We stand here at the center of Charles Bullfinch's magnificent Statehouse, surrounded by the visible signs of the heroism of more than a century of Massachusetts veterans. There are no flags here from our country's and our commonwealth's wars before 1861. There are no banners from King Phillip's War, from the Revolution, from the War of 1812, from the Mexican War. This is not hard to understand, for cloth surviving from that age is rare enough even when it has not been carried through shot and shell. And these earlier wars were fought by extremely small armies. It was not until the Civil War—in many ways, the first modern war—that Massachusetts raised regiment upon regiment. The flags in these cases are witness to that expansion. And in these cases we find well represented the Spanish-American War, the two World Wars, and the Korean War. There were few if any battle honors in these wars not won by some men from Massachusetts.

The soldiers that have fought under these flags have exemplified an intelligent love of country and determination to contribute to its survival. Massachusetts has in its history an exceptional group of veterans. In front of the State House—visible through the windows of Doric Hall—is the Robert Gould Shaw Monument, the masterwork of the great sculptor Augustus St. Gaudens. In the extraordinary relief that faces the State House, the young Shaw, a scion of white Massachusetts, leads his black soldiers towards Fort Wagner and the battle that would bring him death. We do right in Massachusetts to honor Robert Gould Shaw and his fellow officers of the 54th Massachusetts Volunteers. For in addition to the normal risks of war, they risked the chance, should they have been captured, of trial and execution under Southern laws making it a capital offense to arm blacks.

If we walk to the back of the Shaw monument, we will learn that as admirable as

these young white officers were, their black soldiers were at least as admirable.

The black troops of the 54th were free men who risked their lives for the freedom of others. And even had they escaped death capture might well have brought enslavement. And even as soldiers of the United States, they were not free from discrimination. They were segregated into an all-black unit, but this they endured because that was the only way they could fight to end slavery.

They were not permitted black officers, but this too they endured, for that was the only way they could fight to extend freedom.

And the government set a pay scale for them that was half that of the white soldiers. They did not have to endure this humiliation in order to fight slavery, and they refused it. For eighteen months they accepted the traditional pay of slaves—nothing but subsistence—rather than accept something less than the pay of soldiers of the United States. And after eighteen months, the government realized its error and paid them as befitted the soldiers they were.

The men of the 54th Massachusetts demonstrated for all the world that black men could understand their obligations to their society and fulfill them at the risk of death and enslavement. Late in the Civil War, there was a bill in the Confederate Congress to enlist slaves in the Confederate Army. One of the Senators, with more candor than is usual in political debate, said. "You don't understand. If they will make good soldiers, then everything we have been saying about slavery is wrong." Two years earlier, the men of the 54th had already made this point!

Our most recent war is conspicuous by its absence from these cases. And that too, is not so hard to understand. But we must not forget the sacrifices made by the young men of Massachusetts in Vietnam. More important, we must not forget the veterans of Vietnam, whether they are from Massachusetts or elsewhere. For these veterans are to an extraordinary degree deserving of our compassion and our support. They are the first American veterans not to have been welcomed home as heroes. America did not win their war. Some of us believe that this is because we ought not to have won it; others, because we sent our soldiers into battle without the determination to win; still others hold something of each of these positions. Whatever we may believe about merits and the conduct of the Vietnam war, we must agree as to the importance of public and individual support for its veterans. They took up a difficult and unpopular task because it was their duty: their government told them to, and we, the masters of that government, must resolve not be governed by base ingratitude in our treatment of them.

We should also resolve never again to fight an undeclared war. If a cause is worth sending millions of Americans to fight for, then it is worth placing the resources and support of the country unreservedly behind them. Nor should we ever again fight a war with armies conscripted through a class-conscious draft system that through the device of college exemption essentially relieved the middle and upper classes of their obligation for military service. I say this as a university president, conscious that the educational deferment, intended as a substantial benefit for higher education, in fact demoralized our students and imposed an unacceptable cost on our society.

If we ask ourselves why the millions of men represented by the flags around us went off to war, many never to return, many never to return whole, I suppose we would all say partiotism. Patriotism—the love of country—is a noble term denoting a noble virtue. But as a philosopher, I find the term inadequate, for it does not tell us anything about the nature of the beliefs and motives which underly patriotism.

Patriotism is an illustration of the Platonic principle of social dependence, or what I would call the principle of non-parasitism. By this I mean that no justification can be found for allowing any member of society to live as the parasite of other members, for to do so would mean that the parasite was somehow better—supremely better—than the host on which it depends. Yet by definition, parasites are incomplete entities that require another organism in order to exist: The parasite is always inferior to the host. In society, the interrelationship that ought to obtain among individuals is symbiosis, the relation by which two or more individuals cooperate for mutual survival and fulfillment.

The principle of non-parasitism is easily seen in the relation between the generations. We come into the world helpless, and for nearly two decades are largely dependent upon our parents. This relation would approach parasitism were it not for our obligation to our parents, which requires us to care for them at the ends of their lives just as they took care of us at the start of ours. Over time, the relation is symbiotic, and no person honorably exists ultimately at the expense of another.

In fact, our national defense is based on the principle of non-parasitism: that those who are qualified to defend the country in time of war shall do so and that the rest shall support them in every possible way and reward them for their service. That is the essential compact between our veterans and ourselves, the symbiotic relationship implicit in the national defense.

We often now hear jeering references to "old men who send the young to die in battle," but the fact is that the old men more often than not themselves went to battle a generation before when they themselves were young. And if the occasion arises, the young of today may some day as the old men be compelled to send young men to battle. When I observe that the habit of mankind has been for war, I do not approve of the fact. I deplore it, and there is no prospect more splendid than the idea of the world's last generation of veterans.

But we must not let our hope for such a time delude us into thinking that it has come. In the late 1930s, all over Europe, especially in England, a generation of idealistic youth believed that the last war had been fought. At Oxford, the debating society passed a famous resolution: "This House will not fight for King and Country." In doing so they helped to mislead Hitler about the British will to resist him and into a world war. Most of them did fight for King and Country, and a fearful number of them died bravely doing it. In contemporary Europe, the "peace" movement echoes the self-deluding rhetoric of those Oxford students. By maintaining that the United States poses as grave a threat to peace as the Soviet Union, they prepare the way for Soviet enslavement.

Today's ceremony originally commemorated the end of the First World War, as, at 11 minutes past 11 on the 11th day of the 11th month, the guns fell silent. Now we honor all our veterans of all our wars including the Civil War. In many a southern state house, the Confederate counterparts of those flags now rest, symbols of battles that were fought on both sides by Americans, and which are now seen by all as American victories.

We must never forget the views of our Founding Fathers. George Washington insisted that to preserve the peace we must be prepared for war.

Patrick Henry that liberty is worth fighting and even dying for.

Thomas Jefferson that the price of liberty is eternal vigilance.

Our veterans have neverforgotten those principles. And those of us who live in freedom to enjoy the fruits of liberty can never adequately repay our debt to them.

Those who gave their lives or limbs or years of service to the preservation of our freedom lay upon us the obligation of respect and veneration. Let us today remember all our veterans and especially those that are yet alive to receive our gratitude.●

THE PRESIDENT'S PEACE INITIATIVE

HON. MARC L. MARKS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. MARKS. Mr. Speaker, the President's historic speech yesterday makes clear his own and this administration's commitment to a diligent search for peace.

His offer to discuss not deploying the 572 Pershing II and cruise missiles in Europe if the Soviets would remove their intermediate range SS-20's, SS-4's and SS-5's serves to demonstrate the willingness of the United States to discuss not only arms limitation but arms reduction.

The motivation and rationale for the speech certainly included reassuring our NATO allies of this Nation's determination to continue searching for ways to reduce chances of war through confrontation or miscalculation. However, it would be both unfair and unwise to minimize the potential this speech has for achieving the goals the President actually sets forth. It is a genuine offer to continue the arms limitation and reduction processes that were first set in motion by the Nuclear Test Ban Treaty.

The President's willingness to discuss reductions in both theater and strategic nuclear weapons, plus his call on the Soviets to reduce their massive conventional forces in Warsaw Pact countries, should make clear to the world that the United States desires peace.

The President's poignant reminders of his meeting with Brezhnev a decade ago when they talked of peace are as telling as the President's short review of how America, after World War II, rebuilt rather than dominated a prostrate world.

Mr. Speaker, I support wholeheartedly the President's peace initiative. It is a sign of hope to all mankind—a sign that one of the strategic powers is aware of the need for continuing, arduous efforts in the cause of peace. I trust that our European allies, and other partisans of the arms reduction process, will demonstrate both their understanding of and support for the President's call for giving peace a chance.

I commend the President for his courage in continuing this Nation's tradition of searching for peace while remaining able and willing to defend the freedom we both represent and protect.●

ADMINISTRATION LACKING TERRITORIAL POLICY

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. WON PAT. Mr. Speaker, for many months I have been urging this administration to announce its territorial policy. Today, I testified before the Senate Energy Committee and once again called on the President to speed up a program which will help relieve the tremendous economic pressures facing all of America's territories.

There are hopeful signs of progress in this area. Within the near future I expect the Senate to approve the nomination of Mr. Pedro Sanjuan as the new Assistant Secretary of Interior for Territorial and International Affairs. I have met with Mr. Sanjuan on several occasions and believe that he possesses the character and experience to perform well in his new post. I wish him every success and as I said this morning, also urge that he bring to his office a more active role on behalf of the thousands of Americans living in the territories who need and want the assistance his office can provide.

As chairman of the Subcommittee on Insular Affairs, I stand ready to give Mr. Sanjuan and the Department of Interior every assistance where it comes to the formulation and implementation of a sound territorial policy. The stakes are too high to permit these areas to go through one economic crisis after another without sound proposals how to resolve these problems.

During my testimony today in support of Mr. Sanjuan's nomination, I also called on the administration to give detailed thought on just how their programs will affect Americans living in the territories. Tax cuts here are aimed at stimulating the economy; in the territories those same tax cuts could well bankrupt the local treasuries. We do not ask for charity. What we do need and urge is a sound policy toward the territories which will take into account our special problems and requirements. I do not believe this is asking too much of the Federal Government and I hope that Mr. Sanjuan can begin developing such a program immediately. He has my support and that of the territories and we wish him good luck in his new position. At this time I would appreciate having the text of my statement before the Senate Energy Committee included with these comments. Thank you.

[The statement follows:]

STATEMENT OF HON. ANTONIO B. WON PAT

Mr. Chairman, I thank you for this opportunity to appear today to offer testimony on the nomination of Mr. Pedro Sanjuan to be the first Assistant Secretary of Interior for Territorial and International Affairs.

With me today from Guam is Governor Paul Calvo, who will follow my presentation this morning and speak on behaf of myself, Speaker Thomas Tanaka and Senator Joe T. San Agustin, Democratic Minority Leader of the Guam Legislature.

I appear before you this morning as the Chairman of the House Subcommittee on Insular Affairs and as the Delegate from Guam. As such, I deeply appreciate having this opportunity to address the complex problems facing America's off-shore territories for which my committee has oversight and legislative responsibility. Governor Calvo's statement represents the collective views of Guam's elected officials.

I can think of no office in this Administration which is more crucial to the economic and political welfare of the territories than that which Mr. Sanjuan seeks to hold. The Office of Territorial and International Affairs is charged with carrying out the policies of this Administration in the territories and, as such, is widely regarded by residents of these areas to be the official voice of the United States Government in the islands.

Given these realities, I cannot help but wonder why it has taken so long to bring the nomination of Mr. Sanjuan to the Senate. I am equally dismayed why this Administration has yet to enunciate its official policy towards the territories. This failure to establish territorial policy with a responsible official in charge has resulted in a serious diminution of our ability to properly respond to the budget cuts—and the reductions imposed by the White House which have further increased our economic plight in all of the American off-shore areas.

In the eleven months since this Administration came to power it has been totally silent toward the territories. While I certainly understand that national problems have priority in the decision-making process, are we expecting too much for someone—anyone—to at least give us a hint of what we can expect? Perhaps they have had nothing to say. In that case, I would appreciate being told this so this committee and my own in the House can begin to take appropriate action to provide the territories with responsible leadership from Washington.

Instead we have seen a performance from downtown more suited to the sphinx. But I cannot afford to sit here, silent and doing nothing, while the rank and file of my constituency rant and rave. The problems of the territories demand action and we must have something done now, not in the distant future.

I want to make it clear for the record that my concern is not new. My first opportunity to address this issue directly came on February 5, when Interior Secretary James Watt appeared before the House Committee on Interior and Insular Affairs. At that meeting, Mr. Watt, in his maiden statement to the committee, completely ignored any reference to the territories.

On March 13, my subcommittee met with Undersecretary of Interior Donald Hodel to discuss the problems of the territories. We pointed out the need for swift action to help the territories cope with many problems. Mr. Hodel said that our meeting represented an educational experience for him and promised that, and I quote him. "should a crisis develop, you can count on Jim Watt to take personal charge."

Well, in my mind, the crisis has come and gone, and come again, and I am still waiting for someone in the Interior Department to "take personal charge."

On April 16, I learned that the White House had planned a highly publicized task force to study the problems facing Puerto Rico. I immediately wrote the President, urging him to either expand the Puerto Rico study to include the other territories, or authorize a separate task force for those islands. The problems we face are essentially the same in many areas and it would certainly be a welcome move if the other territories could be given the same attention. My answer came many weeks later—from a White House aide—thanking me for writing and noting that the Department of Interior had full responsibility for overseeing the welfare of the United States territories. A quick call to the Interior Department revealed that there was still no one in charge of territories. And I presume that Secretary Watt felt that this was not a crisis of sufficient severity to warrant his "personal" attention.

On August 28, I wrote the White House, urging that they do something about nominating someone to lead the Interior Department's Office of Territorial Affairs. Mr. Sanjuan had been announced for the job sometime prior to my writing but his nomination was nowhere in sight, nor was a territorial policy that we could even discuss. Again I received a tardy response, assuring me that the White House was working on the problem. I also asked the White House what it had in mind for the territories, and to this question I never did get a response.

For the record, I took to the House Floor on September 28 to again question why the Sanjuan nomination was not before the Senate and to again question just what was happening to a territorial policy. I noted that a lot of Budget cuts had gone through, with the territories losing millions in federal aid resulting from the lack of a comprehensive and cohesive policy.

It was clear that our lack of a territorial policy was becoming extremely detrimental to the islands, and we needed to work with the Administration promptly to see what could be done to assure that these areas were not unfairly hurt. Because the Administration did not have a territorial policy, it failed to understand how the budget cuts would impact on the islands, while it was proposing another round of budget reductions. Although the problems were clearly severe, the Interior Department failed to give us any reason to believe that someone was in charge of overseeing the territories and their problems.

The outlook for the territories' economic survival is indeed bleak. Guam, Puerto Rico,

the Virgin Islands, Samoa, and the Northern Marianas all face a major fiscal crisis this year, next year, and in the foreseeable future. As leaders of the various territories will note, and unless this Administration is willing to take charge and start planning what must be done for these areas, I fear for their future. Let no one doubt that these areas are suffering as much as any area here in the States, and in many instances more so. We have no safety net to be provided by private industry. Nor do we have an alternative source of resources. Like it or not, the islands are heavily dependent on Washington for local government operations, which has established a right to expect that Washington will take that fact into consideration when budgets and taxes are cut.

These latter two points are extremely important to the territories. Because of our unique relationship with the United States, coupled with the imposed federal constraints, the various territories are dependent on the Federal Government. Congress has done an outstanding job of recognizing its duties to the territories under the United States Constitution. And Washington also recoginizes the importance these areas represent in a strategic sense to this nation. Guam, in particular, is very proud of its strategic role in the defense of the United States, but often wonders if Washington recognizes this fact and why we need greater cooperation from the Department of Interior than has previously been forthcoming.

On December 3 and 4, my subcommittee, jointly with the Public Lands and National Parks Subcommittee, will conduct oversight hearings into the question of territorial policy and programs. I am particularly pleased, therefore, to urge that this committee confirm the nomination of Mr. Sanjuan so the process of oversight can proceed quickly and necessary legislative measures be undertaken.

With regard to the nominee, I believe that he brings a broad and interesting experience to the post. His past credentials are quite impressive and, in my meetings with this gentleman, he has proven to be a good student of territorial affairs. At least he has shown his willingness to learn.

I certainly wish Mr. Sanjuan well. His record of service is most distinguished and I believe that he is fully capable of facing up to the challenges of his new position.

Let me add that my comments here today are in no way meant to be regarded as critical of Mr. Sanjuan. Nor is this a partisan complaint. Rather, I want to single out the Department of Interior today for following a practice which has been common there for too many years. It is a practice which essentially does little for the territories. Frankly, I have been deeply disappointed for many years over the failure of the Interior Department to act more as an advocate for the territories and less as a guardian and defender of the U.S. Government. By virtue of its size alone, the Federal Government assumes the role of a fiscal Goliath in our lives. I doubt that Interior has to fear a territorial "David" rising up and smiting the U.S. Treasury.

I hope that the new Assistant Secretary for Territorial and International Affairs can bring his office into a more active role on behalf of the thousands of Americans living in the territories who need and want the assistance his office can provide. I assure this committee that anything I can do to make this a reality will be done.

Finally, Mr. Chairman, I want to request, on behalf of the Congressional Territorial Caucus, which I chair, that this committee consider a number of fundamental issues of territorial policy in its deliberations on this nomination.

The questions attached to my statement, which I request be included in the record of this hearing, have been identified by the Congressional Territorial Caucus as among the critical issues in Federal policy towards the insular areas. We believe that they need to be answered by Mr. Sanjuan, as nominee to be the Administration's lead official on territorial issues. We urge you to direct them to him and consider his response to them as you decide upon his confirmation. You should be aware that the Caucus, additionally, is determined to have answers to these basic territorial policy questions presented to my subcommittee during the oversight hearings on the functioning of the Office of Territorial and International Affairs I have scheduled for early next month.

In closing, let me note that Resident Commissioner Baltasar Corrada of Puerto Rico has asked me to convey to the committee both his support of the qualifications of Mr. Sanjuan and his keen interest in the nominee's response to the some three dozen policy questions that he and my other colleagues on the Congressional Territorial Caucus have raised. Thank you.●

JOBS FOR YOUNG PEOPLE

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. ERLENBORN. Mr. Speaker, I am today introducing a bill to help young people get jobs.

Unemployment among the youth of this Nation has substantially exceeded that of the general population for more than 10 years now, and that pattern is continuing. While unemployment in the total work force rose from 7 percent in July to 8 percent in October, teenage unemployment went from 18.1 to 20.6 percent. Among black and other nonwhite teenagers, the statistics are even darker—their unemployment rate has gone from about 35 percent to approximately 40 percent.

Given the announcement Sunday by the Chairman of the Council of Economic Advisers that unemployment will get worse before it gets better, the best thing we can do for these young people is to remove a major obstacle to their being hired: A minimum wage which discourages their employment and their opportunity to learn good working habits and needed skills.

To encourage employers to hire young people, my bill permits payment of 85 percent of the current minimum hourly rate for anyone under 19 years old for the first 6 months on a job and for full-time students. It is identical, for all practical purposes, to the Cornell-Simon amendment to the Fair Labor Standards Amendments of 1977, which was rejected by a tie-breaking vote.

Child labor laws would apply but, except for vacation periods, the youth wage could not be paid to students for more than 20 hours a week. Prior certification would not be required but a student would have to show a prospective employer proof of enrollment in school.

The Secretary of Labor could require payment of unpaid wages and overtime compensation from any employer who pays less than the youth wage or who extends the 180-day limit for youngsters not in school, who displaces workers who must be paid the regular minimum wage with those eligible for the youth rate, or who hires young people for 6 months, fires them, and then hires other youngsters.

The special youth wage has been debated in Congress more than once. On the last occasion, the bill instead created a Minimum Wage Study Commission and directed the Commission to study the issue.

The Commission early this year recommended against a "youth differential," but a minority report filed by one of the Commissioners was extremely critical of that recommendation. The majority disregarded the results of studies conducted by the Commission which showed that a youth wage could raise total teenage employment levels by a least 2.5 percent and create job opportunities for as many as 450,000 unemployed teenagers.

We should not abandon these young people. They deserve to have the doors to jobs opened for them, and my bill will do that.●

LETTER TO AMBASSADOR DOBRYNIN

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. MOLINARI. Mr. Speaker, yesterday I sent a letter to Soviet Ambassador Dobrynin requesting that he stress with his superiors in the Kremlin the importance of President Reagan's speech yesterday. I would also like to commend the President for his bold and courageous action in proposing a plan that would further world peace and encourage a substantive arms reduction. Mr. Speaker, I would like to include the text of my letter in the RECORD:

WASHINGTON, D.C., *November 18, 1981.*

His Excellency ANATOLY DOBRYNIN,
Ambassador to the United States,
Washington, D.C.

DEAR MR. AMBASSADOR: Today President Reagan called for the elimination of intermediate nuclear weapons under Soviet control, that currently are poised against virtually all of Europe and the Middle East.

I share the President's concern, and consider the reduction of such a threat to be crucial in the prevention of a nuclear in-

volvement that could, and probably would have wide ranging, devastating effects.

The Russian people, I am sure, along with all peace loving nations of the world, share a fervent desire to reduce the tensions that are threatening us all.

Therefore, on behalf of my constituency, and indeed all of the people of the United States, I implore you to stress to the Supreme Soviet the urgent need for immediate discussion of the issue. It would, without doubt, lead to a permanent resolution of what could very well be a question of world survival.

There is little doubt that all peace loving people are watching our two nations closely, yearning for a partnership of hope, that would soon become a partnership of peace.

Sincerely yours,

GUY V. MOLINARI,
Member of Congress.●

ILLINOIS GOVERNOR JAMES R. THOMPSON: FEDERAL PRISON CONSTRUCTION AID ESSENTIAL

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. PORTER. Mr. Speaker, I have risen often on the floor of this House to decry the proliferation of violence in our Nation. I have also spoken of the crisis in our prisons.

Gov. James R. Thompson of my State of Illinois recently cochaired the President's Task Force on Violent Crime. This morning he eloquently addressed the Crime Subcommittee of the Judiciary Committee of the other body on the Task Force recommendations with regard to prison construction. Specifically, he testified in favor of S. 186, the House version of which is my H.R. 4620. Because this matter is of such great importance, I commend Governor Thompson's perceptive remarks to the Members:

TESTIMONY BY GOV. JAMES R. THOMPSON, ILLINOIS

When the Attorney General's Task Force on Violent Crime presented its report to Attorney General William French Smith last August, the report recommended that federal legislation be sought to provide $2 billion across four years to the states for prison construction. It is vital to this nation's criminal justice system that federal resources be allocated to aid the states in meeting the demand for prison bed space. More than two-thirds of our states are proposing or are building at least one major corrections facility. Illinois is above that average. At a cost of more than $70,000 per bed in many locations, some states have found they cannot afford to add to their inventories of prison beds.

The result is overcrowding, which creates a kind of incarceration that produces human beings at the end of the process who are more prone to violence in many cases than at their intake. States face the potential added costs of prison riots and court-directed overcrowding solutions that drain our state treasuries—treasuries already ravaged by inflation and a recession-wracked economy.

The Task Force recommendations to assist state corrections programs were presented in four parts:

1. We asked the Attorney General to seek $2 billion in federal funds to be made available over four years to the states for building corrections facilities. Criteria to obtain grants under the program would include a demonstration of need, a 25 per cent contribution by each state toward the overall construction cost, state assurance that operating funds would be available after construction is complete, with funds allocated under a formula measuring a state's need for prison construction in relation to all states.

2. We asked the National Institute of Corrections, which would administer the grants, to develop models within six months for minimum, medium and maximum security prisons of up to 750 beds each from which each state could select an appropriate model or models for construction. Also, we asked that the NIC complete studies on possible regional prisons, the feasibility of prison management by the private sector and funding needs of local jails. The Attorney General was asked to review the NIC findings and other data to determine whether added funding is needed after the four-year program is ended.

3. We asked the Attorney General to support legislation to amend the Federal Property and Administrative Services Act of 1949 to allow the conveyance of appropriate federal property to the states and local governments for correctional use and that such conveyances be given priority over other requests for the same property for other purposes.

We asked for legislation to amend the Vocational Education Act and other related statutes to permit state and local correctional bodies to gain access to existing funds to establish vocational and educational programs inside correctional institutions.

One of the most—perhaps the most—pressing violent crime issue in this nation is finding available space to keep dangerous criminals off the streets. Nearly every state is in crisis in this regard. Violent crime rates are rising. Public demands for harsher sentences and resultant higher conviction rates have produced unprecedented increases in our prison populations.

In Illinois, the situation is one which we reassess almost daily. Since 1977, we have spent $87 million in capital funds in Illinois to add prison beds to our adult corrections system. We have added 3,500 beds to bring our total to 13,250. Each of those beds is occupied. The 3,500 prison beds we already have added to the Illinois adult prison system since 1977, have placed an added demand on our operating funds of more than $42 million each year atop the construction costs. An additional 1,500 beds are in the construction or planning stage. But our prison officials estimate that our prison capacity will be 2,100 beds short of our estimated 16,800 prison population by 1985. We are now looking for sites and funds to meet this foreseen need.

The situation is particularly ominous in light of a federal court class action decision on the third of this month which held that the double-celling of inmates at our maximum security institution at Pontiac, Illinois constitutes "cruel and unusual" punishment under the Eighth Amendment. The court has given us 60 days to propose a plan to eliminate double-celling at the Pontiac Correctional Center by converting to single-cell housing. We are going to appeal that decision, but the outcome could clearly exacerbate the already heavy demands on our state treasury to the point we can no longer make ends meet.

If it stands, the Pontiac order would displace 400 inmates. There would be no space to accommodate them. Further, if the court ruling is upheld, it would displace a total of 3,000 inmates throughout our entire Illinois system. Again, we cannot accommodate this with our present capacity and we must regard it as a federal mandate because of its federal court origin.

It is against this critical backdrop, then, that I appear before you today.

I am in support of Senator Dole's proposal, Senate Bill 186, which has been introduced in the House by Representative John Porter of Illinois. In its present form it is a forward-thinking measure which, if approved, would be of inestimable help to states like Illinois, which are being pressed to the wall by the financial demands of a rising prison population at a time when every area of government service is being critically pared back to match the inflation-recession situation.

Putting violent criminals behind bars is a goal that extends from coast to coast. It is not indigenous to any one state. By the same token, providing space to lock them up is a national problem. It is in that context that I urge you to view with favor the request that resources be found to help individual states meet our urgent needs for the added prison beds to meet a truly legitimate national goal.●

INTEREST RATE CONTROLS

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. McEWEN. Mr. Speaker, the Subcommittee on General Oversight and Renegotiations of the House Committee on Banking, Finance and Urban Affairs today held an oversight hearing on the Depository Institutions Deregulation Committee.

I am concerned over a number of recent DIDC actions and submitted testimony to the subcommittee expressing my concerns and urging the committee to carefully watch the actions of the DIDC to insure that it operates in full compliance with the boundaries laid down by Public Law 96-221, which calls for a phaseout of interest rate controls.

I would like to take this opportunity to share my comments with the Members of the House:

STATEMENT OF CONGRESSMAN BOB MCEWEN

Mr. Chairman, members of the Subcommittee, I am pleased to have this opportunity to share with you my concerns over the actions of the Depository Institutions Deregulation Committee (DIDC) and the effect of these actions on savings and loans and, therefore, housing in my District.

I have heard from a number of savings and loan managers expressing concern over recent DIDC actions creating "wild card" accounts for individual retirement accounts (IRA's) and proposals to create other such "wild card" accounts in the near future. I share this concern.

While I understand the DIDC's wish to move to a deregulated environment and to provide the saver with a market rate of return on his or her savings, I find the timing of the action questionable.

First, Public Law 96-221 provided for a phaseout of interest rate controls over a six-year period as rapidly as economic conditions warrant. In addition, as I understand the law, the DIDC should be cognizant of the effect of their actions on the safety and soundness of depository institutions.

Second, P. L. 96-221 instructs the DIDC to provide an orderly transition to market rates of return on savings deposits.

It seems to me that the actions of the DIDC have followed none of these considerations so carefully set out by Congress when it enacted P. L. 96-221.

Most thrift institution's earnings are currently at a record low level. Many are struggling to survive in the current high interest rate environment. Their traditional source of income—mortgage lending—has been shut off because it is impossible to find qualified buyers at 17% and 18% interest rates. In addition, these institutions have not had time to incorporate the limited asset powers granted last year into their asset structure. Therefore, to impose an additional cost factor at this time by creating "wild card" accounts actually endangers the future stability of these institutions. It is obvious that those institutions with good earnings such as commercial banks and money market funds will be able to offer much higher rates on savings in order to attract these funds. In fact, it is quite likely that interest rates on these accounts will be offered at levels much higher than market. Thrift institutions are not in a position to compete equally in such an environment for either the IRA/Keogh funds or other such accounts that will be created in the near future.

I, therefore, urge this Committee to look carefully at the consequences of the DIDC action on all depository institutions and, particularly, on housing. I would hope that, at a minimum, this Subcommittee will urge the Congress to ensure that deregulation is accomplished by pegging interest rates on these accounts to a market rate index during the transition period guaranteed by P.L. 96-221. This action would eliminate the very real danger of predatory pricing that exists with "wild card" type of accounts.

In addition, I hope that we in the Congress will keep a watchful eye on the DIDC to ensure that this Committee in the future operates within the boundaries laid down by P.L. 96-221. I urge this Subcommittee to recommend appropriate, specific steps to ensure full compliance with that statute.

Thank you for the opportunity to share my concerns. I look forward to working with the members of this Subcommittee and the full Banking Committee to ensure a fair and equitable deregulation of interest rate controls.●

THE DISCOVERY OF PUERTO RICO ON NOVEMBER 19, 1493

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. CORRADA. Mr. Speaker, on November 19 Puerto Rico commemorates the 488th anniversary of its discovery by Christopher Columbus, the dreamer who gave the world of his time an added measure of continents and new, amazing cultures.

This was his second voyage, a far cry from his first high seas adventure of 1492, when he had only the *Pinta*, the *Niña* and the *Santa María* to seek what he thought would be a new passage to India.

In comparison, his flagship the *Marigalante* was now followed by 16 others, which carried more than 1,500 volunteers, most of them young men of noble lineage and empty purse, tempted by the promise of gold, honors, and exciting adventures. But there were also artisans, craftsmen anxious to work and share the benefits, and the missionaries who would propagate the Christian faith among the heathen.

The generosity of King Ferdinand and Queen Isabella had also filled these ships with what seemed most necessary for a fast colonization—and conquest—of the newly discovered lands: a large number of Andalusian horses, merchandise of all sorts to be disposed of, either traded or given away, at the admiral's discretion; seeds and plants that were then common in Spain—wheat, rye, rice, grapes; and fruit trees. No less important were the bovine cattle and other domestic animals, which would be raised to provide the settlers with much-needed food.

The fleet, commanded by Admiral Columbus, sailed from Cadiz on September 25, 1493, following a south-easterly route along the Canary Islands. There they made provision of some more cattle and fowl and, finally, on the 17th of October, he set his course to the south, where pretty soon a startling collection of islands filled the horizon. First was the one called Deseada (Desired, then Dominica and Marigalante, followed by Guadeloupe, Monserrate, Antigua, St. Martin, Saint Christopher, Saint Ursula (and the Eleven Thousand Virgins), and finally San Juan Bautista de Puerto Rico, which the natives called Boriquen.

Here Columbus decided to make provision of fresh water, and after searching for the most adequate harbor he anchored the *Marigalante* in a well protected bay, not too far away from the mouth of the Añasco River, in the western part of the island.

Our great historian Salvador Brau says that there was a small village close to the beach, among trees of dense foliage and climbing vines. A small group of men, headed by the admiral, went ashore, and found nearby abundant sweetwater springs, and they baptized the place as Puerto de los Pozos del Aguada, because of its excellence.

The explorers did not see a soul, so Columbus could not get any information about the island, which he baptized as Saint John the Baptist of the Rich Port; but in his diary he entered his admiration for this land, so green, crossed by many rivers, with rolling hills and a very mild climate. A monument erected near the Culebrinas River in Aguada today serves as a reminder to the world that Columbus was there. He left on November 22, setting course for Hispaniola.

San Juan later became the name of the Spanish settlement started by Juan Ponce de León, and eventually grew to be the capital city. The island, inversely, became known as Puerto Rico and is presently the only land under the American flag where Columbus ever set foot.●

ADDRESS TO THE PRESIDENT

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Ms. OAKAR. Mr. Speaker, I would like to use the vehicle of the floor of the House of Representatives by personally addressing the President of the United States.

Mr. President, let me begin by saying how much your statement asking for nuclear arms control has meant to the people of our country and to the people throughout the world. This truly compassionate, expansive, and enlightened gesture showed a great understanding of the basic integrity of humankinds' existence on this Earth. Now that this initial and very necessary step has been taken toward a peaceful coexistence, I would like to relate to you the very great needs of the American people during these trying times. I have recently traveled to parts of this wonderful country as a member of the House Banking and Urban Affairs Committee and have listened to the people—the aged, the young, the minorities, the small business people and the parents of growing children. Mr. President, they are suffering and asking for help, asking for the quality of their lives to be supported and abetted by we, the elected public officials. In Seattle, my colleagues and myself were particularly moved by a fine, young woman who is considered to be the backbone of our country; a mother of two young children, who was laid off from her job, whose unemployment insurance had just run out, who could not qualify for food stamps because she owned her house, who could not meet the payments on her house and so would lose it. Mr. President, what is she to do? What can we offer her? I ask you to attend to the suffering and pain of our people and show as much compassion to them, the people you and I originate from, as much compassion as you have shown to the world with your statement of yester-

day, with your enlightened realization of the possibilities of life and death on a worldwide scale. No matter how much thus alleviates the potential destruction of all we know as life, unless the quality of life is improved for our people, unless the pain of our people can be heard and eased, America will suffer. Mr. President, they and we, the Congress of the United States, look to you to hear them. A life well lived is a life worthwhile. Our greatest national asset—the people—need you now.●

HUMAN RIGHTS IN THE WORLD

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. BRODHEAD. Mr. Speaker, for the past several months, the issue of human rights has been virtually ignored in American foreign policy. At a time when the administration is beginning to propose new initiatives in the area of nuclear disarmament, and a qualified candidate has at last been nominated to fill the vacant position of Secretary of State for Human Rights and Humanitarian Affairs, I think it is appropriate to direct our attention to the defense and promotion of human rights in the world.

Nowhere is the issue of human rights more pressing at the present time than in the cases of Soviet Jews who seek to emigrate from the U.S.S.R.

The evidence is clear:

Only 368 Jews were permitted to emigrate from the Soviet Union last month, compared with more than 4,500 just 2 years ago. This is the lowest monthly figure since emigration began.

There has been a sharp upturn in the number of refusals for exit permission and an increase in nondelivery of invitations from abroad, which are necessary for applying for visas.

The waiting period for consideration of applications has been increased to almost 2 years.

Some people have waited for years for permission to emigrate. Abe Stolar, an American citizen who holds a valid American passport, applied for exit permission with his family which was approved and then revoked. He has been waiting since 1974. Alexander Maryasin, his wife Leah and daughter Faina applied more than 7 years ago. Both these families are still waiting. Their cases are not unusual.

There has been a sharp upturn in the number of "refuseniks" who are arrested or otherwise harassed by Soviet authorities. One such person, Alexander Paritsky, applied for permission to emigrate in 1976. Since that time he and his family were repeatedly harassed by the KGB. Paritsky was arrested and tried on charges of slander against the Soviet State. Last week, he was convicted and sentenced to 3 years in prison.

Even visitors to the Soviet Union are not immune from official discrimination. Recently one of my constituents, Gerald Rogers of the Detroit Committee for Soviet Jewry, who has previously traveled to the Soviet Union, was denied an entrance visa. No reason was given for this action, although it is strongly suspected that the refusal is related to Mr. Rogers' work on behalf of refuseniks.

Human rights is basic to what this country stands for. I hope the administration will restore it to its rightful place of prominence in the formulation of our foreign policy.●

WINERIES OF CERES, CALIF.

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. COELHO. Mr. Speaker, my native State of California is the leading producer of wine in the United States today. We have over 450 wineries which produced approximately 410 million gallons in 1980 alone.

One of the largest wineries in the United States is the JFJ Bronco Winery Co. of Ceres, Calif. The California wine business has always tended to be a family-oriented one, and the Bronco Winery is no exception. Through the dynamic and energetic abilities of two brothers, Joseph and Fred Franzia, and their cousin, John, the Bronco Winery had its beginnings in 1973. Since 1973, it has expanded into 1 of the 10 largest wineries in the United States today.

Initially the Franzias formed a marketing company which bought bulk wine in the San Joaquin Valley for brokerage to other wineries. They formed a wholesale distribution company which has become the foundation for today's wine production under their JFJ and CC Vineyards labels. Most of the Bronco's wine is sold and consumed in California under a variety of labels—in restaurants as house wine and in the air when champagne is poured for airline passengers.

The Franzia Bronco Winery is a further testament to the excellent wines that are produced in my home State of California. The future of the California wine industry is a very promising one and it is made more so by people like the Franzias.

Mr. Speaker, I submit the following article on the Bronco Winery from the Modesto Bee, dated November 6, 1981, to be printed in its entirety.

CERES WINERY AMONG TOP 10 AND STILL GROWING

(By William D. Kane)

CERES.—Bronco Winery isn't listed in every guide to California wines, yet the winery's output is served throughout the state under a variety of labels, in restaurants as house wine and in the air when champagne is poured for airline passengers.

In fact, the JFJ Bronco Winery is among the 10 largest wineries in the U.S., now producing 2 million cases of wine annually.

Bronco will be the featured winery today at this year's Modesto Chamber of Commerce Wine Appreciation and Information Luncheon.

Nestled in the "country" three miles southwest of Ceres, the Bronco Winery is off the wine-tasting tourists' path—there is no tasting room—and the rows of insulated stainless steel storage tanks resemble a petroleum tank farm.

The dynamic young "brothers and cousin" Bronco partnership started in 1973 when John (the cousin) and brothers Joseph and Fred Franzia left the family's Franzia Winery near Ripon after it was purchased by the Coca-Cola Bottling Co. of New York.

The three had grown up in the wine industry, and John earned a degree in enology—the study of wines and wine making—at the University of California at Davis and serves as winemaker.

They decided at the outset to form a marketing company, reversing the usual process of planting vineyards, finding a home for the grapes and ultimately building a winery.

"We had a chance to go to Napa Valley," John explained, "but we knew this two-county area (San Joaquin and Stanislaus) the best and all we knew was the jug wine business."

What happened was the three started out buying bulk wine in the San Joaquin Valley for brokerage to other wineries, and they formed a wholesale distribution company—which has become the foundation for today's wine production under their JFJ and CC Vineyards labels.

Sine 1974, Bronco also has been a major distributor for premium Robert Mondavi, Charles Krug, Sebastiani, Estrella, C.K. Mondavi, Oakville and Pope Valley wines and Hans Kornell champagnes.

But the Franzia's wasted no time in building the Ceres winery and the bottling lines started rolling in September 1974. For the first three years, they bottled in bulk for other wineries. The "Bronco" label appeared in 1977 but it has since been dropped.

More and more storage tanks were built including a $190,000 expansion this year to add 19 new tanks, to bring the Ceres winery's capacity to 19 million gallons.

When the Franzias started looking for a varietal grape plant, a deal was struck with the Getty Oil company which had extensive vineyard production in the Fresno area. A 17 million gallon capacity storage facility and crushing plant was built with JFJ Bronco as the lease operator. Some of that wine is shipped to Ceres for bottling.

Fred Franzia handles the Fresno plant with double-duty this year as president of the California Wine Institute, a job he says keeps him constantly on the road.

Joe sells the wine, assisted by 42 field representatives. "Our philosophy has always been to give personal service, and offer consistency and affordable prices. As owners, we deal directly with our customers. We're out there every day selling, and it all adds

up, since we don't advertise and it's mostly word-of-mouth," Joe said.

About 40 percent of the Ceres winery's output goes into the JFJ and CC Vineyards label. Bottlings for other customers include a Central Valley Vineyards label for the Winn-Dixie markets in Florida, Three Mountains and Cedar Creek Cellars labels, among others. Most of Bronco's wine, however, is sold and drunk in California.

"Our ultimate goal is to go East," John said, "but we'll send our own people so we have control. It's best when your primary interest is in your own brand."

Bronco is content to make good wine from Central Valley grapes and sell it at the low end of the price market, the Franzias say. "We tried making varietals for our carafe bottlings, but the price scared people away. We started out with a 'jug wine' thinking—we just know that business best," John said.●

STATEMENT BY CONGRESSWOMAN BOBBI FIEDLER IN REACTION TO PRESIDENT REAGAN'S FOREIGN POLICY SPEECH

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Ms. FIEDLER. Mr. Speaker, President Reagan's speech on arms limitation has the potential to be the realization of the administration's commitment to initiate real and meaningful negotiations in this area. By offering to completely halt the deployment of new U.S. theater weapons, President Reagan has served notice to the Soviet Union that the ball is now in its court. If the Soviet Union declines to answer this initiative for disarmament with action and cooperation, it is time for world public opinion to realize where the responsibility for the increase in nuclear weapons in Europe lies.

In the seventies, the United States dismantled its European-based missile forces—Thor, Jupiter, Matador, and Mace missiles were all retired. The Soviet Union retired nothing. Its SS-4 and SS-5 missiles, dating to that period, remain in service, their large, dirty warheads targeted on the great cities of Europe. The Soviets, however, were unsatisfied even with this uncontested advantage. In the late sixties, they deployed the SS-20, a modern, mobile, state-of-the-art missile. Each SS-20 launcher has three missiles it can fire. Each SS-20 missile carries three independently targetable warheads. Able to strike targets as far away as Iceland, the SS-20 put all of NATO's defensive strength within reach of Soviet nuclear power, opening up Europe to Soviet nuclear blackmail. It is small wonder that the countries of Europe asked the United States, at that time, to modernize its theater nuclear forces with Pershing II and ground-launched cruise missiles (GLCM) weapons systems.

The President has now offered to replace this balance of armed deterrence with a broad and sweeping plan for disarmament. While we cannot be too optimistic of the chances that the Soviet Union will accept this plan, it remains for us to show that this is an important first step for peace and not a propaganda ploy. I believe the President's offer to the Soviet Union to begin strategic arms reduction talks—START—offers a chance to follow up this offer with the first ever real mutual reductions in strategic forces since 1945.

I believe that the President is in a unique position to achieve arms control through bilateral negotiations. With his reputation for supporting a strong military, there would be no illusion in anyone's mind that we are negotiating from a position of weakness or fear. The President has, through his record, the authority to secure an arms reduction agreement that will be acceptable to the American Congress and people, an authority that earlier administrations have too often lacked.

Today, we have seen what I hope will be the first step in a new process of arms limitation. If, through this process, peace can be secured by reason and negotiation rather than armed force, then it may well prove to be one of the most significant acts of our time.●

RECONSTRUCTION AND REHABILITATION OF THE MARTIN LUTHER KING BRIDGE CROSSING THE MISSISSIPPI RIVER

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. YOUNG of Missouri. Mr. Speaker, I am pleased to introduce legislation today in the House which will allow the Secretary of Transportation to carry out a project to improve the Interstate Highway System by diverting a portion of the traffic from bridges on the Interstate Highway System across the Mississippi River presently operating above design capacity to other bridges in the vicinity of such Interstate bridge. This goal will be achieved by allowing the recipient State to rehabilitate an existing highway bridge spanning the Mississippi River in the St. Louis metropolitan area.

Mr. Speaker, the United States has more than 500,000 bridges, and slightly over 200,000 of these are deficient. This means that almost 4 out of every 10 bridges in this country are deficient. The Federal Highway Administration currently estimates that it will cost $4.1 billion to rehabilitate or replace these bridges. The threat to safety, inconvenience, and the financial burden of these 200,000 deteriorated and obsolete bridges is of national concern. Over time, many older bridges weaken by weather, erosion, vibration, decay, metal fatigue, and other factors. Increasing amounts of traffic and heavier vehicles have hastened this deterioration. These deteriorated bridges increase the potential for accidents, limit the use of the roads and highways, and cause traffic congestion and additional travel time. They contribute to an increase in traffic deaths, injuries, property damage, fuel consumption, air pollution, and the cost of goods and services. The extent of the safety hazard involved is evidenced by Federal Highway Administration estimates that about 150 of these bridges will collapse each year.

Mr. Speaker, in my own State of Missouri, 16,033 of the State's 24,515 bridges are structurally weak or functionally obsolete and need to be rehabilitated or replaced. This is the highest percentage of bridges in the country (65.4 percent) needing rehabilitation. In the State of Missouri alone, it would cost an estimated $4.96 billion to restore these 16,033 deficient bridges. In the neighboring State of Illinois, there are 8,947 deficient bridges. Illinois estimates that it would cost about $2.6 billion to replace or rehabilitate all of its deficient bridges or about $4 billion over the next 5 years.

In short, the United States has over half a million bridges, about 75 percent of which were built before 1935 and about 40 percent of which are deficient. Costs to replace or rehabilitate these deficient bridges are substantially greater than resources that are being made available to restore them. Limited Federal bridge program funds are not adequate to meet the cost of replacing and rehabilitating even 3 percent of these deficient bridges. State appropriations are even lower. The Federal Government is, however, the major source of funding to rehabilitate these deficient bridges through the special bridge replacement program first established in the Federal Aid Highway Act of 1970. The Surface Transportation Act of 1978 extended and expanded this program to what is now known as the highway bridge replacement and rehabilitation program. At that time, $4.2 billion was authorized for 1979 through 1982 for bridge replacement and rehabilitation. Authorizations have averaged about $120 million per year for the program's first 7 years and slightly over $1 billion for the last 4 years. The 1982 authorization follows this trend. Nationwide, since this program was first funded, some 1,877 bridges have been rebuilt and another 4,448 are underway. This constitutes only about 2 per-

cent of all deficient bridges. At this rate, it will take some 375 years to update the 200,000 deficient bridges, not including future deterioration.

According to a recent Government Accounting Office report, the criteria used by the Federal Highway Administration to select bridges for Federal funding, does not adequately deliver assistance to those bridges in the worst condition or most in need. This is evidenced by the fact that only 10 States account for about 80 percent of the total money spent. Further, bridge programs funds are being allocated to the States based on outdated and incomplete needs data. The allocations are based on 1978 calculations that have not been updated and do not include off-system bridges. Mr. Speaker, this is an important fact because four of the five bridges crossing the Mississippi River between my own State of Missouri and the State of Illinois, in the St. Louis metropolitan area, are not even considered when allocating Federal funds under this bridge program, while these off-system bridges are generally in worse condition than bridges on the Federal-Aid system. The interstate traffic carried by these river crossings is vital to the economic health of the entire Midwestern region, and particularly to transcontinental traffic not to mention the immediate standard metropolitan statistical area. Only one federally assisted bridge, the Poplar Street Bridge, provides adequate access for this important urban bridge corridor. As a result, this one federally assisted bridge is operating above capacity and is subject to increased deterioration while the remaining four bridges crossing the Mississippi River go practically unused and virtually unrepaired.

How can the States of Missouri and Illinois be expected to rehabilitate these important bridges when they are not even considered in the allocation of Federal funding? The continued viability of this urban bridge corridor is clearly a matter of national concern and a matter which should be addressed by this House. Local sources hold no hope of ever meeting the expense involved in rehabilitating even one of these structures. Without Federal assistance, four major bridge structures will be left to deteriorate beyond the point when restoration is possible and only one bridge will be left to carry all regional traffic. In the St. Louis metropolitan area, the movement of persons and goods across the Mississippi River has reached a critical volume in relation to the capacity of existing and planned bridge structures to efficiently accommodate present transportation demands. I submit, Mr. Speaker, that severe off-system bridge conditions combined with a lack of adequate Federal funding, while considering the potential which exists for diverting traffic from interstate bridges operating above capacity to other off-system bridges in the vicinity warrants legislation to provide funding to rehabilitate selected bridges crossing the Mississippi River in the St. Louis metropolitan area. The grant which I propose will greatly improve the bridge network serving this metropolitan area as an integrated, mutually reinforcing traffic system, operating through the presence of all component bridges.

I urge my colleagues to join me in preserving this most important urban bridge corridor.●

DOUBLE CELEBRATION

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. CORRADA. Mr. Speaker, the traditional holiday of Thanksgiving, which the Nation commemorates next Thursday, the 26th of November 1981, will be the occasion for a double celebration for the Honorable Jorge L. Córdova, my predecessor as the 11th Resident Commissioner from Puerto Rico, who served in the House of Representatives during the years 1969 through 1972.

Mr. Córdova, a dedicated public servant and legislator, still remembered with respect and affection by many of the present members, will also celebrate with his wife Dora (nee Rodriguez) their 50th wedding anniversary. They will be joined for the joyful gathering in Puerto Rico by their children: Jorge L., Jr.; Elvira (Mrs. R. A. González); Irene (Mrs. Horacio Subirá), and Fernando, and their many grandchildren.

Prior to coming to the Congress, Judge Córdova had a very distinguished public and professional career. After his graduation from Catholic University (B.A. 1928) and Harvard University (LL.B., 1931) he returned to Puerto Rico to practice law, and was appointed a judge of the San Juan Superior Court (1940–45). Subsequently, he was appointed an associate justice of the Supreme Court of Puerto Rico (1945–46). He did not enter the field of active partisan politics, but never ceased to support actively his long time dream of statehood for the island.

On November 5, 1968, he was elected for a 4-year term as the Resident Commissioner from Puerto Rico. It was one of those rare cases, in which a son follows the footsteps of his father. Judge Córdova's father, the Hon. Félix Córdova-Dávila, was also his predecessor as Resident Commissioner (1917–1932); a position which he resigned in 1932 to become an associate justice of the Puerto Rican Supreme Court.

During his 4-year incumbency Mr. Córdova supported and obtained the approval of very important legislation for Puerto Rico, including the amendment to the House rules, in 1970, by which the Resident Commissioner is granted the right to vote in those House committees to which he may belong. Needless to say, the amendment widened tremendously the scope of the position of the Puerto Rican representative in the Congress.

Today, our hearts go to Jorge and Dora as they commemorate their golden wedding anniversary, and my wife Beatriz and I join the many well wishers to this happy, exemplary couple. May God bless them and their dear ones, for many more years to come.●

MOBILIZING THE AIRWAVES—FREEDOM'S CHALLENGE TO TOTALITARIANISM

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, yesterday, November 18, I introduced part II of a study entitled "Mobilizing the Airwaves: The Challenge of the Voice of America and RFE/RL" published by the Heritage Foundation. In this study, the author, Mr. Paul Olkovsky, research assistant for the Heritage Foundation, examines the current status of the radios and how to increase their effectiveness. He points out that with the pursuit of détente and the proclamation that America must get over its inordinate fear of communism, the radios have been seriously underfunded and allowed to lapse into technical obsolescence.

I commend this study to my colleagues. Part III is printed as follows:

[From the Heritage Foundation]

MANAGEMENT AND CONTROL

(By Paul Olkovsky)

Because of the non-governmental nature of RFE/RL, the Board of International Broadcasting was created to grant and oversee funds allocated by the Congress to the radio. This has created dual management, consisting of the Board of Directors of Radio Free Europe/Radio Liberty and the Board of International Broadcasting. The BIB has been headed by political appointees, while the Board of Directors of RFE/RL has been staffed by professionals. There is friction between the two bodies.

Lack of funding, poor programming, and shortage of personnel, are some of the issues. However, the primary source of discontent has been BIB actions perceived as a detriment to the radio. Since 1973, there have been solid proposals for revitalization, yet the BIB has asked for only moderate increases in funding for the radio. John Gronouski, previous chairman of the BIB, even wanted to allow officials of the Communist governments of Eastern Europe and the Soviet Union "equal time" to respond to

RFE/RL broadcasts which they felt to "be unfair." Many at RFE/RL opposed this recommendation, since Communist governments have a monopoly on the domestic media. Some RFE/RL executives feel that the BIB has been a hindrance to the radio and a source of negative and inaccurate leaks to the media. They feel that BIB should try harder to obtain more funds and find ways to promote financial efficiency. Instead, RFE/RL administrators have had to spend time on Capitol Hill lobbying to counter the efforts of the BIB.

It is widely felt in Congress that the current management structure is awkward. Pending legislation would eliminate the RFE/RL Board of Directors and allow the BIB full control of RFE/RL. Senator Claiborne Pell (D-R.I.) has introduced an amendment for the fiscal year 1982 budget authorization; it has passed the Senate and is now before the House. It states:

Sec. 304(a) The Board for International Broadcasting Act of 1973 is amended by adding to the end thereof the following new section:

"MERGER OF THE BOARD FOR INTERNATIONAL BROADCASTING AND THE RFE/RL BOARD

"Sec. 11. (a) Effective January 1, 1982, no grant may be made under this Act to RFE/RL, Incorporated, unless the certificate of incorporation of RFE/RL, Incorporated, has been amended to provide that—

"(1) the Board of Directors of RFE/RL, Incorporated, shall consist of the members of the Board for International Broadcasting and of no other members; and

"(2) such Board of Directors shall make all major policy determinations governing the operation of RFE/RL, Incorporated, and shall appoint and fix the compensation of such managerial officers and employees of RFE/RL, Incorporated, as it seems necessary to carry out the requirements of this Act.

"(b) Compliance with the requirement of Paragraph (1) of subsection (a) shall not be construed to make RFE/RL, Incorporated, a Federal agency or instrumentality." [8]

This proposal, similar to George McGovern's abortive proposal of 1977, could have several negative effects. It would make the U.S. government directly responsible for what is broadcast by RFE/RL, which would be awkward should the Administration be engaged in SALT or other delicate negotiations with the Soviets. Moreover, opponents of this amendment contend it would mean that direct control of the radio would be in the hands of presidential appointees whose main commitment would be to the specific foreign policy of the President. Thus RFE/RL could become as bland as VOA did during the Nixon and Ford Administrations.

Proponents of the Pell Amendment perceive it to be the way to unify management of RFE/RL, the BIB and the Board of Directors of the RFE/RL. Currently, the only leverage the BIB chairman holds is the threat to withhold funds, which is impractical in most circumstances. It has been further suggested that the passage of the amendment would allow the current Administration as well as future administrations more authority over the radio, necessary because the funds of taxpayers enable the radios to exist. Consideration of the amendment is expected during November.

[8] CONGRESSIONAL RECORD, June 17, 1978, pp. S6387-8.

PERSONNEL PROBLEMS AT VOA

The VOA runs as an agency of the United States International Communication Agency. Employees are part of the Civil Service and are given GS ratings. (Some are also Reserve Foreign Service Officers and contract employees.) For many years, quiet animosity has existed between career foreign service information officers, who are often placed temporarily in the VOA as service directors, and career VOA staff. Advancement is another source of frustration within the language services: the best rating one can achieve in assignments other than editor is GS-11. While an employee can be promoted to other positions, such as a news writer, such positions use only English. As a result, some of the most effective bilingual employees leave VOA for better opportunities both in and out of the federal government. The positions are then often filled with emigre personnel who are not as fluent in English as their assignments require. Consequently, mistakes both in translation and in the home language become more frequent.

FUNDING

Since the Soviet Union spends approximately $300 million on jamming alone, the Soviets spend more money on U.S.-sponsored broadcasts than the U.S. government does. Inflation, increased energy costs, and fluctuating currency rates have impaired growth of the radios.

Radio Free Europe/Radio Liberty has been limited to a growth in funding of between 5.9 percent and 9.4 percent; this has not kept pace with inflation. Indeed, it has been barely adequate to continue operations. Hiring new talent, inaugurating new programs, undertaking needed long-term maintenance have all been beyond the financial reach of the radio. RFE/RL has allotted $2.4 million for fiscal year 1981 to move some of the Munich staff to New York City, as recommended by the General Accounting Office. The Reagan Administration reconsidered the political and morale effects of this move and recommended against implementing it. The Administration also allowed RFE/RL to keep the funds allotted as a supplemental for operations. However, the funds had to be used to offset the $3 million in damages caused by the bomb blast in Munich in February of 1981. Additional operational budget funds were needed to completely cover the damages. The final amount given to the radio in excess of funds originally appropriated by Congress was $4 million. As for the fiscal year 1982, the administration has cut the operating budget by 12 percent from the original figure proposed. This would mean an increase of approximately 8 percent from the fiscal year 1981 budget—an amount woefully inadequate.[9]

For the Voice of America, the picture is somewhat brighter. Congress has allotted $79.3 million to augment the transmitter facilities on Botswana and Sri Lanka. This project will be especially important to the Central and Southeast Asian region where the present transmitting capabilities have been weak. However, the budget is still inadequate. In 1977, the budget for ICA (upon which VOA is dependent) was $320,766,000; the proposed 1982 budget as of September 1981 is $466,638,000. In 1977 dollars this is $288,206,000, or a real dollar decrease of $32 million.

[9] Figures according to Arthur D. Levin, Financial Manager for the Board for International Broadcasting.

VOA still lacks funds to broadcast the hours needed to counter Communist jamming and propaganda. The engineering staff is shorthanded, as are most of the services. In almost every language service there are positions vacant, in part through lack of funds. Both VOA and RFE/RL still lack the resources to finish replacing 1950's vacuum-tube era equipment.

OPERATION BUDGETS OF RFE/FL AND VOA

Fiscal year	VOA	RFE/RL	DM conv. rate
1978	$69,728,000	$64,457,000	2.58
1979	75,294,000	72,490,000	2.1075
1980	85,670,000	80,430,000	1.93
1981	99,087,000	97,495,000	1.74
1982 (projected)	[10]107,022,000	86,500,014	1.93

[10] As of this writing, the Office of Management and Budget has announced that the International Communications Agency will have to cut 12 percent from its original fiscal year 1982 budget. The effect on the VOA operational budget is unknown, although the transmitter augmentation will not be affected.

A proposal from Congressman Courter addresses the problem of technical facility modernization of RFE/RO. Among his major points are:

Replacement of obsolescent medium wave transmitters in West Germany for East European coverage.

Installation of 10 to 12 transmitters at new West European site for coverage of European targets.

Erection of eight transmitters at a new Middle Eastern/South Asian site of Soviet Central Asian and West Siberian coverage.

Miscellaneous technical improvements.

Replacement of obsolescent transmitters in West Germany for coverage of European targets.

This package, based on a more modest proposal by RFE/RL, is estimated to cost $130 million. A bill to appropriate the necessary funds is now being written and potential co-sponsors are being sought.

SECURITY

Since Radio Free Europe/Radio Liberty links with the CIA were severed, individual safety has been a major problem. Employees have been threatened and the intelligence agencies of several of the Eastern Bloc countries have attempted to recruit them. RFE/RL's equipment and facilities have also been the target of Eastern Bloc sabotage. The vulnerability of the radio was nakedly exposed on February 21, 1981, when the Munich headquarters was bombed. The blast caused several million dollars in damage to equipment and hurt morale seriously. Although repairs have been made, the attack was successful in diverting the operating supplemental funds granted to the station by the Reagan Administration.

On July 25, 1981, Jack Anderson reported that the personal secretary of the central news director had been arrested by Bavarian police on charges of spying for the Romanian secret police. In that same article, Anderson reported that Emil Georgescu, a supervising program editor, complained of being harassed by death threats and physical abuse by the Romanian secret police. A few days after the article was published, Georgescu was stabbed twenty-six times in his garage and required intensive care treatment.

Another example of problems with security occurred in the early seventies. When Vladimir Bukovsky was freed from prison for a short time in 1970, he was given a samizdat (an underground dissident publica-

tion) by Vladimir Osipov with Osipov's own handwritten corrections on it. Bukovsky then passed the document to the West, where it was subsequently placed in the Radio Liberty samizdat archive. In 1974, when Bukovsky again was in prison, he was interrogated by the KGB about Osipov. As Bukovsky was denying any knowledge of Osipov, the interrogator produced the same samizdat he had passed to the West four years earlier. It was unmistakably the same because it contained the corrections in Osipov's handwriting. The cover sheet had the Radio Liberty Archieve logo and was stamped with the date it was receiving. As a result, the Soviet authorities sentenced Osipov to four years in prison.

The staff and facilities of RFE/RL must be protected since they are and will continue to be targets of Eastern Bloc covert actions. The government of the Federal Republic of Germany is reluctant to cooperate with the radio because it views RFE/RL as a strictly American operation. An added factor is that some officials in the FRG government view RFE/RL as an obstacle to the forging of closer ties to the Soviet Union and East Germany.

The following steps could improve security:

The CIA should once again conduct background investigations of potential employees.

Updates on the clearances of employees working for RFE/RL should be conducted as soon as possible.

Funds for conventional security of the physical plant should be increased.

These measures should apply not only to the facility in Munich, but to all RFE/RL personnel and property abroad.

CONCLUSION

Voice of America and Radio Free Europe/Radio Liberty have suffered from insufficient funding, technical inadequacy, and over-restrictive programming guidelines. Even under these conditions, the staffs have done a remarkable job. From what is known, both radios have wide audiences despite jamming and weak signals. However, much improvement is necessary. The Solidarity movement in Poland, the invasion of Afghanistan, and nationalist and religious awakening in the Soviet Union all point to a new era in the Eastern Bloc—and new opportunities for the West. International broadcasting to those areas is vital. As Congressman Courter observed:

The truth is one of our greatest weapons—and, as such it should be regarded as an essential element in our defense policy. It is an extremely cost-effective non-military weapon that we must use as energetically as possible in order to prevent ever having to use our military weapons.[11]

VOA and RFE/RL should be permitted to coordinate broadcasts in terms of what geographic areas can and cannot be reached, which transmitters can be shared, and what each knows about the audiences reached or not being reached. Further neglect of the radios would be a waste of a great national security resource.●

[11] Representative Jim Courter, "Truth is a powerful weapon," The Washington Star, August 9, 1980.

PERSONAL EXPLANATION

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mrs. SCHNEIDER. Mr. Speaker, due to my attendance at a memorial service for a close and valued friend, I was unable to be in attendance during a portion of today's proceedings. Had I been present for the vote on which I was absent, I would have cast my vote as follows:

Rollcall No. 324, to resolve into the Committee of the Whole for the consideration of H.R. 3663, "aye."●

VIEWS FROM A VIETNAM VETERAN

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. DASCHLE. Mr. Speaker, today I met with a very courageous young man who has wheeled and hitchhiked from Los Angeles to Washington, D.C. over the past 5 weeks in his wheelchair. Max Inglett has a message to tell this country and I only wish that every American could hear it. For the benefit of my colleagues, I insert the following press statement he made preceding his trek across our country. While I may not be in total agreement with each of the proposals offered, I believe that veterans such as Max Inglett need to be heard.

STATEMENT OF MAX INGLETT

As many of you are aware. I was one of the hunger strikers at the Wadsworth VA Hospital in Los Angeles. What began there in May has not ended. And it will not end as long as the Reagan administration refuses to respond to the pleas of those who have answered our country's call. If we are raised and taught since childhood to show patriotism to our country, it is only justified that our country return that patriotism. Regardless of the validity of the cause, we were ordered to serve. As you know I have been hitchhiking and wheeling in my wheelchair coast to coast. The reason is to emphasize a personal sense of urgency to the American people. Over 70,000 veterans have committed suicide since the duration of the Vietnam war. That suicide rate is now rising to 33 percent higher than the national average. The VA says that 95 percent of Vietnam veterans have little or no problems. They say the issue is overdramatized. I, and the statistics say they are wrong. These issues can no longer be ignored. It is the only way to close the door, and attempt to began a new productive life.

We must now begin to heal the wounds that America is still suffering from our involvement in Southeast Asia. One positive way of accomplishing this goal will be to assure the American people that Vietnam will not happen again. This can be done by bringing before the voters on the next national ballot in 1982 a proposal that would:

A. Prohibit the United States Government "by law" from ever again sending American combat troops into an undeclared war, to intervene in another country's internal conflict.

B. Set a lid or ceiling on the number of "military advisors" being sent into a foreign combat situation, and

C. Clearly define and re-evaluate the exact functions of a military advisor. The second goal is to implore and to impress upon the President that the only way that we as Vietnam veterans can have that assurance that the President really does understand and recognizes our plight is for him to sit down with those who have experienced them.

I wish to make it clear that while I disagree with many of the policies of the Reagan administration, particularly the budget cuts that drastically impair the survival of the disadvantaged American people, I continue to have respect for the President of the United States and therefore intend to show that respect for Mr. Reagan. It is at this time planned to hold a press briefing in each overnight stop. I am especially interested in meeting with college and high school students, citizen action groups, local legislators but particularly as many veterans groups as possible. I have been self-contained, unaccompanied, with a backpack strapped to my wheelchair. I will be receiving advanced weather reports and will be prepared for those conditions as is appropriate. I will be taking care of my personal medical care myself during the overnight stops.

The following is a copy of a telegram sent to President Ronald Reagan:

"DEAR MR. PRESIDENT: I would like to convey to you my happiness and congratulations on your recovery and my admiration for your display of courage, strength and reassurance during what came close to being a time of national crisis. I, along with the rest of America, prayed for that recovery and a quick end to your suffering.

"However, Mr. President, there are still a lot of young men who are suffering. Men who, like you, have been under fire. Many who like you, were physically wounded. Many who have emotional scars that will never disappear. Thousands of our brothers and fathers never made it back from a place called Vietnam. I know first hand, I was there. As you may know, I was one of the Vietnam veterans of the hunger strike in Los Angeles. I was one of the "motley crew", to quote a famous American.

"I could probably list a dozen reasons why I became involved with the hunger strike and the veterans movement. However, the two most important reasons are that I love and believe in my country with all my heart and that I really believe that the goals we seek must be accomplished if Vietnam is finally to be put to rest. Not just for those of us who served there, but indeed for America. I guess you could say that right now I really feel that I'm fighting for my country, in Vietnam, I did not. The reason I'm writing this letter Mr. President is because I do not want young boys to ever be sent to "another Vietnam". I believe in a strong national defense and in protecting our country. Even from a wheelchair, I would still defend my country in whatever way I could but I think that you would agree that Vietnam turned out to be an entirely different situation. It is for this reason that on Saturday, October 3, 1981, I will leave unaccompanied to hitch-hike coast to coast to Washington,

D.C. to gain support for a proposal that I and many Americans feel would offer the American people that guarantee that we would not be involved in another Vietnam. That proposal is as follows:"

[Refer to 3-point proposal in press release]

"Therefor in closing, Mr. President, I would like to take this opportunity to request a personal meeting with you to discuss the issues that I have attempted to address in the letter.

"Respectifully yours,

"MICHAEL D. "MAX" INGLETT."

During my venture across country I, and the goals we seek have been met with overwhelming support: And this reaffirms my conviction that finally, I can proudly say that I feel that I am serving my country. And untimately the future of America.

Thank you and God bless America.●

THE EXODUS OF SENIOR EXECUTIVES FROM FEDERAL GOVERNMENT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. WOLF. Mr. Speaker, as with any complex organization, the effectiveness and productivity of the Government is dependent on the quality of the top executives and scientists managing and implementing national policy. Because of the current pay cap which has retarded pay raises for 4 years and because of the consequent pay compression, these top executives are resigning or retiring from Government service at staggering rates. The loss of such talent, expertise, and institutional memory cannot help but severely damage the Government. The exodus is most pronounced in the high technology fields such as engineering, science, and medicine, but it is having nearly as devastating effects Governmentwide. The following are a few cases in point of individuals who have resigned from Government in favor of private sector positions:

Dr. Philip Leder reluctantly resigned this past summer as Chief of the Molecular Genetics Laboratory, National Institute of Child Health and Human Development. After an 18-year career as a Government scientist, a career that brought him national acclaim in molecular science and genetic development, Leder is now a professor and chairman of the genetics department at Harvard Medical School. With two of his three children now in college, Leder, 46, attributed his decision to resign to financial considerations.

I would have loved to stay in government, but it wasn't possible because of the pay cap and the absence of government programs to help with education expenses (Universities give professional courtesy tuition breaks to offspring of professors or liberalized loans, et cetera).

Leder ruminated on his departure:

A government laboratory is a precious resource. It enabled me to do the basic research on recombinant DNA that no private organization could afford, research that is just not bearing real fruit. Leaving this operation is sad and is done with great reluctance. Government has to be served well, by competent people, and yet—they are being driven away. Public service should be the very highest calling of mankind. The opportunity to literally serve the common weal. With conditions and attitudes prevelent today, it is clear that government employees are hardly so regarded.

In a case remarkably akin to that of Leder's, Dr. Robert Levy resigned as Director of the National Heart, Lung, and Blood Institute of Health to double his salary as dean of Tufts Medical School. And Levy is only the most recent case in point. Two former Directors of the National Cancer Institute have left within the last several years to take higher paying jobs.

Robert VanNess, who was Director of the Energy Department's Office of Financial Incentives, quit in June to take a job as a procurement officer for Burns and Rowe, an architectural and engineering firm in Oradell, N.J. Only 11 years short of his pension, VanNess took a new job with vastly less responsibility and pressure, at an increase in salary.

At various times in his 19-year career in Government, VanNess was the contracting officer of $2 billion in nuclear submarine construction for the U.S. Navy and for $10 billion in price supports, loan and market guarantees for alternative energy experiments. His former supervisor, Hilary J. Rauch, Director of Procurement and Assistance Management at Energy, calls VanNess "a producer, a guy who could make things happen, the type of person you sorely hate to see go, exactly the kind of person the Government needs, extremely competent with great capacity for growth." Adds Rauch:

I invested a lot of (training) time with him for the long range good of the Department. Quite frankly, he was pushing me pretty hard. (That is, he was so competent that he was threatening to take away his boss's job.)

"It just wasn't possible," VanNess said, "to provide education and a reasonable environment for my children." He said:

The pay was clearly out of line for my responsibility. It didn't make sense to spend my most productive years depending on the whim of Congress for whatever modest increase they might provide at erratic moments.

Berton J. Roth, Deputy Director for Procurement and Assistance Management for the Department of Energy, referred to the loss to the Government as "very great as VanNess, now in his early forties, would have been one of the top leaders had he decided to stay in Government service."

Roth went on to speak of another situation in the Department of Energy.

Immediately preceding Bob VanNess out the door was another young man we had recognized as an obvious candidate for Senior Executive Service and we had, over the past four years, given him developmental assignments grooming him for higher level jobs. This young man (Steve Morgan) at an age of about 30 was working as a GS-15 and, in my view, in another year or so we would have pushed him into Senior Executive Service. He also left government service because of the salary cap and, while he was not at the cap, he saw no future over his next 25 working years with the federal government.

Resignations clearly threaten and will continue to threaten the retention of able Government executives. A recent study by OPM revealed that the rate of resignations within the SES ranks soared by 56 percent over the past year. Unfortunately, if the current pay situation is not addressed in November, such losses as the ones listed above will continue.●

FIFTH ANNIVERSARY OF THE UKRAINIAN HELSINKI GROUP

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. COUGHLIN. Mr. Speaker, I join my colleagues today to commemorate the anniversary of the founding of the Ukrainian Public Group to Promote the Implementation of the Helsinki accords. Established just 5 years ago, on November 9, 1976, in Kiev, the Ukrainian Helsinki Monitoring Group has become the vanguard of Ukrainian efforts to monitor and insure Soviet compliance with the Universal Declaration of Human Rights and other human rights provisions of the 1975 Helinski accords.

Unfortunately, the Ukrainian Helsinki Group has suffered the most severe repression of any of the five Soviet Helsinki Monitoring Groups. It is a sad commentary indeed that all of the original members as well as many of those who subsequently joined the Ukrainian Helsinki Group have been subject to imprisonment, exile, or continued harrassment by Soviet authorities merely for their participation in the group.

Having been involved for some time now in efforts to secure the safety and the release of Mykola Rudenko—the group's founder—I now am more keenly aware of the personal risk which faces each member of the group as well as the resistance with which their efforts have been met by Soviet authorities. While political issues—such as the question of Ukrainian independence—cannot be avoided completely, the Ukrainian Helsinki Group has stated time and again that its intention is to deal with humanitarian, rather than political, issues. Nonethe-

less, its efforts repeatedly have been met with resistance and repression by the Soviet Government, despite the fact that that government, by its own accord, agreed in Helsinki in 1975 to honor and uphold certain basic rights for all its citizens. This, however, should not come as a surprise to any of us.

I am proud to stand here today to give recognition to this fifth anniversary of the founding of the Ukrainian Helsinki Monitoring Group and to honor the courage and determination of its members. Let us also take this opportunity to reaffirm and strengthen our own commitment to human rights the world over.●

RECONCILIATION IS NEEDED IN THE AIR TRAFFIC CONTROLLER DISPUTE

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. VENTO. Mr. Speaker, can America afford the inconvenience, expense, and the potential compromising of air traffic safety brought about by the Reagan administration's continued vindictiveness in dealing with the fired air traffic controllers? We as Members of Congress have an obligation to search for and seek out answers to the problems that face our society, yet the problem of dealing with the consequences of firing the striking air traffic controllers has evaded thoughtful consideration from this body.

The actions leading to the present situation have been well aired and need not be repeated. What must be stressed, is the fact that a problem exists that is magnified in human as well as economic terms. The careers and family lives of thousands of air traffic controllers have been ruined, all for the sake of driving home the point that PATCO went on strike illegally. It may be easy to say that in this showdown, the administration won and PATCO lost, but in the end we find that no one is a winner and everyone is a loser. The Government, the air traffic controllers, the public, and the economy are all suffering in this situation.

I bring to the attention of my colleagues, a recent column by William Sumner which appeared in the St. Paul Dispatch. I share Mr. Sumner's sentiments that it is time to bury the vindictiveness that has plagued the air traffic controller situation.

The article follows:

[From the St. Paul Dispatch, Nov. 2, 1981]

IT'S TIME TO BURY VINDICTIVENESS AND REHIRE THE CONTROLLERS

(By William Sumner)

I suppose there are some, including the president, who get some sort of personal satisfaction over the conquest of a cocky union that was going to ground America. A cocky union, and voluble union leaders who attempted to win the impossible on the evening TV news. They defied the law and the president and it looks as though the punishment is to be permanent.

Legal maneuvers continue, but they seem half-hearted. The professional air controllers (PATCO) appear to be finished.

The administration is savoring the victory. PATCO may be down, goes the thinking, but we can still kick it.

It won't be the first time a certain unbecoming vindictiveness has been observed working in the mind of Ronald Reagan. From the start, a meanness of spirit has been apparent among Reagan's troops. It wasn't so much a well-needed cleanup of social programs leaking at the seams, for example, as it was a display of contempt for the poor.

The school lunch program comes to mind. Surely it has been a mess. Anyone with kids in school knew there was more nutrition in a sack lunch. But out of it came, for a time, the sarcastic phrase, "Let them eat ketchup." The food stamp program was abused. Suddenly, about a million have been cut off. This is reform? The aid to dependent children program has been abused. So a half million have been arbitrarily hacked off in defiance, seemingly, of conservative ideals that would encourage recipients to work their way off this form of welfare.

I don't think Reagan got any mandate and I don't think he got a mandate for this, nor, for that matter, for going to vindictive, childish lengths with the air controllers.

I don't think we have to re-hash the strike issues which propelled the controllers' union out of the towers on Aug 3. They were well paid and had been given an offer that still seems generous. They struck illegally when no one would give them the moon. The 10,000 or so controllers now directing traffic appear likely soon to be enjoying the benefits the PATCO negotiators had won and which were rejected by the union.

The Federal Aviation Administration wants to bring the number of controllers up to 14,000, slightly under the number at work before the strike began. I don't know what this means in terms of training new personnel, for military controllers are still at work in the towers in unspecified numbers. Training continues apace. But the controllers now working are still working beyond 40 hours a week and are said to be in need of rest. To accomplish this, the numbers of flights will be cut down further, by 5 percent. Flights are now up to 83 percent of normal and it seems to be too much.

So there are practical reasons for amnesty even if one leaned toward getting even. PATCO broke the law, but we seem to be more generous toward felons than would be the spirit in evidence here. We need controllers. Why not put up signs saying, "Air Controllers Wanted," and give the erstwhile strikers a crack at the jobs? Why not indeed? We want that pound of flesh. The members of the now decertified union can't take any federal job, as a matter of fact.

Meanwhile, many strikers are ruined. They were used to good salaries and, no doubt, a lot of them had mortgages to match. They have proficiency in a specialized field and many have been reduced to taking unskilled jobs in attempts to feed their families. Mind you, they didn't hold up anyone, or take bribes or shoot anybody, but, in Reagan's mind, they are in the same category as child molesters. Or so it seems.

Sure, they were cocky to the point of being insufferable and they broke the government's no-strike law. But I'll bet that most just went along, as so often happens, conned by their leaders and faintly intimidated along with it. Case by case, as individuals, they should be considered for the new jobs. They are needed, needed almost as much as Reagan needs a stirring dose of humanity.●

FOREIGN INVESTMENT

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. ROSENTHAL. Mr. Speaker, the Los Angeles Times recently published an article which forcefully describes the growing concern over foreign investment in major U.S. industries. I am deeply disturbed by the influx of foreign takeovers, especially in such industries as banking, energy, and real estate. The recent announcement by the Government-owned Kuwait Petroleum Corp. to purchase Santa Fe International Corp. typifies the serious ramifications of foreign investment. The Government Operations Subcommittee on Commerce, Consumer and Monetary Affairs, which I chair, has been examining the implications of foreign investment with specific focus on the Santa Fe acquisition. I urge my colleagues to pay close attention to the sentiments expressed the Los Angeles Times report. The text of the article follows:

CONCERN GROWS—FOREIGNERS' INVESTMENTS IN U.S. RISE

(By Karen Tumulty)

It was in 1965, when American impressions of the Middle East were colored more by the movie "Lawrence of Arabia" than by the economic power of OPEC, that Richard H. Jenrette was introduced to the up-and-coming son of a Saudi Arabian spice merchant. Jenrette, the chairman and a founder of Donaldson, Lufkin & Jenrette, Inc., a New York brokerage firm, recalls that Suleiman Olayan was the first Saudi he had ever met.

Sixteen years later, Olayan and Saudi Prince Khaled ibn Abdullah al Saud own about 16% of Jenrette's brokerage—more than he does.

The stock in Jenrette's firm is only a small portion of the vast U.S. investment portfolio owned by Olayan's family interests and managed for them by former U.S. Treasury Secretary William E. Simon.

Their stake of about 1% in Chase Manhattan Bank is second only to that of its former chairman, David Rockefeller. They also hold 7.6% of First Chicago Corp., parent company of the nation's ninth-largest bank, and significant interests in at least a half-dozen other financial institutions. And Olayan sits on the board of directors of Mobil Corp.

$480 BILLION IN HOLDINGS

Olayan is one of a growing number of foreign investors in the United States. By Commerce Department estimates, the value of foreigners' holdings reached $480.9 billion

last year. The figure was a 16% increase from 1979, and critics of the manner in which federal record keepers track foreign holdings contend that even that astronomical sum greatly understates the worth of U.S. assets under non-U.S. ownership.

Such household staples as Alka-Seltzer, Baskin-Robbins ice cream and Libby's canned foods are produced by foreign-owned companies in the United States. In recent years, foreign conglomerates have bought such American institutions as Saks Fifth Avenue, A&P grocery stores and Howard Johnson's, the restaurant and motel chain. Farmers have complained that well-heeled foreigners have bid up the price of U.S. agricultural land to the point where it becomes unaffordable to Americans.

FOREIGNERS BUYING BANKS

And even as foreign-held deposits in U.S. banks have grown, foreigners have also turned to buying the banks themselves. California Banking Department officials estimate that when Midland Bank Ltd. of London completes its takeover of Crocker National Corp., parent of Crocker National Bank, almost one-quarter of California banking assets will be under foreign ownership.

As reports of foreign takeovers continue on an almost daily basis, so does a growing uneasiness over how much of the domestic economy is controlled by foreigners.

"When the history of this period is written, I'm sure that historians will marvel at the spectacle of a powerful nation surrendering its economic might without resistance," former Massachusetts Banking Commissioner Carol Greenwald testified in 1979 hearings before a House subcommittee.

She and other critics charge that in its eagerness to be a good host to foreign investment, the United States is ignoring the danger of losing control over its own future.

Moreover, the critics contend, the government so far has made only a desultory effort to collect information on the extent and nature of foreign investment in this country—thereby making it difficult to determine if and where real dangers may exist.

And as foreign investors continue to become more aggressive, buying entire U.S. companies where once they were careful to own only a small share of any one firm, the risks are certain to mount, these critics insist.

"The dangers of foreign investment take several forms, but they all reduce to one common denominator—a challenge to national sovereignty," argues Benjamin Cohen of Tufts University's Fletcher School of Law and Diplomacy.

Despite such expressions of alarm, the prevailing view in government and among economists, bankers and other analysts is that foreign investment is harmless, even desirable. Supporters of foreign investment assert that it provides the U.S. economy with a much-needed injection of capital and gives foreigners a stake in keeping domestic industry healthy. In that sense, they see it as insurance, rather than a threat.

In some instances, such as French-owned Renault's takeover of American Motors Corp., foreign investment gives ailing U.S. companies access to the technology they need to keep pace in an increasingly competitive world market. Thus, it saves—and even creates—jobs in the United States.

JOBS FOR MANY AMERICANS

By Commerce Department estimates, about 1.6 million people held jobs in firms with more than 10 percent foreign ownership in 1979, the last year for which data is available. The figure was a 24 percent increase from the previous year. By contrast, employment in such foreign-held firms grew by only 3 percent annually during the early years of the decade.

Supporters of foreign investment point out that the size of foreign holdings, while huge, is tiny in comparison to the scale of the entire economy—less than 5 percent of estimated total U.S. assets—and is much smaller than the $603.6 billion that Americans have invested overseas. They also contend that foreign owners of U.S. industry are looking for good investments, not control, and generally are content to allow U.S. managers to operate those businesses with little interference.

The debate over foreign investment—and the uncomfortable ambivalence that surrounds it—has intensified since the announcement last month of a $2.5-billion bid for Santa Fe International Corp. by the government-owned Kuwait Petroleum Corp.

The purchase of the drilling and engineering firm would rank as the largest takeover ever of a U.S. firm by an oil-rich Middle Eastern nation. But its size is not the only new dimension the proposed Santa Fe International purchase adds to the debate over foreign investment. It has also opened an argument over what types of foreign ownership the United States should allow: While a private foreign investor may be expected to act as a domestic owner would—that is, to make the investment as profitable as possible—critics have suggested that government-owned foreign investors may operate according to a different, more insidious agenda.

For example, in hearings by the House subcommittee on commerce, consumer and monetary affairs, subcommittee Chairman Benjamin S. Rosenthal (D-N.Y.) suggested that the Kuwait government might want to stifle Santa Fe International's work on synthetic fuels development, because those new types of fuels may someday compete with the petroleum that fuels the Kuwaiti economy. And, he asked, under Kuwaiti government ownership, can Santa Fe International really be expected to keep out of foreign hands the confidential information it gathers during its construction work on U.S. nuclear power plants?

QUESTIONS OF AN OPEC BOYCOTT

Further, Rosenthal asked, would Santa Fe International operations be affected by a future OPEC boycott?

Rosenthal suggested that a Kuwait-owned Santa Fe International might become an instrument of that nation's political policies, even when those policies conflict with U.S. interests. He thus echoed concerns voiced by other critics that, for example, a U.S. company owned by an Arab nation might be directed to comply with a boycott of Israeli firms or products.

Kuwaiti officials and Sante Fe International executives contended that foreign-government ownership would present no such conflicts for the company. "This is to be a U.S. subsidiary under U.S. laws," Abdul Razzak Mohammed Mulla Hussain, managing director of the Kuwaiti company, told Rosenthal.

Instead of getting simpler with the passage of time and the accumulation of experience, the issue of foreign investment grows more complex.

Certainly, it is not the clear-cut subject it was during the nation's early years, when European capital established the U.S. economy and financed its growth. France funded much of the American Revolution; Erie Canal bonds were traded on the London market in 1817. In fact, it was not until the 20th Century that U.S. holdings abroad began to exceed the amount of foreign investment the United States was taking in.

As early as 1791, Alexander Hamilton expressed a view that has since dominated the nation's policy toward foreign investors.

Instead of seeing them as rivals, Hamilton wrote, their capital "ought to be considered as a most valuable auxiliary, conducing to put in motion a greater quantity of productive labor and a greater portion of useful enterprise than could exist without it."

Former Comptroller of the Currency John Heimann echoed that 200-year-old opinion in his 1979 report to Congress, in which he wrote: "The open-door policy is rooted in economic principle."

"Foreign investment in the United States benefits the economy in the same way as domestic investment, leading to increased competitive ability, greater employment, higher production and improved technology," Heimann wrote.

But even those who argue most vehemently that the door to the U.S. economy should be held open to foreign investors concede they should not be given completely free access.

Foreigners are subject to the same antitrust laws that limit the scale of domestic acquisitions. Federal law also restricts foreign investment in such strategically sensitive industries as communications, transportation and defense contracting.

ROLES HIT AS INADEQUATE

However, Rosenthal's panel, which has long been outspoken in its concern about the issue, has criticized the existing regulations as "piecemeal, haphazard and illogical."

"They do not protect the United States in many equally important national interest sectors (such as banking, food and food distribution, computers and high technology, oil and coal, and real estate)," the committee wrote in a report last year.

In some respects, the fears of foreign domination of the U.S. economy are ironic. It was, after all, 15 years ago that French author Jean Jacques Servan-Schreiber's best-selling book "The American Challenge" sent waves of alarm through Europe. Its warning: American technology and know-how was wiping out Europe's tradition-bound, small-scale entrepreneurs. Within 15 years, Servan-Schreiber predicted, American industry in Europe—not Europe itself—would be the world's greatest industrial force other than the United States and Russia.

But with the first world oil shock in 1973, Americans' perceptions of their own economic power began to shift. They feared their own vulnerability to OPEC's "oil weapon" and its "money weapon," billions of accumulated petrodollars. In 1976, novelist Paul Erdman made U.S. best-seller lists with "The Crash of '79," which had a plot built on an eerie doomsday scenario in which the Saudis collapse the Western financial system by draining their deposits from U.S. financial institutions.

AMERICAN CHALLENGE MET

Of course, neither Servan-Schreiber's nor Erdman's scenarios have come to pass. European countries are struggling under a load of economic problems, but they have met the feared American Challenge by developing their own competitors that rival U.S.

multinationals in many industries; in the United States the year 1979 ushered in another oil crunch, but not a crash.

Smoldering uneasiness remained, however, fanned by revelations of growing amounts being invested in the United States. The news often comes under such headlines as "The Canadians Are Coming! The Canadians Are Coming!" and "Foreign Banks Are Coming! Foreign Banks Are Coming!"

And indeed, foreign investors are coming to the United States, for a variety of reasons. Among the attractions are:

Its political stability, which has grown increasingly important in light of international developments, such as the nationalization of much of French industry under France's new socialist administration.

Its depressed stock market. With many companies' stocks selling at prices far below the value of the assets they hold, they are seen as a bargain.

FEWER CURBS IN UNITED STATES

Its attitude toward foreign investors. Unlike many countries, where foreigners are not allowed to own controlling interest of domestic companies, the United States puts few restrictions on its foreign investors.

Its size. "Other countries cannot handle this amount of investment," Commerce Department economist Michael A. Goodwin said, noting the United States has three times the value of stocks, bonds, currency and other monetary instruments as the rest of the world combined.

The investment takes a variety of forms.

Billions of the dollars that OPEC has gathered through its oil sales have found their way into top-quality corporate debt, certificates of deposit, Treasury bonds, and other types of high-yielding securities.

The Treasury Department estimated that OPEC treasury bond and note holdings were 22% of all foreign holdings of such securities in 1980 but said that amount was less than 3% of total outstanding Treasury debt.

David T. Mizrahi, editor of the New York-based newsletter MidEast Report, has contended that the oil-exporting nations' U.S. assets total between $150 billion and $200 billion, as much as four times as high as official Treasury Department estimates, although still less than 2% of the value of all U.S. assets.

THIRD PARTY INVESTING

"The U.S. Treasury, in all practicality, is unable to obtain highly accurate and comprehensive data on Middle East OPEC country investments in the United States," Mizrahi told Rosenthal's subcommittee.

"A good portion of those investments is being made through third parties, including foreign banks and companies established in the Caribbean region, Luxembourg or Panama," he explained.

By funneling their investments through holding companies incorporated in certain nations, foreigners can disguise their identities and also take advantage of favorable tax treaties between the United States and those countries. Olayan's interest in the Donaldson, Lufkin firm, for example, is held by his Competrol Establishment, which is based in Liechtenstein.

There is also a growing sentiment that the government should make a better effort at gathering and distributing information on the nature and extent of foreign financial interests in the United States.

"They don't really keep what I consider accurate records on it," AFL-CIO economist Elizabeth Jager complained. "Unions have not resisted foreign investment per se, but that does not mean they don't want accurate information."

Data escapes public disclosure in a number of ways. Federal regulations prohibit the Treasury Department from revealing the identities of individual investors in government securities. Officials argue that making that information public would discourage many privacy-concious people from investing in U.S. government issues.

Additionally, federal law does not require that foreign investors make public their holdings of less than 10% of any U.S. firm. And while the Securities and Exchange Commission requires reporting of all interests greater than 5% of any firm whose stock is publicy traded, that does not apply to private concerns.

"They seem to think that an effective monitoring system would deter investment, which has not been true anywhere else in the world," Jager said.

Particularly controversial has been the fact that application of the existing rules makes it difficult to determine how much members of the Organization of Petroleum Exporting Countries are investing in U.S. government securities.

Fixed-interest securities traditionally have been favored by the financially conservative Saudi government, which is the largest OPEC investor, Mizrahi said.

Critics have suggested that the scenario in Erdman's "Crash of '79" is not all that far-out. More plausibly, they say, those deposits could be used as political bargaining chips.

THE ONLY GAME GOING

But others note that if foreign deposits were removed from the United States, their holders would find no other financial system large enough to accommodate them. In effect, they would have nowhere to put them. Further, they point out, the United States could freeze those assets in a national emergency, as it did during the Iranian crisis.

Increasingly, foreign investors are believed to be buying the common stocks of U.S. companies. The Treasury Department estimated in its latest survey that foreign "portfolio" stock holdings—those in which owners hold less than 10% of a company's shares—reached $47.9 billion in 1978, almost double the amount reported four years earlier.

However, Assistant Treasury Secretary Marc Leland expressed no alarm over that growth. In testimony before the Rosenthal subcommittee, he said the stock investments were not concentrated in the hands of a few countries, were small in comparison to the size of the market and did not dominate any sector of the economy.

Of greater concern are "direct" investments, those in which ownership of an enterprise or property is more than 10%. More central than the idea of ownership is the concept of control. How much control do foreigners exercise over U.S. companies? How much is desirable?

There is much evidence to suggest that the amount of control that foreign owners actually exert over their U.S. properties is small, although it varies according to the nature of the owner.

By and large, said David Bauer, who tracks foreign takeovers of manufacturing firms for the New York-based Conference Board, a research organization supported by corporate sponsors, individual investors have sought types of investments that require little day-to-day attention. That, he said, explains a preference for such types of holdings as office buildings and farmland.

Even in cases where foreigners have bought total ownership of U.S. firms, noted the Commerce Department's Goodwin, they have done it intending to "leave the management in place as it is."

Donn Hartley, vice president of Thomas Tilling Inc., a British firm that has purchased 30 U.S. companies since 1977, explained, "We buy them and leave them alone. What we bring to the table is financial discipline and planning discipline and deep pockets."

Hartley explained that Tilling looks to buy relatively small U.S. firms—with sales, for example, that range from $10 million to $15 million—that are strong competitors, but lack the financing they need to grow.

DREAM SHAREHOLDERS

After a typical Tilling acquisition, he said, "the guys who built that company are the ones who are still running it."

Jenrette described the Saudis who own 14% of his firm as having "all the attributes of a dream shareholder."

"They've never exerted any pressure on me in any way," he added. In fact, he said, having partial Saudi ownership has proven beneficial to his business, as his shareholders used their influences in the Middle East to help the firm gain new customers.

But Jenrette conceded he might not be so sanguine if Olayan held a majority interest in his firm. "It's a delicate balance," he said.

Although California Deputy Banking Commissioner Robert Cameron said his agency is giving "more concern" to the issue of foreign ownership, he said experience indicates that foreign bank owners are "basically operating the banks in a manner very similar to the way the previous owner did."

But others disagree. "Distant ownership does complicate the ability of local communities to influence bank management," Greenwald, the former Massachusetts banking official, asserted in congressional testimony. "Boston bankers, simply because they live in Massachusetts and have done so for years, are more likely to care about what happens to Massachusetts communities."

ISSUE OF LOCAL CONCERN

Pointing to U.S. conglomerates as an example of what happens under absentee ownership, she said, "They've been much more economically oriented . . . in closing local plants. They have not had the same concerns that local ownership did about destroying the economic base of a community."

A relatively new concern has been the implications of a foreign government, rather than private capital, owning U.S. businesses.

Critics of deals such as the Santa Fe International takeover, in which the government of Kuwait would own the U.S. firm, tick off a number of potential problems and conflicts.

They see such purchases as a means through which foreign governments may gain quick access to U.S. technology. During questioning at a subcommittee hearing last month, Rosenthal told a Santa Fe International executive, "You're delivering for $2.5 billion—and it's probably a good buy—a hell of a lot of U.S. expertise."

And critics argue that when the interests of the acquired company conflict with the owner country's goals, the owner is most likely to opt against the acquired company. For instance, they say, if a country has chosen boosting its own employment rate as a top priority, it is unlikely to support ex-

pansion and growth of a U.S. company in competition with its own work force.

We need to know whether the assets, technology and resource of Santa Fe (International) will be subject to policies established by the government of Kuwait or by the Organization of Petroleum Exporting Countries," Rosenthal said.

Although the Santa Fe International purchase has garnered national attention, it is not the first example of a foreign government buying a dominant share of a U.S. company.

Last year, for example, French government-owned Renault increased its ownership of American Motors to 46% and last July bought AMC warrants that could give it almost 52%. It was the culmination of a partnership begun in 1979, when the two companies agreed to build a Renault car in AMC's Kenosha, Wis., assembly plant.

Instead of criticism, the takeover of AMC has drawn wide praise. "I am very pleased that our association with Renault is maturing in this way," AMC Chairman Gerald C. Meyers said last year. "It assures AMC, its employees, dealers and stockholders a secure and profitable future." Analysts agree that the relationship has saved AMC from bankruptcy.

Renault also owns 20% of Beverly Hills-based Mack Trucks, Inc.

FOREIGNERS SOUGHT OUT

As high interest rates make it more difficult for U.S. firms to raise their own capital, they are, in fact, seeking foreign investment. Goodwin said her Commerce Department office regularly receives inquiries from small-business owners looking for rich foreigners to buy them out.

Last month, the U.S. Conference of Mayors held a five-day conference in Zurich to lure European investors to U.S. cities hard-hit by federal budget cuts. More than 100 city and state governments participated.

"State development agencies work overtime to encourage foreign investors," Goodwin said.

However, critics are quick to assert that there is a difference between the foreign companies that set up new offices and factories in the United States and those that acquire existing ones.

"When I was commissioner of banks in Massachusetts," Greenwald testified, "I let it be known that, unlike my predecessor, I would welcome applications from large foreign banks to open branches in Boston."

Such a measure stimulates competition, she said. But an acquisition of a large domestic bank by a foreign one amounts to "replacing one oligopolist with another," she added.

Drawing the line between foreign investments that benefit the economy and those which pose a threat is the task of the Committee on Foreign Investment in the United States, an interagency group charged with monitoring proposed acquisitions. Chaired by the Treasury Department's Leland, it has committed itself to the long-held "open door" policy in international trade and thus confined its activities largely to studying investments by foreign government-controlled entities.

INTERAGENCY GROUP CRITICIZED

It currently is looking into the French government-controlled Elf Aquitaine Group's purchase of Texasgulf Inc., Stamford, Conn., and several recent petroleum-related purchases by the Kuwaitis.

Rosenthal's subcommittee has blasted Leland's unit as "a dormant entity, administered by Treasury, whose primary purpose appears to be to forestall further foreign investment legislation and not to determine harm to the U.S. economy." Thus, the subcommittee charged, it "has grossly neglected its responsibilities to the President, the Congress and the public."

Leland defends his group's work. "Since its formation, (it) has operated on the basic premise that its review activities should be limited to cases where there is a genuine concern about U.S. national interest," he told the subcommittee.

And there lies the center of the debate. For the time being at least, it seems federal regulators have determined that foreign investors have not yet given cause for a "genuine" concern. Rosenthal's subcommittee has held numerous hearings on the subject, but it is a surveillance panel and not empowered to introduce legislation. While a handful of states have passed legislation to limit farmland purchases by foreigners, government officials say foreign holdings account for less than 1% of U.S. agricultural acreage and pose little threat to U.S. control of its own lands.

But there is a growing uneasiness over whether the United States is equipped to recognize a danger, if it did exist.

That sentiment was expressed in one witness' complaint to the Rosenthal subcommittee: "There are very few major countries in the world today that are as naive and ignorant concerning the size and nature of foreign investment in their countries as the United States is."●

WHALERS QUIETLY HARPOON CONSERVATION MEASURES

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. BONKER. Mr. Speaker, some of the whaling nations of the International Whaling Commission have once again shown their true colors: They support conservationist measures when the public spotlight is on them at the annual July IWC meeting in England, but file objections to these rules when the spotlight has dimmed. Unless the United States and other nonwhaling countries loudly protest these objections, we can expect the Soviet Union, Brazil, and South Korea to file additional objections within the next 2 months.

The House and Senate have gone on record strongly supporting U.S. conservation efforts in the IWC; we should not let the whalers sneak their objections past us. The objections, filed by Japan, Iceland, and Norway against the ban on the cruel nonexplosive harpoon, and by Japan against the suspension of sperm whaling, are a slap in the face to whale protection. In fact, these two rules were adopted by an overwhelming majority of the Commission members after having granted concessions to whaling interests.

An article that I wish to submit for the record, a November 17 Seattle Times editorial entitled "Whaling Nations Can't Go on Breaking Rules," supports the action I believe we should take in response. The United States should invoke the sanctions provided under the Pelly and Packwood-Magnuson amendments: ban imports of the objectors' fisheries products and cut off their fishing allocation in our 200-mile waters.

The Congress must not ignore the whalers' actions. We should make our commitment to whale protection credible and give the whalers a strong response.

WHALING NATIONS CAN'T GO ON BREAKING RULES

"I urge you to act in the brief time remaining to impress upon the whaling nations . . . the depth of our national commitment to conserve and protect whales . . . these magnificent mammals."

Who wrote those words? A member of Greenpeace? Jane Fonda? Jacques Cousteau?

Nope. They were written by Interior Secretary James Watt, a man regarded widely as unlikely to have a "Save the Whales" bumper sticker on his car.

The letter was sent this month to Secretary of State Alexander Haig (whose critics say might be expected to have a "Nuke the Whales" bumper sticker on his car.)

Watt's letter was part of an effort to prevent the world's few remaining whaling nations from filing formal objections to the International Whaling Commission's latest rules to protect whales.

Adopted last July, the new rules would ban killing of sperm whales and forbid use of "cold harpoons"—a 19th Century weapon that usually means agony for the whales before they die.

The effort failed. Japan, Norway and Iceland filed objections last week. The Soviet Union, South Korea and Brazil now have 90 days to file, which they probably will do.

Since the commission has no enforcement powers, whaling nations simply by filing objections can go right on breaking the rules without fear of penalty.

Well, not totally without fear. Congress has passed two laws potentially detrimental to whaling nations. One is the Pelly amendment (named after a former Washington congressman, the late Tom Pelly), which provides for a ban on U.S. imports of fisheries products from nations that violate I.W.C. rules. The other is the Packwood-Magnuson amendment, which permits the President to bar whaling nations from fishing inside the U.S. 200-mile limit.

Will the administration use these punitive laws—which never have been invoked—to pressure whaling nations to play by the rules? Obviously the trade and diplomatic consequences must be considered, but we think the strongest possible action is in order.

Whaling nations have been able to circumvent I.W.C. rules with impunity for too long.

The matter is now before the Commerce Department, which must make a recommendation to the President. We don't know what kind of bumper sticker Commerce Secretary Malcolm Baldrige has on his car, but we hope it's "Stick it to the Whalers."●

REGULATORY REFORM

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. HILLIS. Mr. Speaker, I recently sent a letter to about 600 of my constituents requesting that they help in identifying excessive or particularly burdensome Federal regulations. These constituents were either small businessmen, or people who had expressed an interest in small business issues.

As many of my colleagues know, Vice President BUSH is heading the Presidential task force on regulatory relief. When I met with the Vice President in October, he requested help in identifying Federal regulations which needed review. This is a grassroots effort in which many Members are participating in order to find as many Federal regulations as possible.

The response I received from my letter was very encouraging. It is obvious that the American people are eager to help the President and the Vice President in getting the Federal Government streamlined and off the backs of American businesses. Due to the numerous letters I received, I have summarized the responses of a sample of representative letters. While I sent a copy of each letter to the Vice President's task force, I am inserting in the RECORD a copy of the summary for the benefit of the House.

Since the inception of EPA, OSHA, and ERISA, our cost related to each area have continued to escalate with respect to excessive paper work as well as direct operating expense. To convey all the problems with each of these areas in detail would require a book * * *

We have had considerable difficulty in complying with the changing EPA rules and regulations. As an example, our company owned a foundry in Marion, Indiana. In 1977, in order to comply with the then current EPA standards, it embarked upon a $500,000 capital expenditure program. At the completion of the project, the standards were revised and the company found it was no longer in compliance leaving it no alternative but to terminate operations which, in turn, placed approximately 300 people out of work.

In my opinion, OSHA has, for the most part, outlived its usefulness. In addition to being genuinely concerned about the safety of employees, today's industry has a monetary incentive to insure that the employee works in a safe environment. With the high cost of Worker's Compensation Insurance, companies are continually seeking ways to operate plants more safely and are making capital expenditures on an ongoing basis to improve working conditions. Routine OSHA inspections are expensive to both industry and the taxpayer.

With the advent of ERISA came reporting requirements that have caused companies to employ additional people to comply with this act. Also, it provides for a liability to a subsidiary company beyond its assets. If these liabilities were to appear on corporate balance sheets, I suspect there would be some notable companies with negative equity. In our particular case, we have been turned away from potential turn-around acquisitions because of the excess liability we would incur. Many of these companies have gone out of business when it's possible they could have been salvaged. Since 1980, ERISA extends to multiemployer plans which results in a company incurring an unfunded liability regardless of having no hand in the adminstration of the funds or expenses.—Gene Hainen, Avis Industrial Corp., Upland, Ind.

Reduce SBA office to State level only. Reduce Farmers Home Administration to State level and allow banks to dispense the loans, more especially on housing. The county offices are not effective. They have lost the sensitivity and seem more interested in loaning money for airports; post offices; fire stations; county-city buildings; street and sewer projects and have completely forgotten about the needs of farmers for Rural Housing.—George Slabaugh, President, Village Green Homes, Inc., Etna Green, Ind.

Most bowling centers operate seven days a week. Previously, the law recognized this by permitting a 48 hour week before overtime payments of 1½ times regular rate. Now this has been reduced to 40 hours raising our wage bill and making scheduling of help difficult.—Bob Donahue, Cedar Crest Lanes, Kokomo, Ind.

Remove the restrictions from the auto industry: (a) mileage goals; (b) bumper requirements; (c) speedometer requirements.

Permit the states to set their own speed limits.

Readjust or continue (but not increase) pollution rules on auto and industry.—Robert H. Colwell, Carmel, Ind.

We retail feed, fertilizer, farm chemicals, seed, and other miscellaneous products used for the production of livestock and crops. We purchase grain for the main purpose of shipment to terminal export points. We also have grain storage space for our customers use under the Federal Warehouse Licensing Program, use in custom feed, or sale at a later date. We are involved in the provision of custom services to our customers such as custom crop spraying, delivery of bulk and bag materials, extension of credit, contracting of livestock (mainly layers and hogs), and the promotion of information pertaining to all the products which we sell. These products and services are common to many country elevator operations.

We have always been under the registration service of the state program in conjunction with Purdue University for fertilizer, seed, and feed, and recently pesticide products. More recently, the FDA has become involved with the feed inspection program pertaining to the use of drug additives to livestock feed. We have become involved with the Board of Health which handles the testing of moisture meters, the Division of Weights and Measures which handles the regulation of scales, and the Department of Financial Institutions under the Indiana Uniform Consumer Credit Code for the carrying charge we utilize on our accounts receivable. Since we are Federally Warehoused, we come under the Department of Agriculture Warehousing Division and because we purchase and resell grain, we are involved with the new Indiana Grain Dealer Licensing and Bonding Law. Because we furnish a group health and hospital plan and a profit sharing plan for our employees we now are involved with the Pension Reform Act of 1974, commonly referred to as ERISA. This requires us to file forms with both the Department of Labor and the Internal Revenue Service. Also, we have filed with the Environmental Protection Agency concerning pollution and energy used in the drying of grain. We have business band radios which require filing with the Federal Communications Commission. The equal opportunity program has brought forth all types of forms from our major suppliers for us to file. OSHA continues to stagger our imagination as to what their final requirements will be. The preceding are in addition to tax forms required for state sales, gross sales, Social Security, Internal Revenue, unemployment, road use, workmen's compensation.

We feel that there are probably close to 300 governmental forms a year which must be made out, that require approximately 80 days for our bookkeeping department to handle. We also need the special aid of our auditor utilizing about 120 hours as well as 80 hours for our legal counsel to fill out special forms.—Gordon Taiclet, President, Buckeye Feed & Supply, Inc.

I do not know of one new mortgage loan, as of this date, that was created by the All Savers Certificates. Supposedly, when these were enacted, it was to help aid the housing and farming industry. In my inquiries among realtors throughout the state, not one new loan, directly related to the All Savers Certificates, was issued.—Joseph Pencek, Pencek/Realtors-Developers, Kokomo, Ind.

As you probably know, everyone from Sears to American Express has become a, quote, "Bank" or financial institution without the guidelines imposed on commercial banks.

These financial entitites and "cash funds" operate at an unfair advantage with commercial banks who must not only put up reserves and insurance on their deposits, but are regulated as to what rate they may pay for their funds and in what vehicles they may invest.

Equal parity must be established among all financial entities if the commercial bank is to survive as we know it.—Tom F. Lyons, 1st National Bank of Madison County, Senior Vice President and Cashier, Anderson, Ind.

My concern with the federal regulation governing the pharmaceutical industry are not with the regulations per se, but with the federal "red tape" involved and the extensive time it takes to show compliance with said regulations. Federal "Job Justification", if you will.—John Edmundowicz, Carmel, Ind.●

THE HOUSING SITUATION

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. OAKAR. Mr. Speaker, as a member of the House Banking Subcommittee on Housing and Community Development and a member of the House Select Committee on Aging, I am seriously concerned with the availability, the conditions, and the dramatic impact of the recent budget cuts on the housing situation, in general,

and specifically, disturbed about housing for the elderly across our Nation.

Only yesterday, figures were released that revealed housing starts are 43 percent below figures in October of last year. This percentage decline is devastating to the industry as a whole and has a critically adverse effect on the elderly as a sector of the population.

Many of our older Americans have no choice but to live in housing that more fortunate Americans would shun—that most safety departments would declare condemned and that most human beings would consider unconscionable.

Approximately 552,000 older persons live in public housing built by HUD. Seventeen percent of the urban elderly and 30 percent of the rural elderly live in housing that is physically deficient. In my own city of Cleveland, 90 to 95 percent of the federally assisted high rise housing estates are occupied by elderly persons. Some 41 percent of the 1,744 million households currently receiving rent subsidies are elderly. Estimates indicated that for every low-income elderly occupant, there may be as many as three older persons waiting for a unit. Approximately 616,693 elderly persons live in units subsidized by section 8. As you are well aware, the administration proposed and had adopted a provision to increase the tenant contribution to 30 percent—727,340 elderly subsidized tenants will be affected by these increases. All funding for congregate housing programs are eliminated and reduced funding for section 202 (housing for the elderly and the handicapped) has already drastically decreased the number of new housing starts.

Currently, 105,000 older persons live in units built by section 202. At least 65,416 older persons in rural areas live in units built under the Farmers Home Administration, section 515. This program has been cut by 12 percent.

Mr. Speaker, it is totally beyond my comprehension that this Nation which stands tall and proud in the defense of human rights for people around the world, dares to deny to the mothers, the fathers, the grandfathers, the grandmothers—their basic earned right to safe, decent, and adequate housing. The decisions made by this Congress, as relates to slashing housing opportunities, will surely come back to haunt us. Perhaps it will be these same legislators and administrators who will wake up in their twilight years and find themselves waiting in line for housing which is either unavailable or in deplorable condition.●

CHILD PASSENGER SAFETY WEEK

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. PANETTA. Mr. Speaker, the week of November 8 was recognized as Child Passenger Safety Week in Monterey County, Calif. I would like to take this opportunity to commend the county on its efforts in recognizing the importance of child passenger safety and encourage the use of child restraint devices.

The dangers of unrestrained child passengers have been clearly depicted. Too many times, we have become aware of automobile accidents in which child passengers are killed or seriously injured. In many of these instances, adequate child restraint devices could have lessened or even prevented the seriousness of the injury occurred in these accidents. Over the past few years, there has been an increase in the purchase and use of child passenger safety devices, and this is certainly a worthwhile development. Parents are now being encouraged to purchase child restraint devices along with the purchase of other necessary infant goods.

The importance of the use of child passenger safety devices cannot be generally taken for granted. I am hopeful that the designation of Child Passenger Safety Week in Monterey County will bring vital attention to this concern and will increase the awareness of the residents in the community. I urge my colleagues' attention to this matter.●

STOPPING THE SALE OF SILVER FROM OUR NATIONAL STOCKPILE

HON. LARRY E. CRAIG

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. CRAIG. Mr. Speaker, today I am joined by my colleague, Congressman HANSEN, in introducing two pieces of legislation aimed at assuring that any sale of silver from the strategic stockpile would be accomplished without undue interruption of the silver market.

The first bill is a companion bill to the McClure-Symms legislation (S. 1823). It would require that the President reevaluate the need for a silver stockpile goal, and if he determines that the silver stockpile be disposed of, that the disposal could only occur through a coinage program.

The second bill is very simple. This bill will amend the Omnibus Budget Reconciliation Act of 1981 to delete language that allows for the sale of silver from our strategic stockpile.

Mr. Speaker, over the past 5 months the issue of silver sale has been greatly publicized in the national media and in my home State of Idaho. I am in opposition to the sale of silver because of its immediate detrimental impacts on the mining industry and my State of Idaho. I am not alone in my opposition to the sale of silver. Senator MCCLURE and Senator SYMMS and Congressman HANSEN have all worked very hard to find a workable alternative to the sale of the silver from our national stockpile.

The time to worry about strategic mineral availability is now, not during a crisis when a shortage of minerals could cause this Nation to alter its foreign policy. This is why Congressman HANSEN and myself are introducing these bills today.

Preliminary results of a study being done by the General Accounting Office (GAO), on the effects and consequences of the Government's silver sale have cast serious doubts upon the sale of silver from the strategic stockpile. GAO's efforts to date have shown:

First, identified demand for silver during periods of national emergency that have not been considered;

Second, identified uncertainties relating to the availability of both domestic and foreign supplies that have not been addressed;

Third, found that the data used to support the zeroing of the strategic silver stockpile is extremely soft;

Fourth, found that the war scenario, upon which the stockpile goals are established, is being reevaluated due to the Sadat assassination;

Fifth, the sale has raised the wrath of our major foreign suppliers including Peru, Mexico, and Canada, all of whom have protested to the U.S. State Department;

Sixth, GAO recommends alternatives to the silver sale such as the legislation I introduced which would restructure the quantity of stockpiled materials, as well as a coinage program.

Consequently, the GAO has indicated that the sale of silver should be postponed and that alternatives to selling the silver on the open market should be explored. Further, I would like to list a few more important reasons why the sale of the silver from our national stockpile should be halted:

First, the availability of silver is essential to the national security, economic well-being and industrial production of the United States;

Second, the United States is not self-sufficient with regard to silver, and in times of national emergency, foreign sources supply may be needed to meet

total industrial, military, and essential civilian needs;

Third, the United States is strongly interdependent with other nations through international trade which with respect to silver and stockpile disposals have the potential of causing adverse international repercussions;

Fourth, in terms of the amount of certain materials that are still needed in the strategic and critical materials stockpile is seriously deficient, and at the present rate of funding, it will be many years before the stockpile's goals are filled.

In conclusion, Mr. Speaker, let me restate that we are adamantly opposed to sale of silver and the prevailing attitude that we have no need for silver in our strategic stockpile. We would like to emphasize that if the administration continues to sell silver from our stockpile, we will continue our efforts to stop the sale, and at the minimum, require a method of sale which would have the least impact upon our mining industry and have the greatest return to the people of this country.●

FREE THE FEDERAL HOSTAGES

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. WOLF. Mr. Speaker, in the last 2 days both the New York Times and the Washington Post have printed editorials in support of the effort to raise the cap on Federal executive salaries. As these editorials point out, there are sound economic reasons for doing so now. I ask that the text of the Washington Post editorial be printed at this point in the RECORD. Good government benefits everyone, and I urge my colleagues to consider the merits of raising the pay cap for Federal executives.

[From the Washington Post, Nov. 19, 1981]

FREE THE FEDERAL HOSTAGES

Congress has another chance today to do right by top federal officials. Sen. Ted Stevens, chairman of the civil service subcommittee, will be urging the Senate to raise the cap on federal executives salaries as part of the spending bill Congress must complete today to keep federal funds flowing.

We have heard from all sides that the problem of pay compression at the top levels of civilian and military pay is causing a massive loss of scarce talent. Pentagon officials are especially alarmed at the loss of technical and administrative personnel to high-paying defense contractors. Early retirements among federal executives in all agencies have reached such alarming proportions—over 95 percent of those newly eligible to retire are now doing so, compared with only 17 percent five years ago—that the General Accounting Office recently estimated that lifting the pay cap could actually save the government money because of reduced pension costs.

While other factors may contribute to this exodus, the pay cap must be a major contributor. Federal executives now earn only 5.5 percent more than they did five years ago. Over the same period, private-sector executive salaries rose 40 percent and cost-of-living adjustments pushed up federal pensions by 55 percent. For those who have stayed behind, the cap has caused severe management and morale problems. Pay increases at lower grade levels have forced more and more workers up against the pay ceiling. At the moment there is nothing beyond self-esteem to motivate workers to accept the added duties and pressures associated with a promotion within the top five civil service levels.

The Stevens amendment would not remove the pay cap entirely. It would, however, improve the competitiveness of top federal salaries somewhat and restore some incentive for promotion at the top grade levels. For several years now, Congress has held federal officials hostage to its own reluctance either to take the heat for raising congressional pay—to which federal pay is now tied—or allow federal executives to earn more than congressmen. Whatever the merits of a congressional pay raise—and there are many separate factors involved in that matter—it is time for Congress to release its federal hostages.●

A TRIBUTE TO ALEXANDER E. BARKAN, NATIONAL COPE DIRECTOR

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. GUARINI. Mr. Speaker, it was with mixed emotions that I recently learned that Alexander E. Barkan, the national director of the Committee on Political Education for the AFL-CIO, was retiring in early January 1982.

A native of Bayonne, N.J., one of the major cities in my congressional district, Al Barkan can, at the age of 72, look back on a long and outstanding career, a career which saw great advances in the role of the working man and woman in the American political system.

Because of his contribution in expanding the participation of working men and women in the democratic process, Al Barkan holds a unique place in recent American political history. He began his duties on the Committee on Political Education in 1955. He served as an assistant director and deputy director before becoming national director in 1963. During those years he has been responsible for the voter registration of millions of union members. He also built and expanded programs on issue information and direct political involvement.

In the process, Al Barkan not only helped build the AFL-CIO into an effective political force, but also expanded the base of our great democratic system. Today, union members register to vote and vote in percentages greater than the rest of the electorate. This simply was not the case before he headed COPE.

Mr. Speaker, we, as a nation, owe a great deal to men like Al Barkan. His unique combination of idealism and organizational pragmatism has contributed to a larger and better informed electorate. I thank him for his service, and I hope that he will remain active in the political world after his retirement.●

HONOR FOR GOVERNOR DAVIS

HON. JERRY HUCKABY

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. HUCKABY. Mr. Speaker, I would like to submit for the record this article written by one of the most distinguished members of the Washington press corps, Mr. Edgar Poe. Mr. Poe has written about the notable two-term Governor of Louisiana, Hon. James Houston "Jimmie" Davis. Governor Davis is a native of the Fifth Congressional District of Louisiana, which I serve. I would like to take this opportunity to insert this excellent account of Governor Davis into the RECORD at this time. The article follows:

D.C. HONORS JIMMIE DAVIS

(By Edgar Poe, Washington Bureau)

WASHINGTON—A few nights ago, as an autumn rain swept over Washington, hundreds of people streamed into a Constitution Avenue auditorium nearly halfway between the White House and the Capitol.

They were attending the Smithsonian Institution's Performing Arts Country Music series. Jimmie Davis and the Chuck Wagon Group were the honored performers.

They came to hear and see the twice governor of Louisiana, far better known nationally for his smash hit, "You Are My Sunshine," than for his governorship tenures and his brief career in the movies, mostly Westerns.

James Houston Davis, member of the Country Music Hall of Fame and the Song Writers Hall of America, arrived in Washington in a converted Pullman-like bus with all conveniences for him and his traveling troupers after a performance the night before in Pennsylvania.

Before and after his singing Jimmie Davis shared with the big assembly a wide range of memories of his youthful years in the red clay and pine-studded hills of Jackson Parish.

The former Louisiana governor was born in 1902 near the deep-rural community of Beech Springs. There were 11 Davis children, their parents, plus grandpa and grandma, who lived in a two-bedroom sharecroppers cabin.

If a poll had been taken before that program it might have shown that many of the people did not know Jimmie Davis served as chief executive of Louisiana, in 1944-48 and 1960-64. The first time he was "drafted" to succeed Gov. Sam Jones of Lake Charles, who could not succeed himself because of the then one-term constitutional limit in office. Now a person can serve two four-year terms before leaving the office.

The people came from all over the District of Columbia and suburban Maryland and Virginia to see and hear a prolific tunesmith who penned "You Are My Sunshine," one of the most popular songs of this century, and numerous others including "Nobody's Darling But Mine" and a sacred song, "Some One to Care."

At the end of the Smithsonian performance, a man with his wife walked up to another man and said: "You can tell the people in Louisiana that Jimmie Davis is an excellent ambassador for his state."

Traveling with Mr. Davis as performing artists are his wife, Anna Carter Davis, her sister Rose and their brother Roy Carter. Jimmie Davis' first wife was the late Alvern Adams Davis of Shreveport, a gracious First Lady of Louisiana and a member of the Louisiana State University Board of Supervisors. She died in 1962 in the middle of her husband's second term.

In his little talks between the music, Davis said some people had been inquiring about his age. He said facetiously that on Dec. 1 he will be 104 and that his wife is 10 years older.

Jimmie Davis and the gospel quartet, which began in Texas in 1935, have sold millions of albums worldwide. He said "You Are My Sunshine" is now played and sung in nearly every country in the world.

Years ago such widely known musical figures as the Andrews Sisters, Guy Lombardo and Bing Crosby contributed to the early success of "You Are My Sunshine."

Not all of his songs were hits or near-hits by any means. Some opponents in his gubernatorial races took him to task for recording what they described as risque songs totally out of line for a man seeking the highest elective office in Louisiana. They were recorded in his early career. His 1934 successful release, "Nobody's Darlin' But Mine," was a big boost for him up the country music ladder.

The simplicity of Jimmie Davis' childhood spilled over into his musical writing and singing. This is spelled out in the 187-page book, "You Are My Sunshine, The Jimmie Davis Story" a biography by Gus Weill. The governor autographed a number of books after the show here.

There was cotton-picking time, and mules and wagon for transportation and farming. At Christmastime there were an apple, an orange and a stick of candy. For entertainment there were singings at people's homes, candy pulls where a lot of romances had their inceptions. To raise money to buy basketball uniforms, there were box suppers at the little country school house.

When a member of the family died the body was placed in a homemade wooden box and taken in a silent community wagon caravan to the church cemetery to be placed in a grave dug by neighbors.

Jimmie Davis worked his way through Louisiana College at Pineville. He ran out of funds the end of the first year and returned to the field in Jackson County, where he raised three bales of sharecropper cotton so he could return.

He became professor of history at Dodd College, a young women's institution at Shreveport. It was there that he began singing once a week over radio station KWKH under the simple title of "Jimmie" before his full identity was discovered by his history students.

His first elected office was that of police commissioner of Shreveport. In this race his style of politics was so successful he never abandoned it. He used a band to draw a crowd. Never again was there simply a speech. After four years as police commissioner, he was elected Louisiana public service commissioner, triumphing over all opponents with a 30,000 majority.

Subsequently he was "drafted" to succeed Gov. Sam H. Jones of Lake Charles. In that wartime campaign, he described his opposition as awesome. The opponents included incumbent U.S. Rep. Jimmy H. Morrison of Hammond, former U.S. Rep. Lewis Morgan, Vincent Moseley of Opelousas and Dudley J. LeBlanc of Abbeville.

Firing the opening gun of his campaign at Jonesboro, the seat of his native parish, he never mentioned the opposition. He recruited a band to accompany his songs that people knew. One of his favorite stump songs was "No Letter Today." This often brought tears to the women in the audience who had loved ones from Europe to the South Pacific.

In French South Louisiana he included "Big Mamou" and "Jolie Blonde."

At the Smithsonian Institution concert, after the songs Jimmie Davis invited the audience, to their delight, to join him in singing the chorus of "You Are My Sunshine."

As a closure, he suggested the audience join him in singing the chorus of "When the Saints Go Marching In."

A magnificent rush of musical voices in harmony poured out from the auditorium. There was also encore after encore for the Louisiana troubadour and his traveling artists.●

REJECT THE FARM BILL CONFERENCE REPORT

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. PEYSER. Mr. Speaker, the conference report on the farm bill will be reaching the floor for action in the next few weeks. While many are going to find fault with the price levels agreed to for various commodities, the most outrageous sellout of the House position has taken place on sugar and peanuts.

There was no compromise worthy of mention between the positions of the House and Senate on sugar. It was a complete loss for the House. We now have a sugar program where we had none, and we also have returned to the quotas and price supports for peanuts.

It is my hope that my colleagues will join me to defeat the conference report and, thereafter, to instruct the conferees to insist on the House position on these two issues.

With the administration pushing for more budget cuts, and with President Reagan clearly expressing his concern that the farm bill would put the Government more into agriculture, rather than less, I believe we have an obligation to reject this conference report, particularly as it exceeds the President's budget by nearly $610 million.

At this point in the RECORD, I would like to insert a recent editorial by the New York Times, which states succinctly the case supporting the defeat of the farm bill conference report. I commend this editorial to my colleagues.

[From the New York Times, Nov. 13, 1981]

FIASCO ON THE FARM

House and Senate conferees are still dotting the "i"'s and crossing the "$"'s on a new farm bill, but the outlines are clear enough. Not surprisingly, price supports for grains and dairy products are less generous than farmers wished, but considerably more generous than taxpayers and consumers might have hoped.

No similar spirit of compromise is evident, however, in the sugar and peanut price support programs. Ignoring the wishes of the House, the conferees have given these growers almost exactly what they want. Only a rebellion by the House can restore some sanity to the farm program.

To raise peanuts, a farmer must lease or buy land from a farmer already admitted to the select circle of legal peanut growers. This year, responding to calls for budget cuts and smarting from peanut price rises, the House voted to scrap all acreage restrictions. The House measure, sponsored by Stanley Lundine, Democrat of New York, would have opened the market to all, with crop values protected by less wasteful Government-set minimum prices.

One victory, however, did not win this war. The House conferees, drawn largely from the Agriculture Committee, accepted a Senate "compromise" that is no compromise at all. Acreage restrictions are out, but in name only. In their place are marketing quotas that provide almost identical benefits for the same landowners. Anyone may be able to grow peanuts, but only those who had acreage allotments can sell them in the United States.

When it came to sugar, the Senate voted a minimum price of 18 cents a pound, 50 percent more than the world price. This would add an extra $2 billion a year to the nation's bill for sweeteners. And, by encouraging domestic production, it would drastically limit imports from poor countries, like the Dominican Republic, which depend on the American sugar market for survival. So a wiser House majority, led by Peter Peyser, the New York Democrat, voted against any sugar program at all.

Senate conferees were prepared to make a deal: support sugar prices, but cut the cost to consumers by lowering the floor to 16 cents. In fact, no bargaining was needed. Rather than representing the sentiments of the House, its conferees supinely voted 15 to 1 simply to accept the Senate bill.

The Reagan Administration is reportedly unhappy with the cave-in, but wants no battle with the farm lobbies. Thus the only hope for balanced legislation lies with the House. A majority there voted to cut the peanut and sugar programs. The same majority can vote to send the conference bill back to committee, this time for some real compromises.●

REACTION TO PRESIDENT REAGAN'S INITIATIVE

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. BROOMFIELD. Mr. Speaker, the praise for President Reagan's peace initiative has been profuse in Western Europe. The President's eloquently stated and thoughtfully conceived policy on arms reduction has elicited support from our allies abroad. Chancellor Schmidt of West Germany declared that President Reagan's speech confirmed his portrayal of the President as a man of peace who is willing to negotiate. He further stated that the speech contained everything that the West Germans could have wished for, and that it gave him a firm basis on which to talk to the Soviet Union during Brezhnev's visit next week to Bonn. Prime Minister Thatcher of the United Kingdom said the speech was warmly received in hearts and minds across the Continent. The Italian Government stated that President Reagan's endorsement of the European position was deeply appreciated.

It is not only reassuring, but essential, that we have the support of our allies in Western Europe on this matter. It would have been reassuring, as well, if the Soviet Union had indicated that the peace initiative was a positive contribution toward arms control. But, alas, they have revealed their true nature with their vicious propaganda attack. Rather than accepting the President's initiative as a step in the right direction to reduce armaments and tension in Europe, they have characterized it as a ploy designed to stalemate the forthcoming nuclear arms talks in Geneva. Again, the Soviet Union has demonstrated that it is primarily interested in subverting the NATO alliance and dominating the European theatre through intimidating threats of nuclear reprisal.

The Soviets' use of faulty figures to validate their position is transparent. Rather than limiting the discussion to United States and Soviet missiles systems, they have claimed that U.S. bombers based in Europe should be counted, but they have conspicuously not included their own bomber force. Moreover, they have stated that the U.S. submarine force should be counted in the intermediate range calculations, yet they have again excluded their own submarine force. In any event, submarine systems have heretofore been included in strategic arms limitation talks, not intermediate range theatre talks. And finally, they have said that the British and French nuclear forces should be included. Not only are these countries sovereign and exercise independent control over their nuclear weapons, but France has not been in the military arm of NATO since the mid-1960's. The inclusion of the nuclear forces of our allies would be equivalent to the United States demanding that China's nuclear forces be counted on the Soviet side, since China is a Communist country and a potential enemy. Clearly, such a proposition on either side is not to be taken seriously, and the Soviet insistence upon such merely underscores their true intentions to undermine the President's initiative.

The Soviets callous disregard for the peace initiative reflects their long-term goals in the nuclear arms arena. They are not seeking meaningful reductions to stabilize a dangerous situation, rather they are seeking to take advantage of every situation in order to enhance their own military might to the detriment of the West. I am sure that Moscow's line will be parroted by Western pacificst and Communist front groups. Rather than dismiss their criticism out of hand, we must copy President Reagan's example. We must face the questions head on and challenge the erroneous assumptions devised by the Soviets.

In the long run, if we are resolute, we can convince the Soviet Union that they must negotiate arms reductions on an equitable basis with us. The support of our allies has been greatly appreciated. We must not falter in driving home the fact that it is the Soviet Union that is being uncooperative in ending the nuclear arms race, and that it is the United States and our allies that are pursuing peace for mankind.●

DECLARATION FOR PEACE

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. LOWERY of California. Mr. Speaker, I congratulate President Reagan on his foreign policy address and commend him for taking the leadership role in efforts to bring about disarmament, not on a unilateral basis, but through mutual and meaningful arms reduction. There is probably no issue before civilized mankind more important than bringing some control to the spread of nuclear weapons, whether they are on the Continent of Europe or throughout the world itself.

I sincerely hope the President's initiative will place us in a strong opening position as we go into negotiations with the Soviet Union on the question of theater nuclear weapons deployment. Clearly, the Soviets have engaged in a very intensive propaganda offensive in Europe to discredit America's commitment to arms control. This must be expected and is certainly in accord with their style and past behavior. They have skillfully attempted to divide the NATO Alliance and to play on the fears of Europeans that Europe would be used as a battleground by the superpowers. They point their fingers at the United States while they continue to deploy medium-range nuclear warheads, at the rate of one SS-20 per week, primarily aimed at Europe.

The President has very effectively taken the offensive out of the Soviets' hands. He has spoken most convincingly and in such a persuasive manner that our Europen friends should be encouraged.

I also applaud the President's announcement that the NATO alliance is prepared to forgo the deployment of new land based, intermediate-range missiles in Europe, provided the Soviets agree to eliminate their enormously hostile and destabilizing force of SS-20, SS-4, and SS-5 missiles. Taken in full consultation with our NATO Allies, this decision should once and for all reassure the people of Europe and the world that the United States is committed to the pursuit of peace and stability in its relationship with the Soviet Union.

Our eminently reasonable offer will appropriately test the Soviets' self-declared dedication to a peaceful and harmonious relationship with the Western alliance. I can only hope that the Soviet Union recognizes and acts on this unique opportunity to reverse what otherwise could prove to be another costly spiral in the nuclear arms race.●

TRIBUTE TO OWEN MANNING

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. APPLEGATE. Mr. Speaker, I am here today to pay tribute to Owen Manning of Coshocton, Ohio, for his accomplishments and service to the rural people of this Nation. Born in Kentucky in 1920, Owen received his early education in the schools of Kentucky and was first employed as an electrical engineer for a consulting engineering firm in Lexington. He later entered the service in World War II, advancing to the rank of sergeant. Following his discharge from the Army in 1945 Owen returned to Kentucky and became the chief engineer for the Fleming-Mason Electric Cooperative. Then in 1955, he moved to Coshocton, Ohio where he was general manager of the Frontier Power Co. This is where his association with the rural electric system began.

In the early 1960's Manning helped form the Buckeye Power, Inc., to supply electric power for over 200,000

customers in 77 counties in Ohio. This pioneering effort was the first time in the Nation's history that an investor-owned utility and member-owned utility joined together to serve their mutual customers. Since that time, many similar organizations have been formed throughout the country. Manning served as president of Buckeye Power for over 14 years and is currently a member of the board. This rural electric system is considered one of the outstanding ones in the Nation.

In addition to these efforts, Owen was instrumental in forming the National Rural Utilities Cooperative Finance Corp. in Washington, D.C., of which he served as president in 1978. Because of his numerous contributions as a leader in rural America, Owen was invited to the White House in 1978 by President Carter.

Owen Manning has significantly contributed to numerous civic organizations in Coshocton County as well as received many awards for his leadership and participation. I am proud to have the privilege to pay tribute to a great gentleman and a friend, Owen Manning.●

U.N. COMMISSION ON HUMAN RIGHTS

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. BONKER. Mr. Speaker, last Monday, the Foreign Affairs Subcommittee on Human Rights and International Organizations, which I chair, held a hearing to review the work of the 37th and the upcoming 38th session of the United Nations Commission on Human Rights. Since I had the privilege of representing the Congress at the 37th session, I thought the following report would be of interest to my distinguished colleagues.

The report follows:

I had the privilege of representing the Congress at several meetings of the 37th session of the United Nations Commission on Human Rights. That Commission met from February 2 to March 14, 1981. While I was in Geneva two important issues of concern were debated and acted upon. The first concerned Chile and the continuation of the mandate of a special rapporteur. The second concerned the continuation of the special working group on missing and disappeared persons.

I was very disappointed and dismayed over the United States' official actions and votes on these two questions.

As the report of the special rapporteur on Chile was discussed, we once again heard the familiar refrains concerning the status of human rights in Chile. The special rapporteur stated: "There had not been improvement in the human rights situation in Chile and that in certain respects it had, on the contrary, deteriorated in comparison with the same period in 1979, particularly as regards the alteration of the traditional democratic legal system and its institutions and the repression of human rights activities of the Catholic Church and academic life."

Despite all the reports condemning the Chilean regime and despite all the reports that nothing had changed in Chile from the previous years, the Reagan administration by its words and deeds left no doubt as to who had its support and sympathies. Reversing the position we had supported at the 36th session of the United Nations Commission on Human Rights, the Reagan Administration representative voted to oppose the continuation of the mandate of the special rapporteur claiming "the situation of human rights has improved." His term was extended anyway by a vote of 22 for, 4 against, and 17 abstentions. The United States had the dubious distinction of being on the side of Argentina, Uruguay, and Brazil. Our allies in the Western block were all opposed to our position and tried to work out a compromise. When that failed they all abstained on the resolution's final vote. They were appalled and astonished.

I was especially displeased over the action of the U.S. delegation concerning the continuation of the special working group on missing and disappeared persons. The Subcommittee conducted a series of hearings in 1979 and 1980 on the subject of disappearances and passed a resolution calling for U.N. action that was overwhelmingly adopted by the House. During the 36th session of the United Nations Commission on Human Rights, under the skillful leadership of Jerry Shestack who enlisted the support of our allies and Third World countries, a working group was established to deal with the thousands of cases of missing and disappeared persons. In the one year of its existence, the working group was credited with having done an extraordinary job and nearly everyone (except Argentina) agreed that its mandate should be renewed. Unfortunately, the Reagan Administration's policy of tilting towards Argentina meant that unless Argentina approved, the U.S. would vote against the renewal of the working group's mandate. Fortunately, due to the great work of our Western allies (especially the British), the U.S. was saved the embarrassment of having to cast a vote—a consensus was reached to continue the working group for another year.

On both of these issues our Western allies were puzzled. The Reagan Administration's representative was down-playing the repression of governments friendly to the United States and at the same time, making speeches identifying terrorism as major problem. However, by his votes on these issues he had aligned the United States with regimes that practice terrorism against their own people. This Administration is fond of talking about the alleged double standards followed on human rights in the Carter Administration. Yet, at the 37th session of the United Nations Commission on Human Rights, more attention was paid by the U.S. representative to human rights abuses of Cuba, Nicaragua, and other regimes of the left than to the human rights abuses of right wing regimes perceived as friendly to the U.S.

We in Congress have followed the practice of condemning human rights violations no matter where they occur and it is my hope that in the future, this Administration's policy will be closer to that of the Congress. As Under Secretary Willian Clark's memo said: ". . . We will have to speak honestly about our friends' human rights violations and justify any decision wherein other considerations (economic, military, etc.) are determinative. There is no escaping this without destroying the credibility of our policy, for otherwise we would be simply coddling friends and criticizing foes . . . Our struggle is for political liberty. We seek to improve human rights performance whenever we reasonably can. We desire to demonstrate, by acting to defend liberty and identifying its enemies, that the difference between East and West is the crucial political distinction of our times."

One newspaper account describing the work of the U.S. delegation at the 37th session reported that, parting company from its Western allies, the U.S. voted against condemning Israeli settlements in the occupied territories and apartheid in South Africa. The U.S. discouraged any talk about the right to development and after having insisted that any inquiry of human rights violations in El Salvador must be evenhanded, abstained when that suggestion was adopted. During the 36th session, the U.S. expended considerable effort to successfully place the case of Andre Sakharov on the agenda. But at the 37th session, the U.S. delegation was outmaneuvered as the Soviet Union was successful in having the Sakharov question removed.

However, this is not say that there were no positive developments. Prominent among the features of this session were the large number of countries discussed during confidential procedures and the public debate that followed; the discussion of El Salvador; the completion after 21 years of a draft declaration on the elimination of all forms of intolerance and discrimination based on religion or belief; the renewal of the mandate of the working group on missing and disappeared persons and the special rapporteur on Chile.

I should hasten to add that the U.S. delegation chaired by Michael Novak, despite the fact that it was sent to Geneva at the last minute with very little time for preparations, worked hard and diligently on many issues. Their positions and votes, featuring the de-emphasis of human rights in foreign policy, with which I disagreed, were under instructions from the Reagan Administration in Washington, D.C.

It is my hope that at the 38th session the U.S. will take some positive initiatives and regain a leadership role in the human rights area. The delegation should be strengthened by the fact that our chief representative will be a veteran of the last session. After nine months, we now have an Assistant Secretary for Human Rights and Humanitarian Affairs and the Reagan Administration has enunciated its policy on human rights as spelled out in the State Department memo. I welcome this new effort and further hope that the U.S. representative will give the State Department the needed guidance which will truly give our country a human rights policy that is balanced.●

AMERICAN EDUCATION WEEK

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. GOODLING. Mr. Speaker, the week beginning November 15, 1981,

has been designated as American Education Week. As the President has noted in his proclamation, we are fortunate to have the right to oversee our children's education. We should never lose sight of the fact that in the United States the primary responsibility for educating our youth has rested with parents. State and local educators have always provided assistance to parents in achieving educational goals and organizing our school systems. The people of our Nation have conciously chosen to offer a primary and secondary education to all of our young people and the unique and fascinating characteristic of this adventure has been the primacy of local control and decisionmaking over the fundamental educational program.

In the wake of so much pessimism regarding the dire effects of budget reductions, I would like to remind my colleagues of the positive steps taken by Congress during this past session to restore a large measure of State and local control over many educational policy decisions.

We should all be aware of the conventional wisdom that education should be a Federal interest and a State and local responsibility. It appears that some people in Washington lost sight of this notion over the past decade. However, I would be the first person to say that the Federal Government must continue to give attention to people with special needs. Federal education policy, while targeting students to receive special assistance, should provide the local school officials and parents the flexibility to develop the methods through which Federal goals can be attained. I am convinced that the proliferation of overly prescriptive Federal categorical aid programs over the years—accompanied by reams of Federal regulations—actually became counterproductive. Many of us who are closely involved in these programs soon realized that educators were so threatened by Federal auditors that they began to place more emphasis on developing a "clean audit trail" rather than developing a dynamic creative educational program for students. That is why I am optimistic today.

Under the leadership of my colleague from Ohio, JOHN ASHBROOK, the Congress has blazed a new trail along the path of commonsense. Starting next school year, the trend toward responsibility for educational excellence will again shift toward the State and local education agencies and the parents and students that they serve. I am optimistic that the competence and dedication of these people will prove effective and will clearly demonstrate that the source of wisdom does not reside along the banks of the Potomac. That is why this week, American Education Week, I am personally excited about the prospects for the future of our schools and students.●

AMERICA'S PROGRAM FOR PEACE

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. FORSYTHE. Mr. Speaker, yesterday, President Reagan delivered a truly historic speech. In outlining this Nation's agenda for peace, he not only reaffirmed the American commitment to the Atlantic Alliance and our desire to reduce the massive buildup of arms in Europe but also challenged the Soviet Union to join in reducing nuclear and conventional forces so that peace and security can be achieved throughout the world. As the President said:

> There is no reason why people in any part of the world should have to live in the permanent fear of war or it specter. I believe the time has come for all nations to act in a responsible spirit that does not threaten other states. I believe the time is right to move forward on arms control and the resolution of critical regional disputes at the conference table.

I, too, share these sentiments. For many months now, Moscow has been waging a propaganda campaign to discredit American commitment to arms control in an attempt to divide the Atlantic Alliance by playing on the fears of many Europeans who see their homeland as the battleground of the two superpowers. I am proud that the President has very effectively popped the Soviet's propaganda balloon and taken the high road.

President Reagan has offered an alternative which not only can be used as a framework for peace but also offers a way out of a costly arms buildup for all countries involved. Serious people in this country, in Europe and in the Soviet Union ought to listen.●

TRIBUTE TO H. STUART KNIGHT

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. RODINO. Mr. Speaker, before this session adjourns, I ask that my colleagues in the Congess join me in paying tribute to a man who has recently announced he is ending his Federal career after 35 years of extraordinarily dedicated service—H. Stuart Knight, Director of the U.S. Secret Service.

Appointed from the ranks to the Office of Director in 1973, Stu Knight skillfully and successfully led the Secret Service through some shocking episodes in our history: The scandal of Watergate, assassination attempts on the life of President Ford in 1975, and, most recently, the attack on President Reagan last March, in which one of his own men was wounded.

Through all these traumatic events, Stu Knight's leadership, his integrity, honesty, selflessness, and professionalism exemplified the dedication and ability that has become synonymous with the Secret Service.

His loyalty to the Office of the President and to the principles and ideals of our democratic institutions was largely responsible for the manner in which the Secret Service maintained and enhanced its reputation for nonpartisan dedication and superior competence in law enforcement during years when so many agencies of Government became suspect and had to undergo the closest scrutiny.

To dwell on each of Stu Knight's accomplishments during the last 8 years would be impossible at this time. However, his countless contributions to the Secret Service and to the international law enforcement community are personified in the image he has given us of a devoted, able, and effective leader in law enforcement.

I join his legion of friends and admirers in extending my best wishes and my gratitude for the splendid job he has done.

The Secret Service, the Department of the Treasury and the Nation will be hard pressed to find an individual who can fill the chair that will be left vacant when Stu Knight retires on November 30, 1981.●

STRATEGIC ARMS REDUCTION TALKS

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. DREIER. Mr. Speaker, I rise today in support of the bold arms reduction initiative outlined by President Reagan in his speech before the National Press Club. I urge my colleagues to join with me in working with the President to enhance global security by reducing the threat of nuclear war.

I have long been an advocate of a fair and verifiable reduction in nuclear and conventional armaments by the world's superpowers. The President has presented a clear framework for achieving this goal. The proposal is called START—strategic arms reduction talks. Specifically, the President has called for:

> The dismantling of Soviet SS-20, SS-4 and S-5 missiles aimed at Western Europe in exchange for the cancellation of the deployment of U.S. Pershing II and ground launched cruise missiles.
>
> The opening of negotiations of further reductions of strategic arms as early as possi-

ble next year to achieve "substantial reductions in nuclear arms which would result in levels that are equal and verifiable."

The reduction of conventional forces stationed in Europe.

The establishment of a conference to develop effective measures to reduce the chance of war arising out of uncertainty or miscalculation.

I believe that these measures, if enacted, will be a monumental step toward the establishment of a more secure world. As the President pointed out, the threat to that security has been greatly increased by recent Soviet arms buildups. During the past decade the Soviet Union has increased its real military spending by about one-third and increased the size of its armed forces so that they now number more than double those of the United States. During this same 10-year period, the United States has decreased its military spending. In addition, while NATO has displayed no new intermediate range nuclear missiles and was indeed reducing warheads by 100, the Soviets were busy deploying new SS-20 missiles which contain over 750 warheads.

The President has made it clear that he will not allow the United States to be threatened by a Soviet military superiority, nor will he allow the NATO alliance to be weakened. In both these positions, I believe President Reagan is absolutely correct.

The President, however, has offered a plan to work with the Soviets to put an end to the arms race. He has offered not vague phrases, but a concrete proposal. We should applaud the President for this initiative as we await the Soviet response. Indeed, as President Reagan concluded his speech, we look for all nations to join in this effort to create a world in which "the strong are just and the weak secure and the peace preserved." I would hope that my colleagues will join with the President to make this vision a reality.●

A TRIBUTE TO RINBAN TOKUNAGA

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today to honor one of Santa Clara County's outstanding members of the clergy, Rev. Kyoshiro Tokunaga, who will be retiring on December 31, 1981, after serving the San Jose Buddhist Church for 30 years.

Reverend Tokunaga was born in Tokyo, Japan, on November 2, 1905. Shortly after his birth his father emigrated to the United States and his mother and the rest of the family joined is father in Denver in 1918. He graduated from the University of Denver in 1932. During this time he taught Sunday school and Japanese language school at the Denver Buddhist Church. Throughout his young life, he continually taught both Sunday school and Japanese language school at the Senshin Buddhist Church in Los Angeles, Harbor City, and Long Beach. In 1938, he went to the San Diego Buddhist Church and in 1939-40 he went to Japan and toured Manchuria before returning to the United States.

At the onset of World War II he was arrested as an alien and sent to a detention camp. He was interned originally at Santa Fe, N. Mex., and finally at Crystal City, Tex.

After the war and his release from camp, he returned to the Denver area and later moved to Los Angeles where he attended graduate school at USC. In 1951, he was transferred to the San Jose Buddhist Church as its executive secretary. The next few years found him pursuing the studies necessary to become a minister. During this time he studied at both Stanford and in Japan. In 1959, he became a minister for the San Jose Buddhist Church.

In 1976, when the classification of Betsuin was assigned to the San Jose Buddhist Church, the Reverend Tokunaga was given the title of Rinban. Betsuin status is given only to a larger church in a given area to serve as the "mother church" to provide leadership, guidance, and counseling to smaller churches in the area and its head minister becomes a Rinban.

Rinban Tokunaga has been active in many aspects of the church, having served as a member of the bishops advisory committee, and the BCA ministerial research committee, as chairman of District Ministerial Association and the chairman of Coast Ministerial Association.

In addition to his church related work, he has found time to be a guest lecturer at San Jose State University in Eastern philosophy. He has spoken at many community and civic functions over the years and has been an active participant in the Council of Churches of Santa Clara County whose goal is to further common goals among churches of all denominations.

In his retirement, it is Rinban Tokunaga's goal to translate Buddhist writing into English. He is a most respected clergyman among the Buddhist ministers in the United States and is a picture of man of compassion and humility as well as a scholar who has a deep and sincere understanding of the teachings of the Lord Buddha.

Mr. Speaker, I ask you and all my colleagues in the House of Representatives to join me in saluting this outstanding member of the clergy and in wishing Rinban Tokunaga the very best in his retirement.●

HIGH TEMPERATURE GAS-COOLED REACTORS (HTGR)—FORT ST. VRAIN ACHIEVES 100-PERCENT REACTOR POWER

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. LOWERY of California. Mr. Speaker, the high temperature gas-cooled reactor (HTGR) offers unique advantages over the current generation of fission reactors. It is capable of providing higher efficiency electricity production and consumes less uranium than the water-cooled reactors currently in use.

Because it uses helium as a coolant, and high heat-absorbing graphite as a moderator, the HTGR offers inherent safety advantages which address both public safety concerns and protection of the utility plant investment. Additionally, the HTGR is unique among utility systems in its capability to produce high temperature steam or heat at temperatures matched to meet the requirements of major process industries—oil, chemical, synfuels, aluminum, and so forth—and therefore to displace the fossil fuels that would otherwise be required in these industries.

The Fort St. Vrain nuclear powerplant, designed and built by General Atomic Co. of San Diego for Public Service Co. of Colorado, is the only operating commercial-size HTGR in the world. Early data analysis from the plant, installed north of Denver, confirms the unique advantages of the high temperature gas-cooled reactor concept.

The plant, which attained 100-percent reactor power on November 6, 1981, showed an operating efficiency of more than 38.5 percent. That is higher than any other nuclear powerplant in the United States, and about 20 percent more efficient than water-cooled nuclear powerplants.

According to Dr. Corwin L. Rickard, executive vice president of General Atomic and a leader of the team that has pioneered HTGR development in the United States, all systems in the advanced nuclear power system performed at or near design conditions during the full-power test run. The helium coolant in the HTGR left the reactor core at design conditions—1400° F—and produced 995° steam at 2,430 pounds per square inch with reheat to 990° at 530 pse to drive the plant's 330,000-kilowatt turbine generator. The 12 high-temperature steam generators—the first in this country—met all design performance conditions. Of helical coil design, the heat exchangers produced 2.2 million pounds of steam per hour for the first full load test.

Furthermore, according to Dr. Rickard, the amount of radioactivity carried in the helium flow was less than one-fiftieth of the design limit; impressive evidence of the structural integrity of the dense carbon-coated fuel particles and the graphite core structure. The circulators that move helium between the hot core and steam-producing heat exchangers achieve more than 100 percent of their design flow of 3.4 million pounds per hour.

Mr. Speaker, I wish to take this opportunity to commend Dr. Rickard and his colleagues for their tremendous contributions to the advancement of this important technology, and to encourage continued congressional support of their efforts.●

RENEWABLE ENERGY

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. MAVROULES. Mr. Speaker, on November 17, 1981, I introduced H.R. 5005, the Department of Defense Renewable Energy Utilization Act of 1982. I commend this bill to my colleagues for it gives the DOD a greater role in reshaping its own energy needs and consumption patterns:

H.R. 5005

A bill to amend title 10, United States Code, to promote the use of solar and other renewable forms of energy in military facilities and equipment

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Department of Defense Renewable Energy Utilization Act of 1982".

FINDINGS

SEC. 2. The Congress finds that—

(1) the mission of the Department of Defense is successfully to protect the United States from foreign aggression;

(2) in carrying out this mission, the Department of Defense consumes vast amounts of energy (primarily nonrenewable fossil fuels), and is, in fact, the largest single user of energy in the United States;

(3) the Nation's consumption of fossil fuels and reliance on foreign sources of such fuels could be significantly reduced if the Department of Defense used renewable forms of energy, particularly solar energy, to supply a portion of its energy needs;

(4) many uses of solar and other renewable forms of energy in military facilities and equipment have been shown to be cost effective and reliable, and additional cost effective and reliable uses will be developed as scientific and technological knowledge advances;

(5) in implementing existing law that mandates cost effective solar energy systems shall be used in new military facilities, the Department of Defense has applied the statutory term "cost effective" in a manner which fails to accomplish the intent of the Congress to promote the use of solar energy systems;

(6) the national interests of energy security and fiscal responsibility demand that the Department of Defense use energy systems using solar and other renewable sources of energy (including systems that generate electricity) in new military facilities and equipment when those systems are cost effective and reliable for defense purposes;

(7) the Department of Defense has the capability to carry out an aggressive program to study the cost effectiveness of various uses of solar and other renewable forms of energy in military facilities and equipment, and to install, maintain, and monitor systems applying such uses; and

(8) implementation of such a program will result in many technological spin-offs adaptable to the needs of the private sector, will assure a growing market for energy systems powered by solar and other renewable forms of energy, and will hasten the general commercial, residential, industrial, agricultural, and governmental use of such systems in the United States and abroad.

PROCUREMENT OF ENERGY SYSTEMS POWERED BY RENEWABLE FORMS OF ENERGY

SEC. 3. (a) Chapter 141 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 2391. Procurement of energy systems powered by renewable forms of energy

"(a)(1) When procuring energy systems to supply the energy needs of a military department, the Secretary of such military department, whenever possible, shall procure energy systems powered by solar or other renewable forms of energy that have been shown to be cost effective, reliable, and otherwise suited to supplying such needs (such as energy systems powered by solar or other renewable forms of energy supplying energy for mobile power systems, cathodic protection of pipelines, remote communications sites, mobile radar sites, navigational aids, military range monitoring and conditioning equipment, load center power, water pumping and purification, cathodic protection of water towers and bridges, perimeter security devices, data links, repeater stations, emergency and rescue communications, lighting, remote instrumentation, marking and warning devices, monitoring and sensing devices, and remote weather stations and transmitters).

"(2) It is the sense of the Congress that up to 20 percent of the amount spent under paragraph (1) to procure energy systems using solar or other forms of renewable energy should be spent to procure such energy systems from small business concerns.

"(b)(1) For purposes of carrying out subsection (a) and section 2688(a), the Secretary of Defense shall undertake studies to identify applications of the use of solar and other renewable forms of energy to supply the energy needs of the Department of Defense that are cost effective and reliable.

"(2) Not later than 2 years after the date of the enactment of this Act, and every 2 years thereafter, the Secretary of Defense shall submit to the Committees on Armed Services of the House of Representatives and of the Senate a report containing the findings of such studies and any recommendations for legislative action.

"(c) For purposes of this section—

"(1) the term 'cost eeffective' shall have the meaning given to it in section 2688(b); and

"(2) the term 'energy systems' includes energy systems that generate electricity.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"2391. Procurement of energy systems using renewable forms of energy.".

USE OF RENEWABLE FORMS OF ENERGY IN NEW FACILITIES

SEC. 4. (a) Section 2688 of title 10, United States Code, is amended—

(1) in subseciton (a)—

(A) by inserting "(1)" after "(a)";

(B) by striking out "solar energy systems" the first place it appears and inserting in lieu thereof "energy systems using solar or other renewable forms of energy (including systems that produce electricity)";

(C) by striking out "solar energy has" and inserting in lieu there of "such systems have";

(D) by striking out "solar energy" the third place it appears and inserting in lieu thereof "such"; and

(E) by adding at the end the following new paragraph:

"(2) It is the sense of the Congress that up to 20 percent of the amount spent to purchase such systems should be spent to purchase such systems from small business concerns."; and

(2) in subsection (b)—

(A) by striking out "a solar energy system" and inserting in lieu thereof "an energy system using solar or other renewable forms of energy (including systems that produce electricity)"; and

(B) in paragraph (2) by striking out "a solar system" and inserting in lieu thereof "any such system".

(b) The heading of such section is amended to read as follows:

"§ 2688. Use of renewable forms of energy in new facilities".

(c) The item in the table of sections of such chapter relating to section 2688 is amended to read as follows:

"2688. Use of renewable forms of energy in new facilities.".●

CAN WE HAVE EXCELLENCE IN EDUCATION?

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. SPENCE. Mr. Speaker, on November 6 and 7, the University of South Carolina Third Annual Conference on Educational Issues and Research was held on the University of South Carolina campus. The keynote speaker was Dr. Donald J. Senese, Assistant Secretary for Educational Research and Improvement, U.S. Department of Education, who is also a graduate of the University of South Carolina.

Dr. Senese raised a number of important and timely issues in his address to these distinguished educators. He also paid tribute to three of my constituents who have contributed to the field of education: Mrs. Mae Clark, Dr. Inez C. Eddings, and Mrs. Myra Wyman.

I would like to enter Dr. Senese's remarks, "Can We Have Excellence in Education?", in the CONGRESSIONAL RECORD, and I commend them to the attention of my colleagues. I believe that he has pointed the way we must follow if we are to reverse the downward trend which we have experienced in education in recent years.

CAN WE HAVE EXCELLENCE IN EDUCATION?

(By Donald J. Senese, Ph. D.)

Dean Mulhern and distinguished educators, I am proud to say that I received my master's and doctorate degree from the University of South Carolina and did research for my master's thesis and dissertation on South Carolina History.

As one walks across this campus and views the buildings—Lieber, Pinckney, Legare, Sloan, Calhoun and Barnwell—the campus is alive with those individuals who made South Carolina a great State.

I bring you greetings from Education Secretary Terrel H. Bell. South Carolina can be proud of its congressional delegation featuring Senator J. Strom Thurmond, President pro tempore of the U.S. Senate and chairman of the Senate Judiciary Committee, and Representative Floyd Spence, the Congressman from this district, who serves so ably on the House Armed Services Committee and House Ethics Committee. There is Jim Edwards, Secretary of Energy, my special assistant, Dr. George Youstra, who is from South Carolina, as well as Lee Atwater at the White House. There are distinguished South Carolinians at all levels of Government in our Nation's Capital.

Before I officially begin, I want to pay tribute tonight to three South Carolinians who did so much to encourage me in my education, and I am pleased they are here tonight: Mrs. Mae Clark of Cayce; Dr. Inez Eddings, who served as superintendent of the Richland County Schools, and Mrs. Myra Wyman, who taught Latin and an appreciation of Western civilization here in Columbia. They have served as an inspiration to many students.

The topic of my talk this evening, "Can We Have Excellence in Education?", may seem a surprising challenge to you, especially if you think we already have excellence in education in America.

If you are new in the field of education, you might have thought, "Can we? I thought we did!"

There is nothing like the exuberance of youth when there is a challenge to be met. We all benefit from the very presence of the indomitable spirit of youth, and new teachers, fresh out of college, make an important contribution to the faculties they join by the enthusiasm which they infuse into the school's atmosphere. I commend those of you who have answered the call to the teaching profession.

On the other hand, if you have been around awhile, and in addition to your academic degrees, you have added experience from the school of hard knocks, you are wise indeed, and you know that while we do have an outstanding educational system in our country, we have lost ground in the last decade in the area of quality of education.

We are putting children through the mills of learning, and they are exiting the twelfth grade with diplomas in hand, but are they ready for higher education or for apprenticeship in a vocation or to meet the challenges in a society growing more complex and requiring more knowledge of technology?

What has education done for them? Or, to put it another way—even more bluntly perhaps—are they really educated? That distinguished scholar of the American educational system, Dr. Russell Kirk, has put it this way: "A great many are schooled; very few are educated."

Some react to education like the old seaman once reacted to a lighthouse he used to stare at day after day as the fog rolled in from the sea: "The light shines; we ring the bell and blow the horn; but the fog comes in all the same!"

The purpose of education surely has always been to dispel the fog of ignorance and, where the fog persists, to give us a sense of direction as we make our way through it. Teachers have provided that guiding light on the long road to knowledge and wisdom.

One measure of enlightenment, or learning achievement, if you will, the SAT test score, has shown a steady decline nationwide for the past fifteen years.

Quantitatively, we have excelled. We have made education equally available to everyone. In 1980, enrollment in institutions of higher education reached an all-time high of 12.1 million. During this school year, expenditures for public and private education at all levels are expected to reach $198 billion, compared to outlays of $181 billion in 1980-1981. The high school graduating class of 1982 will be close to 3 million.

The estimates of the number of earned degrees to be conferred during the year 1981-1982 are: bachelor's degrees, 945,000; first-professional degrees, 72,000; master's degrees, 300,000; and doctorates, 33,000.

In spite of seemingly stupendous efforts being put into education, parents—and even students themselves—are less than satisfied with the results.

Public perception of education is that schools are failing in their responsibility to educate the youth of America.

A story that represents the widespread dissatisfaction with our schools comes to my mind. A young man complained to his mother, "I don't want to go to school. The courseware is dull. The teachers are always complaining. The students are wild and undisciplined. The cafeteria food is lousy. Give me two good reasons why I should go to school." and his mother replied, "one, you are 39 years old, and two, you are the principal."

The consumer is always explicit in his demands, and in the field of education, competency is a commodity that is in great demand. Across the length and breadth of this land, parents are demanding that schools produce students who are competent in basic skills. They know, without the benefit of a testing program, whether or not their children are competent in reading, writing, and math skills. Parents know that grades of A's and B's on a report card don't mean a thing unless they represent true achievement.

Parent's aren't buying social promotion and grade inflation any longer for their children. Promotions that do not represent true progress deceive both parents and students. A student who has been pushed along with his peers may find himself in over his head and unable to catch up when basic skills, which would have provided a foundation on which to build more profound subject matter, have not been mastered.

Inflating the value of a grade reduces competition in the classroom by making it easier to get a passing grade. A student quickly learns that he can get by without really exerting himself.

For a while, students, parents, and the school administration may be fooled by inflated report cards but, eventually, as in the story of the emperor's new clothes, people face the truth.

The moment of truth has arrived. The day of judgment is here. Parents are putting educators to the test. They are taking stock of the system and asking: What are your standards?

Parents are paying high taxes for education—the average cost for each student in public schools is $2,200 per year—and parents expect to get something for that money. Instead, they feel that they are being shortchanged. They are demanding a solution for today's crisis in the schools.

Can we blame them? We are spending more money than ever before on education, yet achievement scores have been declining with an alarming persistence. A high school diploma sometimes only affirms that a student has occupied space in school for a required number of years.

In an effort to prove their public school systems can work, most States have adopted minimum competency examinations. These require a bottom line competency or mastery of certain levels of achievement before a student can graduate.

The purpose of such tests is not to demonstrate fluency in a subject. Minimum competency means "just getting by." One problem with the concept of minimum competency testing is that when we expect little, we get little.

I think our students deserve better than that. We ought to give equal consideration to maximum competency—a program wherein a student might aspire to something higher than himself and thereby learn to prove his worth. Certainly, we should challenge students to strive for excellence rather than allowing this generation of budding minds to settle into a dormant state of mediocrity.

Perhaps I should have chosen as my topic this evening "The Need for Greater Expectations."

I believe children will rise to the level of expectancy. If we set high standards for students, they will meet them.

We need a reformation, a return to high standards in education. Secretary Bell has said our education system has become flabby. It has. We need to put some muscle in it.

In too many instances, students are not being given a firm foundation on which to build future careers. Instead, they are being offered a marshmallow curriculum.

In California we can see what a devastating effect superficial courses have had on student achievement. Recognized as the land of adventure and promise, California has been a trendsetter in education and technology as well as in many other areas. Yet, in the past ten years California's test scores have dropped from 52nd to 34th percentile in reading and from 42nd to 28th percentile in language for seniors.

Some critics are trying to blame proposition 13 which was passed in 1978 resulting in budget cuts that would not have had an impact on the schools until fiscal year 1979. Could there be another cause for test scores to decline steadily for the past decade in California?

A recent article in the Washington Post—headlined "California High Schools Wearing 'National Dunce Cap'"—reported an increase in the number of students taking "Lifestyle" instead of more traditional academic courses. I don't know if "Lifestyle"

courses include surfing and beachcombing, but that title certainly does not suggest academic rigor.

According to the article, seniors who were interviewed said students gravitate toward one of the new courses, "Human Physiology," as an easy way to meet the science requirement without wrestling with chemistry.[1]

In his book, "Decadence and Renewal in the Higher Learning," Dr. Russell Kirk, well-known author and lecturer, analyzes the decline in education standards that has characterized our schools for the last thirty years and notes the purposelessness and intellectual disorder among students that has accompanied that decline.

When our schools fail to educate the students, we are wasting our greatest resource—our mental capabilities. South Carolina's State motto should be our goal in education: "Prepared in Mind and Resources."

I think one of the problems has been that over the past decade there has been a heavy political emphasis at the Federal level on access and equity in education to the extent that overall quality has been neglected.

No one benefits from a lowering of standards—not even minority and disadvantaged groups.

I believe students themselves want to be challenged. They should be given the opportunity to enjoy the Sweet Taste of Accomplishment. They'll get hooked on it and come back for more.

That wise sage Aristotle observed that, "educated men are as much superior to uneducated men as the living are to the dead." To make that distinction true today, we need to quicken education with the spirit of purpose and high endeavor.

It is trite but true to say that things are not the way they used to be in the elementary and secondary classroom. Teachers do not rule the room as they once did. Combative situations between teachers and students, once unheard of—or at least rare—now occur with alarming frequency.

In some severe inner-city cases, principals should probably post signs over classroom doors—"Combat zone. Enter at your own risk."

We have so slackened the reins of discipline that no one is in control.

What has happened is that, while attempting to help minority groups, the underprivileged, and the handicapped and to rehabilitate those with psychological problems and even criminal backgrounds, our society has become so permissive that the very concept and essence of authority has been jeopardized.

The result has been that academic standards have slipped and so has the teacher's prestige.

I realize I am painting a dreary picture of the education landscape. Of course, there are schools that have outstanding administrators, teachers, and students.

Two weeks ago Herb Sang, superintendent of public schools in Jacksonville, Florida, addressed an education forum at the Horace Mann Learning Center in Washington, D.C., and described the successful turn-around that has taken place in the Jacksonville school system in the last five years. Disgraced with disaccreditation in 1964, the school system has risen to national prominence as one of the most outstanding schools systems in the country.

However, when statistics show a 15-year decline in nationwide test scores, a decline in public confidence in our schools, and an increase in violence in the classroom, we cannot take comfort in the patches of evidence of excellence that remain; we must address our failings and set about to improve our education system. Even though SAT scores seemed to stabilize last year, that is just not good enough after a decade of declining scores.

It is always easier to identify problems than it is to find solutions.

Nevertheless, I would like to enumerate for you what I believe to be the major problems facing us in education today.

Loss of prestige is a significant factor influencing the teacher job market. Once considered noble, the teaching profession has slipped from its lofty pedestal of honor to the footstool of society.

Low salaries and lack of advancement possibilities are deterring some of the better students from choosing teaching as a career. Instead, they are going into more lucrative fields, such as, law, medicine, business administration, engineering, or computer science. A side-effect of this movement has been that more parents are better educated than their children's teachers than what used to be and this has led to teachers being held in lower esteem by the community.

A decline in rewards of teaching has led to teachers leaving education and finding new careers.

Without the incentives of salary, prestige, and opportunities for upward mobility, the brighter college students are not choosing education for a career, and many of the better teachers are leaving the classroom to go into administrative positions or into other careers.

In short, we are losing quality students and teachers to other fields of endeavor. This is a serious problem confronting teacher colleges everywhere, including here at U.S.C.

Without quality teachers, it is difficult, if not impossible, to have quality learning. You may have heard the story of the businessman, the lawyer, and the teacher who met at a social club. When the waiter came to take their orders, the businessman said, "I'll have an I.W."

The waiter thought a moment and then said, "All right, that's an Irish whiskey." He then asked the lawyer what he would like to have and the lawyer responded, "I'll have an I.W.W."

The waiter paused a moment and then said, "Oh, yes, Italian white wine." He then turned to the teacher, who, by the way, was a math teacher.

"I'll have a fifteen," said the teacher.

The waiter looked puzzled and finally said, "Well, you have me there. What is a fifteen?"

The math teacher quickly replied, "Oh, that's Seagram's Seven with Seven-Up."

Of course, the joke overstates the situation; but the inference gives us pause for thought. The pursuit of excellence in education must begin with quality teaching. Teacher colleges should prepare students with a solid foundation in subject matter so that teachers going into the classrooms will be as knowledgeable in their field as are doctors, lawyers, businessmen, and other professional people.

Education theory does serve a purpose, but it is also practical and quite respectable to be able to add seven and seven and get fourteen.

Now I know you would like to ask the question: If a teacher does know his subject well, what is going to keep him from leaving the classroom for a higher paying position in industry?

One answer is that teaching historically has been more than just a career—it has been a calling, and I believe there will always be a certain number of very dedicated people who will be attracted to teaching for that reason.

This view is depicted at the end of the play, "A Man for All Seasons." You may remember the scene where Thomas More urges a young man to return to his university studies.

"Be a teacher, be a great teacher," More tells him.

"And if I am, who will know?"

Thomas More responds, "Yourself, your pupils, and God. Not a bad audience, sir, not a bad audience."

Such dedication deserves recompense; teachers have to eat and someone has to pay the rent. In addition to improving salaries, I think school boards are going to have to borrow a page from the businessman's handbook and offer further incentives to teachers.

Some school systems are doing just that. Education Week recently reported, for example, that Houston schools are paying bonuses to keep teachers. Better pay and recognition for top performance will help attract and keep good teachers.

Louisiana has recently launched a State teacher-improvement program, and many of the States, including South Carolina, have added a new requirement for teacher certification: passing a State teachers' exam.

A good teacher with a solid grasp of his subject commands the respect of his students much more so than the teacher who is ill-prepared. The truly learned teacher also brings prestige to his profession. And the good teacher will always be in demand.

Can we have excellence in education? Yes, but only if we have all of the ingredients that make up a good school. Herb Sang's formula, which is succeeding in Jacksonville, Florida, is: Discipline plus patriotism plus courtesy plus academics equals a successful school. Recognized nationally for his outstanding achievements, Herb Sang has been named by the National School Boards Association as one of the top 100 school administrators in North America.

According to a study conducted by the National Institute of Education, the five ingredients most necessary for an effective school are:

1. A principal who provides strong administrative leadership, especially in regard to instructional matters;

2. An orderly climate; learning can take place only when there is an atmosphere of peace and order;

3. Basic skills; the curriculum must offer academic courses packed with substance. In order to develop intellectually, the mind needs to be nourished on the meat of academics rather than the milk and marshmallow of easy-out, introductory courses that only skim the surface of knowledge.

4. Confident teachers; teachers must believe that all children can learn, and they must set high standards for them. Where expectancy is high, learning is high.

5. Measurement; schools need to monitor and assess the learning that is taking place. When performance is measured, performance improves.

Yes, I believe we can have excellence in education. We have lost nothing that cannot be regained by a renewal of our commitment to excellence in education.

[1] The Washington Post, Friday, October 16, 1981. p. A3.

The Reagan administration has given a high priority to stimulating excellence in education. Last August Secretary Bell established a National Commission on Excellence to examine American education and to highlight its strong points. The Commission has been charged with the following responsibilities:

It will review and synthesize data on the quality of learning in the Nation's schools, both public and private;

It will examine, compare, and contrast the curricula, standards, and expectations of the educational systems of several advanced countries with those of the United States;

It will study a representative sampling of university and college admission standards;

The Commission will hold hearings, receive testimony and expert advice on efforts that could and should be taken to foster high levels of academic excellence in the Nation's schools, colleges and universities; and, perhaps most important of all,

The Commission will review and describe those school programs that are recognized as preparing students who consistently attain higher than average scores on college entrance examinations.

Those are just some of the responsibilities of the Commission on Excellence, and, as I said, probably their most important task will be to find out and tell the rest of us how those schools who consistently turn out top students are doing it. We need to know the reasons for their success.

One means of reaching a greater level of excellence is through the application of technology to teaching methods. The integration of technology into the learning experience can provide a cohesive thread which will upgrade the level of achievement.

South Carolina has set an exemplary record in the use of television as a supplement to traditional educational materials. Pioneering in the late 50's in the use of that medium, South Carolina educators have been successful in using ETV to achieve educational objectives.

We are on the edge of exciting new frontiers leading into the fantastic world of technology, and we must keep pace with progress in that realm if education is to lead, rather than follow, civilization.

But, we cannot overlook, nor underestimate, the importance of the teacher-pupil relationship in the learning process. The human touch provides inspiration, encouragement, and understanding, which we all need in order to develop our mental and physical capabilities.

Education is a complex universe made up of many worlds, each moving in its own sphere. The interrelated components have a contribution to make toward our common goal of excellence.

Teacher colleges move in one orbit, while administrators and classroom teachers function in another world; they are out there working in the trenches, so to speak, where the real world exists. Our colleges and universities, guided by State policies, must prepare school personnel for that real world.

According to Secretary Bell, the most sweeping challenge in education has to do with teacher competence. He has said that the States must change their policies that relate to the education, certification, promotion, reward, and retention of teachers. At the present time, only 16 States require applicants for teacher certification to be tested for competency. The South Carolina Legislature has just passed a law requiring teachers to pass the National Teachers' exam for certification.

Surrounding the colleges and neighborhood schools are parents and the community. Those satellites play a key role in the success or failure of a school. A recent study by the Southern Regional Education Board concluded that caring parents and an involved community contribute immeasurably to the success of a school. In fact, students are more highly motivated when parents and the community are involved in school activities.

Can we have excellence in education? Yes, if we make that our expection and discipline ourselves toward that goal.

True education requires discipline, a fine sense of selection, discrimination between what is worth knowing and not worth knowing, an appreciation of the mastery of skills before frills.

Teachers are not social reformers charged with remaking society or finding solutions to social ills. Teachers are torch bearers; they enlighten the minds of their pupils with the wisdom of the ages, and that wisdom is made up of the components of concrete knowledge.

The primary purpose of education is to help each student master basic skills in language arts, mathematics, social studies, and science so that he is able to go on from there and develop his particular talent to its fullest potential. Anything less than that falls short of the mark of excellence.

Let us go forward toward the mark of our high calling and, together, achieve that degree of mastery in education deserving of the term excellence. Thank you for inviting me to share these thoughts with you. It has been my pleasure.●
